Letter from the Chairperson

Friday, 1 July 2022

Dear Shareholder

As announced on Monday, 27 June 2022, carsales.com Limited (ASX: CAR) (**CAR**) has exercised its call option to acquire the remaining 51% in Trader Interactive LLC (**Trader Interactive**) for US\$809 million (the **Proposed Transaction**). CAR acquired a 49% interest in Trader Interactive on 1 September 2021 (the **2021 Transaction**).

The Proposed Transaction continues CAR's international growth strategy into large, fast-growing non-auto industries where CAR has market-leading positions. CAR has a strong track record of delivering value through building scale in international markets, and moving to 100% ownership of Trader Interactive accelerates CAR's expansion in the US. The Proposed Transaction is expected to generate high single-digit to low double-digit EPS accretion in the first full year after completion.

Further information about the Proposed Transaction, including strategic and financial benefits, is detailed in CAR's ASX Announcement and Investor Presentation lodged with ASX on Monday, 27 June 2022 (and included in this Information Booklet in Section 3).

The proceeds of the Entitlement Offer will be used to fund the Proposed Transaction and associated transaction costs.

As announced on Wednesday, 29 June 2022, the Institutional Entitlement Offer successfully completed before trading commenced on Wednesday, 29 June 2022, resulting in the issuance of approximately 47.4 million New Shares in the capital of CAR and raising approximately \$842 million. Your Entitlement is set out in your personalised Entitlement and Acceptance Form and has been calculated as 1 New Share for every 4.16 Existing Shares you held as at the Record Date. If the result is not a whole number, your Entitlement will be rounded up to the nearest whole number of New Shares.

Your personalised Entitlement and Acceptance Form can be accessed and downloaded via the Entitlement Offer Website: www.carsalesoffer.com.au.

If you have more than one registered holding of Shares, you will be sent more than one personalised Entitlement and Acceptance Form and you will have a separate Entitlement for each separate holding.

The Entitlement stated on your personalised Entitlement and Acceptance Form may be in excess of the actual Entitlement you may be permitted to take up where, for example, you are holding Shares on behalf of a person in the United States.

2.6 Consider the Retail Entitlement Offer carefully in light of your particular investment objectives and circumstances

The Retail Entitlement Offer is being made pursuant to provisions of the Corporations Act which allow rights issues to be made without a prospectus. This Information Booklet does not contain all of the information which may be required in order to make an informed decision regarding an Application for New Shares offered under the Retail Entitlement Offer. As a result, it is important for you to read carefully and understand the publicly available information on CAR and the Retail Entitlement Offer prior to making any decision in respect of your Entitlement. In particular, you should refer to this Information Booklet and other announcements made available on the Entitlement Offer Website: www.carsalesoffer.com.au (including announcements which may be made by CAR after publication of this Information Booklet). You should also refer to the 'Key Risks' Section of the Investor Presentation included in Section 3 of this Information Booklet.

You should consult with your professional adviser if you have any queries or are uncertain about any aspect of the Retail Entitlement Offer.

2.7 If you wish to take up all your Entitlement

If you wish to take up all of your Entitlement, you must:

- (a) pay your Application Money via BPAY® by following the instructions set out on the personalised Entitlement and Acceptance Form; or
- (b) if you are a New Zealand Shareholder, please contact the Offer Information Line on 1300 850 505 (within Australia) and +61 3 9415 4000 (outside Australia) between 8.30am to 5.00pm (Melbourne time) Monday to Friday for details on how to make payment by Electronic Funds Transfer,

in each case, by no later than 5.00pm (Melbourne time) on Wednesday, 13 July 2022.

CAR will pay any refund amounts in Australian dollars to you either by direct credit to your nominated bank account, or by cheque sent by ordinary post to your address as noted in the share register as at the Closing Date. No interest will be paid on any Application Money received or refunded.

2.8 If you wish to take up part of your Entitlement and let the balance lapse

If you wish to take up part of your Entitlement, you must:

- (a) pay your Application Money for the relevant part via BPAY® by following the instructions set out on the personalised Entitlement and Acceptance Form; or
- (b) if you are a New Zealand Shareholder, please contact the Offer Information Line on 1300 850 505 (within Australia) and +61 3 9415 4000 (outside Australia) between 8.30am to 5.00pm (Melbourne time) Monday to Friday for details on how to make payment by Electronic Funds Transfer,

in each case, by no later than 5.00pm (Melbourne time) on Wednesday, 13 July 2022.

Any of your Entitlement which you do not take up will lapse. Your percentage shareholding in CAR will be diluted accordingly.

If CAR receives an amount that is less than the Offer Price multiplied by your Entitlement, CAR may treat your payment as an Application for as many New Shares as your Application Money will pay in full and the balance of your Entitlement will lapse.

2 How to Apply continued

2.9 If you wish to do nothing and allow your Entitlement to lapse

If you do not wish to take up all or any part of your Entitlement, you do not need to take any further action. Your Entitlement will lapse and your percentage shareholding in CAR will be diluted accordingly.

2.10 Consequences when an Entitlement lapses

If you do not accept all or part of your Entitlement in accordance with the relevant instructions and all or part of your Entitlement lapses, the New Shares to which you would otherwise have been entitled under the Retail Entitlement Offer may be acquired by the Underwriters.

By allowing all or part of your Entitlement to lapse, you will forego any exposure to increases or decreases in the value of New Shares you would have received had you taken up your Entitlement and you will not receive any value for your Entitlement. Your percentage shareholding in CAR will be diluted accordingly.

2.11 Ineligible Retail Shareholders

If you are a retail shareholder that is not an Eligible Retail Shareholder, you are an "**Ineligible Retail Shareholder**". Ineligible Retail Shareholders are not entitled to participate in the Retail Entitlement Offer.

CAR has decided that it is unreasonable to make offers under the Retail Entitlement Offer to shareholders who have registered addresses outside Australia or New Zealand. In making this decision, CAR has had regard to the number of such holders, the number and value of the New Shares that they would be offered, and the cost of complying with the relevant legal and regulatory requirements in those places.

Ineligible Retail Shareholders are not eligible to participate in the Retail Entitlement Offer due to securities laws restrictions on the offer of New Shares in certain jurisdictions.

CAR reserves the right to determine whether a shareholder is an Eligible Retail Shareholder or an Ineligible Retail Shareholder.

2.12 Payment

You can pay in the following ways:

- by BPAY®; or
- if you are a New Zealand Shareholder, by Electronic Funds Transfer.

Cash payments will not be accepted. Receipts for payment will not be issued.

CAR will treat you as applying for as many New Shares as your payment will pay for in full up to your Entitlement.

Any Application Money received for more than your final allocation of New Shares, provided that amount is more than \$2, will be refunded as soon as practicable after the close of the Retail Entitlement Offer. No interest will be paid to applicants on any Application Money received or refunded.

(a) Payment by BPAY®

To pay by BPAY®, follow the instructions on your personalised Entitlement and Acceptance Form. You can only pay via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions.

If you are paying by BPAY®, you must use the specific Biller Code and your unique Customer Reference Number (**CRN**) on your personalised Entitlement and Acceptance Form. If you have multiple holdings and consequently receive more than one personalised Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those holdings only use the CRN specific to that holding. If you do not use the correct CRN specific to that holding your application will not be recognised as valid.

If you pay by BPAY®:

- you do not need to submit your personalised Entitlement and Acceptance Form but are taken to make the declarations, representations and warranties on that Entitlement and Acceptance Form and in Section 2.13; and
- if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares which is covered in full by your Application Money.

It is your responsibility to ensure that your BPAY® payment is received by CAR's Share Registry by no later than 5.00pm (Melbourne time) on Wednesday, 13 July 2022. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration in the timing of when you make payment. CAR takes no responsibility for loss resulting from late payment.

(b) Payment by Electronic Funds Transfer (New Zealand Shareholders)

To pay by Electronic Funds Transfer, Shareholders in New Zealand can visit the Entitlement Offer website: www.carsalesoffer.com.au to access your personalised Entitlement and Acceptance Form, or call the Offer Information Line on 1300 850 505 (within Australia) and +61 3 9415 4000 (outside Australia) between 8.30am to 5.00pm (Melbourne time) Monday to Friday. You must use your unique payment reference number as displayed on your personalised Entitlement and Acceptance Form when making your Electronic Funds Transfer payment. If you are not a shareholder in New Zealand and you wish to make an Electronic Funds Transfer payment, please contact the Offer Information Line using the phone numbers in Section 2.14 below.

Your Electronic Funds Transfer must be:

- for an amount equal to \$17.75 multiplied by the number of New Shares that you are applying for; and
- in Australian dollars – payment cannot be made in New Zealand dollars.

You should ensure that sufficient funds are held in the relevant account to cover the Application Money as your Electronic Funds Transfer will be processed on the day of receipt. If the amount of your Electronic Funds Transfer is insufficient to pay in full for the number of New Shares you have applied for in your personalised Entitlement and Acceptance Form, you will be taken to have applied for such lower whole number of New Shares as your Application Money will pay for (and to have specified that number of New Shares on your personalised Entitlement and Acceptance Form) and to have provided the representations in Section 2.13. Alternatively, your application may not be accepted.

If you make payment via Electronic Funds Transfer your Application Money must be received at CAR's Share Registry no later than the close of the Retail Entitlement Offer, being 5.00pm (Melbourne time) on Wednesday, 13 July 2022.

- Pro-forma transaction adjustments**
- A. Carsales' Pro forma net finance costs of A\$643.2m and TI Pro forma net finance costs of A\$47.8m represents the annual cost of the new capital structure which will be finalised pre completion. Assumed debt at the TI level is being replaced with debt at the carsales level as part of a refinancing to be undertaken pre completion. The net finance cost savings reflect a more efficient debt structure and a lower average interest rate post completion. Current three month forward BBSW rates have been used to calculate interest costs and debt balance as at 31 December 2021.
 - B. Income tax expense of (AUD\$0.7m) at the Trader Interactive level reflects a tax deduction of AUD\$68m for purchase price intangibles. This annual deduction will continue to be available to carsales under a 100% ownership scenario. These additional tax deductions relate to incremental amortisation deductions, prior year interest and tax deductions and R&D tax credits. The additional deductions will be available in the short to medium term and will then tail away whilst the \$68m deduction will remain available for 9 years. The Adjustment of AUD\$6.3m represents a pro forma tax deduction on AUD\$22.0m of additional interest expense at the carsales level.

