

Fluence Receives US\$3 Million Follow-On Aspiral™ Order from ITEST

Melbourne, New York 01 November 2019

Fluence Corporation Limited (ASX: FLC) is pleased to announce the execution of a US\$3 million follow-on order from a subsidiary of ITEST. The order is comprised of 10 Aspiral™ S1 units, 18 Aspiral™ L4 units and auxiliary equipment, bringing the total capacity of this purchase order to 1,950 m³/day. The units will be deployed at service stations and toll stations along highways in Hubei province as contemplated in the original agreement signed in October 2018. Shipments will begin immediately and are expected to extend into early 2020.

Commenting on this award, Fluence Managing Director & CEO Henry Charrabé said: “We are pleased to continue progressing the close relationship with ITEST, which has now resulted in orders of more than 100 Aspiral™ units since the inception of our multi-year partnership one-year ago. The superior nitrogen removal capabilities of Fluence’s Aspiral™ products makes them ideal to treat wastewater high in nitrogen concentration, such as the influent from ITEST sites. ITEST has become a true partner for us in China and we look forward to executing on the partnership agreement over the next several years and developing similar mutually beneficial relationships in the near future.”
