Use of proceeds

The proceeds will be used to fund:

- ii) Idaho Cobalt Operations ramp up and mine sustaining capital expenditure; and
- iii) general corporate purposes including Jervois Finland expansion BFS.

Details of the Retail Entitlement Offer

The Offer Price of \$0.42 per New Share represents a:

- 12.9% discount to the theoretical ex-rights price (“**TERP**”) (including the Placement) of \$0.482;²
- 14.6% discount to TERP (excluding the Placement) of \$0.492; and
- 16.8% discount to the last close price of \$0.505 on Tuesday, 8 November 2022;

- the Investor Presentation, which was released to ASX on Thursday, 10 November 2022, and provides information on the Company and key risks;

- instructions on how to take up all or part of your Retail Entitlement.

In particular, you should read and consider the “Key Risks” section in the Investor Presentation included in Section 3 of

² The theoretical ex-rights price (“TERP”) is the theoretical price at which Shares should trade at immediately after the ex-date for the Entitlement Offer based only on the last traded price and issuance of shares at the Offer Price under the Entitlement Offer (and here the Placement). TERP is a theoretical calculation only and the actual price at which Shares traded immediately after the ex-date for the Entitlement Offer may be different from the TERP; 2) Directors will not participate in the Placement, they are not permitted to under the ASX Listing Rules without shareholder approval; 3) The Placement is within Jervois’ current placement capacity, as upsized by an ASX Listing Rule 7.1 “supersize” waiver granted by ASX, which allows placement capacity to be calculated based on the number of shares that may be issued under the underwritten Entitlement Offer.

Section 1 – Overview of the Entitlement Offer

1.1 Overview

The Company intends to raise approximately \$231 million under the Offer, of which approximately \$118 million will be under the Entitlement Offer.

Under the Entitlement Offer, the Company is offering Eligible Shareholders the opportunity to subscribe for 1 New Share for every 5.42 Existing Shares held on the Record Date. The Offer Price per New Share is \$0.42.

The Company has also conducted an institutional placement to certain Institutional Investors (“**Placement**”) which raised approximately \$113 million.

The Company intends to use the proceeds of the Offer primarily to complete the restart of the São Miguel Paulista nickel-cobalt refinery, remaining Idaho Cobalt Operations ramp-up and mine sustaining capital expenditure, and general corporate purposes including Jervois Finland expansion BFS.

The Entitlement Offer has two components:

- (a) the Institutional Entitlement Offer – Eligible Institutional Shareholders were given the opportunity to take up all or part of their Entitlement, and a bookbuild process to sell Entitlements not taken up by Eligible Institutional Shareholders as well as New Shares that otherwise would have been offered to Ineligible Shareholders was carried out. The Institutional Entitlement Offer raised approximately \$64 million; and
- (b) the Retail Entitlement Offer (to which this Retail Information Booklet relates) – Eligible Retail Shareholders will be given the opportunity to take up all or part of their Entitlement or do nothing in respect of their Entitlement. The Retail Entitlement Offer is expected to raise approximately \$54 million.

Both the Institutional Entitlement Offer and the Retail Entitlement Offer are non-renounceable. Accordingly, Entitlements cannot be traded on the ASX, nor can they be sold, transferred or otherwise disposed of.

New Shares issued under the Retail Entitlement Offer are to be issued at the same price as New Shares issued under the Institutional Entitlement Offer and the Placement. In addition, Eligible Shareholders' Entitlements under the Institutional Entitlement Offer and the Retail Entitlement Offer are calculated based on the same ratio.

The Entitlement Offer is fully underwritten by the Underwriters in accordance with the terms of the Underwriting Agreement (see Section 4.12 of this Retail Information Booklet).

1.2 Institutional Entitlement Offer and Placement

The Company has already raised approximately \$177 million from Institutional Investors as part of the Institutional Entitlement Offer and Placement, at \$0.42 per New Share.⁴

New Shares are expected to be issued under the Institutional Entitlement Offer and Placement on Monday, 21 November 2022.

⁴ Settlement of the Institutional Entitlement Offer is expected to occur on Friday, 18 November 2022.

1.3 Retail Entitlement Offer

The Retail Entitlement Offer is being made pursuant to section 708AA of the Corporations Act (as notionally modified by ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84 and ASIC Corporations (Disregarding Technical Relief) Instrument 2016/73) which allows entitlement offers to be offered without a prospectus, provided certain conditions are satisfied.

As a result, the Retail Entitlement Offer is not being made under a prospectus and it is important for Eligible Retail Shareholders to read and understand the information on the Company and the Retail Entitlement Offer made publicly available prior to taking up all or part of their Entitlement. In particular, please refer to the materials in Section 3 of this Retail Information Booklet and other announcements made by the Company (available at asx.com.au) and all other parts of this Retail Information Booklet carefully before making any decisions in relation to your Entitlement.

The Retail Entitlement Offer consists of an offer to Eligible Retail Shareholders, who are invited to apply for 1 New Share for every 5.42 Existing Shares held on the Record Date. The Offer Price of \$0.42 per New Share represents a:

- 12.9% discount to the theoretical ex-rights price (“**TERP**”) (including the Placement) of \$0.482;⁵
- 14.6% discount to TERP (excluding the Placement) of \$0.492; and
- 16.8% discount to the last close price of \$0.505 on Tuesday, 8 November 2022.

The Retail Entitlement Offer opens on 9:00am (Sydney time) on Thursday, 17 November 2022. This is also the date when this Retail Information Booklet will be despatched, along with a personalised Entitlement and Acceptance Form, to Eligible Retail Shareholders. The Retail Entitlement Offer is expected to close at 5:00pm (Sydney time) on Wednesday, 30 November 2022.

Please consult your professional adviser if you have any queries or are uncertain about any aspect of the Retail Entitlement Offer.

1.4 Eligibility of Retail Shareholders

This Retail Information Booklet is for people who meet all of the following requirements (referred to as “**Eligible Retail Shareholders**” in this Retail Information Booklet):

- you were registered as a holder of Shares as at the Record Date, being 7:00pm (Sydney time) on Monday, 14 November 2022;
- you had a registered address on the Company’s share register in Australia or New Zealand as at the Record Date;
- you are not in the United States and are not acting for the account or benefit of a person in the United States (to the extent you hold Shares for the account or benefit of such person in the United States);
- the Company determines in its absolute discretion that you did not receive an invitation to participate in, or were otherwise ineligible to participate under, the Institutional Entitlement Offer (other than as a nominee, trustee or custodian, in each case in respect of other underlying holding); and
- you are eligible under all applicable securities laws to receive an offer under the Retail Entitlement Offer without a prospectus or other disclosure document or any lodgement, filing, registration or qualification.

⁵ See footnote 2.

“Ineligible Retail Shareholders” are Shareholders who are not Eligible Retail Shareholders, Eligible Institutional Shareholders or Ineligible Institutional Shareholders.

The Company has determined that it would be unreasonable to extend the Retail Entitlement Offer to Ineligible Retail Shareholders because of the small number of those Shareholders, the number and value of Shares that they hold and the cost of complying with the applicable laws and regulations in jurisdictions outside Australia and New Zealand, but reserves its right to do so (subject to compliance with relevant laws).

To help you understand the terminology used in this Retail Information Booklet:

- references to “you” are references to Eligible Retail Shareholders; and
- references to “your Retail Entitlement” are references to the Retail Entitlements of Eligible Retail Shareholders; and
- references to “your Entitlement and Acceptance Form” are references to the form of that name accompanying this Retail Information Booklet that you can use to take up your Retail Entitlement.

Section 2 - How to apply

2.1 Your Retail Entitlement

An Entitlement and Acceptance Form setting out your Retail Entitlement (calculated as 1 New Share for every 5.42 Shares held on the Record Date with fractional entitlements rounded up to the nearest whole number of New Shares) will accompany this Retail Information Booklet when it is despatched to Eligible Retail Shareholders. Eligible Retail Shareholders may subscribe for all or part of their Retail Entitlement.

If you have more than one registered holding of Shares, you will be sent more than one personalised Entitlement and Acceptance Form and you will have separate Retail Entitlements for each separate holding. Note that the Retail Entitlement stated on your personalised Entitlement and Acceptance Form may be in excess of the actual Retail Entitlement you may be permitted to take up where, for example, you are holding Shares on behalf of a person in the United States (see the definition of “**Eligible Retail Shareholder**” in Section 1.4).

Eligible Retail Shareholders who hold Shares in the capacity of a nominee, trustee or custodian for a person that is in the United States cannot take up Retail Entitlements or purchase New Shares on behalf of that person. See Section 2.11 for the notice to nominees, trustees and custodians.

All Eligible Retail Shareholders who apply to participate in the Retail Entitlement Offer are taken to make the declarations, representations and warranties on the Entitlement and Acceptance Form and in Section 2.10 of this Retail Information Booklet.

2.2 Options available to you

The number of New Shares to which Eligible Retail Shareholders are entitled is shown on the personalised Entitlement and Acceptance Form that accompanies this Retail Information Booklet. Eligible Retail Shareholders may:

- **Option A:** take up their Retail Entitlement in full by the Retail Closing Date (refer to Section 2.3 of this Retail Information Booklet);
- **Option B:** take up part of their Retail Entitlement by the Retail Closing Date and allow the balance to lapse (refer to Section 2.4 of this Retail Information Booklet); or
- **Option C:** do nothing and allow their Retail Entitlement to lapse (refer to Section 2.5 of this Retail Information Booklet).

The Retail Entitlement Offer is an offer to Eligible Retail Shareholders only. Ineligible Retail Shareholders may not participate in the Retail Entitlement Offer.

The Company reserves the right to reject any Entitlement and Acceptance Form that is not correctly completed or that is received after the Retail Closing Date. The directors of the Company reserve the right to issue any shortfall (including any excess shortfall) under the Entitlement Offer at their discretion. Any excess shortfall may, subject to the terms of the Underwriting Agreement, be allocated to the Underwriters or to third party investors as directed by the Underwriters. The basis of allocation of any other shortfall will be determined

by the directors of the Company at their discretion, taking into account whether investors are existing Shareholders, the Company's register and any potential control impacts.

The Retail Closing Date for acceptance of the Retail Entitlement Offer is expected to be 5:00pm (Sydney time) on Wednesday, 30 November 2022 (however, that date may be varied by the Company, in accordance with the ASX Listing Rules and applicable law).

If you wish to take up part of your Retail Entitlement, you are encouraged to make payment via BPAY® by following the instructions set out on your personalised Entitlement and Acceptance Form or available online at www.computersharecas.com.au/jrvooffer.

If you are a New Zealand Eligible Retail Shareholder who does not have an Australian bank account or does not wish to pay via BPAY®, you will be presented EFT details via the offer website www.computersharecas.com.au/jrvooffer.

Payments must be received by the Share Registry by no later than 5:00pm (Sydney time) on Wednesday, 30 November 2022.

If the Company receives an amount that is less than the Offer Price multiplied by your Retail Entitlement, your payment may be treated as an Application for as many New Shares as your Application Monies will pay for in full.

