## **dorsaVi receives \$350,000 Victoria Government Future Industries Manufacturing Grant; plans to improve local manufacturing facilities fast-tracked**

**Melbourne, Australia, 29 September 2016;** dorsaVi (ASX: DVL) is pleased to announce they have received a Victoria Government Future Industries Manufacturing grant of \$350,000. The Future Industries Manufacturing Program offers funding to Victorian-based companies to implement new manufacturing technologies and processes to facilitate growth.

dorsaVi Chief Executive Officer Andrew Ronchi said the grant would be used to help fund the new manufacturing facilities, equipment and staff in its Jolimont premises that are required to bring the next generation of its wearable medical-grade sensors to market. The grant will allow dorsaVi to complete the facility sooner than originally anticipated. This initiative will greatly assist the scale and speed of manufacturing of the world-leading wearables.

The new facility will incorporate cutting-edge technologies which will reduce manufacturing timelines, automate manual processes, improve stock control and product traceability, and reduce overall manufacturing costs. This funding ultimately ensures that dorsaVi is able to significantly reduce the cost of goods whilst maintaining the high level of quality required for its FDA cleared medical device.

**About dorsaVi**

dorsaVi (ASX:DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety, and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove is transforming the management of patients by providing objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia and the United Kingdom and is now available in the United States following FDA 510K clearance.

- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs, Cricket Australia, and the Australian Institute of Sport (AIS) in Australia. In the UK, Barclays Premier League (EPL), U.S. based sports clubs including the National Basketball Association (NBA) and the National Football League (NFL), and various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. ViSafe has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), and BHP Billiton.