Key Risks

3 ASX Announcements continued

This section describes the key risks to carsales' business associated with the Acquisition together with the risks relating to participation in the Entitlement Offer that may affect the price or value of carsales' shares. Before investing in carsales, you should be aware that an investment in carsales has a number of risks, some of which are specific to carsales and some of which relate to listed securities generally, and many of which are beyond the control of carsales.

The risks set out in this section do not constitute an exhaustive list of all risks involved in an investment in carsales and for the avoidance of doubt, the categorisation of the risks does not limit their relevance to that particular category.

Investors should consult their own professional, financial, legal and tax advisers about these risks and the suitability of investing in carsales in light of their particular circumstances. Investors should also consider publicly available information on carsales and Trader Interactive (including information available on the ASX website) before making any investment decision.

A. SPECIFIC RISKS RELATING TO THE ACQUISITION

1. Risks associated with completion of the Acquisition

carsales has exercised its call option to acquire the remaining 51% interest in Trader Interactive. The Acquisition is subject to various conditions, including obtaining the necessary regulatory approval and execution of the securities purchase agreement. The conditions are expected to be satisfied within 90 days but some of these are not within carsales' control.

carsales expects the Acquisition to proceed as advised. However, if the Acquisition fails to proceed or is delayed, the expected financial performance of carsales could be adversely affected and the benefits of the Acquisition outlined in this presentation may not be realised. The consummation of the Acquisition, or any transaction, is also subject to various risks and contingencies. There can be no assurance that the Acquisition, or any transaction, will be consummated.

If the Acquisition does not proceed and carsales has raised funds under the Entitlement Offer, carsales will return such proceeds to shareholders. If the Acquisition is delayed, carsales may incur additional costs and it may take longer than anticipated, if at all, for carsales to realise the anticipated benefits of the Acquisition or those benefits may be diminished.

Failure to proceed with or complete the Acquisition may be due to circumstances outside of carsales' control, including intervention by a regulatory body or order of a court of competent jurisdiction that imposes conditions, terms, obligations or restrictions in connection with their approval of the Acquisition, a failure to execute the securities purchase agreement or the occurrence of any event, change or other circumstance that could give rise to the termination of the securities purchase agreement, amongst other factors. Completion may also be impacted or prevented as a result of changes in the relevant legal and regulatory frameworks in Australia, the United States or other relevant jurisdictions.

2. Due Diligence

carsales has undertaken a due diligence process in relation to the Acquisition which relied in part on the review of financial and other information provided by Trader Interactive.

Despite making reasonable efforts, carsales has not been able to verify the accuracy, reliability or completeness of all of the information which was provided to it against independent data. carsales' assumptions and analysis may be inaccurate, including as a result of incorrect or missing information, flawed analysis methods or incorrect assumptions. There is no assurance that the due diligence conducted was comprehensive and that all issues and risks in respect of the Acquisition have been completely or accurately identified and avoided (or managed appropriately). Actual performance of Trader Interactive or circumstances may differ from carsales' conclusions.

Unforeseen issues and risks in respect of the Acquisition, in relation to Trader Interactive and its business may arise, which may have a materially adverse impact on carsales (for example, carsales may later discover liabilities or issues which were not identified through due diligence or for which there is no protection for carsales or fail to identify historical or future tax exposure across multiple jurisdictions). This could adversely affect the operations, financial performance or position of both Trader Interactive and carsales (the **Combined Business**).

Key Risks

A. SPECIFIC RISKS RELATING TO THE ACQUISITION (CONTINUED)

3. Future earnings risk

carsales has undertaken financial and business analysis of Trader Interactive in order to determine whether to pursue the Acquisition and its attractiveness to carsales. It is possible that such analysis, and the best estimate assumptions made by carsales, draw conclusions and forecasts that are inaccurate or which will not be realised in due course. To the extent that the actual results achieved by Trader Interactive, and consequently of the Combined Business, are different than those anticipated there is a risk that the profitability and future earnings of the Combined Business may differ (including in a materially adverse way) from the performance as described in this Presentation. There is also no guarantee that any prospective future earnings of carsales will be realised after completion of the Acquisition. Investors should also note this Presentation contains pro forma historical financial information, which is provided for illustrative purposes only and is not represented as being indicative of carsales (or anyone else's) views on the Combined Business's future financial condition and/or performance.

4. Key management personnel

The success and performance of the Combined Business will rely on the effectiveness, talent and experience of key management personnel. The loss of any key personnel or group of staff generally could cause disruption to the conduct of the Combined Business in the short term and may have a material adverse impact on the Combined Business's operations, financial performance and/or financial position. It may be difficult to replace key personnel, or to do so in a timely manner or at comparable expense.

5. Regulatory risks

Post completion of the Acquisition, carsales will operate a wholly owned subsidiary in the United States and therefore be required to comply with the associated legal, regulatory, tax, licensing, and compliance relating to operating a business in the United States. This expansion will also expose carsales to the risk of operating in some jurisdictions which have different regulatory environments for breach of financial crimes laws; carsales will need to manage compliance with applicable laws. Any breach of the relevant legal or regulatory obligations or failure to meet compliance requirements may have an adverse impact on, or prevent completion of, the Acquisition, and may also have an adverse impact on the Combined Business's earnings and/or financial position and performance as well as their reputation.

6. Legal risks

The Acquisition involves carsales exercising its rights under a call option. Whilst the transaction documents relating to the Acquisition will contain some protections in respect of certain historical liabilities of Trader Interactive, there is always a risk that the transaction documents do not contain adequate protection for potential liabilities relating to Trader Interactive's business or other costs, potentially exposing carsales to the risk of future liabilities, costs or disputes arising in relation to the Acquisition or Trader Interactive's business generally.

7. Impact of COVID-19

Trader Interactive's business and operations continue to be exposed to the effects of COVID-19 (for example, supply chain issues arising from COVID-19, which in turn has resulted in lower inventory levels). There is a risk that COVID-19 continues to disrupt the Trader Interactive business, impair financial performance and impact the wellbeing of personnel. The long-term impacts of COVID-19 on the general economy, Trader Interactive and the industry in which Trader Interactive operates are uncertain and the future financial and operational performance of Trader Interactive and in turn the Combined Business may continue to be adversely affected by impacts from COVID-19.

8. Global markets and foreign exchange risk

As a result of the Acquisition, carsales is further increasing its concentration in the United States and therefore will be further exposed to the performance of the United States' domestic economy as well as global macroeconomic conditions (including as a result of any sanctions or escalations from the current conflict in Ukraine or other future world conflicts).

carsales will also become more exposed to fluctuations in the value of the USD, as well as other global currencies, than it was prior to the Acquisition. In cases where carsales' debt or other obligations are in currencies different than the currency in which carsales earns revenue, carsales may face higher costs to service those debts, which could impact on its financial performance or position. Fluctuations in exchange rates may also decrease the expected contributions made by Trader Interactive to carsales' earnings, resulting in an adverse impact on the Combined Business's earnings and/or financial position and performance.

Key Risks

A. SPECIFIC RISKS RELATING TO THE ACQUISITION (CONTINUED)

9. Historical liabilities

If the Acquisition completes, carsales will have greater exposure to any liabilities that Trader Interactive has incurred or agreed to incur in the past.

In addition, carsales will be exposed to any liabilities which were not identified during its due diligence, or which are greater than expected, for which insurance may not be adequate or available, and for which carsales may not have recourse. These could include liabilities relating to current or future litigation, regulatory actions and other liabilities. Such liability may adversely affect the financial performance or position of the Combined Business following completion of the Acquisition.

10. Debt funding and refinance risks

As part of the Transaction, carsales will seek the consent of its existing lenders to the Acquisition and also plans to upsize its debt facilities with existing lenders and new lenders as set out in slide 31 of this Investor Presentation. In the event carsales does not receive these consents it will need to replace its existing debt facilities prior to Completion of the Acquisition. If the existing lenders and/or new lenders do not agree to increase the existing debt facilities prior to completion of the Acquisition, carsales will need to seek alternative funding. In both cases, carsales may rely upon a backstop agreement with other lenders which may have higher financing costs. To the extent the increased facilities are provided, carsales will be more exposed to risks associated with gearing and higher leverage ratios, as its stand alone debt levels will increase.

In addition, the Combined Business will be more exposed to general risks associated with higher levels of debt. It may be more difficult for the Combined Business to refinance all or some of these debt facilities in the future and may result in an inability to secure new debt facilities at a similar quantum and cost to existing debt facilities which may adversely affect its financial performance. There is also a risk that shareholders do not agree with the increase in carsales' debt levels and may seek to reduce their shareholding, which may result in a fall in carsales' share price.

The Acquisition may also result in unforeseen requirements given the larger capital requirements of the Combined Business. The Combined Business may not be able to secure financing on favourable terms, or at all, to meet its future capital needs, and therefore additional offers that could dilute the capital of carsales or additional debt facilities may be required. Any existing and future debt financing may contain covenants that impact the operation of the Combined Business and pursuit of business opportunities, carsales' ability to conduct an offer in the future will depend on the market conditions at the time.

11. Underwriting risks

carsales has entered into an underwriting agreement with Morgan Stanley Australia Securities Limited, Goldman Sachs Australia Pty Ltd and UBS Securities Australia Ltd (together, the **Underwriters**) in respect of the Entitlement Offer, a summary of which is set out in Appendix D of this Presentation (**Underwriting Agreement**). If certain conditions are not satisfied or if certain termination events occur, the Underwriters may terminate the Underwriting Agreement.

Termination of the Underwriting Agreement may impact the ability of carsales to proceed with the Entitlement Offer and raise proceeds under the Entitlement Offer. If the Underwriting Agreement is terminated by the Underwriters, there is no guarantee that the Entitlement Offer will continue in its current form or at all. In these circumstances, carsales may need to find alternative funding to meet its contractual obligations under the Acquisition, which may result in carsales incurring additional costs and/or potential restrictions being imposed on the manner in which carsales conducts its business and deals with its assets. There is no guarantee that alternative funding could be sourced on satisfactory terms and conditions or at all. In this situation, carsales may be exposed to liability under the securities purchase agreement, once executed. Termination of the Underwriting Agreement could materially adversely affect carsales' business, cash flow and financial performance.

Key Risks

A. SPECIFIC RISKS RELATING TO THE ACQUISITION (CONTINUED)

12. Anticipated synergies and integration

There is a risk the anticipated benefits, cost savings and efficiencies associated with the Acquisition, may be achieved only in part, or not at all. This could impact carsales' financial performance and position, the future prospects of the Combined Business and the forecasts and prospective financial information regarding the Combined Business disclosed in this Presentation.

