Group 6 Metals Appoints CEO Keith McKnight as Managing Director

Group 6 Metals Limited (**ASX: G6M**, “**Group 6 Metals**” or the “**Company**”) is pleased to announce that the Board of Directors has appointed current CEO, Keith McKnight, as Managing Director and Chief Executive Officer, effective immediately.

Keith has served as Chief Executive Officer of the Company since January 2022. The terms and conditions of appointment remain otherwise unchanged.

The Company also advises that following this appointment, Chairman Johann Jacobs has elected to relinquish his executive role with the Company. Johann will continue to serve as Non-Executive Chairman of Group 6 Metals.

The Board of Directors expresses its gratitude to Mr Jacobs for his substantial contributions to the Company's development over his tenure as an executive.

Group 6 Metals Chairman, Johann Jacobs, said:

"Keith has led the Group 6 Metals business in an outstanding manner since he joined the Company in January 2022. His appointment as an Executive Director recognises the contribution he is making to the strategic and operational direction of the Company. I would like to congratulate Keith on his appointment and my fellow Directors and I look forward to working alongside him at Board level whilst he transitions the Company into a tungsten producer."

Approved by the board of Group 6 Metals Limited.

About Group 6 Metals

Group 6 Metals Limited (ASX: G6M), previously known as King Island Scheelite Limited (ASX: KIS), is an Australian resources exploration and development company. The Company's name honours tungsten as Group 6 Metals' first commodity project (The Dolphin Mine) under development, as tungsten is a member of Group 6 of the periodic table along with chromium and molybdenum, as well as being a critical mineral and a geopolitically strategic resource.

For personal use only

The Company is focused on the redevelopment of its 100%-owned Dolphin Mine located on King Island, Tasmania. Initially the focus is on producing a high grade of tungsten concentrate, however, the Company plans to value-add the product for supply into the upstream tungsten industry.