Any Retail Entitlements which you do not take up will lapse and may be acquired by the Underwriters or any sub-underwriters.

Eligible Retail Shareholders who do not take up their Retail Entitlements in full will not receive any value for those Retail Entitlements that they do not take up. See also Section 2.6.

2.5 Option C: Allowing your Retail Entitlement to lapse

If you take no action, you will not be issued New Shares and your Retail Entitlement will lapse.

Any Retail Entitlements which you do not take up may be acquired by the Underwriters or any sub-underwriters.

Eligible Retail Shareholders who do not take up their Retail Entitlements in full will not receive any value for those Retail Entitlements they do not take up. See also Section 2.6.

2.6 Consequences of not taking up your Retail Entitlement

By allowing all or part of your Retail Entitlement to lapse, you will forgo any exposure to increases or decreases in the value of the New Shares representing that part of your Retail Entitlement not taken up and you will not receive any value for that part of your Retail Entitlement. Your proportionate interest in the Company will also be diluted as a result of the Offer, to the extent that New Shares are issued under the Offer.

2.7 Payments and refunds

You are encouraged to pay your Application Monies using BPAY® if possible (see below at Section 2.8 of this Retail Information Booklet).

If you are a New Zealand Eligible Retail Shareholder who does not have an Australian bank account or do not wish to pay via BPAY®, you will be presented EFT details via the offer website www.computersharecas.com.au/jrvooffer.

Cash payments will not be accepted. Receipts for payment will not be issued. All payments must be in Australian dollars.

The Company will treat you as applying for as many New Shares as your payment will pay for in full up to your Retail Entitlement.

Any Application Monies received for more than your final allocation of New Shares will be refunded as soon as practicable after the close of the Retail Entitlement Offer. No interest will be paid to Applicants on any Application Monies received or refunded.

Refund amounts, if any, will be paid in Australian dollars. You will be paid by either direct credit to the nominated bank account as noted on the Company's share register as at the Retail Closing Date or by cheque sent by ordinary post to your address as recorded on the share register (the registered address of the first-named in the case of joint holders). If you wish to advise or change your banking instructions with the Share Registry you may do so by going to www.computershare.com.au/easyupdate/JRV to update your details before the Retail Closing Date.

2.8 Payment by BPAY®

To pay by BPAY®, please follow the instructions on the Entitlement and Acceptance Form or available online at www.computersharecas.com.au/jrvooffer. You can only make a payment via BPAY® if you are the holder of an account with an Australian branch of a financial institution that supports BPAY® transactions.

If you are paying by BPAY®, please make sure you use the specific Biller Code and your unique Customer Reference Number ("**CRN**") on your personalised Entitlement and Acceptance Form. If you have multiple holdings and consequently receive more than one personalised Entitlement and Acceptance Form, when taking up your Retail Entitlement in respect of one of those holdings only use the CRN specific to that holding. If you do not use the correct CRN specific to that holding your Application will not be recognised as valid.

Please note that by paying by BPAY®:

- you do not need to submit your personalised Entitlement and Acceptance Form **but are taken to make the declarations, representations and warranties on that Entitlement and Acceptance Form and in Section 2.10 of this Retail Information Booklet**; and
- if you do not pay for your full Retail Entitlement, you are deemed to have taken up your Retail Entitlement in respect of such whole number of New Shares which is covered in full by your Application Monies.

It is your responsibility to ensure that your BPAY® payment is received by the Share Registry by no later than 5:00pm (Sydney time) on Wednesday, 30 November 2022. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration in the timing of when you make payment.

2.9 If you are unable to pay by BPAY®

The Company encourages payments by BPAY® if possible.

If you are a New Zealand Eligible Retail Shareholder who does not have an Australian bank account or do not wish to pay via BPAY®, you may make payment by accessing EFT instructions with a personalised reference number via the Company's Offer website at www.computersharecas.com.au/jrvooffer or completing and returning your personalised Entitlement and Acceptance Form in accordance with the instructions set out on that form and attaching a cheque, bank draft or money order in Australian currency.

Your cheque, bank draft or money order must be:

- payable to "Jervois Global Limited" and crossed "Not Negotiable";
- for an amount equal to \$0.42 multiplied by the number of New Shares that you are applying for; and
- in Australian currency drawn on an Australian branch of a financial institution. Payment cannot be made in New Zealand dollars. New Zealand Eligible Retail Shareholders must arrange for payment to be made in Australian dollars.

It is your responsibility to ensure that your Entitlement and Acceptance Form and cheque, bank draft or money order is received by the Share Registry by no later than 5:00pm (Sydney time) on Wednesday, 30 November 2022 at the address set out below:

Australia

Entitlement and Acceptance Forms (and payments of any Application Monies) will not be accepted at the Company's registered or corporate offices, or at the offices of the Share Registry.

For the convenience of Eligible Retail Shareholders in New Zealand, an envelope with the appropriate address has been included with this Retail Information Booklet. Eligible Retail Shareholders in New Zealand will need to affix the appropriate postage if deciding to return a physical copy of their personalised Entitlement and Acceptance Form. The late delivery of any cheque, bank draft or money order may result in you being ineligible to participate in the Retail Entitlement Offer.

You should ensure that sufficient funds are held in relevant account(s) to cover the Application Monies as your cheque, bank draft or money order will be processed on the day of receipt. If the amount of your cheque, bank draft or money order for Application Monies (or the amount for which the cheque clears in time for issue) is insufficient to pay in full for the number of New Shares you have applied for in your personalised Entitlement and Acceptance Form, you will be taken to have applied for such lower number of whole New Shares as your cleared Application Monies will pay for (and to have specified that number of New Shares on your Entitlement and Acceptance Form). Alternatively, your Application will not be accepted.

2.10 Payment through BPAY®, EFT or submission of an Entitlement and Acceptance Form is binding

A payment made through BPAY®, EFT or a completed and lodged Entitlement and Acceptance Form together with the payment of requisite Application Monies constitutes a binding offer to acquire New Shares on the terms and conditions set out in this Retail Information Booklet and the Entitlement and Acceptance Form and, once lodged or paid, cannot be withdrawn.

If the Entitlement and Acceptance Form is not completed correctly it may still be treated as a valid Application for New Shares. The Company's decision whether to treat an Application as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final.

Acknowledgments, representations and warranties

By making a payment by BPAY® or EFT or by completing and returning your Entitlement and Acceptance Form with the requisite Application Monies, you will also be deemed to have acknowledged, represented and warranted on your own behalf and on behalf of each person on whose account you are acting that:

São Miguel Paulista refinery restart FID

Jervois Global Limited (“Jervois” or the “Company”) (ASX: JRV) (TSX-V: JRV) (OTC: JRVMF) is pleased to announce its final investment decision (“FID”) on the restart of the SMP nickel-cobalt refinery in São Paulo, Brazil.⁵

Jervois has continued to advance the restart pathway since Ausenco completed a Bankable Feasibility Study (“BFS”) in April 2022. Restart capital deployment is already underway at SMP with an initial US\$1 million of the previously estimated US\$55 million⁶ total capital cost approved by the Jervois Board in September 2022. Ausenco is currently mobilised at site undertaking detailed engineering and construction execution planning, as well as advanced procurement. Jervois’s commercial executives are negotiating refinery feed sourcing arrangements and product sale discussions are also underway.

Jervois has added US\$10 million contingency to the earlier US\$55 million estimate to address the potential for capex escalation. This takes the total budgeted capital project funding to replace and refurbish plant and equipment at SMP, and restart the plant, to US\$65 million.

Restart capital spending is planned across 2023 with production expected to commence in Q1 2024, with initial production forecast of 10,000 mtpa nickel and 2,000 mtpa cobalt metal cathode.⁷ While not part of the restart, over time, Jervois will target the historic nameplate SMP capacity of 25,000 mtpa nickel via debottlenecking, including further investment. Assessment of the potential addition of a pressure oxidative autoclave (“POX”), is in progress, with its scope and potential release linked with third party concentrate sale negotiations.

SMP is within the São Paulo city limits with ready access to labour and services, 120 km from the largest container port in Brazil (Santos), ensuring it is well located to serve export markets. SMP previously produced ‘Tocantins’ nickel and cobalt products, which are well established domestically in Brazil and key Western export markets.

Jervois has appointed an experienced leadership team to drive SMP project delivery, including recently appointed President and EGM Jervois Brasil, Mr. Carlos Braga.

Funding

Jervois is undertaking a fully underwritten A\$231 million (US\$150 million) equity capital raising consisting of a A\$113 million (US\$73 million) institutional placement of new Jervois

⁵ The FID is subject to the Equity Raising being successfully completed.

⁶ Before additional US\$10 million contingency added. Refer to associated Risk Factors on slide 47 of the Investor Presentation released by Jervois today.

⁷ See ASX release dated 29 April 2022 titled “BFS for São Miguel Paulista refinery restart”.

For personal use only

ordinary shares (the "**Placement**") and a A\$118 million (US\$77 million) 1 for 5.42 accelerated pro-rata non-renounceable entitlement offer (the "**Entitlement Offer**" and, together with the Placement, the "**Equity Raising**").

Jervois will use proceeds from the Equity Raising to fully fund the restart of SMP, ICO ramp up and mine sustaining capital expenditure, and for general corporate purposes including Jervois Finland expansion BFS. The Equity Raising provides a fully funded, de-risked restart model that is the simplest and lowest capital pathway to SMP production.

The Board considers the Equity Raising as the preferred funding pathway as it ensures Jervois maintains a balanced capital structure. Importantly, it allows Jervois to retain 100% ownership of its three geopolitically strategic assets in high quality jurisdictions, producing critical minerals that will be delivered to Western markets. Macroeconomic tailwinds are strong, with nickel prices and premia significantly above assumptions applied in the SMP restart BFS. These trends are expected to continue into 2023 and beyond. Strengthening its balance sheet ahead of a key negotiating period with OEMs and other nickel and cobalt customers, Jervois is well-positioned to maximise commercial outcomes for the benefit of all shareholders.

A full breakdown of funding sources and uses is detailed on slide 30 of the Jervois Investor Presentation released today in connection with the Equity Raising.

Jervois' cash balance at 31 October 2022 was US\$42 million⁸. This will be used as detailed in the Investor Presentation.

Equity Raising

Jervois will issue approximately ~550 million new fully paid ordinary shares in Jervois ("**New Shares**") under the Equity Raising, equivalent to approximately ~36% of Jervois' current issued capital. New Shares issued under the Equity Raising will rank equally in all respects with Jervois' existing ordinary shares.

Entities controlled by AustralianSuper, the Company's largest shareholder, have agreed to invest up to A\$55.6 million (US\$36.1 million) to participate in up to ~24% of the Equity Raising – including its full Institutional Offer entitlement, Placement pro-rata and additional Retail Entitlement Offer sub-underwriting.

As a part of the Equity Raising, Mercuria, Jervois' third largest shareholder and one of the world's largest integrated energy and commodity traders, will invest US\$10.5 million (A\$16.2 million).

⁸ On an unaudited basis. See slide 42 of the Investor Presentation released by Jervois on 10 November 2022 for more information.

