

PROJECT ICEWINE

NORTH SLOPE OF ALASKA

PROJECT ICEWINE FEBRUARY 2017 ICEWINE#2 UPDATE

Doyon Arctic Fox
DOYON DRILLING, INC.

For personal use only

The information contained in these slides has been prepared by 88 Energy Limited (the “Company”). The information contained in these slides, the presentation made to you verbally and any other information provided to you (in writing or otherwise) in connection with the Company and its business (the “Presentation Materials”) is subject to updating, completion, revision, verification and amendment without notice which may result in material changes. The Company, in its sole discretion, reserves the right to amend or supplement these Presentation Materials at any time.

The Presentation Materials have not been approved by the London Stock Exchange plc or by any authority which could be a competent authority for the purposes of the Prospectus Directive (Directive 2003/71/EC). The Presentation Materials are for information purposes only and do not constitute or form part of any offer for sale or solicitation of any offer to buy or subscribe for any securities nor shall they nor any part of them form the basis of or be relied on in connection with, or act as any inducement to enter into, any contract, transaction or commitment whatsoever. The Presentation Materials contain only a synopsis of more detailed information published in relation to the matters described therein and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency of such information or on the completeness, accuracy or fairness of such information and to do so could potentially expose you to a significant risk of losing all of the property invested by you or the incurring by you of additional liability.

No undertaking, representation, warranty or other assurance, express or implied, is made or given by or on behalf of the Company, the Company’s nominated adviser and UK broker, Cenkos Securities Plc (“Company Adviser”), or any of their respective affiliates or any of such persons’ directors, officers, partners, employees, agents or advisers or any other person as to the adequacy, accuracy, completeness or reasonableness of the information or opinions contained in the Presentation Materials and no responsibility or liability is accepted by any of them for any such information or opinions or for any errors, omissions, mis-statements, negligence or otherwise for any other communication written or otherwise.

No Company Adviser has approved (for the purposes of section 21 of the Financial Services and Markets Act 2000 (“FSMA”)) the contents of, or any part of, the Presentation Materials. The Presentation Materials are only being issued to and directed at and may only be received by persons who: (a) in the UK: (i) have professional experience in matters relating to investments and who fall within the exemptions contained in Articles 19 or 49 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (investment professionals and high net worth companies, unincorporated associations etc.) and (ii) are a “qualified investor” within the meaning of Section 86(7) of the FSMA; or (b) are otherwise permitted by the laws of the jurisdiction in which they are resident to receive them. It is a condition of your receiving the Presentation Materials that you fall within one of the categories of persons described above and you warrant to the Company and each Company Adviser that: (a) you fall within one of the categories of persons described above; (b) you have read, agree to and will comply with the terms of this disclaimer; and (c) you will conduct your own analyses or other verification of the information set out in the Presentation Materials and will bear the responsibility for all or any costs incurred in doing so. Persons who do not fall within one of the categories of persons described above should not rely on the Presentation Materials nor take any action upon them, but should return them immediately to the Company.

It is a condition of your receiving these Presentation Materials that you fall within, and you warrant and undertake to the Company that you are either an “accredited investor” (as defined in Rule 501 of the U.S. Securities Act of 1933, as amended (the “Securities Act”)) or you are located outside of the United States (as defined in Regulation S promulgated under the Securities Act).

The distribution of the Presentation Materials in certain jurisdictions may be restricted by law and therefore persons into whose possession the Presentation Materials come should inform themselves about and observe such restrictions. In particular, neither the Presentation Materials nor any copy of them nor any information contained in them may be taken or transmitted into the United States, Canada, Japan, or the Republic of South Africa, except in compliance with applicable securities laws.

Disclaimer (cont.)

For personal use only

Any failure to comply with this restriction may constitute a violation of securities laws. No action has been or will be taken by the Company that would permit a public offer of its securities in any jurisdiction in which action for that purpose is required. No offers of securities or distribution of the Presentation Materials may be made in or from any jurisdiction except in circumstances which will not impose any obligation on the Company or any of its advisers to take action.

The Presentation Materials include certain forward-looking statements, estimates and forecasts with respect to the anticipated future performance of the Company which reflect the Company's expectations regarding future plans and intentions, growth, results of operations, performance and business prospects and opportunities. Such forward-looking statements, estimates and forecasts reflect various assumptions made by the management of the Company and their current beliefs, which may or may not prove to be correct. A number of factors could cause actual results to differ materially from the potential results discussed in such forward-looking statements, estimates and forecasts including, changes in general economic and market conditions, changes in the regulatory environment, business and operational risks and other risk factors. Although such forward-looking statements, estimates and forecasts are based upon what the management of the Company believe to be reasonable assumptions, no guarantee can be given that actual results will be consistent with such forward-looking statements, estimates and forecasts. Prospective investors should not place undue reliance on such forward-looking statements, estimates and forecasts. Such forward-looking statements, estimates and forecasts are made as of the date of these Presentation Materials and the Company does not assume any obligation to update or revise them to reflect new information, events or circumstances. Past performance is not a guide to future performance.