Without limiting the possible issues or challenges that could be faced in the further integration and consolidation of the Trader Interactive business, there may be issues with the integration of operating and management systems (such as IT, information, or accounting systems), challenges maintaining employee morale and attracting and motivating and retaining management personnel and other key employees, the possibility of faulty assumptions underlying expectations regarding the integration process, consolidating corporate and administrative infrastructures and eliminating duplicative operations and challenges that divert management attention or do not deliver the expected benefits of the Acquisition.

Many of these factors will be outside of Combined Business's control and these issues may cause unexpected delays, liabilities and costs to the Combined Business. Additionally, there are inherent risks in connection with the targeted potential synergies. For example, there is a risk that the targeted synergies of the Acquisition may be less than estimated or potential synergies are not achieved or take longer to achieve. If the integration of carsales and Trader Interactive takes longer than expected there may be delays in achieving the targeted potential synergies. In addition, carsales' initial estimate of the cost of integration may differ from the actual cost of integration. carsales may not be able to realise the targeted cost synergies and/or may not be able to increase its purchasing power or realise the benefits of a more efficient capital structure as a result of completion of the Acquisition.

Further, given the costs associated with implementing the targeted synergies, carsales' ability to realise the benefits is dependent, in part, on carsales and Trader Interactive having sufficient capital and other resources to complete the integration in the manner and time period contemplated. The estimated cost synergies from the Acquisition are predicated in character, may be affected by inaccurate assumptions or by known or unknown risks and uncertainties and may differ materially from results ultimately achieved. These risks may have a material impact on the operations, financial performance and/or financial position of the Combined Business and the future price of carsales' shares.

13. Change of control in Trader Interactive

The completion of the Acquisition will result in a change of control in Trader Interactive. Although carsales has conducted due diligence in connection with the Acquisition, there is a risk that the change of control may have an adverse impact on material contracts that Trader Interactive has entered into with third parties, including key customer and supplier agreements. Any loss of key merchants or contracts as a result of completion of the Acquisition may result in a material adverse impact to the operations, financial performance and/or financial position of the Combined Business.

B. OFFER SPECIFIC RISKS

1. Dilution risk

As the Entitlement Offer is non-renounceable, the issue of New Shares will dilute the interests of ineligible shareholders. Moreover, eligible retail shareholders who do not participate or take up their full Entitlements under the Entitlement Offer will have their percentage holding in carsales diluted as a result of the Entitlement Offer. Eligible retail shareholders who do take up their full Entitlements under the Entitlement Offer will not have their percentage holding in carsales diluted. Further, in the future, carsales may elect to issue further shares or engage in offers to fund its operations, for working capital purposes or to fund other opportunities that carsales may decide to pursue. Shareholders at the time may also be diluted as a result of such issuances of shares.

2. Regulatory risk

carsales must comply with the applicable foreign securities laws and regulations in each jurisdiction in which the Entitlement Offer will be made available. Any breach of the relevant legal or regulatory obligations or failure to meet compliance requirements in any of the relevant foreign jurisdictions may have an adverse impact on the success of the Entitlement Offer, as well as the financial and operating position of carsales.

Key Risks

B. OFFER SPECIFIC RISKS (CONTINUED)

3. Risks associated with an investment in shares

There are general risks associated with investments in equity capital such as carsales shares and the stock market. The trading price of carsales shares may fluctuate with movements in equity capital markets in Australia and internationally. This may result in the market price for the new shares issued under the Entitlement Offer being more or less than the Offer Price. There is also considerable uncertainty as to the ongoing impact of COVID-19 on the Australian, United States, European and other economies and of the recent events involving Russia and Ukraine. Rising rates of inflation globally and the increase in interest rates by the Reserve Bank of Australia and the United States Federal Reserve is creating further uncertainty and instability in the Australian, United States, European and global economies and may impact the market price of carsales shares. Generally applicable factors that may affect the market price of carsales shares include:

- general movements in Australian and international stock markets;
- investor sentiment;
- Australian and international economic conditions and outlook;
- changes in government legislation and policies, in particular taxation laws;
- announcement of new technologies;
- geopolitical instability, including international hostilities and acts of terrorism;
- demand for and supply of carsales shares;
- announcements and results of competitors; and
- analyst reports.

The operational and financial performance and position of carsales and carsales' share price may be adversely affected by a worsening of general economic conditions in Australia, as well as international market conditions and related factors. No assurance can be given that the New Shares will trade at or above the Offer Price. None of carsales, its directors or any other person guarantees the market performance of carsales or of the New Shares.

It is also possible that new risks might emerge as a result of Australian or global markets experiencing extreme stress, or existing risks may manifest themselves in ways that are not currently foreseeable. Equity markets have in the past and may in the future be subject to significant volatility.

4. Exchange rate fluctuations

The proceeds that carsales will receive from the Entitlement Offer will be denominated in AUD. However, the purchase price payable by carsales under the Acquisition will be denominated in USD. Given there is expected to be a substantial period of time between the conclusion of the Entitlement Offer and the payment of the purchase price under the Acquisition, there is a risk that AUD/USD exchange rate fluctuations may result in the proceeds received by carsales under the Entitlement Offer having a lower USD value when the payment of the purchase price is made. There is a risk that carsales will need to access alternative sources of funds, including debt markets, in the future to pay any shortfall in the purchase price resulting from exchange rate fluctuations. Possible increases in the interest rate, the cost of interest rate hedges and the level of financial covenants required by lenders in these situations may also adversely impact the operational and financial results of the Combined Business if additional funds are required in this scenario.

5. Liquidity risk

Shareholders who wish to sell their New Shares may be unable to do so at an acceptable price, or at all, if insufficient liquidity exists in the market. There is no guarantee of the liquidity of the New Shares and there is a risk that shareholders may lose some of the money invested.

Key Risks

C. RISKS RELATED TO INVESTMENT IN CARSALES, INCLUDING POST COMPLETION OF THE TRANSACTION

1. Cyber security

The cyber threat to companies around the world is growing and unrelenting. As online businesses, carsales and Trader Interactive are not immune to these risks. A cyberattack or hack of carsales' or Trader Interactive's systems, including those of third party providers of information technology services to carsales, could have serious impacts on the Combined Business's reputation, operational and financial performance.

carsales and Trader Interactive collect personal information on its customers. Data or security breaches may compromise the ability of carsales to protect customer data, which could result in breaches of privacy laws and may damage the Combined Business's brand, reputation and consumer confidence. Further, laws relating to data privacy are evolving across all jurisdictions and any changes to standards may adversely impact carsales systems and operating procedures.

Both carsales' and Trader Interactive's businesses may be adversely affected by malicious third party applications that interfere with, or exploit, security flaws in its websites. Viruses, worms and other malicious software programs could, among other things, jeopardise the security of information stored in a user's computer or in carsales' or Trader Interactive's computer systems or attempt to change the internet experience of users by interfering with carsales' and Trader Interactive's ability to connect with its users.

If carsales', Trader Interactive's and consequently the Combined Business's efforts to combat these malicious applications are unsuccessful, or if its products and services have actual or perceived vulnerabilities, carsales' business reputation and brand name may be harmed and user traffic could decline, which may result in a material adverse effect on the Combined Business's operations, financial performance and/or financial position.

2. Reputational risks

The success of carsales and its businesses and associates around the world, including Trader Interactive, is heavily reliant on its reputation and branding. Unforeseen issues or events, which place carsales' reputation at risk, may impact its future growth and profitability.

3. Relationships with dealers and OEMs

carsales and the Combined Business derive a significant proportion of their revenue from motor vehicle dealers and automotive manufacturers (**OEMs**). A change in the size and/or structure of this market could impact the earnings of the Combined Business. In particular, consolidation of the dealer market with fewer, larger dealers or increased manufacturer control of dealers' online advertising activity may impact upon the financial performance of the Combined Business. In addition, a significant proportion of the revenue of the Combined Business is generated under monthly agreements with motor vehicle dealers. Should a significant number of dealers cancel or fail to renew their agreements, this may have an adverse effect on the financial performance of the Combined Business.

4. Competition

The online advertising industry for automotives, commercial trucks, recreational vehicles, powersports and equipment industries is highly competitive. While carsales will undertake reasonable due diligence in its business decisions and operations, carsales will have no influence or control over the activities or actions of its competitors, whose activities or actions may positively or negatively affect the operating and financial performance of carsales and the Combined Business. For instance, new technologies could result in carsales' or Trader Interactive's various online platforms not being sufficiently differentiated to other similar offerings. The Combined Business's ability to develop additional online features could be adversely affected if it is unable to respond effectively and/or in a timely manner to the strategies and actions of competitors and potential competitors or the entry of new competitors into the market. This may in turn impede the financial condition and rate of growth of the Combined Business and its operations, financial performance and/or financial position.

5. Downturn in economy or advertising market

The performance of carsales and the Combined Business will continue to be influenced by the overall condition of the motor vehicle, commercial truck, recreational vehicle, powersports and equipment industries markets. These markets are influenced by the general condition of the Australian and US economies (along with others), which by their nature is cyclical and subject to change. In addition, carsales derives a significant proportion of its revenue from display advertisers on its network of websites. A decline or significant change in the advertising market as a result of broader economic influences or changing advertiser trends could have a negative impact on carsales' future earnings.

Key Risks

C. RISKS RELATED TO INVESTMENT IN CARSALES, INCLUDING POST COMPLETION OF THE TRANSACTION (CONTINUED)

6. Information technology

The performance of the Combined Business's websites, apps, databases, IT and management systems is very important to the reputation of the Combined Business, its ability to attract customers and to achieve overall market acceptance of its services.

The Combined Business's websites and business operations rely on owned and third party IT infrastructure and systems, telecommunications operators, data centres and other third parties to maintain its websites and provide its products and services to customers. Any interruption to these operations, corruption to the databases or loss of customer data could impair the Combined Business's ability to operate its customer facing websites which could have a negative impact on the Combined Business's financial performance and reputation. The Combined Business's financial performance will also depend on its ability to monitor and manage major projects such as website upgrades and other projects involving its IT infrastructure.

Although the Combined Business's systems have been designed around industry standard architectures, they remain vulnerable to damage or interruption from earthquakes, floods, fires, power loss, telecommunication failures, terrorist attacks, computer viruses or similar events. The Combined Business's disaster recovery planning cannot account for all eventualities. The websites operated by carsales and Trader Interactive have experienced system failures in the past and may do so in the future. If frequent or persistent significant system failures are experienced on carsales' and Trader Interactive's websites, they may need to take steps to increase the reliability of its systems and invest in further or improved back-up systems. This could be expensive, reduce operating margins and may not be successful in reducing the frequency or duration of unscheduled downtime. It would also negatively impact the Combined Business's business reputation and brand name.