Jervois Directors and Senior Management will participate for approximately A\$2.0 million (US\$1.3 million) in the Equity Raising.⁹

Under the Entitlement Offer, eligible shareholders are invited to subscribe for 1 New Share for every 5.42 existing Jervois ordinary shares ("**Entitlement**") held as at 7:00pm (Sydney time) on Monday, 14 November 2022.

All New Shares will be issued at a fixed price of A\$0.42 per New Share ("**Offer Price**"), which represents a:

- 12.9% discount to TERP¹⁰ (including Placement) of A\$0.482;
- 14.6% discount to TERP (excluding Placement) of A\$0.492; and
- 16.8% discount to the last close price of A\$0.505 on Tuesday, 8 November 2022

Institutional Entitlement Offer

Eligible institutional shareholders will be invited to participate in the institutional component of the Entitlement Offer (the "**Institutional Entitlement Offer**"), which is being conducted Thursday, 10 November in Australia.

Eligible institutional shareholders can choose to take up all, part or none of their Entitlement. Eligible institutional shareholders who do not take up their Entitlement under the Entitlement Offer, in full or in part, will not receive any value in respect to those Entitlements not taken up. Institutional Entitlements cannot be traded on the ASX, TSX-V, OTC or transferred.

Institutional Entitlements that eligible institutional shareholders do not take up by the close of the Institutional Entitlement Offer, and Institutional Entitlements that would otherwise have been offered to ineligible institutional shareholders, will be offered to new and existing institutional investors concurrently with the Institutional Entitlement Offer and Placement.

Jervois' shares will re-commence trading on Friday, 11 November 2022 on the ASX following completion of the Institutional Entitlement Offer and Placement.

Retail Entitlement Offer

Eligible retail shareholders in Australia and New Zealand will be invited to participate in the retail component of the Entitlement Offer (the "**Retail Entitlement Offer**") at the same offer

⁹ Directors will not participate in the placement component of the Equity Raising, they are not permitted to under the ASX Listing Rules without shareholder approval.

¹⁰ The theoretical ex-rights price ("TERP") is the theoretical price at which Jervois' shares should trade at immediately after the ex-date for the Entitlement Offer based only on the last traded price and issuance of shares at the Offer Price under the Entitlement Offer (and here the Placement). TERP is a theoretical calculation only and the actual price at which Jervois shares trade immediately after the ex-date for the Entitlement Offer may be different from the TERP.

price and offer ratio as the Institutional Entitlement Offer. The Retail Entitlement Offer will open on Thursday, 17 November 2022 and close at 5:00pm (Sydney time) on Wednesday, 30 November 2022.

Additional Information

Further details on the Equity Raising are set out in the Investor Presentation also released to the ASX today and expected to be filed by the Company shortly on SEDAR, together with a copy of the Underwriting Agreement. The Investor Presentation contains important information including disclaimers, key risks and foreign selling restrictions with respect to the Equity Raising.

Any New Shares issued to Canadian residents under the Equity Raising will be offered pursuant to exemptions from the prospectus requirements and will be subject to a statutory hold period in Canada expiring four months and one day from the date of issuance, and TSX-V hold period, as applicable. The Equity Raising is subject to approval of the TSX-V.

The participation of AustralianSuper and Jervois' Directors and Senior Management (the "**Related Party Participation**") in the Equity Raising constitute a "related party transaction" under Multilateral Instrument 61-101 – *Protection of Minority Security Holders in Special Transactions* ("**MI 61-101**") as AustralianSuper is a related party of the Company given its greater than 10% beneficial shareholding. Pursuant to Section 5.5(a) and 5.7(1)(a) of MI 61-101, the Company is exempt from obtaining a formal valuation and minority approval of the Company's shareholders in respect of the Equity Raising due to the fair market value of the Related Party Participation being below 25% of the Company's market capitalization for purposes of MI 61-101. The Company will file a material change report in respect of the Equity Raising. However, the material change report will be filed less than 21 days prior to the closing of the Equity Raising, which is consistent with market practice and the Company deems reasonable in the circumstances.

The Equity Raising is fully underwritten.

SMP expected to deliver robust operating margins through the cycle

Operating cost structure

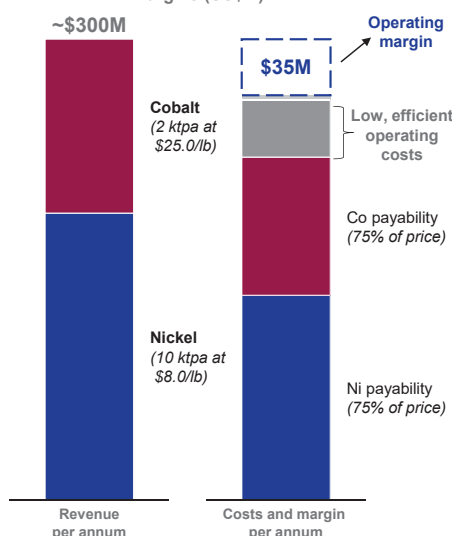

Globally competitive operating cost structure

- Key raw materials costs based on pricing linked to final product – e.g., % payable x LME nickel price
- Price risk managed through commercial model including Quotational Periods
- Annual average operating cost of US\$37M (R\$196M), based on BFS¹
- Long-term cost competitiveness underpinned by skilled workforce, competitive energy (hydropower) and local currency (R\$)
- Economics also supported by historical and forecast recoveries of 99% nickel, 97% cobalt

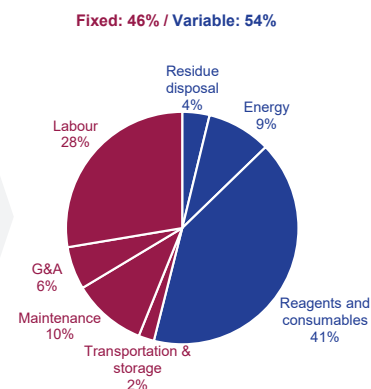

Sustainable EBITDA margin expected through the cycle

- Annual average EBITDA ~US\$35M and EBITDA margin ~12% under BFS assumptions¹
- Margins expected to be resilient through the cycle – raw materials costs linked to metal prices
- Near-term upside potential should current market conditions persist (e.g., premiums, payables)

Market conditions favourable for SMP raw materials procurement

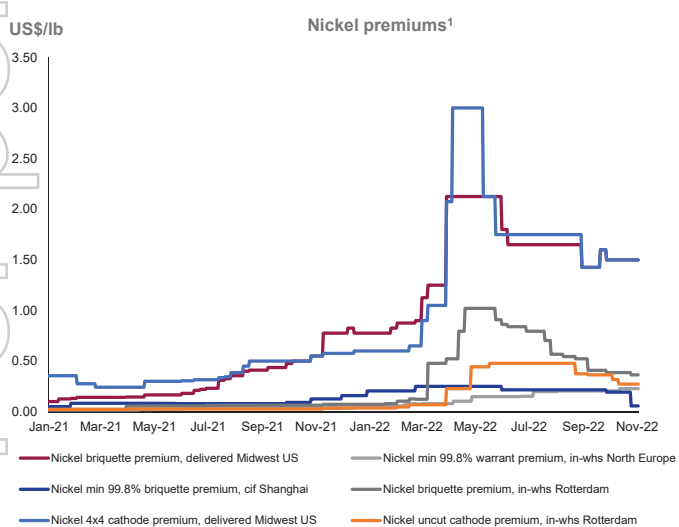

Significant rise in MHP supply forecast from Indonesia

- SMP historically processed around 10-20% MHP and 20-30% cobalt hydroxide
- MHP is an intermediate product used as a raw material in production of refined nickel – existing major producers:
 - Ravensthorpe Nickel Operations in Australia
 - Goro in New Caledonia
 - Ramu in Papua New Guinea
 - Gordes in Turkey
 - Multiple HPAL operations in Indonesia
- Growth of Indonesian supply increasing global availability of MHP with downward pressure on payabilities
- Initial MHP supply contracts under negotiation – expected to be finalised by end Q4 2022
- For MHP producers, sale to SMP is an attractive diversification opportunity away from China

Market conditions favourable for SMP product sales

Class 1 electrolytic nickel premia trading strongly

- SMP historically produced electrolytic nickel with 99.9% purity
 - Grade exceeded London Metal Exchange ("LME") delivery specifications
 - Purity for demanding applications such as batteries, electroplating, high grade speciality stainless steels
- SMP electrolytic cobalt (broken cathodes) can be sold into battery manufacturing, super alloys, chemical industry, diamond tooling and magnets
- 'Tocantins' nickel and cobalt brands well established domestically in Brazil and key Western export markets

A global leader in cobalt-based advanced materials

Jervois Finland overview

Jervois business based on contractual rights to refining capacity and ownership of downstream production

Working capital	Dec 2021	Sep 2022
Cobalt price, qtr end (US\$/lb)	33.5	25.7
Cobalt inventory (mt ³)	1,704	2,687
Net Working Capital (US\$M)	115	163

Established global leader in cobalt-based advanced materials

- One of two major players active across all key markets globally
- Strategic asset – unique capabilities and market position hard to replicate
- Well diversified business serving customers in U.S., Europe and Japan

Near-term focus on margin optimisation and inventory management

- EBITDA margin target ~10-15% through the cycle, influenced by price
- Staged unwind of excess inventories into 2023 – cash release to repay debt

BFS underway on potential expansion to match expected growth in demand

- Potential for additional 6,000 tonnes capacity at Kokkola from mid-2020s

Jervois

1) Pro-forma revenue estimate using actuals January to September 2022 and forecast for October to December 2022 (assuming US\$25/lb cobalt price for the forecast period; 2) EBITDA is a non-IFRS measure but is commonly used in evaluating financial performance. While the common definition of EBITDA is "Earnings Before Interest Expense, Taxes, Depreciation and Amortisation", EBITDA used in this document may not be comparable to EBITDA presented by other companies. Adjusted EBITDA excludes items which do not reflect the underlying performance of the Company's operations. For the current period, a US\$17.3M non-cash adjustment (cost) was recorded as the historical cost of inventories were in excess of its net realisable value at 30 September 2022. This has been excluded from Adjusted EBITDA. See Slide 64 for further information on the basis of preparation 3) Metric tonnes ("mt")

Working capital overview

Jervois Finland underpinned by >US\$150M of product inventory

Mercuria facility established to provide commercial flexibility

- US\$100M of US\$150M drawn at end September 2022 (US\$115M drawn at end of October 2022)
- Underpinned by >US\$150M of physical cobalt inventory

Significant loan repayments anticipated if cobalt prices are stable

- Intention is to unwind inventory to target levels (90 -110 days), with proceeds to be applied to amortisation of Mercuria loan
- Natural repayment and deleveraging as inventory decreases both as volumes are reduced, and lower prices flow through

Measured approach to reducing cobalt inventory remains optimal

- Selling premium cobalt products on a discounted basis into non-strategic end markets (China) is a suboptimal commercial outcome
- Proceeds from inventory unwind applied to amortise Mercuria loan in line with anticipated reduction in collateral
- Permitted cash to upstream under loan terms capped at US\$50M

