## Important Notice

This presentation (**Presentation**) is dated 16 July 2021 and has been jointly prepared by 5G Networks Limited (5GN) and Webcentral Group Limited (**Webcentral**) in relation to the proposed merger between 5GN and Webcentral by way of scheme of arrangement under Part 5.1 of the Corporations Act 2001 (**Corporations Act**), (**Merger** or **Scheme**).

Under the Merger, Webcentral would acquire 100% of the fully paid ordinary shares in 5GN in exchange for the issue of new, fully paid ordinary shares in Webcentral, subject to the terms and conditions described in the merger implementation agreement entered into on or about the date of this Presentation (**Implementation Agreement**). A copy of the Implementation Agreement is available on ASX.

# Key Risks

## Investment risk

An investment in shares in 5GN or Webcentral is subject to investment and other known and unknown risks, some of which are beyond the control of 5GN and Webcentral. These risks, together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of shares in 5GN or Webcentral in the future. 5GN and Webcentral do not guarantee any particular rate of return or the performance of 5GN and Webcentral, nor guarantee the repayment of capital from 5GN and Webcentral, or any particular tax treatment. When making any investment or other decision in relation to 5GN or Webcentral, investors should make their own enquires and investigations regarding all information in this Presentation, including, but not limited to, any assumptions, uncertainties and contingencies which may affect future operations of 5GN and Webcentral, and the impact that different future outcomes may have on 5GN and Webcentral. In respect of the Merger, investors should carefully consider the information to be made available in the Scheme Booklet (and all other materials issued by 5GN or Webcentral in connection with the Merger) and seek independent advice before making any decision.

## Conditions precedent must be satisfied or waived

The implementation of the Merger is subject to a number of conditions precedent. There can be no certainty that these conditions precedent will be satisfied or waived (where applicable), or if satisfied or waived (where applicable), when that will occur. In addition, several of the conditions precedent to implementation of the Merger are beyond the control of 5GN or Webcentral, including, but not limited to, approval of the Merger by the requisite majority of 5GN shareholders and the Court, and approval of the required shareholder resolutions by Webcentral shareholders.

If for any reason the conditions to the Merger are not satisfied or waived (where applicable) and the Merger is not completed, the market price of 5GN Shares and Webcentral Shares may be adversely affected.

## Court approval and delays

There is a risk that the Court may not approve the Merger or that Court approval may be delayed.

Each of 5GN and Webcentral has the right to terminate the Implementation Agreement. Accordingly, there is no certainty that the Implementation Agreement will not be terminated by either 5GN or Webcentral before the implementation of the Merger.

## Value of the scheme consideration is not certain

The implied value of the scheme consideration is liable to vary over time depending on the prevailing Webcentral share price, including between the date of this Presentation, the date of the scheme meeting and the date on which the scheme consideration is received by scheme shareholders.

## Integration risk and realisation of synergies

There is a risk that the integration of 5GN and Webcentral may be less effective than expected, or that expected synergies arising from the Merger will not be realised, or fully realised. Effective integration and the realisation of synergies will depend on a range of factors including the response of customers, suppliers and personnel to the Merger, the successful management of the integration of 5GN and Webcentral and other factors beyond the control of either of 5GN and Webcentral.

## Change in risk and investment profile

After implementation of the Merger, eligible participating shareholders who currently hold 5GN Shares will be exposed to additional risks relating to Webcentral and certain additional risks relating to the Merged Group and integration of the two businesses.

While the operations of 5GN and Webcentral are similar in a number of ways, there will be differences between the size, capital structure, infrastructure and clients of the Merged Group and 5GN currently.

## Securities market fluctuations

There are various risks associated with investing in any form of business and with investing in listed entities generally. As with any entity listed on the ASX, the value of 5GN or Webcentral shares is influenced by a variety of factors, including macroeconomic factors or broader social occurrences which are beyond 5GN or Webcentral's ability to control or predict. The events relating to the COVID-19 pandemic have recently resulted in relation to certain listed entities, in significant market falls and volatility including in the prices of securities trading on ASX. The value of new Webcentral shares following Implementation of the Merger will depend upon general share market and economic conditions, which are uncertain and subject to fluctuation, as well as the specific performance of the Merged Group. There is no guarantee of profitability, dividends, return of capital, or the price at which Webcentral shares will trade on the ASX. The past performance of 5GN or Webcentral shares is not necessarily an indication as to future performance as the trading price of shares can go down or up in value.

# Key Risks (continued)

## General economic conditions

The financial performance of the Merged Group and the value of the new Webcentral shares may fluctuate due to various factors, including movements in the Australian and international capital markets, recommendations by brokers and analysts, interest rates, exchange rates, inflation, Australian and international economic conditions, change in international economic conditions, change in government, fiscal, monetary and regulatory policies, prices of commodities, global geo-political events and hostilities, global health pandemics and acts of terrorism, investor perceptions and other factors that may affect the Merged Group's financial position and earnings. In the future, these factors may affect the Merged Group and may cause the price of new Webcentral shares to fluctuate and trade below current prices.

In light of recent global macroeconomic events, including the impact of COVID-19, Australia may experience an economic recession or downturn of uncertain severity and duration which could impact the Merged Group's ability to attract and retain customers, to invest sufficiently to develop, adopt and integrate the latest technologies into existing infrastructure, and to secure and maintain third party suppliers for IT and network infrastructure over whom the Merged Group may have no direct operational or financial control. These economic disruptions may adversely impact the Merged Group's earnings and assets, as well as the value of the new Webcentral shares.

## COVID-19

The escalation of the outbreak of the COVID-19 virus into a global pandemic is impacting global economic markets. The severity and duration of the COVID-19 pandemic and the effect on the performance of the Merged Group remains unknown. The Merged Group may be impacted both by deterioration in macroeconomic conditions generally and specifically in relation to its operations.

Many of the operational and general risks relating to the Merged Group are likely to be heightened due to the impacts of the COVID-19 pandemic. There is continued uncertainty as to the further impacts of COVID-19, including in relation to governmental action, lockdown, quarantines, customer behaviour, employee availability, travel restrictions and the general impact on the Australian global economy and share markets.

In addition, the COVID-19 global pandemic may specifically impact the operations of the Merged Group, including customers seeking lower cost services, increased bad debt risk, reduced revenue, including outbound international and inbound visitor roaming revenue, customers not being able to access retail stores, and delays in mobile network roll out. If any of these risks were to materialise, this could negatively impact the operating and financial performance of the Merged Group and hinder its capacity to meet its business objectives.

## Other risks

Additional risks and uncertainties not currently known to 5GN or Webcentral may also have a material adverse effect on 5GN, Webcentral or the Merged Group and the information set out above does not purport to be, nor should it be construed as representing, an exhaustive list of the risks affecting 5GN, Webcentral or the Merged Group.