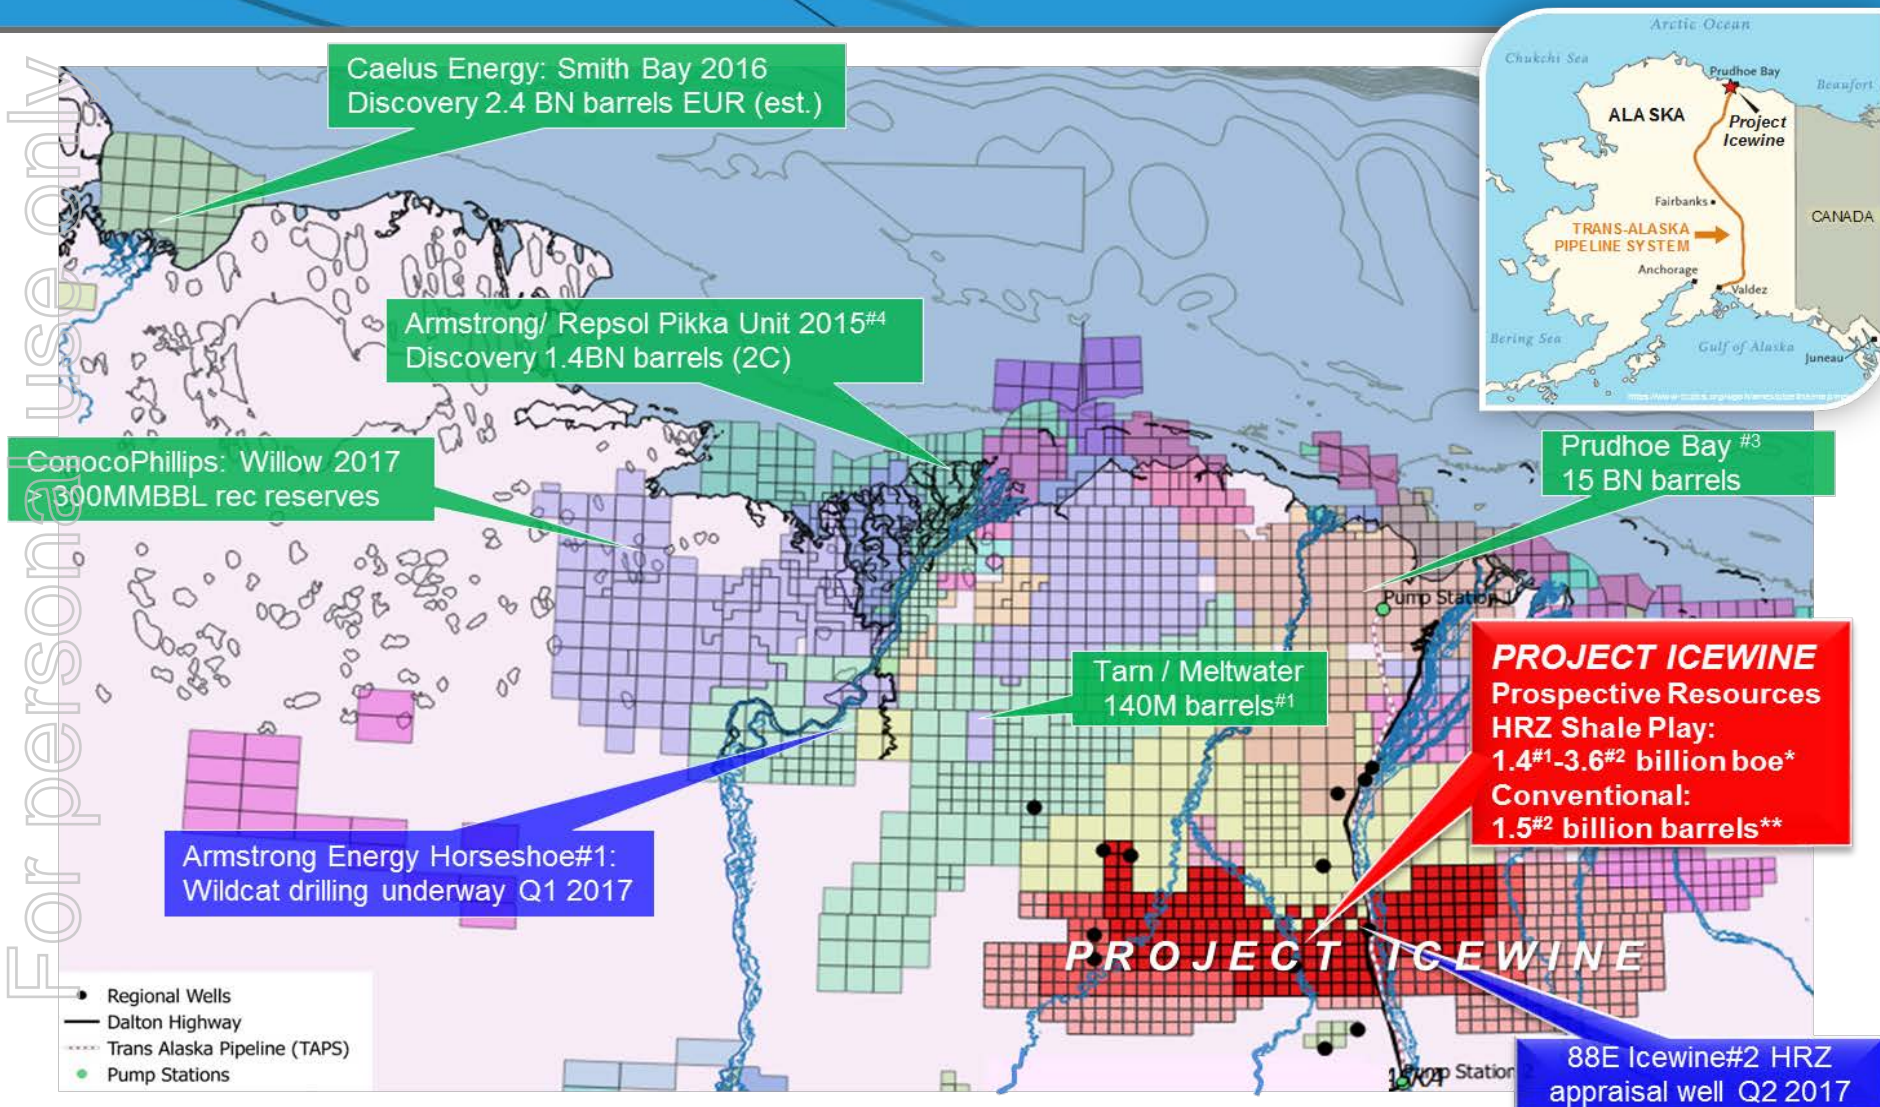

The Presentation Materials do not purport to contain all the information that a prospective investor may require. Prospective investors should conduct their own independent investigation and analysis of the Company and the information contained in these Presentation Materials and are advised to seek their own professional advice on the legal, financial and taxation consequences of making an investment in the Company. The contents of these Presentation Materials are not to be construed as legal, business, investment or tax advice.