Cobalt inventory: raw materials (mt)	1,015
Cobalt inventory: finished goods (mt)	1,488
Cobalt inventory: total (mt)²	2,687

- Cobalt price movements materially impact inventory value and changes to working capital
- Investment in working capital part of the Jervois Finland business model
- Working capital optimised to balance supply chain risk, commercial objectives and liquidity management
- Total inventory volumes temporarily in excess of target levels (90 - 110 days)
- Cobalt hydroxide supply catch up follows significant logistical interruptions over past 12 months
- Working capital expected to normalise across 2023, weaker than expected 2H 2022 due to China lockdowns

Jervois

1) Fastmarkets MB SG cobalt price; 2) Total inventory may be greater or less than the sum of raw materials and finished goods due to "work in process" inventory and other adjustments; 3) 160 days calculated based on a denominator of 6,000 mt per year; 4) Unaudited figures. An audit will be completed for the 12 months to 31 December 2022 and therefore numbers may be subject to change

Overview of critical minerals policy environment

Step change in U.S. Government engagement on critical minerals policy; a whole of government approach to enhancing domestic capacity

- Several new initiatives and pieces of legislation provide incentives for domestic extraction, processing and refining of critical minerals
- Inflation Reduction Act ("IRA") broadens scope of existing legislation to include critical minerals and provides significant funding boost to many existing programmes:
 - Department of Defense: Defense Production Act Title III Program
 - Department of Energy: Title XVII Innovative Energy Loan Guarantee Program; Advanced Technology Vehicles Manufacturing Loan Program; Vehicle Technologies Office
 - U.S. International Development Finance Corporation
- IRA regulations being drafted – implementation will potentially have a positive economic impact for Jervois
- Mineral Security Partnership – in co-operation with key Allies including *inter alia* Australia, Finland, EU, Japan, South Korea and Canada

European Union Critical Raw Materials Act at early stage of development

- While unlikely to be as far reaching as the U.S. IRA, denotes understanding of the importance of securing critical minerals supply chains
- Jervois participating in industry consultation and providing input to regulators

Outlook for nickel

Positive fundamental outlook for the nickel industry driven by the growth in battery precursors

Primary nickel demand outlook by segment (kt)¹

Electrification expected to drive a step change in nickel demand

- High nickel remains chemistry of choice for Western OEMs
- Global demand outlook for nickel in EVs remains robust
- LFP important for entry level EVs, high LFP penetration is key to moderating expected nickel and cobalt supply shortfalls
- OEMs forced to consider entry into less favourable investment jurisdictions to secure supply
- Battery demand expected to reach ~1Mt in 2026 representing ~25% of primary nickel consumption, up from 15% currently

Nickel markets

Nickel prices have stabilised following LME disruptions at the beginning of 2022

Overview

- LME Nickel prices @ US\$22,134/Mt (~US\$10.05/lb) (1 November 2022)
- After LME disruptions earlier in the year, prices have fallen and stabilised around US\$10/lb since June
- Electrolytic nickel metal at significant premiums to LME during most of 2022

Price drivers

- Increased MHP and matte supply from Indonesia
- Due to macroeconomic and COVID-19 impacts (latter in China), stainless steel demand softening
- Superalloy demand rebounding

Market outlook

- Increasing supplies of intermediates creating lower payables, and larger spread between class 1 & class 2 prices
- EV growth rates for high Ni chemistries forecast to remain strong
- Possible further impact to class 1 supply due to potential sanctions for Russian metal and LME delivery restrictions

Jervois

Cobalt markets (1/2)

Positive fundamental outlook for the cobalt industry

Total cobalt demand by sector and scenario¹

IEA forecast future cobalt demand under two scenarios

- Stated Policies Scenario (STEPS) – forecast based on sector-by-sector analysis of today's policies and policy announcements
- Sustainable Development Scenario (SDS) – compliance with Paris Agreement by 2040 (stabilisation at <2°C global temperature rise)

IEA conclusions

- Conservatively assumed that cobalt content in cathodes continues to fall
- Despite this, by 2040 cobalt demand into EVs and battery storage expected to rise 7x (STEPS) and 21x (SDS) from 2020 baseline
- Cobalt demand growth in non energy transition uses expected to continue
- Expansion in cobalt supply unlikely to be capable of satisfying demand
- Supply increases expected to be dominated by unstable and unreliable regions

Cobalt markets (2/2)

Cobalt price stabilised and then consolidated in Q3 - outlook remains positive for 2023 and beyond

Cobalt price (MB Fastmarkets SG Low) January 2021 to November 2022 – US\$/lb¹

Cobalt market stabilised after recent downturn

- Global macroeconomic situation, along with continuing COVID-19 related lockdowns, dampened demand in Q2 2022
- Risk of supply disruptions from DRC are re-emerging and may trigger restocking, favourably impacting prices

Resilient demand in industrial segments

- Aerospace industry is on path to recovery with increased aircraft orders driving super alloy demand
- Chemicals, Catalysts, Ceramics and PM segments stable with GDP demand growth expected

Growth in battery sector demand poised to accelerate

- EV outlook for demand remains robust – Jervois well placed to participate in demand growth
- Consumer electronics sector expected to recover from recent slowdown

Appendix B – Commodity Market Update

Appendix C – Key Risks

Appendix D – International Offer Restrictions

Risk factors (1/14)

This section discusses some of the risks associated with an investment in Jervois Global Limited ("Company" or "Jervois", and together with its subsidiaries, the "Group").

The Group's business is subject to a number of risks both specific to its business and of a general nature which may impact on its future performance. Before subscribing for new shares in the Company ("New Shares") under the Placement or Entitlement Offer ("Offer"), investors should carefully consider and evaluate the Company, the Group's business and whether the New Shares are suitable for them having regard to their investment objectives and financial circumstances and take into consideration the risks set out in this section and other risks relevant to the Group.

The list of risks below should not be taken as an exhaustive list of the risks faced by the Group or by investors in the Company. Those risks, and others not specifically referred to below, may in the future materially affect the financial performance of the Group and the value of the New Shares. The offer of New Shares carries no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares. Investors should consider the investment carefully and should consult their professional advisers before deciding whether to apply for New Shares.

1. Jervois Finland

1.1 Working capital

Jervois anticipates that cash will be released from lower working capital in 2023 and will be used to meet partial repayment of the Mercuria working capital facility. The pace and extent of inventory unwind will be influenced by market conditions. Adverse market conditions may cause inventory reductions to occur at a slower pace than currently expected. Should this occur, the timing and extent to which the Mercuria loan is reduced will also be impacted.

1.2 Future earnings may not be as expected

To the extent that the actual results achieved by Jervois Finland are different than those anticipated there is a risk that the profitability and future earnings of the operations of Jervois Finland and the Group may differ (including in a materially adverse way) from the performance as expected.

1.3 Cobalt Prices

A significant proportion of Jervois Finland's product sales are based on prices linked to the quoted prices for cobalt. Purchases of cobalt hydroxide, which is refined and then processed into a range of cobalt products, are priced according to a percentage of quoted cobalt prices. Changes in the quoted price of cobalt impact Jervois Finland's sales, costs, profitability, cash flow, and working capital requirements. Rapid or material adverse movements in the quoted price of cobalt, may lead to financial losses and may adversely impact liquidity of the Group.

1.4 Feed Supply payables

The cobalt hydroxide (feed supply) cost is typically paid as a percentage of the cobalt price and may be influenced by levels of available supply feed stock. In market conditions where there is limited supply feed, the Group may need to pay a higher percentage to secure supply. Historically a higher payable is often associated with higher cobalt prices, however this is not always the case. If a higher payable is required without a commensurate change in the quoted price of cobalt, this may impact the operating margin and therefore the future profitability of Jervois Finland.

1.5 Risks to availability of supply

In view of forecast growth in demand for cobalt, there is a risk that supply availability will be partially or totally constrained. ESG issues will constrain preferred supply, and material that is available from sources meeting ESG requirements (including Jervois Finland's sources of supply) will be in higher demand. There is also a risk that if availability of supply is materially constrained that feed supply prices increase adversely impacting the future profitability of Jervois Finland.

1.6 Cooperation with Umicore:

Jervois Finland relies on a shared refinery with Umicore, and future cooperation with Umicore on matters related to the operation of the facilities is essential. Any material technical malfunction, fire, loss of cooperation or dispute may adversely impact the Jervois Finland business.

Risk factors (2/14)

2. RISKS TO JERVOIS USA

2.1 Limited operating history

The Company's principal assets currently 100% indirect ownership of Jervois Finland, 100% indirect ownership of the São Miguel Paulista nickel-cobalt refinery in Brazil ("SMP Refinery") and 100% indirect ownership in Jervois Mining USA Limited ("JRV USA").

JRV USA's principal asset is a permitted cobalt-copper mine in Idaho, United States that is currently completing construction and commissioning (the "ICO Project"). The remainder of the construction and commissioning is expected to be funded by funds raised under the Offer. JRV USA is still in the early stages of commissioning meaning that JRV USA will be subject to all the risks inherent in the ramp-up of, inter alia, the underground mine transitioning from development to production mining and surface grinding and flotation metallurgical processing facilities ramping up to continuous commercial production. The ICO Project holds an approved Plan of Operation, an access agreement for site access, and associated land claims. Investors should note that JRV USA has no history of earnings, and there can be no assurance that JRV USA's ICO Project or any other property or business that JRV USA may acquire or undertake will generate earnings, operate profitably or provide a return on investment in the future.

Although JRV USA has initiated measures to mitigate risks related to geology, mining, processing and transportation through the ICO Bankable Feasibility Study ("BFS") and certain drilling and testwork programmes in 2019 and an ongoing drilling programme in 2022, geological and economic extraction and processing risk will always remain.

2.2 The key risks related to JRV USA identified in the ICO BFS and more generally moving forward are

- **Geology:**
 - Geological interpretation – sub-surface modelling of geological characteristics is based on drilling information, surface mapping and ore deposit models. This carries data accuracy and interpretation risk. To minimise this risk, factors such as nearby mine knowledge, drillhole core analysis and structural models have been used to develop the resource model. The ore deposit is stratiform with mineralization confined to the BTE rock unit which has been identified from drillhole logging. By their nature, stratiform deposits display a high continuity.
 - Drill spacing – the orebody has been drilled on a nominal 200ft sectional spacing, however the central zone which is the first to be mined has been infilled to a 100ft spacing. Establishing surface drilling platforms is difficult due to the steep terrain, as such we are executing an infill drilling programme from underground. Initial planned stopes will be infill drilled to 50ft spacing for ore definition and grade control.
 - Assay data – pre-2009 assay data is incomplete with respect to arsenic assays. Examination of drill ore intercepts with QEMScan reveals that arsenic is mostly associated with cobalt as the mineral Cobaltite. Therefore, arsenic is mainly contained within the orebody and has a close direct relationship to cobalt.
 - Oxidation – oxidized ore shows poor recoveries. This ore is identified by low sulphur content and is excluded from the reserve.
 - Faulting displacement – a detailed 3D structural model has been formed of the major faults occurring in the orebody area. These have been shown to be subparallel to the orebody strike and only minor displacements of the orebody occur. There may be minor fault plays which remain unknown in extent and orientation however the occurrence of these will be defined by close spaced underground drilling.
 - Grade estimation – the selected method of grade estimation is ID2. This method was chosen over other statistical methods for preservation of the high-grade components of the ore intercepts which is appropriate to the selective mining method to be employed. Indicator and ordinary kriging were found to smear grades on a local scale which is not acceptable for selective mining. As the drill intercept density increases via underground drilling, conditional simulation methods will be employed to further enhance grade definition.