7. Dependence on internet infrastructure

As online businesses, carsales and Trader Interactive are dependent on the ongoing maintenance of the global, regional and local internet infrastructure to provide the necessary data speed, capacity and security to allow it to offer viable services.

The internet has experienced significant growth in the number of users and amount of traffic. To the extent that the internet continues to experience increased numbers of users, there can be no assurance that the internet infrastructure will continue to be able to support the demands placed on it by continued growth. Any ongoing or serious disruptions to the performance of the internet in carsales' or Trader Interactive's respective markets will adversely affect the Combined Business's operations and growth plans and would damage its business reputation and brand name.

8. Reliance on search engine marketing

A minority component of the revenue of carsales and the Combined Business is attributable to customers who access the Combined Business' website by clicking on links that the Combined Business paid to list on search engine results pages. From time to time, the Combined Business places bids on key words at a certain cost per click, the cost of which is subsequently paid to the search engine in order to place these listings with a search engine. The cost of search engine marketing generally increases as the importance of online advertising increases and competition to be ranked higher in paid listings increases. Furthermore, businesses might have to submit higher bids in order to purchase certain key words to offset a reduction in their click-through rate. This may occur if the Combined Business were to suffer negative publicity or if its market share were to decline, or if any other factor impacted on its brand or reputation. In addition, if the Combined Business were to experience a reduction in natural search visibility in search engines, it could increase the Combined Business' reliance on search engine marketing. The business, financial performance and operations of the Combined Business may be materially adversely affected by any increase in the cost of, or in reliance on, search engine marketing, or any decrease in the effectiveness of its search engine marketing.

9. Litigation or disputes

In the ordinary course of business, carsales and the Combined Business may be involved in possible disputes. These disputes could give rise to litigation, the outcome of which could have a material adverse effect on their operations, financial performance and/or financial position. While the extent of any disputes and litigation cannot be ascertained at this time, any dispute or litigation may be costly and may adversely affect the operational and financial results of the Combined Business. There is also a risk that the Combined Business's reputation may suffer due to the profile and public scrutiny surrounding any such litigation and disputes regardless of their outcome.

Key Risks

C. RISKS RELATED TO INVESTMENT IN CARSALES, INCLUDING POST COMPLETION OF THE TRANSACTION (CONTINUED)

10. Intellectual Property

carsales and Trader Interactive regard substantial elements of their websites, software tools, applications, databases and underlying technology as proprietary. Despite precautionary measures, third parties may copy or otherwise obtain and use their respective proprietary information without authorisation or may develop similar technology independently. In addition, competitors may be able to design around their respective technologies or develop competing technologies substantially similar to those without any infringement of their proprietary rights. Any legal action the Combined Business may bring to protect its proprietary information could be unsuccessful and expensive and would divert management's attention from its business operations.

carsales and Trader Interactive are also subject to the risk of claims alleging infringement of third-party proprietary rights. If carsales or Trader Interactive infringes upon the rights of third parties, they may be unable to obtain licences to use those rights on commercially reasonable terms. Third parties that provide products and services that are critical to the Combined Business may be subject to similar claims, which could prevent them from continuing to provide these products and services. In either of these events, the Combined Business may be required to undertake substantial reengineering of its systems or processes in order to continue offering its services and it may not succeed in doing so. In addition, any claim of infringement could use substantial management time and result in the Combined Business incurring substantial costs to negotiate and resolve the claim. Furthermore, a party making such a claim could secure a judgment that requires carsales to pay substantial damages, which could adversely affect the Combined Business's operations, financial performance and/or financial position.

11. Electric vehicles

The number of electric vehicles being purchased is rapidly increasing. The average purchase price of an electric vehicle is currently greater than the average price of a conventional combustion engine vehicle. The engines of electric vehicles tend to last longer than the engines of traditional combustion engine vehicles. The increase in the sale of electric vehicles may result in consumers purchasing fewer vehicles and less frequent vehicle purchases by a consumer over their life. This could result in a decline in sales of traditional combustion engine vehicles, which includes commercial trucks and recreational vehicles, which could have an adverse financial impact on carsales and the Combined Business. Several electric vehicle manufacturers market and sell their products directly to consumers (e.g. Tesla) and this may extend to manufacturers of traditional combustion engine vehicles, which may have an adverse impact on the Combined Business' revenue that is generated from existing relationships with vehicle manufacturers and dealers.

12. Supply of vehicles

carsales' and Trader Interactive's ability to offer a wide variety of automotive and non-automotive products, including motor vehicles, commercial trucks, recreational vehicles, powersports and equipment products for sale are key contributors to the appeal of their respective business to customers. There is a risk that the Combined Business may be unable to continue to provide the same variety of products to customers if the number of motor vehicles, commercial trucks and recreational vehicles being supplied to the Australian market / US market (as applicable) by manufacturers decreases. This risk has been further heightened as a result of the conflict in Ukraine which has created shortages in the supply of essential items used in the manufacture of vehicles. This could adversely affect the operations, financial performance and/or financial position of the Combined Business.

13. Shift away from car ownership

carsales' core business offering relies on the desire of individuals to own a vehicle. There is a risk that with the increase in alternative options to individual vehicle ownership, for example, vehicle sharing services, there may be a shift away from individual vehicle ownership in the long term albeit during the COVID-19 pandemic this trend declined as individuals preferred to have their own vehicles. As the effects of the COVID-19 pandemic diminish, it may be likely that the trend towards individual car ownership increases in the future. This could adversely affect the operations, financial performance and/or financial position of carsales.

14. Insurance

Not all risks are insured or insurable, carsales cannot be certain that its current insurance is adequate or that adequate insurance coverage for potential losses and liabilities will be available in the future on commercially reasonable terms. If carsales experiences a loss in the future, the proceeds of the applicable insurance policies, if any, may not be adequate to cover replacement costs, lost revenues, increased expenses or liabilities to third parties. Additionally, carsales' current insurance policies may not cover newly acquired assets or businesses (including its investment in Trader Interactive) and/or such acquisition may involve a substantial increase in premium to achieve coverage. These risks may have a materially adverse effect on carsales' financial position and performance.

Key Risks

C. RISKS RELATED TO INVESTMENT IN CARSALES, INCLUDING POST COMPLETION OF THE TRANSACTION (CONTINUED)

15. Expiry or termination of material contracts

carsales and Trader Interactive rely on service providers for a number of ongoing services, which if terminated might have significant financial and operational implications for their respective businesses. Whilst each party seeks to manage these arrangements, from time to time, in the ordinary course of business, material contracts will be terminated by the counterparty, expire or come up for renegotiations.

Whilst carsales and Trader Interactive carefully manage the replacement and renegotiation of material contracts and seeks to maintain positive relationships with counterparties, there is a risk that a counterparty may not be willing to enter into a further agreement or may seek to renegotiate the terms of the contract on less favourable terms for carsales. If any of the material contracts are terminated by the counterparty, not renewed or renegotiated on less favourable terms, it may have an adverse impact on the operations, financial performance and/or financial position of the Combined Business.

16. Future acquisitions

carsales may consider future acquisitions where it believes they are supportive of carsales' growth strategy or are otherwise in the best interests of carsales. There are a number of potential risks associated with acquisitions, including but not limited to the integration of financial, operational and managerial resources. If the assets or businesses are not successfully integrated, this may have a material adverse effect on carsales' financial and operational performance.

In addition, while carsales will conduct due diligence on proposed acquisitions, there is no assurance that an acquisition will perform as forecast once fully integrated, or successfully achieve the desired objectives, including, where applicable, any synergies. Further, carsales may encounter unanticipated events, circumstances or legal liabilities in connection with any proposed acquisition, including risks with financing or refinancing any proposed acquisition.

17. Key personnel

carsales relies on the talent and experience of its directors, key senior management (which will include those of Trader Interactive post completion of the Acquisition) and staff generally. The loss of any key personnel or a group of staff generally could cause disruption to the conduct of the Combined Business in the short term and may have a material adverse impact on the Combined Business' operations and/or financial performance. It may be difficult to replace key personnel, or to do so in a timely manner or at comparable expense.

18. Culture and talent

Poor corporate culture can lead to, amongst other things, unethical practices, lack of trust, poor decision-making, increased employee turnover and reduced motivation. Any of these outcomes may have a material adverse impact on carsales' operations and financial performance. As with carsales' key personnel, the future success of carsales will depend substantially on its ability to attract and retain high quality staff and consultants. carsales relies on its highly capable staff to manage the operational, sales, compliance and other functions of its business. There is a risk that, if carsales is understaffed (or the workload of existing staff is unsustainable), carsales' operational and financial performance will suffer.

19. International expansion

With the expansion of the business into new high growth international geographies, carsales becomes exposed to the macroeconomic environment of these markets as well as to fluctuations in exchange rates. carsales may not be able to fully recoup its investment in these markets should it not be able to accelerate the growth of its business through the implementation of carsales' business models, intellectual property and technologies.

20. Regulatory risk

carsales must comply with wide ranging laws and regulations in each of the jurisdictions in which it operates, which include consumer protection laws. Changes to laws and regulations that apply to carsales and the Combined Business in any of the jurisdictions in which they operate may have a material adverse effect on carsales' and the Combined Business's financial position and prospects. Further, regulatory requirements in any of the jurisdictions in which carsales operates may become more burdensome in the future, which may result in the Combined Business being required to dedicate more time, resource and expenditure to ensure compliance. Any breach of the relevant legal or regulatory obligations or failure to meet compliance requirements may have an adverse impact on the financial performance and operating position of the Combined Business.

Key Risks

D. GENERAL RISKS

1. Dividends

The payment of dividends in respect of carsales' shares is impacted by several factors, including carsales' profitability, capital requirements and free cash flow. Any future dividends will be determined by carsales' board having regard to these factors, among others. There is no guarantee that any dividend will be paid by carsales, or if paid, paid at historical levels.

2. Macroeconomic conditions, including COVID-19

Adverse macroeconomic conditions could have an impact on the retail sector leading to lower demand for automotive and non-automotive products, which could adversely affect the Combined Business's operations, financial performance and/or financial position. Sustained periods of economic downturn leading to increased unemployment, higher cost of living and increased interest rates may also lead to lower demand, which could adversely affect the Combined Business's operations, financial performance and/or financial position.