Cenkos Securities Plc which is authorised and regulated in the United Kingdom by the Financial Conduct Authority, is acting for the Company and no-one else in connection with the contents of this document and will not be responsible to anyone other than the Company for providing the protections afforded to the clients of Cenkos Securities Plc or for affording advice in relation to the contents of this document or any matters referred to herein. Nothing in this paragraph shall serve to exclude or limit any responsibilities which Cenkos Securities Plc may have under FSMA or the regulatory regime established thereunder. Cenkos Securities Plc is not making any representation or warranty, express or implied, as to the contents of this document.

Pursuant to the requirements of the ASX Listing Rules Chapter 5 and the AIM Rules for Companies, the technical information and resource reporting contained in this presentation are based on, and fairly represent, information and supporting documentation prepared by, or under the supervision of, Mr Brent Villemarette, who is a Non Executive Director of the Company. It has been produced for the Company, and at its request, for adoption by the Directors. Mr Villemarette has more than 30 years experience in the petroleum industry and is a qualified Reservoir Engineer who has sufficient experience that is relevant to the style and nature of the oil prospects under consideration and to the activities discussed in this document. He has consented to the inclusion of the petroleum prospective resource estimates prepared by DeGolyer & MacNaughton (as of 31 December 2015) and supporting information being included in this announcement in the form and context in which they are presented. His academic qualifications and industry memberships appear on the Company's website and both comply with the criteria for "Competence" under clauses 18-21 of the Valmin Code 2005. Terminology and standards adopted by the Society of Petroleum Engineers "Petroleum Resources Management System" have been applied in producing this document.

The presentation materials are being furnished solely in reliance on applicable exemptions from the registration requirements under the Securities Act. The securities of the Company have not and will not be registered under the Securities Act or any State Securities laws, and may not be offered or sold within the United States unless an exemption from the registration requirements of the Securities Act is available. Accordingly, any offer or sale of securities in the Company will only be offered or sold (i) within the United States only to institutional accredited investors (as defined in Rule 501 (a)(1),(2),(3) or (7) of the Securities Act) in private placement transactions not involving a public offering and (ii) outside the United States in offshore transactions in accordance with Regulation S. Securities of the Company may not be resold unless the offer and sale is registered under the Securities Act or an exemption from registration is available. Neither the U.S. Securities and Exchange Commission nor any State or Foreign Regulatory Authority has approved the securities of the Company to be offered or the terms of such offering or passed upon the accuracy or adequacy of the Presentation Materials. Any representation to the contrary is a criminal offence.

Project Icewine: World Class Location, World Class Prize

* Gross mean prospective recoverable resource, refer ASX/AIM announcement 6/04/16 (271,119 acres)

** Gross mean prospective recoverable resource, refer ASX/AIM announcement 13/01/17

#1 Independent Est., #2 Internal Est., #3 Source USGS 2005, #4 Armstrong 2016

Paul M. Basinski, Founder & CEO	
Michael R. McFarlane, President	
Closely Held Texas LLC	
Special Purpose Vehicle for Project Icewine	
Project Icewine Working Interest 22.5%	

Activity Planned

- Spud Icewine #2 vertical well – April 2017
- Stimulate and Production Test HRZ / HUE – mid 2017
- Progress maturation of drilling candidate from conventional leads – Q3 2017

Large, Strategic Acreage Position – Vast Majority of HRZ Play now Captured

- Joint Venture now controls rights to 690,000 gross acres (~400,000 acres net to 88E*, Operator)
- Strategically located on infrastructure – all year access road / pipeline

Primary Target: HRZ Liquids Rich Resource Play – 1.0-2.6 billion barrels liquids**

- De-risked by core/log analysis from Icewine#1 corehole (2015/2016)
- Modelled breakeven oil price for success case <US\$40 per barrel

Drilling of Icewine#2 Appraisal Well Imminent – Production Test of HRZ Play

- Rig contracted – Arctic Fox is a premier North Slope rig that will commence drilling Icewine#2 post completion of the Horseshoe#1 well (in progress)
- Estimated mobilization March / April 2017, with spud to follow shortly thereafter
- Flow results expected mid year, post stimulation

Large Conventional Leads Identified – 1.5 billion barrels**

- Based on 750km of modern 2D seismic (2015/2016)
- Maturation of leads into potential drilling candidates underway

* ~400,000 acres net to 88E assuming all rights taken up – 210,000 net acres currently under award