Risk factors (3/14)

- **Mining:**
 - Contractor performance – Currently Jervois USA has opted for a contract miner option and operation of the mine is reliant on contractor performance. The mine plan, mining method and contractor performance can be impacted by ground conditions, updates in geological information, such as faults and structures, resource definition and the presence of water.
 - Geological interpretation – The mine schedule is based on resource estimation and any scheduling is based on geological interpretation.
- **Metallurgy and processing:**
 - Recovery of metal may be hindered by poor head grade delivery from the mine.
 - Recovery of metal may be hindered by poor operation of the plant.
 - Through-put of material may be hindered by poor maintenance.
- **Infrastructure, Logistics and Transportation:**
 - ICO business depends on adequate infrastructure, including reliable power sources, water supply, roads and other infrastructure. Water shortages, power outages, sabotage, community, government or other interference in the maintenance or provision of such infrastructure could adversely affect ICO's business, financial condition and results of operations.
 - Significant current infrastructure is already in place. Risks such as adverse weather, forest fires and other climatic risks may impact this infrastructure.
 - Future infrastructure development that may be required could be impacted by climatic risks.
 - Site access and road usage – limiting road traffic and access to the site is an environmental and safety risk which will be mitigated during operations by use of the accommodation camp which will accommodate the bulk of mining labour. Material and equipment deliveries will be managed or controlled through the Salmon warehouse to ensure deliveries to site are coordinated.
- **Permitting:**
 - Demonstrating the effectiveness of the pump-back system/groundwater capture zone prior to initiating mining activities below the water table.
 - Ability of the water treatment plant to meet agency compliance.
 - Submittal and approval of various plans to the agency and the uncertainty in obtaining the approval by the agencies.
 - Final outcome of the Point of Compliance issued by the State of Idaho regarding groundwater quality threshold levels for the project.
 - Uncertainty of regulatory or rule changes by the State of Idaho or the U.S. federal government during construction and/or operations that may apply to the site.
- **Procurement, Construction and Execution:**
 - As part of project development risks associated with supply chain, sourcing of materials and equipment and deliveries can impact project cost and schedule.
 - Construction activities can be impacted by sourcing or contractors and workforce, site conditions and weather, delivery of materials and equipment and site productivity.
 - Construction of environmental systems – environmental systems and early works include completion of the miners dry and mining infrastructure, commissioning of the water treatment plant and pump back systems. Certain aspects of this work are affected by seasonal construction access.
- **Commissioning:**
 - Under delivery of ore to the Mill creating the requirement for stop start operations of the Mill.
 - Potential for catastrophic failure of equipment in the initial start-up and commissioning phase.
 - Technical difficulties in achieving expected recoveries and concentrate qualities expected in the concentrate flowsheet during start up activities.
 - The ability to attract and retain adequate workforce through start up, commissioning and operations phase of the project could impact project cost and schedule.
- **Marketing:**
 - The cobalt at ICO is contained within cobaltite, a mineral composed of cobalt, arsenic and sulphur. The ICO cobalt concentrate therefore contains elevated arsenic, as the arsenic cannot be separated from cobalt using conventional sulphide flotation methods. The marketability of the ICO concentrate is more limited due to the arsenic which requires specialised and safe extraction (such as that which Jervois plans to undertake at the SMP refinery via the use of a pressure oxidative leach ("POX") autoclave). Any delay or reduction in sales of the ICO cobalt concentrate could adversely affect the Group's future cash flow and overall profitability.
 - Arsenic will also deport to the copper concentrate, in quantities likely sufficient to trigger penalties from customers (which were incorporated into the ICO BFS marketing assumptions), but not in adequate volumes to affect the marketability of the concentrate or to render it a 'complex' material for global copper smelters.

Risk factors (4/14)

2.3 Risks related to the JRV USA's financial situation

The proceeds from the Offer will be used towards payment of capital expenditures, operating expenses and financing costs (including payment of interests on the Bonds) associated with the development and operation of the ICO Project. The proceeds from the Offer are expected to be sufficient for the Group to bring the ICO Project into continuous commercial production. If there is a shortfall in funding for ICO Project the Group has a history of successful equity fund raising and may also enter into pre-payment, mineral streams or inventory financing transactions, any, or a combination of which, may provide sufficient financing to bring the ICO Project into continuous commercial production. There can be no assurance that the Group will be able to obtain or access additional funding if required, or that the terms associated with the funding will be reasonable. If the Group, as concerns JRV USA and the ICO Project, is unable to obtain such additional funding, lease payments, work commitments, rental payments and option payments, if any, may not be satisfied and could result in a loss of property ownership or earning opportunities for JRV USA and the Group.

The management of the Group will have some discretion concerning the timing and size of the expenditures for sustaining capital of the ICO Project. As a result, an investor will still be subject to the judgment of the management of the Group for the application of the proceeds of the Offer. Further, the results and the effectiveness of the application of the proceeds are uncertain. If the proceeds are not applied effectively, the Group's results of operations and the value of the shares or secured assets may be materially and adversely affected.

2.4 Calculation of mineral resources and mineral reserves and limitations on mineral resource estimates

There is a degree of uncertainty attributable to the calculation of mineral reserves, mineral resources and corresponding grades being mined or dedicated to future production. Until mineral reserves or mineral resources are actually mined and processed, the quantity of mineral reserves or mineral resources and grades must be considered as estimates only. In addition, the quantity of mineral reserves or mineral resources may vary depending on metal prices. Any material change in the quantity of mineral reserves, mineral resources, grade or dilution may affect the economic viability of the ICO Project. In addition, there can be no assurance that mineral recoveries in small-scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production.

No assurance can be given that any particular level of recovery of minerals will in fact be realized or that identified mineral resources will ever qualify as a commercially mineable (or viable) deposit which can be legally and economically exploited. In addition, the grade of mineralization which may ultimately be mined may differ from that indicated by drilling results and such differences could be material. Production can be affected by such factors as permitting regulations and requirements, weather, environmental factors, unforeseen technical difficulties, unusual or unexpected geological formations and work interruptions. The estimated mineral resources at ICO should not be interpreted as assurances of commercial viability or of the profitability of any future operations. Moreover, certain sections of the mineral resources are reported at an "inferred" level. Inferred mineral resources have a substantial degree of uncertainty as to their existence, and economic and legal feasibility. Accordingly, there is no assurance that inferred mineral resources reported herein will ever be upgraded to a higher category. Investors are cautioned not to assume that part or all of an inferred mineral resource exists or is economically or legally mineable.

Jervois engaged independent consulting firms to both prepare (Orix Geosciences) and audit (CSA Global) the ICO Mineral Resource Estimate. RPM Global were engaged by Jervois as Independent Engineer for lenders, and part of their scope was to also review the mineral resource estimate. RPM Global's recommendation was that the resource classification must be solely based on drillhole spacing and, as a result, Measured tonnes should be changed to Indicated, and Indicated tonnes changed to Inferred tonnes. No change to the Inferred resource was recommended. Jervois and Orix disagree with RPM Global's opinion, which is also inconsistent with prior mineral resource estimates at ICO from Micon. The Group has commenced an additional infill drilling at ICO in order to increase the confidence in the mineral resource and mineral reserve estimates. The outcome of the drilling may result in an updated mine plan being prepared to take into account any changes to classification, tonnes and metal grades and may result in the operations at ICO reaching commercial production later than currently expected.

Risk factors (5/14)

3. RISKS TO THE SMP REFINERY

3.1 Capital cost estimates

The company has undertaken a BFS which includes estimates of the capital costs required to restart the SMP Refinery. Estimates are provided on a plus/minus 15% range as is standard in BFS estimates. There is a risk that the final capital expenditure will be higher than the upper end of this range due to macro-economic and project-specific factors including inflation, interest rates and currency fluctuation, supply chain disruptions, and project execution risks. If the capital expenditure amount is greater than the plus 15% range this may impact the ability of the company to complete the SMP Refinery restart, or impact the financial returns estimated for the SMP Refinery.

3.2 Nickel and Cobalt prices, premia and feedstock availability and payability

The feed supply cost is typically paid as a percentage of the cobalt and nickel price and may be influenced by levels of available supply feed stock. In market conditions where there is limited, or no feed supply, the Group may need to pay a higher percentage to secure supply or may not be able to secure any supply. Historically a higher payable is often associated with higher nickel or cobalt prices, however this is not always the case. If there is no supply or if a higher payable is required without a commensurate change in the quoted price of nickel or cobalt, this may impact the operating margin and therefore the future profitability of SMP refinery.

3.3 Intermediate feedstock impurity levels

The variability of the feed MHP (nickel) and Co(OH)₂ is unknown. Higher levels of metals such as manganese, magnesium and zinc can impact the product quality and plant operations.

3.4 Logistics

The logistics of receiving reagents, feed material and shipment of product has been assessed but forecasting errors may impact the cost for receiving materials and exporting the product

3.5 Brownfield construction

Brownfield construction has implicit complexity due to limited space for new equipment, laydown yards and construction assembly. Any impact from these issues may delay the construction process and may impact overall capital costs.

3.6 Permit and licenses

New permits and licences that may be required or modification of existing permits and licenses, associated with construction and or operating activities may be obtained in a longer time frame the anticipated, or not granted on the terms required by the SMP refinery. If such permits or licences are not received or are not as requested by the Group, this may have a material impact on the ability of the refinery to operate and therefore on the Group financial position.

4. RISKS TO THE GROUP

4.1 Global Operating Footprint and Russian Federation Invasion of Ukraine

The Company has activities across Finland, Australia, the United States and Brazil. The integration and ongoing management of this portfolio imposes heightened risks related to the ongoing business prospects of Jervois.

The invasion by the Russian Federation of Ukraine, the resulting economic sanctions and the potential escalation or expansion of the invasion and the global response to it may have an impact on the Company's business. It may result from a broader global economic fallout and its impact on commodity prices including their price discovery mechanisms, credit markets and commercial counterparty risk or have more local impacts at the operational level. The Company continues to monitor the situation and the impact the invasion, resulting sanctions and potential escalation or expansion may have on the Company. The Company's ability to obtain financing and the ability of the Company's vendors, suppliers, customers and partners to meet obligations may be impacted as a result of the invasion, the resulting sanctions and potential escalation or expansion. Similarly, the Company's ability to advance our stated strategy and business plan and commodity prices may be impacted.

4.2 Reliance on management

The success of the Group depends to a large extent upon its ability to retain the services of its senior management and key personnel. The loss of the services of any of these persons could have a materially adverse effect on the Group's business and prospects. There is no assurance that the Group can maintain the services of its Directors, officers or other qualified personnel required to operate its business.

