HIGHLIGHTS

Merlin Mine –Operations

- Successfully recommenced initial phase of operations
- Australia's 5th largest diamond 35.5 carats recovered
- Discovery of rare blue diamond
- Successful mining campaign delivered circa 70,000 tonnes of ore for wet season treatment
- \$44.6m royalty credits preserved
- Experienced diamond team appointed
- Initial processing phase up-scaled with the introduction of scrubber

Merlin Mine Exploration

- No exploration conducted during the quarter
- Previous work identified seven drill ready targets and seventy four new exploration target areas which remain to be investigated

Merlin Diamonds Limited

ABN 86 009 153 119

MERLIN DIAMOND MINE PROJECT

Some highlights of the mining operations at the Merlin diamond mine since 1 October 2016 include:

Merlin Diamond Mine Operations

Successfully recommenced initial phase of operations

The processing plant was rapidly refurbished and production commenced with steady ramping up of the production process

Australia's 5th largest diamond 35.5 carats recovered

Merlin previously produced Australia's largest diamond at 104 carats. This 35.3 carat diamond reflects merlin's history of recovering large diamonds.

Discovery of rare blue diamond

The recovery of the blue diamond demonstrates the potential for valuable coloured diamonds at Merlin.

Successful mining campaign delivered circa 70,000 tonnes of ore for wet season treatment

Northern Territory based contractor successfully commenced mining in Kaye pit

\$44.6m royalty credits preserved

Through the successful commencing of operations, Merlin satisfied the requirement of the NT department of Treasury and Finance

Experienced diamond team appointed

Merlin has assembled an exceptionally experienced diamond mining executive team. This team also includes high level experienced security surrounding the finished product of rough diamonds.

Initial processing phase up-scaled with the introduction of scrubber

The commissioning of the scrubber in January 2017 significantly improves the preparation of the ore and throughput

For personal use only

Rough Diamonds before cleaning and polishing

Merlin is known for its high quality white diamonds, and Australia's largest diamond. Note that clarity and whiteness of diamonds are not visible on this photo. Professional photos will be released in the future. Photo released due to the relevance of the discovery of the large diamond.

Recently commissioned scrubber

For personal use only

Merlin Diamonds Limited

ABN 86 009 153 119

During July and August 2016, project planning was undertaken to recommence operations in 2016 as soon as possible after approval of the Mining Management Plan (MMP) by the Department of Minerals and Energy (DME).

Following a detailed review of the existing 60 tph plant it was decided to simplify the plant flowsheet as well as introduce contract crushing and screening ahead of the existing DMS plant. The impact of this includes:

- Significant reduction of the capital requirement and timeline to get the operation into production
- Allowing existing oversize stockpiles to be treated for several months
- Allowing for treating +40mm ore from the open pits, which previously would have been added to the oversize stockpiles
- Reducing the risk of crushing large diamonds, which have been proven to exist at the Merlin diamond mine
- Positioning the Merlin diamond mine to scale up production of the process plant

A modular final recovery unit incorporating X ray Flowsort recovery units purchased from Ellendale was transported to the Merlin diamond mine and installed and commissioned in October 2016. This together with the planned installation of a grease table for treating the Flowsort tailings is a significant improvement over the previous DMS concentrate hand-sorting methodology.

The MMP, which incorporates the environmental management plan and commitments for the project, was approved by the DME on 9 September 2016. Work immediately commenced to recommission the plant and prepare for conventional mining in the Kaye pit.

The mobile plant for the contract crushing and screening was mobilised, commissioned and began processing stockpiled material on 1 October 2016. The water from the Kaye open pit was transferred into the Gareth pit in preparation for mining of Kaye.

Following a review of the mining methodology and mine planning, initial mining in 2016/17 year will be by conventional open pit mining from Kaye and Ector. The opportunity to mine ore from the other kimberlite pipes, in particular the small but high grade Ywain and Gwain pipes, by dry clamshell mining will be evaluated over the wet season.

EXPLORATION OVERVIEW

Merlin Mining Lease (ML1154) and near Mine

No exploration work was undertaken this quarter.

Summary of Previous Work

Review of all available historical data was completed in early 2014 with the identification of seventy-four new target areas that require further investigation. Seven of these targets are ready for immediate drilling (Figure 1). During 2013 the Company's field personnel completed an extensive heavy mineral sampling program on ML1154 and EL26944 targeting areas where sampling density was considered insufficient. Kimberlitic chromites have been recovered from a number of these samples in an area where no known kimberlites occur (Figure 1). This area has been poorly explored in the past relative to other parts of the mining lease and these results are highly encouraging. High resolution ground electromagnetic surveying will be undertaken to define drilling targets.

Borrooloola Alluvial Diamond Project

The Company has decided to focus resources on development of the primary mining project at the Merlin Diamond Mine and high priority exploration targets within and immediately surrounding the Mine Lease and will therefore reduce its current exploration portfolio. The Borrooloola Project was reviewed during the quarter and was assessed as being a non-core exploration asset and therefore this project, consisting of EL24512 and EL24082, has been relinquished.

Arnhem Land Exploration

The Company's Arnhem Land project consists of 1 granted exploration licence (EL26206). Numerous exploration licences are currently at the application stage and are held by Merlin Diamonds either outright or under joint venture agreements with other parties.

The licences are located on the North Australian Craton (**NAC**), which is a geologically stable block favourable for kimberlite emplacement. The NAC hosts the Merlin kimberlite field, the Abner Range kimberlite and breccia pipes, and the Roper River and Timber Creek kimberlites.

The majority of the licence applications fall on land controlled by the Arnhem Land Aboriginal Land Trust. Merlin has farmed out the non-diamond rights for the majority of the licence applications to Top End Minerals Limited (Top End). Top End is responsible for negotiations with the Northern Land Council and progress of the licences to grant and to obtain early ground access, Top End has submitted Preliminary Exploration Permit applications to the Northern Land Council, which allow activities such as geological mapping, surface sampling and ground geophysics. These activities will enable Top End to make an early assessment of the prospectivity of some applications and whether to prioritise these for negotiations with the Northern Land Council.

WESTERN AUSTRALIAN PROJECTS

Kimberley Diamond Projects

The Company holds three mining licences (M80/492, M80/26 and M80/532) in the Kimberley region of Western Australia. The licences host a number of diamondiferous kimberlite pipes, which the Company has previously evaluated to identify a JORC Compliant Inferred Resource of 869,000 carats. The Company continues to hold the mining licences as they retain commercial potential. The information in the table below was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

	Inferred Infill Resource	Inferred Kimberlite Resource	Total Inferred Resource	Grade (cpht)	Carats (Mcts)
Kimberley Projects	tonnes	tonnes	tonnes		
Ashmore 1	305,000	868,000	1,173,000	3.67	43,000
Ashmore 2	262,000	771,000	1,033,000	6.00	62,000
Ashmore 3	108,000	243,000	351,000	3.42	12,000
Ashmore 4	58,000	100,000	158,000	13.29	21,000
Seppelt 1	214,000	1,101,000	1,315,000	25.9	341,000
Seppelt 2	27,000	146,000	173,000	225	390,000
TOTAL	975,000	3,232,000	4,207,000	21	869,000

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
