

31 October 2017

ASX Announcement / Media Release

Quarterly Report for Period Ending 30 September 2017

- **Record Purchase Orders of almost AUD\$2m received for the quarter providing a solid base of revenue for the coming quarters.**
- **Orders were up 236% on the previous quarter (+794% Sept 16) with further significant growth expected to continue following Mobile World Congress in San Francisco during September 2017.**
- **Placement of AUD\$3m managed by Trident Capital to assist with increased manufacturing capacity allowing accelerated sales to continue.**
- **Number of Customer Accounts grew 8% from Q4 2016 to now total 1,065 customers that have purchased from CIO. 72% of orders in the quarter were from repeat customers.**
- **Cash Receipts growing with AUD\$591,093 received during the quarter, a significant result during the company's Purchase Order growth phase.**

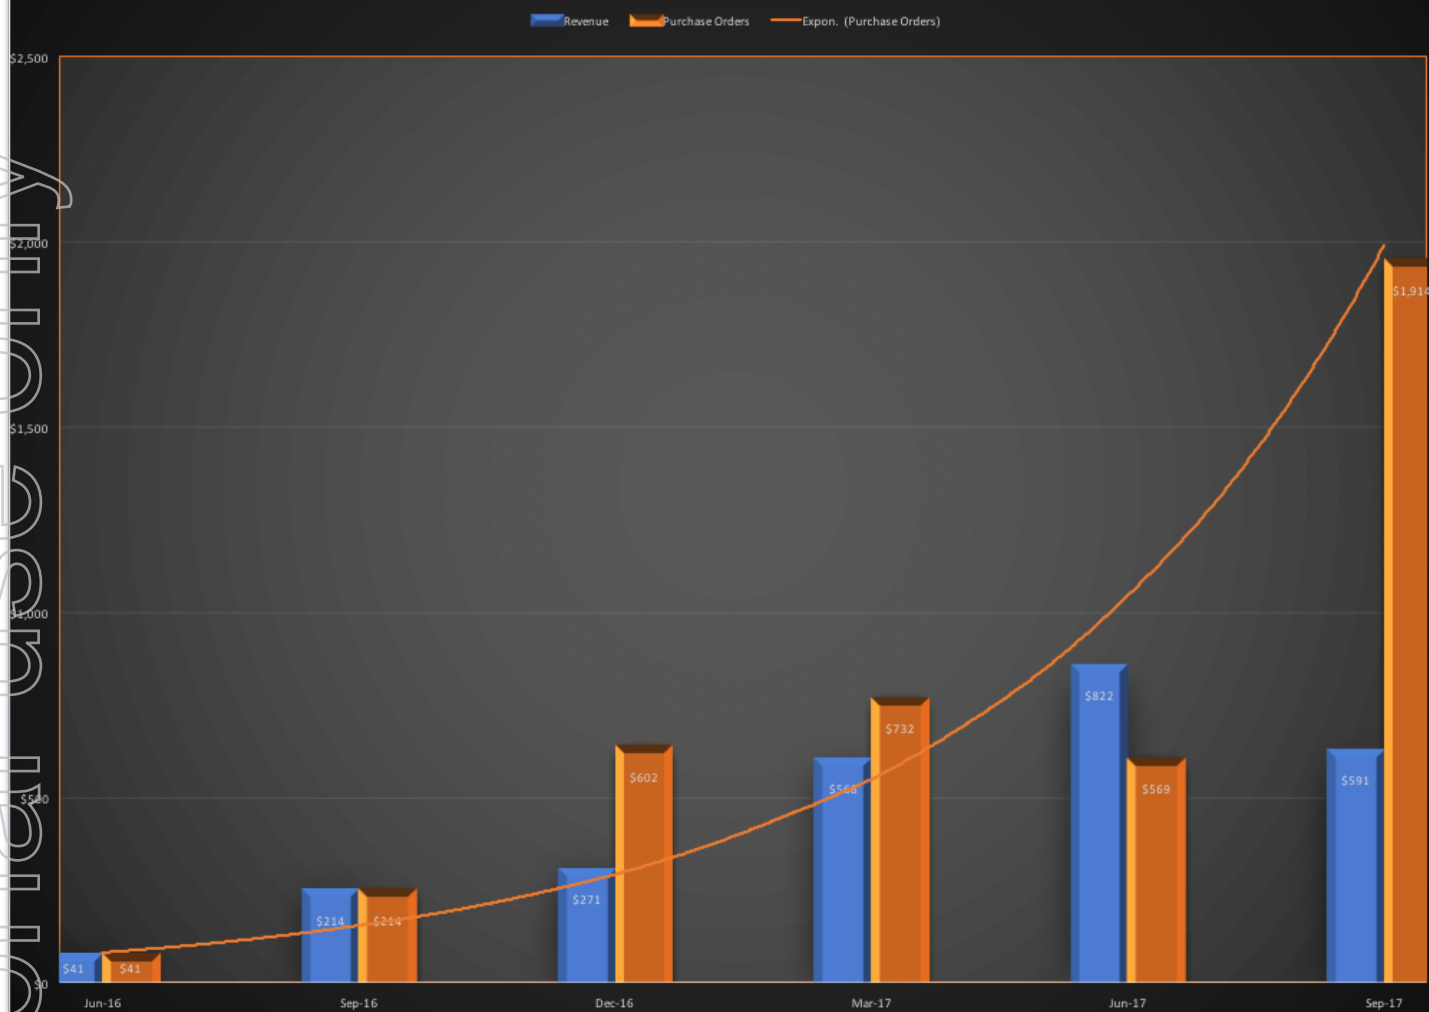

The Board of Connected IO Limited ("CIO" or "Company") is pleased to announce the release of its results for the quarter ended 30 September 2017.

The Company has achieved record sales during the quarter with purchase orders amounting to **AUD\$1,914,000**. These purchase orders further support the momentum CIO is building as sales continue to develop and grow quarter on quarter.

CIO achieved cash receipts from customers for the quarter of AUD\$598,807 (up 179% from Q1 FY16). The revenue generated along with the significant increase in Purchase Orders highlighted above bode well for revenue growth over the coming quarters as the Company strives to build a significant revenue base to springboard into the 2018 calendar year.

During the quarter CIO released its new family of CAT-1 products at the Mobile World Congress in San Francisco. As a direct result purchase orders were received from distributors and many new opportunities are now being negotiated. The interest generated both leading up to and during the congress has extended the Company's growth outlook for the December quarter and beyond.

Connected IO Quarterly Purchase Orders ('000's)

In addition to the expected increase in revenues as a result of the record Purchase Orders, Connected IO also successfully completed a placement of AUD\$3m under mandate with Trident Capital in Perth. As at the date of this announcement \$2.85m has been received with the balance expected to follow this week. The placement will allow the company to confidently continue to seek and accept Purchase Orders with increased financial manufacturing capacity. The Company would also like to confirm it is negotiating a six month extension on the original loan facility arranged by 708 Capital and Trident Capital (announcement dated 22 June 2017) to further assist the Company's next growth phase.