Risk factors (6/14)

4.3 Group's operations are subject to human error

Despite efforts to attract and retain qualified personnel, as well as the retention of qualified consultants, to manage Group's interests, and even when those efforts are successful, people are fallible and human error could result in significant uninsured losses to Group. These could include loss or forfeiture of mineral claims or other assets for non-payment of fees or taxes, significant tax liabilities in connection with any tax planning effort Group might undertake and legal claims for errors or mistakes by Group personnel.

4.4 Community and stakeholder relations

The Company's relationships with the community in which it operates are critical to ensure the future success of its existing operations and the construction and development of its project. The future success of Jervois is reliant on a healthy relationship with local communities in which the Company operates. While the Company is committed to operating in a socially responsible manner, there is no guarantee that its efforts will be successful, in which case interventions by third parties could have a material adverse effect on the Company's business, financial position and operations.

4.5 Risks related to insurance and insurance coverage

Exploration, development and production operations on mineral properties and in refineries involve numerous risks, including unexpected or unusual geological operating conditions, ground or slope failures, fires, environmental occurrences and natural or climate change related phenomena such as prolonged periods of inclement weather conditions, floods and wildfires. It is not always possible to obtain insurance against all such risks and the Group may decide not to insure against certain risks because of high premiums or other reasons. Such occurrences could result in damage to, or destruction of, mineral properties or production facilities, personal injury or death, environmental damage to the Group's properties or the properties of others, delays in exploration, development or mining operations, supply chain disruptions, monetary losses and possible legal liability. Should such liabilities arise, they could reduce or eliminate future profitability and result in increasing costs and a decline in the value of the securities of the Group. If the Group is unable to fully fund the cost of remedying an environmental problem, it might be required to suspend operations or enter costly interim compliance measures pending completion of a permanent remedy. The lack of, or insufficiency of, insurance coverage could adversely affect the Group's future cash flow and overall profitability.

4.6 Project Delay

Jervois has a significant investment planned to complete construction in Idaho, US and to restart the SMP Refinery in Brazil. There are a number of risks inside and outside its control, such as availability of suitable financing, technical risk, infrastructure and logistics constraints, construction delays, cost overruns, insufficient labour skills or resources, delays in confirmatory permitting to move into construction then the commissioning and operating phases, or any other regulatory matters. Once complete given the risks outlined previously, there is no guarantee the results of ICO or SMP Refinery will be sufficient to offset such capital expenditures and generate adequate investor return.

Risk factors (7/14)

4.7 Competition risk in the market in which the Group operates

Significant and increasing competition exists for appropriate supply of feedstock for the mineral processing assets of the Group and the limited number of mining and mineral processing acquisition opportunities available. Additionally, new mineral processing facilities may be commissioned that will be in competition for the supply of feedstock and the sale of products in which the Group operates. The Group expects to leverage its increased size and market exposure to secure appropriate feed supply and to selectively seek strategic acquisitions in the future, however, there can be no assurance that suitable feed supply or acquisition opportunities will be identified. As a result of this existing or potentially new competition, some of which is with large established mining or refining companies with substantial capabilities and greater financial and technical resources than the Group, the Group may be unable to acquire adequate feed supply on suitable terms and this may impact the operating margin and therefore the future profitability of the Group. Additionally, the Group may be unable to acquire additional attractive mining or mineral processing assets on terms it considers acceptable. In addition, the Group's ability to consummate and to effectively integrate any future acquisitions on terms that are favourable to the Group may be limited by the number of attractive acquisition targets, internal demands on resources, competition from other companies and, to the extent necessary, the Group's ability to obtain financing on satisfactory terms, if at all.

4.8 Liquidity risk

The Group is transitioning to the operating phase at the ICO Project and the SMP Refinery, however the Group has not yet generated positive cash flow from these assets. The Group is a revenue generating group and will require working capital to manage its operations and therefore it is subject to liquidity risk. Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group is devoting significant resources to the development of its assets, however there can be no assurance that it will generate positive cash flow from operations in the future. The Group expects to continue to incur negative consolidated operating cash flow and losses until such time as it achieves commercial production at a particular project. Due to the lack of positive operating cashflow, the Group manages liquidity risk by maintaining adequate cash reserves, by continuously monitoring actual and forecast cash flows, its credit facilities and matching the maturity profiles of financial assets and liabilities.

4.9 Currency fluctuations

The Company's operations in the U.S., Finland, Brazil, and Australia make it subject to foreign currency fluctuations and such fluctuations may materially affect the Company's financial position, operational results and cashflows. The Company does not currently use an active hedging strategy to reduce the risk associated with currency fluctuations.

4.10 Commodity price risk

The Company is not currently a producing entity so is not directly exposed to fluctuations in commodity prices although these will affect equity market sentiment, the value of its securities and its ability to raise further capital on desired terms. As the Company transitions to become a producer as anticipated in the near term this risk will become the most material factor affecting its financial results.

Jervois Finland is directly exposed to the price of cobalt. Jervois Finland's profitability may be significantly affected by changes in the market price of cobalt.

The development of the Company's properties is dependent on the future prices of cobalt and nickel. Once the Company's properties enter commercial production, the Company's profitability will be significantly affected by changes in the market prices of cobalt and nickel. Metal prices are subject to volatile price movements, which can be material and occur over short periods of time and which are affected by numerous factors, all of which are beyond the Company's control. Such factors include, but are not limited to, interest and exchange rates, inflation or deflation, fluctuations in the value of the U.S. dollar and foreign currencies, global and regional supply and demand, speculative trading, the costs of and levels of metal production, and political and economic conditions. Such external economic factors are in turn influenced by changes in international investment patterns, monetary systems, the strength of and confidence in the U.S. dollar (the currency in which the prices of metals are generally quoted) and political developments. The effect of these factors on the prices of metals, and therefore the economic viability of the Company's mineral properties, cannot be accurately determined. The prices of cobalt and nickel have historically fluctuated widely, and future price declines could cause the development of (and any future commercial production from) the Company's mineral properties to be impracticable or uneconomic. As such, the Company may determine that it is not economically feasible to commence commercial production, which could have a material adverse impact on the Company's financial performance and results of operations. In such a circumstance, the Company may also curtail or suspend some or all of its exploration activities.

Risk factors (8/14)

4.11 Tenements, licences and permits

Jervois Mining USA holds permits for the operation of the ICO Project. Each of these have certain requirements and obligations attached to them, which if not met, will result in Jervois Mining USA losing the rights to operate in these land areas and the resulting negative impact to the future prospects of Jervois Mining USA. Jervois Finland holds permits for the operation of its facilities. Each of these have certain requirements and obligations attached to them, which if not met, will result in Jervois Finland losing the rights to operate in these areas and the resulting negative impact to the future prospects of Jervois Finland and could adversely affect the Group's future cash flow and overall profitability

There is no guarantee that title to the Group's mining leases, exploration licenses, environmental licenses and other tenure of property will not be challenged or impugned. The Group's tenure, permits and licenses may be subject to prior unregistered agreements, transfers, leases or native land claims and title may be affected by such unidentified or unknown claims or defects. Furthermore, any concession, permit or license may be withdrawn or the terms and conditions thereof, be changed by the relevant authority if the Group does not comply with its obligations under applicable laws or such specific concession, permit or license or if there otherwise are compelling reasons, (e.g. effects of the operations that could not have been foreseen at the time of authorization of such concessions, permits and licenses). In particular, mining tenements are subject to expenditure and work commitments which must be complied with in order to keep the tenements in good standing. In certain circumstances, these commitments may be varied at the discretion of the relevant mining authority. Failure to meet these commitments could lead to forfeiture of the tenement. Where tenement expenditures and work commitments or other regulatory requirements are not complied with, regulatory exemptions may need to be applied for within specified periods. Should exemptions not be applied for in time or are applied for in time but are not ultimately granted, fines may be payable to avoid the tenements being forfeited or, in extreme cases, the tenements may be forfeited.

Obtaining the necessary governmental licenses or permits is a complex and time-consuming process. There can be no assurance that the Group will be able to maintain or obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations or refinery activities at its projects. This could materially and adversely affect its business, results of operations, financial conditions or prospects. The ICO Project and SMP Refinery will require certain permits through construction and commissioning.

4.12 Environmental risks and other regulatory requirements

The activities of the Company are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation generally provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining or refining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations, including any proposed development of the Company's mineral properties and restart of the SMP Refinery, may require the submission and approval of environmental impact assessments. Environmental legislation is evolving to stricter standards, and enforcement, fines and penalties for noncompliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and Directors, officers and employees. The cost of compliance with changes in governmental regulations has potential to reduce the profitability of operations.

Failure to comply with applicable environmental laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining and mineral processing activities may be required to compensate those suffering loss or damage by reason of such activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations.

Amendments to current environmental laws, regulations and permits governing operations and activities of mining and metallurgical processing companies may change. Regulatory requirements surrounding site reclamation and remediation activities, or more stringent implementation thereof, could have a material adverse impact on the Group and cause increases in capital expenditures or production costs or reduction in levels of operational production, or require abandonment or delays in the development of new sites.

4.13 Financing Risks

The Company may require financing in the future to continue to develop its business and there can be no assurance that such financing will be available or, if available, that it will be on reasonable terms. If financing is obtained by issuing common shares, control of the Company may change, and investors may suffer additional dilution. To the extent financing is not available, lease payments, work commitments, rental payments and option payments, if any, may not be satisfied and could result in a loss of property ownership or earning opportunities for the Company.

Risk factors (9/14)

4.14 Land Title

No assurances can be given that there are no title defects affecting the properties in which Jervois has an interest. The Company's mineral properties and refineries may be subject to prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects. Other parties may dispute title to a property or the property may be subject to prior unregistered agreements and transfers or land claims by Indigenous people. Title may also be affected by undetected encumbrances or defects or governmental actions. Jervois has not conducted surveys of the Company's properties and the precise area and location of claims and other mineral rights may be challenged. Jervois may not be able to register rights and interests it acquires against title to applicable mineral properties. An inability to register such rights and interests may limit or severely restrict Jervois' ability to enforce such acquired rights and interests against third parties or may render certain agreements entered into by Jervois invalid, unenforceable, uneconomic, unsatisfied or ambiguous, the effect of which may cause financial results yielded to differ materially from those anticipated. Although Jervois believes it has taken reasonable measures to ensure proper title to its mineral properties, there is no guarantee that such title will not be challenged or impaired.

4.15 Pre-existing Environmental Liabilities

Pre-existing environmental liabilities may exist on the properties in which Jervois currently holds an interest or on properties that may be subsequently acquired by Jervois which are unknown to Jervois and which have been caused by previous or existing owners or operators of the properties. In such event, Jervois may be required to remediate these properties and the costs of remediation could be substantial. Further, in such circumstances, Jervois may not be able to claim indemnification or contribution from other parties. In the event Jervois was required to undertake and fund significant remediation work, such event could have a material adverse effect upon Jervois and the value of its securities.