The ongoing COVID-19 pandemic has had a significant impact on the global economy and the ability of individuals, businesses, and governments to operate. There continues to be considerable uncertainty as to the duration of and further impact of COVID-19 and related variants, including in relation to government, regulatory or health authority actions, work stoppages, lockdowns, quarantines and travel restrictions and the impact on the Australian, United States and global economy and share markets. The COVID-19 pandemic and related containment measures, as well as other macroeconomic events, including central bank policies to curb inflation and future government actions, may have an impact on customer purchasing appetite which could have an adverse impact on the Combined Business's financial performance / financial position, operations and success.

Overall, the Combined Business's financial performance, financial position and the price of carsales' shares may fluctuate due to various factors, including movements in domestic and international capital markets, recommendations by brokers and analysts, investor perceptions, interest and exchange rates, changes in government, inflation, fiscal, monetary and regulatory policies, prices of commodities, global geopolitical events (including the recent events involving Russia and Ukraine, which appear to have had a significant impact on financial markets causing general uncertainty in the market), hostilities and acts of terrorism, and other factors.

3. Rising inflation (vehicle costs)

Inflation is increasing globally. As inflation increases, this may result in prices of motor vehicles, commercial trucks and recreational vehicles increasing. It may also result in the prices of digital marketing solutions and services in connection with these products increasing. Inflation also increases manufacturing costs for vehicle manufacturers and these costs are passed on to consumers. If these prices increase, fewer consumers may be able to purchase vehicles. This may result in a reduction of the number of vehicles sold by manufacturers and dealers, which could have an adverse impact on the operations, financial performance and/or position of carsales and the Combined Business.

4. Rising inflation and staff shortages

Unemployment rates in Australia and the United States are currently among the lowest in history. This has increased the costs for employers of retaining existing staff and hiring new staff. The challenging labour market and increasing inflation (which increases the cost of living for employees) makes it more difficult to retain existing staff and hire new staff. The Combined Business relies on the quality and stability of its work force for performance. If inflation continues to rise and the labour market remains challenging, this may result in a decline in the Combined Business' financial performance, which could have an adverse impact on the operations, financial performance and/or position of the Combined Business.

5. Rising interest rates (vehicle sales)

Interest rates in Australia and the United States are increasing. Further, the Reserve Bank of Australia and the United States Federal Reserve have indicated that it is likely that interest rates will continue to increase in Australia and the United States respectively. Increasing interest rates may have several consequences for sales of motor vehicles, commercial trucks and recreational vehicles, including it being more difficult for consumers to obtain vehicle finance as lenders may require additional security or impose stricter requirements before advancing vehicle finance, vehicle finance being more expensive and for consumers with existing vehicle finance, the servicing of this debt could be more expensive. This could result in fewer vehicle sales by manufacturers and dealers, as well as fewer consumers being able to obtain vehicle finance, which could have an adverse financial impact on the operations, financial performance and/or position of the Combined Business.

Key Risks

D. GENERAL RISKS (CONTINUED)

6. Force majeure

In addition to the COVID-19 pandemic risks, events may occur within or outside Australia that could have an adverse effect on the global economies and carsales' share price. The events include hostilities (including the recent events involving Russia and Ukraine, which appear to have had a significant impact on financial markets causing general uncertainty in the market), acts of terrorism, civil wars, labour strikes, natural disasters or other man-made disasters.

7. Changes in tax rules or their interpretation

Changes in tax law, or changes in the way tax laws are interpreted may impact the tax liabilities of carsales and the Combined Business, shareholder returns, or the tax treatment of an investment. In particular, both the level and basis of taxation may change. Tax law is frequently being changed, both prospectively and retrospectively. Any actual or alleged failure to comply with, or any change in, the application or interpretation of tax rules applied in respect of such transactions, may increase carsales' and the Combined Business's tax liabilities or expose it to legal, regulatory or other actions.

8. Australian online retail market

There is no guarantee that the Australian online retail market will continue to grow into the future, or as currently forecast. Growth in the Australian online retail market is expected to be driven partly by the migration of customers from traditional retail formats to online retail platforms. This factor is in part outside the control of online retailers, including carsales, and there is no guarantee that the migration of customers observed in recent years will continue in the future. If online penetration of the Australian retail market does not increase in line with carsales' expectations, carsales may not be able to acquire new customers or engage existing customers, and its business, financial condition and operating results may suffer.

9. Trading Patterns

carsales' financial performance depends in part on its ability to gauge and react to changing trading patterns in a timely manner. The change to trading patterns is further heightened as a result of COVID-19 and ongoing disruption which has created volatility in customer spending patterns. If carsales fails to react to changes in trading patterns in a timely manner, this may result in lower revenue and margins and could adversely impact carsales' financial and operational performance.

10. Changes in Australian Accounting Standards

Australian Accounting Standards are issued by the Australian Accounting Standards Board ("AASB") and are outside of the control of carsales and its directors. Any changes to the accounting standards or to the interpretation of those standards may have an adverse effect on the reported financial performance and position of carsales.

There is also a risk that interpretations of existing Australian Accounting Standards, including those relating to the measurement and recognition of key income statement and balance sheet items, including revenue and receivables, may differ. Changes to Australian Accounting Standards issued by the AASB or changes to the commonly held views on the application of those standards could materially adversely affect the financial performance and position reported in carsales' consolidated financial statements.

11. Currency risks

Revenue and expenditure in overseas jurisdictions are subject to the risk of fluctuations in foreign exchange markets. carsales carries on a large part of its business outside of Australia. Accordingly, revenues and payments will be made in those countries' currencies and may deviate from budgeted expectations if there are adverse currency fluctuations against the Australian dollar.

12. Heightened Geopolitical Risk

The ongoing Russia-Ukraine conflict has had and will continue to have a significant impact on vehicle manufacturers and dealers (e.g. shortages of critical materials, a slowing down of automotive electrification, disruptions to key supply chains, semi-conductor and electric vehicle battery manufacturing, and a reduction in catalytic converter production), resulting in a decline in the number of vehicles sold and car prices remaining high. This conflict has also created a significant degree of uncertainty in global markets, which could have an adverse impact on carsales.

Key Risks

D. GENERAL RISKS (CONTINUED)

13. General Operating Risks

The performance of carsales may be subject to conditions beyond the control of its management, and these conditions may reduce sales of its services and/or increase costs of both current and future operations (e.g. unplanned shutdowns for an extended period of time, changes in legislative requirements, variation in timing of regulatory approvals, abnormal or severe weather or climatic conditions, natural disasters, fire and explosion events, disruption to transport operations due to a significant event or regulatory action, reputational issues, unexpected maintenance or technical problems, new technology failures and industrial disruption).

14. Climate Change

Carbon emissions from traditional combustion engine vehicles is one of the leading causes of global warming. For this reason, several governments have implemented measures to reduce these emissions (e.g. the introduction of mandatory catalytic converters). This area is evolving rapidly and governments are under significant pressure to make changes to reduce climate change and carbon emissions. These changes could result in an increase in the cost of vehicles, which is carried by the consumer, or other consequences that could have an adverse impact on the operations, financial performance and/or financial position of carsales.

15. Historical Acquisitions

In accordance with its growth strategy, carsales has undertaken several acquisitions in the past. At the time of each acquisition, carsales conducted due diligence. Despite this, it is possible that one or more issues or liabilities may not have been identified, or are of an amount greater than expected, and that the protections negotiated by carsales prior to the relevant acquisition are inadequate in the circumstances and may materially affect carsales and its business in the future.