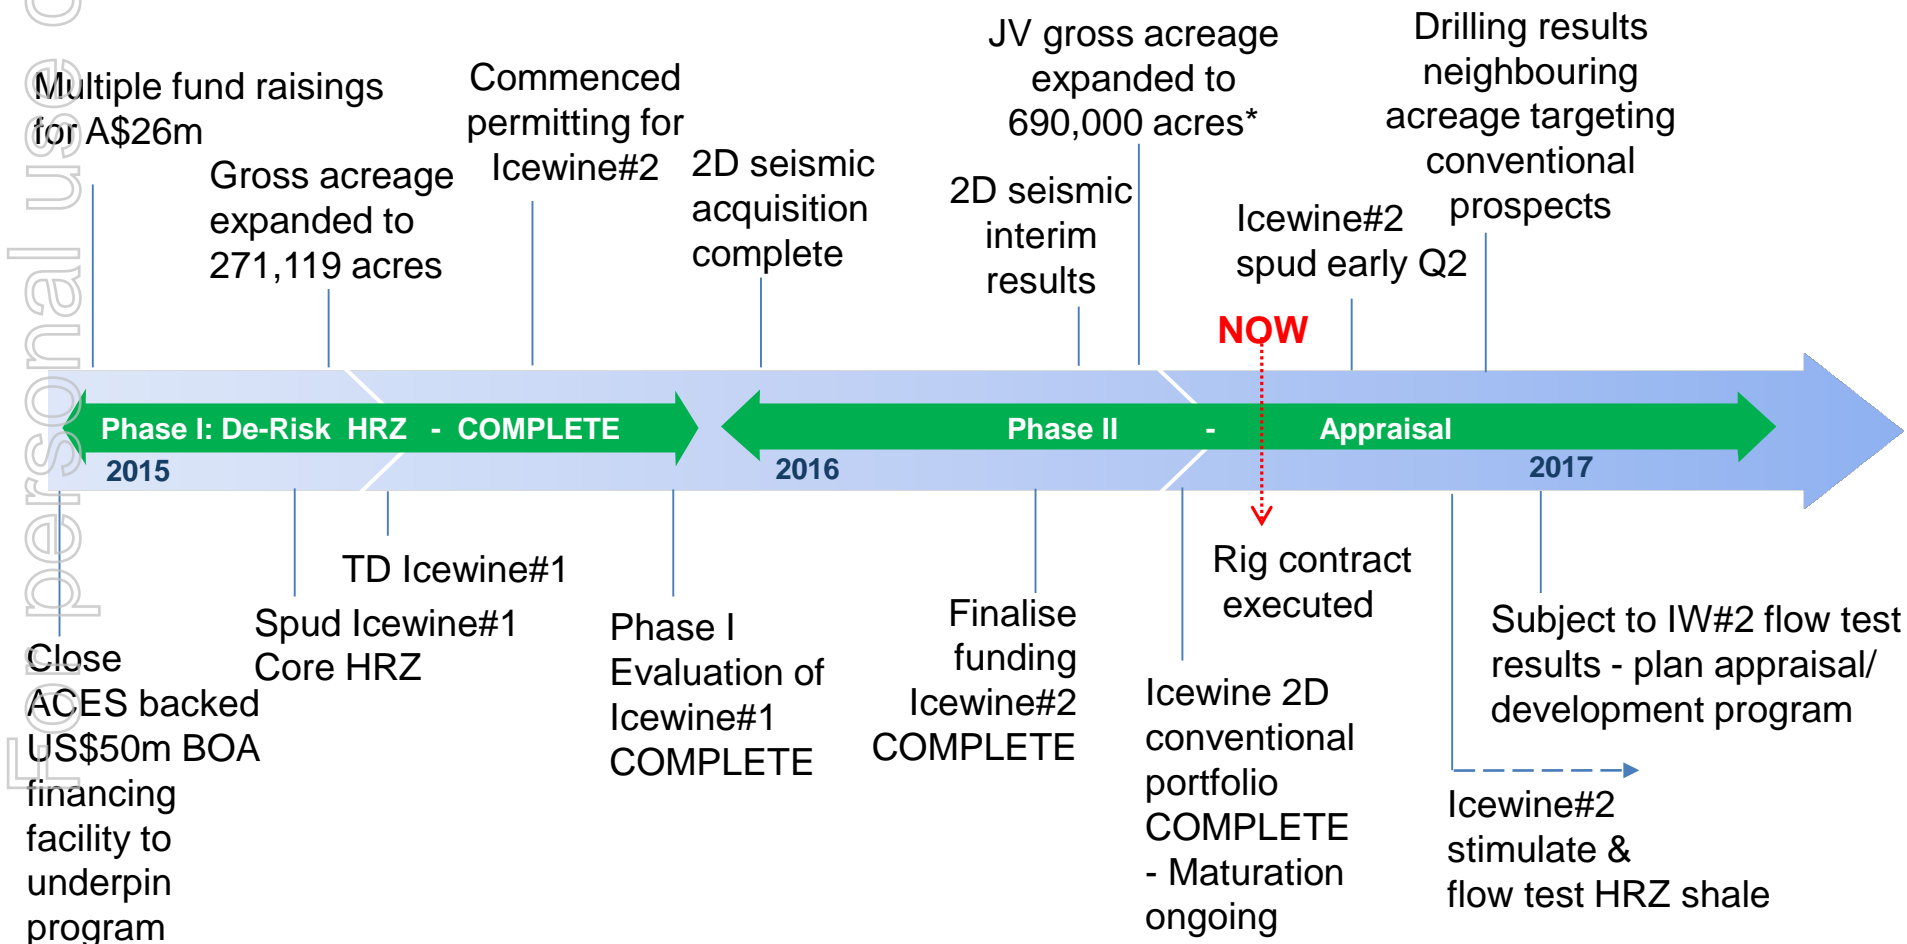

** Gross Mean Prospective Recoverable Resource based on 271,000 acres (see Appendix for full details)

Project Icewine Timeline

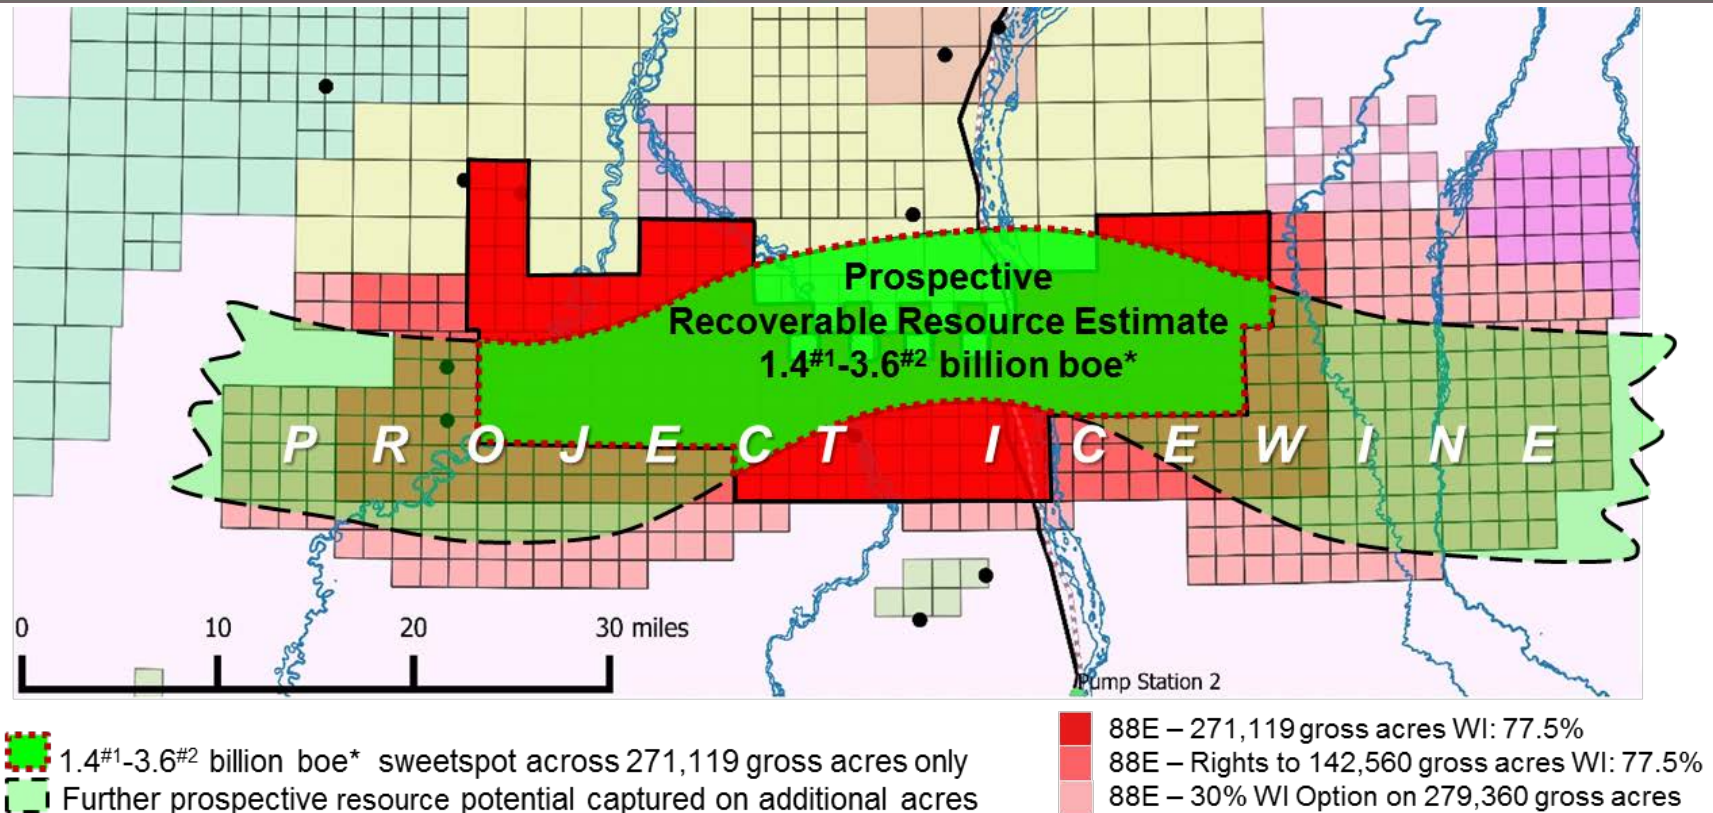

Phase I De-Risking Complete Successful Evaluation of HRZ

Phase II Appraisal Icewine#2 - Stimulate & Flow Test Q2-Q3 2017

* ~400,000 acres net to 88e assuming all rights taken up

HRZ Unconventional: Volatile Oil Sweetspot Mapping

- Increased confidence of HRZ sweetspot based on thermal maturity, porosity, permeability, pressure and resource concentration
 - Drove decision to lease substantial additional acres in November 2016
- Proof of HRZ producibility to be determined by Icewine#2
- JV now has rights to largest contiguous landholding on the world class North Slope of Alaska

* Gross mean prospective recoverable resource, refer ASX/AIM announcement 6/04/16 (271,119 acres)
Ref: Estimates #1 Independent, #2 Internal

HRZ Unconventional: Phase II

Icewine#2 Vertical Well, Stimulate & Flow Test

Icewine#2 Overview – Spud Early Q2 2017

- Single stage, multi-perforation cluster stimulation and production test over 160' interval (HRZ and basal Hue Shale)
 - Estimated 30-45 days to drill, log and conduct micro stimulation
 - Main stimulation will then be refined over 1-2 week period before execution
 - Flow test results expected mid 2017
- All major permits secured as planned
 - Permit To Drill being finalised & on track
- Well cost estimated at US\$17.7m* (net US\$14m)
 - 88E funded from current cash position (US\$20m) for Icewine#2
- Franklin Bluffs Pad location – year round access via Dalton Highway

* includes 15% contingency, fully completed with production test

HRZ Unconventional: Well Performance Analogues

- Typical performance for vertical phase of shale exploration / appraisal => 80-150bopd initial production
- Historic uplift average 10-30x as play evolves from vertical to horizontal development
- Project Icewine JV aim is to leverage the learning curve to accelerate optimisation of HRZ productivity

