

Activity in shares following ABC Four Corners program featuring Group 6 Metals

Group 6 Metals Limited (**ASX: G6M**, “Group 6” or the “Company”) advises that on Monday 9 May at 8.40pm AEST, the Australian Broadcasting Corporation's Four Corners program broadcast an investigative story which featured the Company and its operations, including its recent commencement of construction of the Dolphin Tungsten Mine on King Island, Tasmania. Following the broadcast of the program, there was a notable increase in the Company's share price and volume of shares traded on the market.

The investigative piece, titled “*Digging In: Why powering a green future means more mines*”, focused on the new critical minerals mining boom and examined Australia's capability to meet an expected surge in global demand.

During the program, Group 6 Metals Executive Chairman Johann Jacobs and King Island Mayor Julie Arnold were both interviewed, respectively highlighting the geopolitical significance of the Dolphin Tungsten Mine and its importance to the economic and social prosperity of King Island.

The program can be viewed on the ABC NEWS channel on Saturday 14 May at 8.10pm AEST and is replayable on ABC iview and at the ABC's Four Corners website.

As announced to the ASX on 19 January 2022, the Company reiterates its indicative timeline to achieving plant commissioning in early 2023 ahead of first shipment of tungsten concentrate in Q1 2023.

Approved by the board of Group 6 Metals Limited.

About Group 6 Metal

Group 6 Metals Limited (ASX: G6M), previously known as King Island Scheelite Limited (ASX: KIS), is an Australian resources exploration and development company. The Company's name honours tungsten as Group 6 Metals' first commodity project (The Dolphin Mine) under development, as tungsten is a member of Group 6 of the periodic table along with chromium and molybdenum, as well as being a critical mineral and a geopolitically strategic resource.

The Company is focused on the redevelopment of its 100%-owned Dolphin Mine located on King Island, Tasmania. Initially the focus is on producing a high grade of tungsten concentrate, however, the Company plans to value-add the product for supply into the upstream tungsten industry.