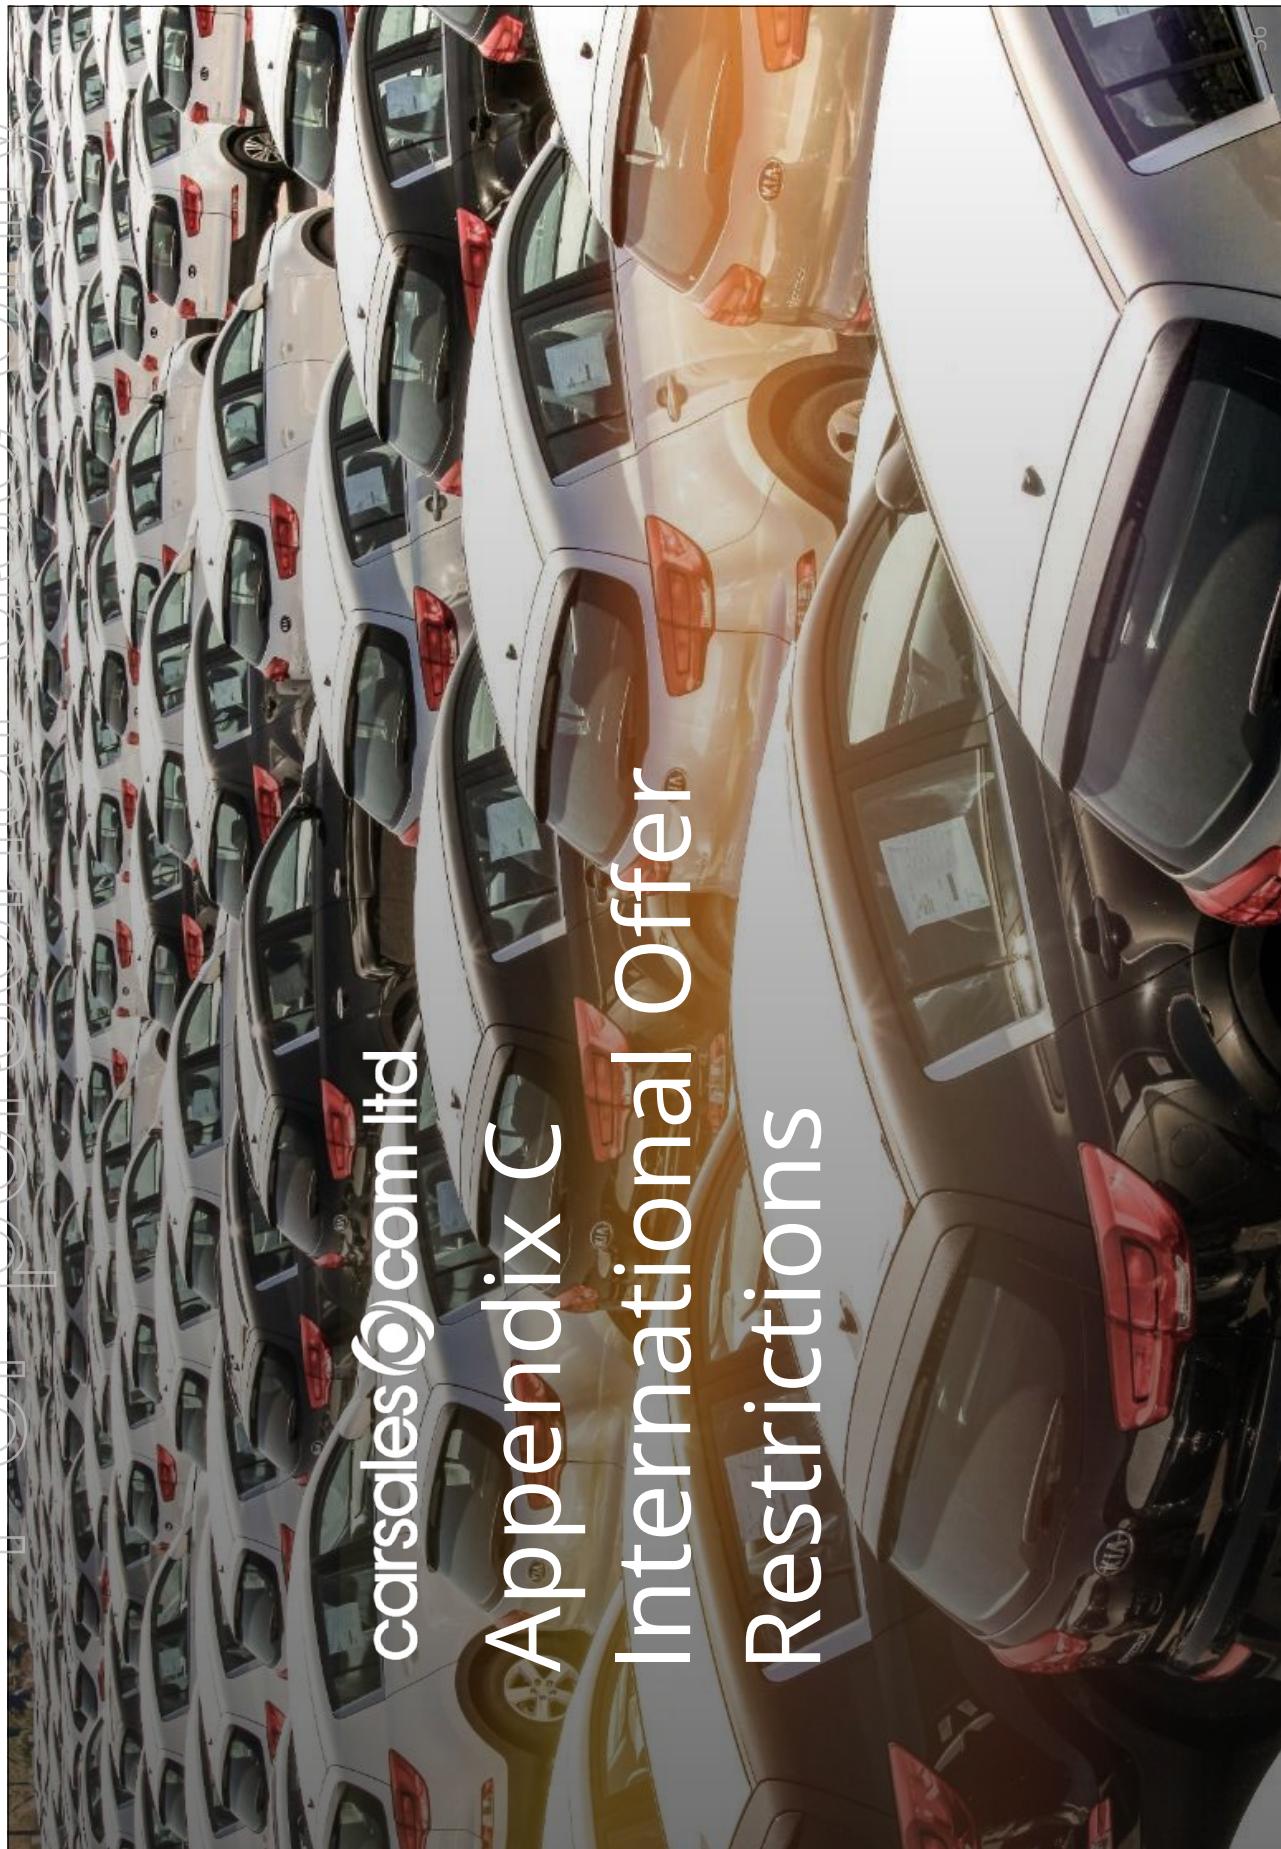

E. OTHER RISKS

The above risks should not be taken as a complete list of the risks associated with an investment in carsales. The risks outlined above and other risks not specifically referred to may in the future materially adversely affect the value of carsales securities and their performance. Accordingly, no assurance or guarantee of future performance or profitability is given by carsales and the Combined Business in respect of carsales shares.

- an offer of Shares or transaction is announced which may result in a person and their associates acquiring a beneficial interest in, or voting power of, 50% or more of the interests in CAR; or
- there is any adverse, or prospective adverse change or disruption to the financial markets, political or economic conditions of Australia, New Zealand, the United States, the United Kingdom or Hong Kong.

If the Underwriters terminate their obligations under the Underwriting Agreement, the Underwriters will not be obliged to perform any of their obligations that remain to be performed.

Termination of the Underwriting Agreement could have an adverse impact on the amount of proceeds raised under the Entitlement Offer. In these circumstances, carsales would need to utilise alternative funding to achieve its objectives described in this Presentation.

For details of the fees payable to the Underwriters in consideration for performing their obligations under the Underwriting Agreement, see the Appendix 3B released to ASX on 27 June 2022.

The retail component of the Entitlement Offer ("Retail Entitlement Offer") is expected to raise approximately A\$365 million, which in conjunction with the Institutional Entitlement Offer would result in carsales raising approximately A\$1,207 million. Australian Tax Considerations

4 Australian Tax Considerations

This Section summarises certain Australian income tax, capital gains tax (**CGT**), goods and services tax (**GST**) and stamp duty implications of the Retail Entitlement Offer for Eligible Retail Shareholders who hold their Existing Shares, Entitlements and New Shares on capital account.

This section is general in nature and does not take account of the individual circumstances of particular Eligible Shareholders and does not constitute tax advice. For instance, this section does not consider the position of Eligible Retail Shareholders who:

- are not resident solely in Australia for Australian income tax purposes;
- are in the business of security trading, or who hold their Existing Shares on revenue account or as trading stock (including shareholders such as banks, insurance companies and shareholders carrying on a business of security trading);
- are exempt from Australian income tax;
- acquired their Existing Shares under an employee share or option plan, or in return for services provided; or
- are subject, or have elected to become subject, to the Division 230 "Taxation of Financial Arrangements" (**TOFA**) provisions contained in the *Income Tax Assessment Act 1997* (Cth).

This Section does not purport to be a complete analysis of the potential tax consequences of the Retail Entitlement Offer and is intended only to provide a general guide to the Australian tax implications. Eligible Retail Shareholders (including those noted above) should seek advice from an appropriate professional advisor in relation to the tax implications (Australian and non-Australian, as applicable) of the Retail Entitlement Offer based on their own individual circumstances (including tax residency).

Neither CAR nor any of its officers or employees, nor its taxation and other advisers, accepts any liability or responsibility in respect of any statement concerning taxation consequences, or in respect of the taxation consequences.

The comments below are based on the Australian taxation legislation, case law and administrative practice adopted by the Australian Taxation Office (**ATO**) as it applies as at 9.00am (Melbourne time) on Friday, 1 July 2022. Other than as expressly discussed, the comments do not take into account or anticipate changes in Australian tax law or future judicial or administrative interpretations of tax law after this time unless otherwise specified.

4.1 Issue of Entitlement

The issue of the Entitlement should not in itself result in any amount being included in the assessable income of an Eligible Retail Shareholder.

4.2 Exercise of Entitlement

New Shares will be acquired where the Eligible Retail Shareholder exercises (i.e. takes up) all or part of their Entitlement under the Retail Entitlement Offer.

An Eligible Retail Shareholder should not derive any assessable income, or make any capital gain or capital loss, at the time of exercising their Entitlement under the Retail Entitlement Offer.

For Australian Capital Gains Tax purposes, New Shares should be taken to have been acquired on the day that an Eligible Retail Shareholder exercises their Entitlement.

The cost base of each New Share should include the Offer Price payable for each New Share (plus any non-deductible incidental costs the Eligible Retail Shareholder incurs in acquiring the New Shares). For CGT purposes, the Eligible Retail Shareholder should apportion the costs of acquiring each New Share over each of the Shares acquired on a reasonable basis. We recommend independent tax advice is obtained to determine the appropriate allocation.

4 Australian Tax Considerations continued

4.3 Lapse of Entitlement

If an Eligible Retail Shareholder does not accept all or part of their Entitlement in accordance with the instructions, that Entitlement will lapse and the Eligible Retail Shareholder will not receive any consideration for their Entitlement that is not taken up. There should be no tax implications for an Eligible Retail Shareholder from the lapse of the Entitlement.

4.4 Distributions on New Shares

Any future dividends or other distributions made in respect of New Shares should generally be subject to the same income tax treatment as dividends or other distributions made on Existing Shares held in the same circumstances.

4.5 Disposal of New Shares

As each share comprising the Retail Entitlement Offer is a separate CGT asset, the disposal of New Shares should constitute a disposal for CGT purposes. Accordingly, the capital proceeds referable to the disposal of each individual Share should be determined by apportioning the total capital proceeds received from the disposal of the New Shares on a reasonable basis. We recommend independent tax advice is obtained to determine the appropriate allocation.

On disposal of a New Share, an Eligible Retail Shareholder should:

- make a net capital gain if the capital proceeds received on disposal exceed the total cost base of the New Share; or
- make a net capital loss if the capital proceeds are less than the total reduced cost base of the New Share.

Eligible Retail Shareholders that are individuals, trustees or complying superannuation entities and that have held their New Shares for at least 12 months prior to disposal should be entitled to apply the applicable CGT discount factor to reduce the capital gain (after offsetting available capital losses). The CGT discount factor is 50% for individuals and trustees and 33.33% for complying superannuation entities. The CGT discount is not available to companies that are not trustees. Trustees should seek specific tax advice regarding the tax consequences arising as a result of discount capital gains.

For the purpose of determining whether the New Shares have been held for 12 months or more, Eligible Retail Shareholders should be taken to have acquired them when they exercised their Entitlement under the Retail Entitlement Offer.