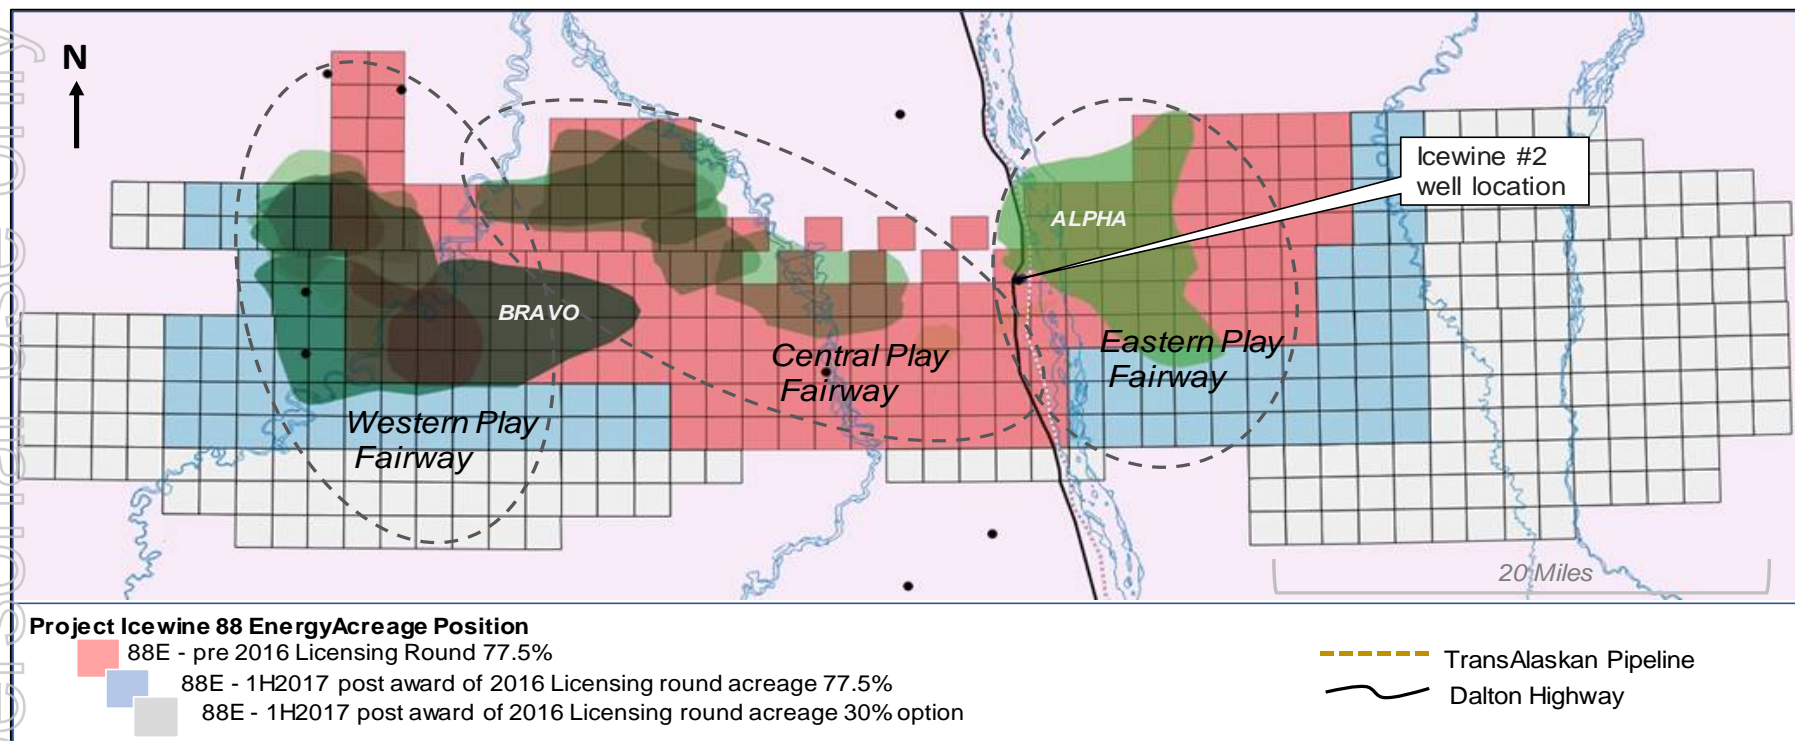

Source: EIA Drilling Productivity Report 17 Jan 2017

NOTE:

Bakken, Permian and Haynesville already partway through evolution from vertical to horizontal wells by 2007 so uplift multiple from inception of play to current day is understated

Project Icewine Conventional Prospectivity Portfolio

- Conventional Prospective Resource Potential (mean unrisked) :
 - 1.47 BN barrels gross; 1.14 BN net to 88E *
- Leads predominantly stratigraphic, slope apron, turbidites & basin floor fan systems
- Prospective areas high graded across acreage:
 - Eastern Play Fairway - advantaged by close proximity to transportation corridor
 - Western & Central Play Fairways - opportunity to test stacked multiple objectives with one well
- Central North Slope ranked #1 in the US for remaining conventional oil potential (majority in same sequence targeted by 88E)

* Refer ASX/ AIM announcement 13/01/2017 11

Project Icewine Conventional Portfolio: Prospective Oil Resources- Unrisked Recoverable

PROJECT ICEWINE CONVENTIONAL LEAD SUMMARY Prospective Oil Resources - Unrisked Recoverable - MMBO

Lead	Low	Best	High	Gross Mean	Net Mean to 88E (WI: 77.5%)
<i>Eastern Play Fairway</i>					
Alpha	19	71	263	118	91
Romeo	2.1	3.4	5.3	3.6	2.8
Sierra	1.1	2.0	3.4	2.2	1.7
<i>Central Play Fairway</i>					
Golf	60	115	210	128	99
Hotel	10	18	31	19.8	15.3
India	61	116	212	129	100
Juliet	52	99	181	110	85
<i>Western Play Fairway</i>					
Bravo	129	245	449	273	212
Oscar	14.5	26.6	47	29.2	22.6
Papa	7.6	13.9	24.6	15.3	11.9
Charlie*	147	257	432	277	215
Delta*	74.7	131	219	141	109
Foxtrot*	40.9	71.5	120	77	60
Mike*	50	87.5	147	94	73
November*	24.8	45.6	80.4	50.1	39
FINAL TOTAL				1,468	1,137

- Leads predominantly stratigraphic
- Alpha and Bravo Leads prominent given mapped seismic geometries and relief
- Stacked leads offer opportunity to test multiple objectives

Prospective Resources classified in accordance with SPE-PRMS as at 13th January 2017 using probabilistic and deterministic methods on an unrisked basis. Leads identified from interpretation of modern 2D seismic acquired in 2015/2016 across Project Icewine, which comprises 271,119** gross acres on the Central North Slope of Alaska. 88 Energy is Operator of record at Project Icewine (through its wholly owned subsidiary Accumulate Energy Alaska, Inc) with a 77.5% working interest.