4.16 Loan Default Risk

Loan default risk is the risk that loan covenants may be breached, which could lead to defaults under the loans, economic loss or investment write-off. Jervois Finland has approximately US\$115m of gross debt as at the end of October 2022 (being funds drawn under the US\$150m Mercuria facility, the details of which are set out on page 28). Jervois Finland's ability to service its debt is dependent on future business performance. ICO has US\$100m bond on issue. ICO's ability to service its debt is dependent on future business performance. There is a risk that the Group's cash flow generation will not be sufficient to meet these payment obligations which may result in defaults under this facility. There is a risk that the future business performance or other adverse impacts to the Group will result in non-compliance with these debt obligations. Refinance or replacement of this debt facility will depend on the Group's trading performance, economic conditions and the availability on acceptable terms of debt facilities in the future. There is no certainty that loans will be successfully refinanced or replaced.

Risk factors (10/14)

5. GENERAL RISKS

5.1 Coronavirus (COVID-19) and Global Health Crisis

The COVID-19 global pandemic and efforts to contain it may have an impact on the Company's business. These may extend to local impacts at the operational level, international travel restrictions, together with the broader global economic fallout. The Company continues to monitor the situation and the impact COVID-19 may have on the Company's mineral properties and refinery assets. Should the virus continue spread, travel bans be re-instated or should one or more of the Company's executives become seriously ill, the Company's ability to advance its mineral properties or refinery assets may be impacted. Similarly, the Company's ability to obtain financing and the ability of the Company's vendors, suppliers, consultants and partners to meet obligations may be impacted as a result of COVID-19 and efforts to contain the virus.

5.2 Economic conditions and other global or national issues

General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, current exchange controls and rates, national and international political circumstances (including wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemic and pandemics, may have an adverse effect on the Group's operations.

5.3 Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Group's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- introduction of tax reform or other new legislation;
- interest rates and inflation rates;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor its Directors warrant the future performance of the Company or any return on an investment in the Company.

5.4 Market liquidity and Share Price Fluctuations

There can be no guarantee of an active market for the Company's shares or that the price of the Company's shares will increase. There may be relatively few potential buyers or sellers of the Company's shares at any time. This may increase the volatility of the market price of the Company's shares. It may also affect the prevailing market price at which shareholders are able to sell their shares in the Company. In recent years, capital markets have experienced a high level of price and volume volatility, and the market price of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

5.5 Climate change risks

The main climate change risks are associated with changes in the frequency, intensity, spatial extent, duration, and timing of weather and climate events and conditions. Potential effects, such as those related to flooding, droughts, forest fires, insect outbreaks, erosion, landslides and others, may pose risks to operations and their safety, environmental, social and financial performance. Potential adverse effects may occur in terms of geotechnical stability, water supply systems and water balance, working conditions (humidity, heat stress), construction schedules, site access, reclamation as well as supply chain disruptions (e.g. access to inputs, shipping of products), among others. Economic implications of climate change may pose additional risks through reduced global demand for products and increased costs of inputs, among others. Although, through its expanding ESG regime, the Group is taking steps to mitigate its carbon emissions and assess and respond to climate change risks within its business and management processes, the nature and intensity of potential adverse impacts of climate change cannot be precisely ascertained.

Risk factors (11/14)

5.6 Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends or franking credits attaching to dividends can be given to the Company.

5.7 Force majeure

The Group's projects now or in the future may be adversely affected by the risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

5.8 Taxation

The acquisition and disposal of New Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring New Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of subscribing for New Shares under the Offer.

5.9 Litigation risks

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, reputation, financial performance and financial position.

5.10 Influence of third party stakeholders

Assets in which the Group holds an interest, including fixed assets and infrastructure / utilities, which the Group intends to utilize in carrying out its general business mandates, may be subject to interests or claims by third party individuals, groups, or companies. If such third parties assert any claims, the Group's activities may be delayed even if such claims are not meritorious. Such claims may result in significant financial loss and loss of opportunity for the Group.

Risk factors (12/14)

6. Equity Raising and underwriting risk

Jervois entered into an underwriting agreement with the Underwriters in respect of the Equity Raising on 10 November 2022 ("Underwriting Agreement").

Key terms of the Underwriting Agreement

Each Underwriter's obligations under the Underwriting Agreement, including to underwrite and manage the Equity Raising, are conditional on certain matters, including the timely delivery of certain due diligence materials. If certain conditions are not satisfied, or certain events occur, the Underwriters may terminate the Underwriting Agreement. Termination of the Underwriting Agreement by both Underwriters would have an adverse impact on the total amount of proceeds that could be raised under the Equity Raising and therefore on the ability of Jervois complete the SMP restart and other activities as set out in the use of proceeds section on Slide 30.

The events which may trigger termination of the Underwriting Agreement include (but are not limited to) the following:

- any material member of the Jervois group becomes insolvent, or there is an act or omission which is likely to result in a material member of the Jervois group becoming insolvent;
- Jervois ceases to be admitted to the official list of ASX or its shares are suspended from official quotation on ASX (other than as contemplated by the Underwriting Agreement), or cease to be quoted on, ASX;
- a material statement contained in the Equity Raising materials is or becomes misleading or deceptive or likely to mislead or deceive (whether by omission or otherwise);
- there are not, or there ceases to be, reasonable grounds in the reasonable opinion of the Underwriters for any statement or estimate in certain Equity Raising materials which relate to a future matter;
- there occurs an adverse new circumstance that arises after certain Equity Raising materials were given to ASX that would have been required to be included in certain Equity Raising materials (or otherwise to have been included in material previously disclosed to ASX) if it had arisen before certain Equity Raising materials were given to ASX;
- there are certain defects in a cleansing notice for the Equity Raising where the defect is materially adverse from the point of view of an investor;
- Jervois is prevented from conducting or completing the Equity Raising by or in accordance with the listing rules, certain regulatory authorities, any applicable laws, an order of a court of competent jurisdiction or a government agency, or otherwise is unable or unwilling to do any of these things;
- Jervois or any member of the Jervois group or any of their respective directors or officers engage, or have engaged in, or is charged in relation to, any fraudulent conduct or activity whether or not in connection with the Equity Raising;
- certain regulatory actions are taken or regulatory approvals are withdrawn or certain other proceedings commence;
- unconditional approval is refused or not granted for official quotation of the New Shares or ASX or TSXV makes an official statement to any person or indicates to Jervois or the Underwriters that official quotation of the New Shares will not be granted;
- certain delays in the timetable for the Equity Raising;
- certain issues with closing certificates under the Underwriting Agreement;
- Jervois withdraws all or any part of the Equity Raising in certain circumstances;
- certain changes in management or the board of directors of Jervois;
- if a material contract is materially breached or terminated or otherwise affected in a prescribed way;

Risk factors (13/14)

- Jervois alters its issued capital or disposes or attempts to dispose of a substantial part of its business, subject to certain exceptions;
- there is an event or occurrence, including any statute, order, rule, regulation, directive or request of any government agency which makes it illegal for the Underwriters to satisfy an obligation under the Underwriting Agreement, or to market, promote or settle the Equity Raising;
 - a director of Jervois is charged with an indictable offence whether or not relating to financial or corporate matters or fraud or financial crimes, or any director of Jervois is disqualified from managing a corporation under Part 2D.6 of the Corporations Act;
- any adverse change occurs in the assets, liabilities, financial position or performance, profits, losses or prospects of the Group from the position fairly disclosed by Jervois to ASX before the date of the Underwriting Agreement or in the Equity Raising materials, but does not include a material adverse change arising from changes in the Cobalt Price or Cobalt Hydroxide Price provided that the Jervois group does not suffer or incur a disproportionate effect compared to other participants in the cobalt industry;
- a change in the board of directors of Jervois occurs;
- certain breaches of the Underwriting Agreement or applicable law by Jervois, including in relation to the Equity Raising materials or the Equity Raising;

- (prosecution) a director of Jervois is charged with an indictable offence that does not relate to financial or corporate matters of fraud or financial crimes.

The ability of an Underwriter to terminate the Underwriting Agreement in respect of some of the termination events will depend on whether in the reasonable opinion of that Underwriter, the event:

- has or is likely to have a material adverse effect on the success, marketing or settlement of the Equity Raising or on the ability of the Underwriters to market, promote or settle the Equity Raising or the willingness of investors to subscribe for New Shares; or
- has given or is likely to give rise to a contravention by, or liability of, the Underwriters (or one of their respective affiliates) under, the Corporations Act or any other applicable law.

If an Underwriter terminates, Jervois will not be obliged to pay that Underwriter any fees which are not payable or accrued prior to the date of termination.

For details of the fees payable to the Underwriters, see the Appendix 3B released to ASX on 10 November 2022.

Jervois also gives certain representations, warranties and undertakings to the Underwriters. This includes an undertaking restricting the issue of certain securities by Jervois for a prescribed period subject to certain exceptions. Jervois also gives an indemnity to the Underwriters and their respective indemnified parties subject to certain carve-outs.

Risk factors (14/14)

Regulatory

Jervois will need to comply with Australian and Canadian securities laws (and certain other foreign securities laws), and the ASX listing rules and the TSX-V listing rules, in order to be able to proceed with the Equity Raising, issue new shares under the Equity Raising and successfully complete and close the Equity Raising. This involves Jervois having to making certain applications and filings with ASX and TSX-V, all of which are procedural in nature and generally within the control of Jervois. If Jervois does not make any filings when required, or is unable to meet any applicable securities law or listing rules requirements, or has any requested regulatory relief not granted or revoked, it may not be able to proceed with the Equity Raising in accordance with the proposed timetable, or in its current form, or at all. If this is the case, then participating shareholders and investors may not receive their applicable New Shares when anticipated, or at all. If the Equity Raising does not proceed, then this may have an adverse impact on the ability of Jervois to complete the SMP restart and other activities.

Dilution risk

Existing shareholders who do not participate in the Placement or the Entitlement Offer will have their percentage shareholding in the Company diluted. Depending on the size of a shareholder's existing holding and the number of shares allocated to them, a participating shareholder may still be diluted even though they participate in the Placement or the Entitlement Offer.

Forward-looking statements are provided as a general guide only and should not be relied on as an indication or guarantee of future performance. These statements may assume the success of the Company's business strategies, the success of which may not be realised within the period for which the forward-looking statements may have been prepared, or at all, and the receipt of applicable approvals to complete the Equity Raising.

Section 4 - Additional information

4.1 Responsibility for this Retail Information Booklet

This Retail Information Booklet (including the ASX Announcements in Section 3) and the Entitlement and Acceptance Form has been prepared by the Company. No party other than the Company has authorised or caused the issue of this Retail Information Booklet or the Entitlement and Acceptance Form, or takes any responsibility for, or makes or gives any statements, representations or undertakings in, this Retail Information Booklet or the Entitlement and Acceptance Form.