Eligible Retail Shareholders that make a capital loss can only use that loss to offset other capital gains from other sources (i.e. the capital loss cannot be used against taxable income on revenue account). However, if the capital loss cannot be used in a particular income year it may be carried forward for use in future income years, noting that depending on the tax profile of the relevant Eligible Retail Shareholder (e.g. a corporate shareholder that is not a trustee), certain loss utilisation tests may need to be satisfied prior to utilisation of the capital loss.

4.6 Taxation of Financial Arrangements

The TOFA provisions operate to make assessable or deductible, gains or losses from certain 'financial arrangements' (importantly, the CGT discount is not available for any gain that is subject to the TOFA provisions). A right to receive a share is a 'financial arrangement', however, depending on the facts and circumstances of a particular Eligible Retail Shareholder, the TOFA provisions may not apply. Eligible Retail Shareholders should seek advice from an appropriate professional advisor in relation to the implications of the TOFA provisions.

4.7 Non-resident CGT withholding

The Foreign Resident Capital Gains Withholding (**FRCGW**) rules can apply to the disposal of certain taxable Australian property, an indirect Australian real property interest or an option or right to acquire such property or interest, whereby a 12.5% non-final withholding tax may be applied.

For Eligible Retail Shareholders who receive and/or dispose of their New Shares, the FRCGW rules generally should not apply. A Share in CAR, or option/right to acquire such a Share, generally should not be a relevant interest to which the FRCGW rules apply having regard to the nature of CAR's business and assets (i.e. CAR's value is not principally derived from Australian real property). In addition, the FRCGW rules should not apply to the disposal of New Shares on the ASX (in accordance with a specific exemption).

It is recommended that Eligible Retail Shareholders and Ineligible Retail Shareholders consider the application of the FRCGW rules to their own individual circumstances (having regard to the circumstances of CAR and the Retail Entitlement Offer) in consultation with their professional advisor(s) and satisfy the requirements of the FRCGW rules where necessary.

4.8 Withholding taxes

CAR may be required to withhold tax from Eligible Retail Shareholders on payments of dividends that are not fully franked at the specified rate (currently 47%), and remit such amounts to the ATO, unless the Eligible Retail Shareholder has provided an Australian Business Number (**ABN**), Tax File Number (**TFN**), or they have informed CAR that they are exempt from quoting their ABN or TFN.

Eligible Retail Shareholders are not required to provide their ABN or TFN to CAR, however they may choose to do so. If an Eligible Retail Shareholder has quoted their ABN or TFN to CAR, or an exemption from quoting their TFN exists and CAR has been informed, this quotation or exemption should also apply in respect to any New Shares acquired by that Eligible Retail Shareholder.

Australian tax resident shareholders are able to provide their TFN or ABN online at www.computershare.com.au/easyupdate/car. When providing your details online, you will be required to enter your Securityholder Reference Number (**SRN**) or Holder Identification Number (**HIN**) as shown on your issuer sponsored holding statement or CHESS holding statement (as applicable) and other personal details.

Eligible Retail Shareholders may be able to claim an income tax credit/refund (as applicable) in their income tax returns in respect of any tax withheld.

4.9 Tax File Number

If an Eligible Retail Shareholder has quoted their Australian Business Number (**ABN**), Tax File Number (**TFN**) or an exemption from quoting their TFN exists, this quotation or exemption will also apply in respect to any New Shares acquired by that Eligible Retail Shareholder.

4.10 Goods and Services Tax (GST)

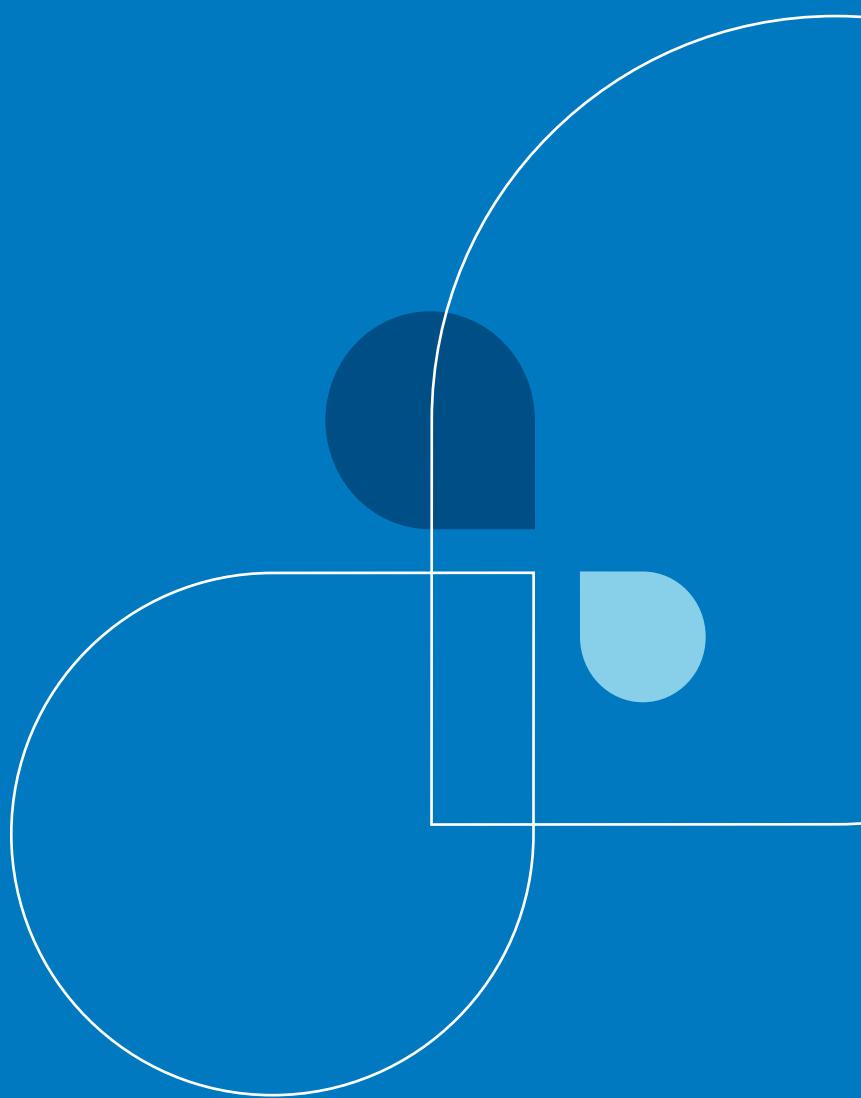

The taking up of the New Shares should be classified as a "financial supply" for Australian GST purposes. Accordingly, Australian GST should not be payable in respect of amounts paid for the purchase of the New Shares. Subject to certain requirements, there may be a restriction on the entitlement of Eligible Retail Shareholders to claim an input tax credit for any GST incurred on costs associated with the acquisition of New Shares.

4.11 Stamp duty

No stamp duty should be payable in respect of the taking up of New Shares.

Important
Information

5 Important Information

This Information Booklet (including the ASX Announcements in Section 3) and your personalised Entitlement and Acceptance Form have been prepared by CAR.

This Information Booklet is dated Friday, 1 July 2022 (other than the Investor Presentation, the announcement of the Entitlement Offer and completion of Institutional Entitlement Offer published on the ASX website on Monday, 27 June 2022 and Wednesday, 29 June 2022, respectively). The information contained in this Information Booklet remains subject to change without notice and CAR is not responsible for updating this Information Booklet.

There may be additional announcements made by CAR after the date of this Information Booklet and throughout the Retail Entitlement Offer Period that may be relevant to your consideration of whether to take up or do nothing in respect of your Entitlement. Therefore, it is prudent that you check whether any further announcements have been made by CAR (by visiting the ASX website at www.asx.com.au) before submitting your Entitlement and Acceptance Form to take up your Entitlement or before making a decision to allow your Entitlement to lapse.

No party other than CAR has authorised or caused the issue of this Information Booklet, or takes any responsibility for, or makes, any statements, representations or undertakings in this Information Booklet.

This Information Booklet is important and requires your immediate attention.

You should read this Information Booklet carefully and in its entirety before deciding how to deal with your Entitlement. In particular, you should consider the risk factors outlined in the 'Key Risks' Section of the Investor Presentation included in Section 3 of this Information Booklet, any of which could affect the operating and financial performance of CAR or the value of an investment in CAR.

You should consult your professional adviser to evaluate whether or not to participate in the Retail Entitlement Offer.

CAR may (in its absolute discretion) extend the Retail Entitlement Offer to any institutional shareholder that was eligible to participate in the Institutional Entitlement Offer but was not invited to participate in the Institutional Entitlement Offer (subject to compliance with relevant laws).

5.1 Trading of New Shares

It is the responsibility of each applicant to confirm their holding before trading in New Shares. Any applicant who sells New Shares before receiving written confirmation of their holding will do so at their own risk.

CAR and the Underwriters disclaim all liability whether in negligence or otherwise (to the maximum extent permitted by law) to persons who trade New Shares before receiving their holding statement, whether on the basis of confirmation of the allocation provided by CAR, the Share Registry or the Underwriters.

If you are in any doubt as to these matters, you should first consult with your professional adviser.

5.2 Eligible Retail Shareholders

This Information Booklet contains an offer of New Shares to Eligible Retail Shareholders with a registered address in Australia and New Zealand and has been prepared in accordance with section 708AA of the Corporations Act as notionally modified by *ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84*. Accordingly, neither this Information Booklet nor the Entitlement and Acceptance Form are required to be lodged or registered with ASIC and no prospectus for the Entitlement Offer will be prepared. These documents do not contain, or purport to contain, all of the information that a prospective investor may require in evaluating a possible investment in CAR. They do not and are not required to contain all of the information which would be required to be disclosed in a prospectus.

Shareholders who are not Eligible Retail Shareholders are Ineligible Retail Shareholders. CAR reserves the right to determine whether a Shareholder is an Eligible Retail Shareholder or an Ineligible Retail Shareholder.

5 Important Information continued

5.3 Ineligible Retail Shareholders

CAR has decided that it is unreasonable to make offers under the Retail Entitlement Offer to shareholders who have registered addresses outside Australia and New Zealand. CAR has had regard to the number of such holders in those places and the number and value of the New Shares that they would be offered, and the cost of complying with the relevant legal and regulatory requirements in those places.

Ineligible Retail Shareholders are not eligible to participate in the Retail Entitlement Offer due to securities laws restrictions on the offer of New Shares in certain jurisdictions.

5.4 Eligible Institutional Shareholders

Eligible Institutional Shareholders are institutional shareholder to whom the Underwriters made an offer on behalf of CAR under the Institutional Entitlement Offer.