Cautionary Statement: The estimated quantities of petroleum that may be potentially recovered by the application of a future development project relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration, appraisal and evaluation are required to determine the existence of a significant quantity of potentially movable hydrocarbons.

* Conceptual leads extend into previously open acreage to the west of Project Icewine, which was successfully bid on by 88 Energy in the recent State of Alaska Licensing round, December 2016. Currently delineated on Icewine 2D seismic data and extending onto sparse vintage 2D. Further technical work is required to define the full potential of the Western Play Fairway conceptual leads.

** An additional ~420,000 gross acres (~190,000 net to 88E) is subject to formal award, expected in 2017

Board and Key Management

Mr David Wall – Managing Director

4 years experience in strategy and planning at Woodside Petroleum. 6 years experience in financial services industry as small cap oil and gas equities analyst, specialising in exploration companies.

B. Comm in Management and Finance from University of Western Australia.

Mr Michael Evans – Non-Executive Chairman

Extensive executive and Board level experience with publicly listed companies in the natural resources sector spanning 30 years.

Founding Executive Chairman of ASX oil and gas explorer FAR Limited and was responsible for FAR's entire West African portfolio where significant oil discoveries were made in 2014.

B Bus Curtin University, Chartered Accountant, Chartered Secretary, Governance Institute Australia

Erik Opstad – General Manager Alaska Operations

37 years of energy project management and technical experience including with BP in Alaska, conducting both offshore and onshore operations. Mr. Opstad joined the 88 Energy team from Savant Alaska where as a principal in the company he served as Drilling & Wells Manager and General Manager driving geoscience and engineering redevelopment activities at the Badami oilfield on the North Slope of Alaska. *Erik holds a BSc and MSc in Geology from the University of Iowa.*

Dr Stephen Staley – Non-Executive Director

30 years of energy management and technical experience including with Conoco and BP. Dr Staley was founding Managing Director of upstream AIM start-ups Fastnet Oil & Gas plc and Independent Resources plc and a Non-executive Director of Cove Energy plc. *BSc (Hons.) in Geophysics from Edinburgh University, PhD in Petroleum Geology from Sheffield University and MBA from Warwick University.*

Mr Brent Villemarette – Non-Executive Director

Over 35 years experience in the global oil and gas industry, primarily with Apache Corporation in the US and in Australia. Also served as Chief Operating Officer for Transerv Energy, an ASX listed oil and gas company. *BSc in Petroleum Engineering from Louisiana State University. Reservoir Engineer.*

Ms Elizabeth Pattillo – General Manager Exploration

Over 20 years experience in the upstream petroleum industry both with major international oil and gas companies, (BHP Petroleum Pty Ltd, Shell UK Exploration & Production), and junior explorers. *BSc (Hons) in Geology, Monash University Australia; Post Graduate Diploma in Education University of Western Australia*

Mr Ashley Gilbert – Chief Financial Officer

Over 20 years' experience in commerce and public practice. Prior roles include CFO of Neptune Marine Services and Nido Petroleum, as well as positions within Woodside Petroleum and GlaxoSmithKline plc. in London. *B.Comm Curtin University, Chartered Accountant, Governance Institute Australia, Institute of Company Directors GAICD*

APPENDIX

For personal use only

HRZ Unconventional – What Makes a Top Tier Liquids-Rich Resource Play?

FLOW RATE IS KEY DRIVER—AHEAD OF OIL PRICE AND COST

WHAT CHARACTERISTICS DETERMINE FLOW RATE? HOW DOES ICEWINE MEASURE UP TODAY?

VISCOSITY

Measure of how easily hydrocarbon can travel through the reservoir

Project Icewine: In thermal maturity sweetspot where liquid content is high but viscosity remains low (volatile oil)

PRESSURE

Reservoir energy that improves well performance

Project Icewine: Estimated 40% higher than the hydrostatic gradient (ie overpressured)

PERMEABILITY

State of the reservoir which allows hydrocarbons to flow through it

Project Icewine: Excellent permeability by comparison to other liquids-rich resource plays

HYDROCARBON PORE VOLUME

How much hydrocarbon is in place to be potentially accessed by a well bore

Project Icewine: Good porosity, thickness and hydrocarbon saturation

HRZ Unconventional: PHASE I Formation Evaluation - COMPLETE

Metric (Unit)	Result	Comment / Comparison
Thermal Maturity	Volatile Oil	High rate, recovery, & performance
GRI Matrix Permeability	> Eagle Ford	Very good for volatile oil resource plays
Gross / Net Pay	197' / 186'	Tier 1 net to gross ratio of 94%
Effective Porosity	12.6%+	30%+ higher than Eagle Ford
TOC	3.7%+ (wt basis)	In line with highly commercial resource plays
Clay Content	38%	Analogous to Marcellus / Haynesville
Hydrocarbon Saturation	75%	Consistent with world class resource plays
Bottom Seal	Effective	Confines overpressure needed for volatile oil phase
Pore Pressure Gradient	40% above normal	Essential for commercial production

HRZ Unconventional: Prospective Resource Assessment

2.6 Billion Barrels (Liquids Only) Gross Mean Prospective Recoverable Resource from HRZ

	P90	P50	P10	Mean	Pc [#]
Gross Liquids Resource (mmbbl)	1,594	2,471	3,830	2,602	50%
Net Attributable to 88 Energy (mmbbl)	1,236	1,916	2,970	2,017	50%

[#]Estimated Probability of Commercial Success – Company Estimate

- Independent assessment methodology largely consistent with 88 Energy estimates
- 88 Energy internal evaluation assumes higher percentage of acreage to be prospective
- 90% of liquids estimated in volatile oil window in Internal Assessment

