

Prospect Resources signs MOU with Uranium One Group

African lithium developer, Prospect Resources Ltd (ASX: PSC, FRA:5E8) (“**Prospect**” or “**the Company**”) is pleased to announce that it has entered into a Memorandum of Understanding (“**MOU**”) with Uranium One Group JSC (“**Uranium One**”).

The purpose of the MOU is to afford Uranium One with a 90-day exclusivity period (subject to certain exceptions) to:

- complete due diligence on the Company and its Arcadia Lithium Mine; and

subject to satisfactory due diligence, negotiate:

- equity investment terms in Prospect or its subsidiaries; and
- off-take terms for at least 51% of the Company’s future lithium production.

The discussions with Uranium One are incomplete and ongoing and there is no guarantee that the MOU or any discussions with Uranium One will result in a formal binding agreement or proposal or as to the timing or terms on which any transaction may proceed.

Uranium One Group

Uranium One is a global energy company and one of the world’s largest uranium producers, with a diverse portfolio of assets worldwide, including in Kazakhstan, the United States and Tanzania. Uranium One is a company of ROSATOM, the Russian State Corporation for Nuclear Energy.

ENDS

Africa’s leading battery mineral company

Well positioned Lithium Resource in regard to both Scale and Grade

Strong Project Economics demonstrated in DFS

Path forward to Financing, Development and Production

Offtake Agreement in place and positioned to capitalise on Market Demand

About Prospect Resources Limited (ASX:PSC, FRA:5E8)

Prospect Resources Limited (ASX:PSC, FRA:5E8) is an ASX listed lithium company based in Perth with operations in Zimbabwe. Prospect's flagship project is the Arcadia Lithium Project located on the outskirts of Harare in Zimbabwe. The Arcadia Lithium Project represents a globally significant hard rock lithium resource and is being rapidly developed by Prospect's experienced team, focusing on near term production of petalite and spodumene concentrates.

About Lithium

Lithium is a soft silvery-white metal which is highly reactive and does not occur in nature in its elemental form. In nature it occurs as compounds within hard rock deposits (such as Arcadia) and salt brines. Lithium and its chemical compounds have a wide range of industrial applications resulting in numerous chemical and technical uses. Lithium has the highest electrochemical potential of all metals, a key property in its role in lithium-ion batteries.

Caution Regarding Forward-Looking Information

This announcement may contain some references to forecasts, estimates, assumptions and other forward-looking statements. Although the Company believes that its expectations, estimates and forecast outcomes are based on reasonable assumptions, it can give no assurance that they will be achieved. They may be affected by a variety of variables and changes in underlying assumptions that are subject to risk factors associated with the nature of the business, which could cause actual results to differ materially from those expressed herein. All references to dollars (\$) and cents in this announcement are in United States currency, unless otherwise stated.

Investors should make and rely upon their own enquiries before deciding to acquire or deal in the Company's securities.
