Dear Sir/Madam

Quarterly Report for the Period Ended 30 September 2021

Nex Metals Explorations Ltd (Nex or the Company) provides the following update on recent Company activities.

During the quarter the Company was still undertaking engineering and commissioning a near new plant as part of the trial. The plant is based on a Sepro Mineral Systems Corp – Falcon Concentrator. Delays in results of assays from analytical laboratories has slowed the process as the Company requires more definition on recoverability so that additional plant can be incorporated. The site is on care and maintenance until this is ascertained, which is expected to restart in November (next quarter).

Takeover Bid from Metalicity Limited

On 14 September 2021 the Company received from Metalicity Limited (ASX:MCT) a proposal addressed to Nex Metals Shareholders for an off-market all scrip takeover bid. The proposed offer is 4.81 Metalicity ordinary shares for every 1 Nex ordinary share.

Metalicity made an announcement on 14 September 2021 regarding the proposed offer.

The Company has advised its shareholders on the same day to take no action (it has subsequent to the quarters end lodged the Target Statement with a supplementary to follow).

Nex has requested from Metalicity on a number of occasions to obtain mining information and data from Metalicity which they hold regarding the Joint Venture but Metalicity has failed or neglected to provide the requested mining information and data to Nex Metals. Nex considers that Metalicity has only provided limited access to mining information and data to the consulting geologist of Nex.

Nex considers that it is essential to have all mining information and data so that it conducts its own Mineral Resources Estimate (which is long outstanding in Nex's view) and being a relevant measure of the value of the project so that Nex can meet its obligation to Shareholders and provide a suitable recommendation to accept or reject the offer.

Nex distinguishes that the Joint Venture Agreement with Metalicity is in 2 distinct stages, the first being the farm-in by Metalicity and the second being the Joint Venture. Metalicity has yet to verify to the satisfaction of Nex that it has met its obligations under the stage 1 farm-in as it is yet to be verified and audited by Nex. In addition the value of the Project and the value of Nex as a standalone Company are 2 different items.

About the Kookynie Tailings Research Project

In late October 2017 Nex Metals drilled a total of 81 aircore holes for 497 metres over the tailings stockpiles (Figure 1). There are six distinct tail stockpiles located on Cosmopolitan tenement M40/61. Drilling was designed to test the full depth profile of these stock piles which were up to seven metres high. Drilling confirmed the grades previously identified by the Nex Metals soil sampling program. The overall average grade of the Cosmopolitan tails is 0.69 g/t Au. However, examination of the individual tails stockpiles indicate that certain stockpiles are higher grade than others. This is shown in Table 1, with stockpile 5 showing a mean grade of 1.33g/t Au.

Figure 1 shows representative cross sections through stockpiles 4, 5 and 6.

Other:

With respect to the applications for forfeiture lodged by MCA Nominees Pty Ltd over the Yundamindera tenements these are an ongoing matter. As previously advise the Company sees no merit in the claim and will defend in the usual course. Subsequent to the end of the quarter the Company has received notice of a hearing date being allocated currently as June 2022.

This announcement is approved by authority of the Managing Director, Kenneth Allen.

Responsibility Statement

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Rob L'Heureux, who is a Member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta (Canada). Mr. L'Heureux M.Sc., P.Geol., who is a full-time employee of APEX Geoscience Australia Pty Ltd., has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. L'Heureux consents to the inclusion in this report of the matters based on their information in the form and context in which it appears.

Forward Looking Statements

This announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have reasonable basis. However, forward looking statements are subjected to risks, uncertainties, assumptions and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward looking statements. Such risks include, but are not limited to Resource risk, metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks in the Countries and States in which we operate or sell product to, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company's annual reports, as well as the Company's other filings. Readers should not place undue reliance on forward looking information. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statements" to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.