Mean Comparison (gross)	D&M*	88E Internal**
Hydrocarbon In-Place, mmboe	10,308	21,093
Prospective Acreage for Development	114,056	176,656
Recoverable Resource, mmboe	1,359	3,607
% Liquids	72.5	72.1
RF, %	13.2	17.1
Hydrocarbon Liquid Resource, mmbbl	985	2,602

* DeGolyer & MacNaughton 2016:

Prospective unrisked mean recoverable, calculated using probabilistic methods, 100% basis, gas converted to oil equivalent on a 6:1 ratio

**Prospective unrisked mean recoverable, calculated using deterministic and probabilistic methods, 100% basis, gas converted to oil equivalent on a 6:1 ratio

Cautionary Statement: The estimated quantities of petroleum that may be potentially recovered by the application of a future development project relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration, appraisal and evaluation are required to determine the existence of a significant quantity of potentially movable hydrocarbons. Refer ASX announcement on 6/4/16

HRZ Unconventional: Internal Project Economics#

Cost Assumption based on Low-High cost scenarios

Resource Case based on well performance type curves over P10-P90 prospective resource estimate

- Icewine#2 designed to provide additional insight into future lateral well performance and narrow P10-P90 range of outcomes
- Potential to increase resource estimates for both HRZ and HUE
- Given already large resource potential, success at Icewine#2 could unlock significant value for shareholders
 - Majority of play already leased by Project Icewine Joint Venture

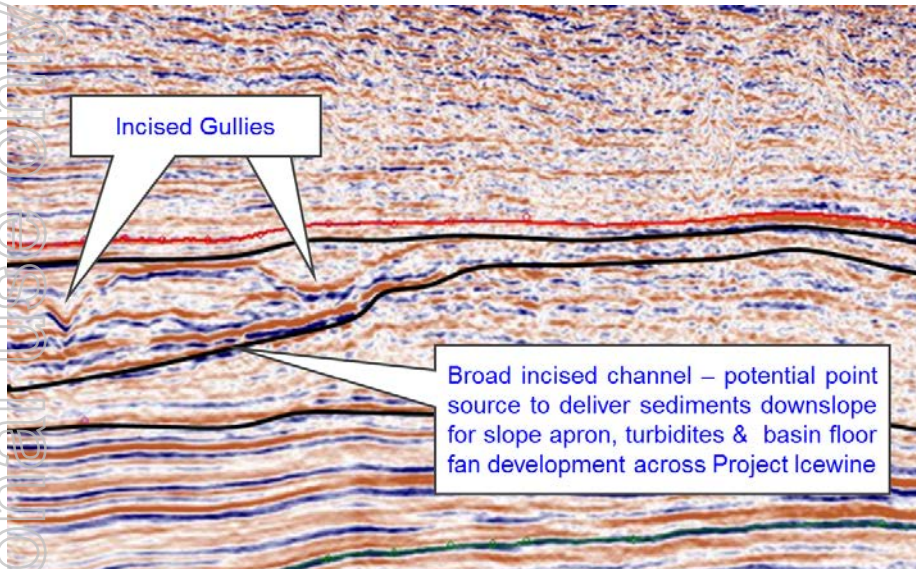

Estimated Oil Prices Required for Continued Exploration and Development

	Cost Assumption		
Resource Case	High Costs	Mid Costs	Low Costs
P10	US\$44/bbl	US\$35/bbl	US\$27/bbl
P50	US\$49/bbl	US\$39/bbl	US\$29/bbl
P90	US\$68/bbl	US\$54/bbl	US\$41/bbl

#Based on Prospective Resource estimates, which are classified as undiscovered accumulations that carry associated risk of discovery as well as risk of development. See full disclaimer on Slide 10. Refer ASX announcement 6/4/2016.

Project Icewine Prospectivity

Conventional Analog: Tarn Oil Pool

Project Icewine: N-S trending 2D seismic line with incised gullies/ feeder channel delivering sediments downslope to Western Play Fairway Leads

Tarn Depositional System (Annotated, after Helmold 2006)

- Project Icewine conventional prospectivity considered analogous to Tarn/ Meltwater stratigraphic play fairway within the Seabee Formation to the north
- Tarn Oil pool – part of the Kuparuk River Unit – produced in excess of 100+ MMBO
- Comprises stacked slope apron, turbidites, basin floor fan & channel levee deposits fed by incised gullies on shelf break to the west
- Similar seismic geometries and incised gullies mapped at Project Icewine
- Potential opportunity to test multiple stacked objectives with one well

Project Icewine Conventional: Select Leads- Alpha – Eastern Play Fairway

Alpha

Sequence	Brookian
Trap	Stratigraphic pinchout to west and north
Play	Lobate toe of slope/ basal floor fan Working petroleum system
Remarks	Large areal extent with significant relief Located in close proximity to road and TAPS

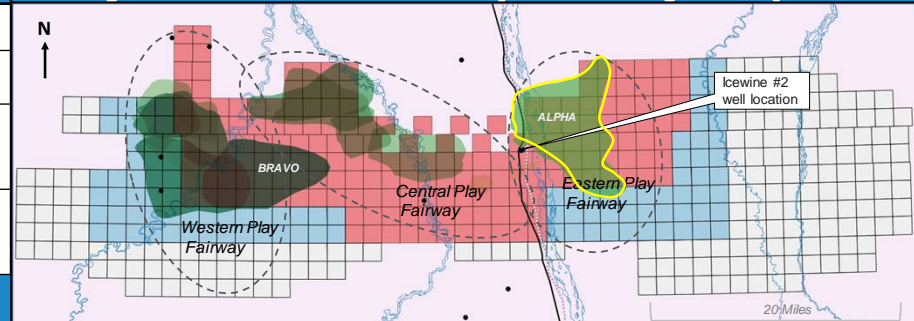

Prospective Oil Resources (mmbbl)

Unrisked Recoverable

P90	P50	P10	Mean	Mean Net to 88E
19	71	263	118	91