As you begin to agree, you can say, "I agree with you. The problem is that the company is not doing enough to address the issue."

GOLD ASSET UPDATE

As previously announced to the market (announcement dated 22 September 2017) the Company continues to plan for the development of the Missions & Cables gold project. The project contains a JORC Inferred resource in the eastern goldfields adjacent to infrastructure and 7kms from the 3 million ounce Darlot/Centenary gold mine recently acquired by Red 5 Limited. CIO has received multiple approaches in recent months by parties, including nearby gold producers interested in developing the project.

CIO has recently been made aware that it potentially owns a registered royalty interest on a tenement (M15/646) associated with the Coolgardie Gold Project that is now owned and operated by ASX-listed Focus Minerals Ltd. The Company is continuing to process the extent of its rights and will update the market as soon as the details of the royalty interest are verified.

CEO Yakov Temov also commented "The Company's quarterly sales growth and projected pipeline of opportunities for the December quarter and beyond underpin the ability of the business to scale significantly going forward with a sales force and manufacturing capacity to meet demand. CIO's strong objective is to become cash flow positive in 2018 and look to expand the business globally."

About Connected IO Ltd. (CIO)

Based in Silicon Valley, Connected IO (CIO) develops wireless products for machine-to-machine (M2M) communications and Internet of Things (IoT) connectivity. The CIO EMU family of programmable modems and routers are innovative, carrier-certified, secure, and affordable, making them the preferred choice of enterprises around the globe. The IoT market is growing exponentially and cellular technology and wireless connectivity are advancing rapidly—from LTE to Narrowband IoT (NB-IoT) and Low-Power Wide-Area Networks (LPWANs). To keep pace, reduce development costs, and shorten time to market, companies are choosing CIO hardware. Ready to go right out of the box, CIO products can be easily configured, deployed, monitored, and managed with CIO M2M Cloud software. CIO products can be found in a wide array of applications and industries, including digital signage, retail kiosks, vending machines, monitoring and control systems, failover, unmanned aerial vehicles (UAVs), and healthcare.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
