## Quarterly Activities Report For Period Ended 30 September 2019

### **Dobsina Project, Slovakia:**

- ***Geochemical sampling program conducted across the Rejdova Licence***

### **Potential Material Acquisition:**

- ***Evaluation of multiple additional value accretive opportunities within the resource sector undertaken***

---

#### **TECHNICAL DOBSINA**

During the quarter a geochemical sampling survey was undertaken across the Rejdova Licence, part of the broader Dobsina Project. The geochemical sampling program aims to delineate anomalies associated with historical workings located towards the west of the licence area and potentially additional unrecognised targets. Furthermore the program aims to define the level of metal zonation in the system.

The results of the geochemical survey are presently pending and further updates will be provided upon interpretation of the results.

---

#### **POTENTIAL MATERIAL ACQUISITION**

A multitude of resource opportunities have been presented to the Company and were evaluated during the period. At present the Company is in suspension relating to a potential material acquisition. Further details relating to the potential material acquisition will be released to market when it is in a position to do so.

## DISCLAIMER

*Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)" and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All of such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and foreign exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company's prospects, properties and business strategy. Our audience is cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and we do not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.*