5.5 Ranking of New Shares

New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally in all respects with Existing Shares from the date of issue. The rights and liabilities attaching to the New Shares are set out in CAR's constitution, a copy of which is available online at CAR's website: <https://shareholder.carsales.com.au/charters/>.

5.6 Risks

An investment in New Shares is subject to investment and other known and unknown risks, uncertainties and assumptions, many of which are beyond the control of CAR and its board, including the risks described in the Investor Presentation included in Section 3 of this Information Booklet, which could cause actual results, performance or achievements to differ materially from future results, performance or achievements expressed or implied by any forward-looking statements in this Information Booklet. Neither CAR, its officers, employees, agents, associates and advisers, nor any other person, warrants or guarantees the future performance of the New Shares, any particular rate of return, the performance of CAR, the repayment of capital from CAR or any particular taxation treatment. In considering an investment in the New Shares, you should have regard to (among other things) the risks and disclaimers outlined in this Information Booklet.

You should refer to the 'Key Risks' Section of the Investor Presentation (included in Section 3 of this Information Booklet) which details important factors and risks that could affect the financial and operating performance of CAR. You should consider these factors in light of your personal circumstances, including financial and taxation issues, before making a decision in relation to your Entitlement.

5.7 Reconciliation and the rights of CAR and the Underwriters

The Retail Entitlement Offer is a complex process and in some instances investors may believe that they will own more Shares than they ultimately did as at the Record Date or are otherwise entitled to more New Shares than initially offered to them. These matters may result in a need for reconciliation. If reconciliation is required, it is possible that CAR may need to issue additional New Shares to ensure that the relevant investors receive their appropriate allocation of New Shares. These additional New Shares would be issued, if required, at the Offer Price.

CAR also reserves the right to reduce the size of an Entitlement or number of New Shares allocated to Eligible Institutional Shareholders or Eligible Retail Shareholders, or persons claiming to be Eligible Institutional Shareholders or Eligible Retail Shareholders or other applicable investors, if CAR believes in its complete discretion that their claims are overstated or if they or their nominees fail to provide information requested to substantiate their claims. In that case, CAR may, in its discretion, require the relevant shareholder to transfer excess New Shares to the Underwriters at the Offer Price per New Share. If necessary, the relevant Shareholder may need to transfer Existing Shares held by them or to purchase additional Shares on-market to meet this obligation. The relevant Shareholder will bear any and all losses caused by subscribing for New Shares in excess of their Entitlement and any actions they are required to take in this regard.

By applying under the Retail Entitlement Offer, those doing so irrevocably acknowledge and agree to do the above as required by CAR in its absolute discretion. Those applying acknowledge that there is no time limit on the ability of CAR nor the Underwriters to require any of the actions set out above.

5.8 No cooling off rights

Cooling off rights do not apply to an investment in New Shares. You cannot withdraw your Application once it has been submitted.

5.9 Rounding of Entitlements

Where fractions arise in the calculation of an Entitlement, they will be rounded up to the nearest whole number of New Shares.

5.10 Notice to nominees and custodians

The Retail Entitlement Offer is being made to all Eligible Retail Shareholders. Nominees and custodians with registered addresses in Australia and New Zealand, irrespective of whether they participate under the Institutional Entitlement Offer, may also be able to participate in the Retail Entitlement Offer in respect of some or all of the beneficiaries on whose behalf they hold Existing Shares, provided that the applicable beneficiary would satisfy the criteria for an Eligible Retail Shareholder. Where any holder is acting as a nominee for a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Retail Entitlement Offer is compatible with applicable foreign laws, including as discussed in this Information Booklet.

If CAR believes that you hold Shares as a nominee or custodian you will have received, or will shortly receive, a letter in respect of the Retail Entitlement Offer. Nominees and custodians should consider carefully the contents of that letter and note in particular that the Retail Entitlement Offer is not available to Eligible Institutional Shareholders who were invited to participate in the Institutional Entitlement Offer (whether they accepted their Entitlement or not) and others who were treated as Ineligible Institutional Shareholders under the Institutional Entitlement Offer.

Persons acting as nominees or custodians for other persons must not take up any Entitlements on behalf of, or send this Information Booklet (or any part of it) or any other documents related to the Retail Entitlement Offer to, any person in the United States or any person that is acting for the account or benefit of a person in the United States. Persons in the United States and persons acting for the account or benefit of persons in the United States (to the extent such persons are acting for the account or benefit of persons in the United States) will not be able to take up any of their Entitlements and may receive no value for any such Entitlements held.

Nominees and custodians may not distribute any part of this Information Booklet, or take up Entitlements on behalf of persons, in the United States or in any other country outside Australia or New Zealand except to beneficial shareholders who are professional or institutional shareholders in other countries (other than the United States) where CAR may determine it is lawful and practical to make the Retail Entitlement Offer.

CAR is not required to determine whether or not any registered holder or investor is acting as a nominee or custodian or the identity or residence of any beneficial owners of Existing Shares or Entitlements.

5.11 Not investment advice

This Information Booklet is not a prospectus under the Corporations Act and has not been lodged with ASIC. It is also not financial product advice and has been prepared without taking into account your investment objectives, financial circumstances or particular needs. CAR is not licensed to provide financial product advice in respect of the New Shares. This Information Booklet does not purport to contain all the information that you may require to evaluate a possible Application for New Shares, nor does it purport to contain all the information which would be required in a prospectus prepared in accordance with the requirements of the Corporations Act. It should be read in conjunction with CAR's other periodic statements and continuous disclosure announcements lodged with ASX, which are available at www.asx.com.au.

5 Important Information continued

Prospective investors should conduct their own independent investigation and assessment of the Retail Entitlement Offer and the information contained in, or referred to in, this Information Booklet. An investment in CAR is subject to investment risk including possible loss of income and principal invested. Before deciding whether to apply for New Shares, you should consider all materials sent to you in relation to the Retail Entitlement Offer and any relevant materials lodged with ASX, and whether the New Shares are a suitable investment for you in light of your own investment objectives, financial circumstances and investment needs (including financial and taxation issues) and having regard to the merits or risks involved (including the 'Key Risks' set out in the Investor Presentation included in Section 3 of this Information Booklet). If, after reading the Information Booklet, you have any questions about the Retail Entitlement Offer, you should contact your professional adviser or call the Offer Information Line on 1300 850 505 (within Australia) and +61 3 9415 4000 (outside Australia) between 8.30am and 5.00pm (Melbourne time) Monday to Friday during the Retail Entitlement Offer Period. Alternatively, if you are located in Australia or New Zealand, you can also visit the Entitlement Offer Website: www.carsalesoffer.com.au.

5.12 Quotation and trading

CAR will apply to ASX for official quotation of the New Shares in accordance with the Listing Rule requirements. If ASX does not grant quotation of the New Shares, CAR will repay all Application Money (without interest).

Subject to quotation being granted, it is expected that normal trading of New Shares allotted under the Retail Entitlement Offer will commence on Thursday, 21 July 2022.

5.13 Continuous disclosure

CAR is a "disclosing entity" under the Corporations Act and is subject to regular reporting and disclosure obligations under the Corporations Act and the Listing Rules, including the preparation of annual reports and half yearly reports.

CAR is required to notify ASX of information about specific events and matters as they arise for the purposes of ASX making that information available to the stock markets conducted by ASX. In particular, CAR has an obligation under the Listing Rules (subject to certain exceptions) to notify ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price or value of CAR's Shares. That information is available to the public from ASX.

Some documents are required to be lodged with ASIC in relation to CAR. These documents may be obtained from, or inspected at, an ASIC office.

5.14 Information Booklet availability

If you are in Australia or New Zealand, you can call the Offer Information Line on 1300 850 505 (within Australia) and +61 3 9415 4000 (outside Australia) between 8.30am and 5.00pm (Melbourne time) Monday to Friday during the Retail Entitlement Offer Period to order a copy of this Information Booklet, or visit the Entitlement Offer Website: www.carsalesoffer.com.au.

If you access the electronic version of this Information Booklet, you should ensure that you download and read the entire Information Booklet.

5.15 Foreign jurisdictions

This Information Booklet has been prepared to comply with the requirements of the securities laws of Australia. To the extent that you hold Shares or Entitlements on behalf of another person resident outside Australia, it is your responsibility to ensure that any participation (including for your own account or when you hold Shares or Entitlements beneficially for another person) complies with all applicable foreign laws and that each beneficial owner on whose behalf you are submitting the personalised Entitlement and Acceptance Form is not in the United States and not acting for the account or benefit of a person in the United States.

The New Shares are not being offered or sold to the public within New Zealand other than to existing Shareholders of CAR with registered addresses in New Zealand to whom the offer of New Shares is being made in reliance on the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2018* (New Zealand).

This document has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

CAR has determined that it is unreasonable to extend the Retail Entitlement Offer to Ineligible Retail Shareholders because of the small number of such Shareholders, the number and value of Shares that they hold and the cost of complying with the applicable regulations in jurisdictions outside Australia and New Zealand.

This Information Booklet does not constitute an offer in any jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer. No action has been taken to register or qualify the Retail Entitlement Offer, the Entitlements or the New Shares, or otherwise permit the public offering of the New Shares, in any jurisdiction other than Australia.

The distribution of this Information Booklet (including an electronic copy) outside Australia is restricted by law. If you come into possession of this Information Booklet, you should observe such restrictions. See the foreign selling restrictions set out in the "International Offer Restrictions" Section of the Investor Presentation included in Section 3 of this Information Booklet for more information.

Any non-compliance with these restrictions may contravene applicable securities laws.

5.16 Underwriting of Entitlement Offer

CAR has entered into an underwriting agreement (**Underwriting Agreement**) with Morgan Stanley Australia Securities Limited ABN 55 078 652 276, Goldman Sachs Australia Pty Ltd ABN 21 006 797 897 and UBS Securities Australia Ltd ABN 62 008 586 481 who have agreed to fully underwrite the Entitlement Offer, subject to the terms and conditions of the Underwriting Agreement.

The obligation on the Underwriters to underwrite the Entitlement Offer is conditional on certain customary matters, including CAR delivering certain certificates, sign-offs and opinions to the Underwriters.

Additionally, an Underwriter may (in certain circumstances having regard to the materiality of the relevant event) terminate the Underwriting Agreement and be released from its obligations under it on the occurrence of certain events, which are set out in the "Summary of Underwriting Agreement" Section of the Investor Presentation included in Section 3 of this Information Booklet.

The Underwriters will be paid:

- (a) a 1.60% underwriting fee; and
- (b) a 0.40% management fee,

on the proceeds of the Entitlement Offer. The Underwriters will also be reimbursed for certain expenses.
