**G8 COMMUNICATIONS COMMENCES PILOT TRIAL WITH NASHVILLE POLICE FORCE  
TO ENABLE MOBILE ACCESS TO SURVEILLANCE CAMERAS**

---

**Highlights**

- **First Units of the Connected IO Machine Connect LT100 units delivered to the Nashville Police Force**
- **Pilot program initial success has led to more Machine Connect units being required for the pilot trial**
- **Potential for a successful pilot trial to lead to substantial orders and sector roll out of Machine Connect units to enable mobile access to surveillance cameras**

The Board of G8 Communications Limited (“G8”) is pleased to advise the Company has delivered its first units to the Nashville police force as part of a pilot program to deploy and retrofit existing surveillance cameras. In addition G8 has received an order from the Nashville police force to provide further units to continue the pilot trial.

The Company anticipates that successful pilot trials with the Nashville police force has the potential to lead to further orders in the thousands and to create a stepping stone to deployment of these units in other police departments in the United States and internationally, and other first responding groups.

This represents an important step towards G8 capturing new markets outside those in which the Company already sells units. G8 considers this an important part of the

Company's marketing strategy and has formed relationships with US distribution groups to law enforcement agencies to expedite the marketing of its products.

### **About G8 Communications**

G8 Communications is US based wireless technology innovator and manufacturer operating in the multi billion dollar Internet of Things ("IoT") space. G8 specialises in machine to machine ("M2M") connectivity, providing hardware solutions for some of the world's largest companies including Coca Cola and Verizon. G8's software solutions also include a customised cloud management interface and variety of support services. Cisco predicts there will be 50 billion connected devices by 2020.