4.2 Date of this Retail Information Booklet

This Retail Information Booklet (other than the ASX Announcements in Section 3) is dated Thursday, 17 November 2022. Subject to the following paragraph, statements in this Retail Information Booklet and the Entitlement and Acceptance Form are made only as of the date of this Retail Information Booklet unless otherwise stated and the information in this Retail Information Booklet and the Entitlement and Acceptance Form remains subject to change without notice. The Company is not responsible for updating this Retail Information Booklet or the Entitlement and Acceptance Form.

The ASX Announcements are current as at Thursday, 17 November 2022, which is the date they were released on ASX. There may be additional announcements made by the Company on or after Thursday, 17 November 2022 and throughout the Retail Entitlement Offer Period that may be relevant in your consideration of whether to take part in the Retail Entitlement Offer. Therefore, it is prudent that you check whether any further announcements have been made by the Company before submitting an Application. The ASX Announcements made by the Company can be found at <https://jervoisglobal.com/investors/asx-announcements>.

4.3 Allotment, quotation and trading of New Shares

The Company has applied for quotation of the New Shares on ASX in accordance with ASX Listing Rule requirements. If ASX does not grant quotation of the New Shares, the Company will repay all Application Monies (without interest).

Subject to ASX approval being granted, it is expected that trading on ASX of New Shares issued and allotted under the Retail Entitlement Offer will commence trading on Thursday, 8 December 2022. Application Monies will be held by the Company on trust for Applicants until the New Shares are allotted. No interest will be paid on Application Monies.

It is the responsibility of Applicants to determine the number of New Shares issued and allotted to them prior to trading in those New Shares. The sale by an Applicant of New Shares prior to receiving their holding statement is at the Applicant's own risk.

To the maximum extent permitted by law, the Company, the Underwriters and the Share Registry have no responsibility and disclaim all liability (including for fault or negligence) in respect of persons who trade New Shares they believe have been issued to them before they receive their holding statements, whether on the basis of a confirmation of allocation or issue provided by the Company or the Share Registry or otherwise, or who otherwise trade or purport to trade New Shares in error or which they do not hold or are not entitled to.

If you are in any doubt as to these matters, you should seek professional advice.

4.4 No Retail Entitlements trading

Retail Entitlements are non-renounceable and cannot be traded on ASX or any other exchange, nor can they be privately transferred.

4.5 Ranking of New Shares

The New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally with the Existing Shares from their date of issue.

The rights attaching to the New Shares are set out in the Company's constitution and are regulated by the Corporations Act, ASX Listing Rules and general law.

4.6 Rounding of Entitlements

Where fractions arise in the calculation of Retail Entitlements, they will be rounded up to the nearest whole number of New Shares.

4.7 Reconciliation and the rights of the Company and the Underwriters

In any entitlement offer, investors may believe that they own more existing shares on the record date than they ultimately do. This may result in a need for reconciliation to ensure all eligible Shareholders have the opportunity to receive their full entitlement.

The Company may need to issue a small quantity of additional New Shares to ensure all Eligible Shareholders have the opportunity to receive their full Entitlement. The price at which these New Shares would be issued, if required, is the same as the Offer Price.

The Company reserves the right (in its absolute discretion) to reduce the number of Retail Entitlements or New Shares allocated to an Eligible Shareholder if the Company believes in its absolute sole discretion that their claim is overstated or if the Eligible Shareholder (or any beneficiary that the Eligible Shareholder holds Existing Shares on behalf of) fails to provide information requested to substantiate their claim.

In that case, the Company may, in its absolute discretion and subject to the terms of the Underwriting Agreement, require the relevant Eligible Shareholder to transfer excess New Shares to the Underwriters at the Offer Price per New Share. If necessary, the relevant Eligible Shareholder may need to transfer Existing Shares held by them or to purchase additional Shares on-market to meet this obligation. The relevant Eligible Shareholder will bear any and all losses and expenses caused by subscribing for New Shares in excess of their Retail Entitlement and any actions they are required to take in this regard.

By applying under the Entitlement Offer, you irrevocably acknowledge and agree to do the above as required by the Company or the Underwriters in their absolute discretion. You also apply acknowledging that there is no time limit on the ability of the Company or the Underwriters to require any of the actions set out above.

The Company also reserves the right to reject any Application that it believes comes from a person who is not eligible to accept an Entitlement.

4.8 No cooling off rights

Cooling off rights do not apply to an investment in the New Shares. You cannot withdraw your Application once it has been made or accepted.

4.9 Not financial product or investment advice

This Retail Information Booklet and the Entitlement and Acceptance Form is not a prospectus, product disclosure statement or other disclosure document under Australian law or any other law (and will not be lodged with ASIC or any foreign regulator). This Retail Information Booklet and the Entitlement and Acceptance Form is for information purposes only and is not an invitation or offer of securities for subscription, purchase or sale in any jurisdiction.

This Retail Information Booklet and the Entitlement and Acceptance Form should not be considered to be comprehensive and do not purport to contain all the information that you may require to make a decision about whether to submit your Entitlement and Acceptance Form and invest in New Shares. This Retail Information Booklet and Entitlement and Acceptance Form should be read in conjunction with the Company's other periodic statements and continuous disclosure announcements lodged with ASX which are available at www.asx.com.au.

Any Eligible Retail Shareholder who wishes to participate in the Retail Entitlement Offer should consider this Retail Information Booklet and the Entitlement and Acceptance Form in their entirety. Any Eligible Retail Shareholder who wishes to subscribe for and purchase New Shares will need to follow the instructions contained in this Retail Information Booklet and the Entitlement and Acceptance Form which accompanies it.

This Retail Information Booklet and the Entitlement and Acceptance Form do not constitute financial product or investment advice or any recommendation to acquire the Shares or New Shares and has been prepared without taking into account your objectives, financial circumstances or particular needs. They do not and will not form any part of any contract for the acquisition of New Shares.

Each recipient of this Retail Information Booklet should make their own enquiries and investigations regarding all information in this Retail Information Booklet and the Entitlement and Acceptance Form, including but not limited to the assumptions, uncertainties and contingencies which may affect future operations of the Company and the impact that different future outcomes may have on the Company.

Before making an investment decision, Eligible Retail Shareholders should consider the appropriateness of the information having regard to their own objectives, financial situation and needs, make their own assessment of the information and seek advice appropriate to their jurisdiction in relation to the information and any action taken on the basis of the information. Any references to, or explanations of, legislation, regulatory issues or any other legal commentary (if any) are indicative only, and do not summarise all relevant issues and are not intended to be a full explanation of a particular matter.

The Company is not licensed to provide financial product advice in respect of the Shares. If, after reading this Retail Information Booklet, you have any questions about whether you should invest in the Retail Entitlement Offer, you should seek professional advice from a licensed advisor before making any investment decision.

4.10 Continuous disclosure

The Company is a "disclosing entity" under the Corporations Act and is subject to regular reporting and disclosure obligations under the Corporations Act and the ASX Listing Rules, including the preparation of annual reports and half yearly reports.

The Company is required to notify ASX of information about specific events and matters as they arise for the purposes of ASX making that information available to the stock markets conducted by ASX. In particular, the Company has an obligation under the ASX Listing Rules (subject to certain exceptions) to notify ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price or value of the Shares. That information is available to the public from ASX (www.asx.com.au) or on the Company's website at <https://jervoisglobal.com/investors/asx-announcements>.

Some documents are required to be lodged with ASIC in relation to the Company. These documents may be obtained from, or inspected at, an ASIC office.

The Company is also a "reporting issuer" under applicable Canadian securities laws and is subject to continuous disclosure obligations under such laws, including the preparation of annual and quarterly financial statements, management's discussion and analysis and an

annual information form. The Company is also required to make timely disclosure in Canada of any “material change” (as such term is defined under applicable Canadian securities laws) by way of news release and material change report. Copies of the continuous disclosure documents, news releases and material change reports (other than any confidential material change reports) filed with the Canadian Securities Administrators by the Company are available under the Company’s profile on the SEDAR website maintained by the Canadian Securities Administrators at www.sedar.com.

4.11 Brokerage and stamp duty

No brokerage fee is payable by Eligible Retail Shareholders who accept their Retail Entitlement. No stamp duty should be payable for subscribing for New Shares under the Retail Entitlement Offer.

4.12 Underwriting arrangements and disclaimers

The Underwriters are acting as joint lead managers, bookrunners and underwriters to the Offer. The Company entered into the Underwriting Agreement with the Underwriters in respect of the Offer on Thursday, 10 November 2022.

The key terms of the Underwriting Agreement are contained on pages 54 to 56 of the Investor Presentation in Section 3 of this Retail Information Booklet.

Neither the Underwriters nor any of their respective related bodies corporate or affiliates nor any of their respective directors, officers, partners, employees, representatives, agents, consultants, contractors or advisers (collectively, the “**Underwriter Parties**”) or any of the advisers to the Company have authorised, permitted or caused the issue, lodgement, submission, despatch or provision of this Retail Information Booklet or the Entitlement and Acceptance Form (or any other materials released by the Company) and none of them makes or purports to make any statement in this Retail Information Booklet or the Entitlement and Acceptance Form and there is no statement in this Retail Information Booklet or in the Entitlement and Acceptance Form which is based on a statement made by any of them.

Each of the Underwriters is a full service financial institution engaged in various activities, which may include trading, financing, financial advisory, investment management, research, principal investment, hedging, market making, brokerage and other financial and non-financial activities including for which they have received or may receive customary fees and expenses.

Each of the Underwriters is acting for and providing services to the Company in relation to the Offer and will not be acting for or providing services to Shareholders or potential investors. Each of the Underwriters have been engaged solely as an independent contractor and are acting solely in a contractual relationship on an arm’s length basis with the Company. The engagement of each of the Underwriters is not intended to create any fiduciary obligations, agency or other relationship between the Underwriters and the Company, Shareholders or potential investors.

Each of the Underwriters will receive fees and expenses for acting as joint lead managers, bookrunners and underwriters to the Offer. The Underwriter Parties may, from time to time, hold interests in the securities of, or earn brokerage, fees or other benefits from the Company and may in the future be lenders to the Company or its related bodies corporate or affiliates.

Determination of eligibility of investors for the purposes of the institutional or retail components of the Offer is determined by reference to a number of matters, including legal and regulatory requirements, logistical and registry constraints and the discretion of the Company and the Underwriters. To the maximum extent permitted by law, each of the Company and the Underwriters and each of their respective related bodies corporate and affiliates and each of their respective directors, officers, partners, employees, representatives, agents, consultants, contractors and advisers (together, the “**Beneficiaries**”) disclaim any duty or liability (including for fault or negligence) in respect of that determination and the exercise or otherwise of that discretion.

To the maximum extent permitted by law, the Underwriter Parties exclude and disclaim all liability (including for fault or negligence) for any expenses, losses, damages or costs incurred by you as a result of your participation in, or failure to participate in, the Retail Entitlement Offer and the information in this Retail Information Booklet or the Entitlement and Acceptance Form being inaccurate or due to information being omitted from either. Further, the Underwriter Parties make no representation or warranty, express or implied, as to whether you or your related parties should participate in the Entitlement Offer nor do they make any representations or warranties, express or implied, as to the fairness, currency, accuracy, reliability or completeness of the information in this Retail Information Booklet and the Entitlement and Acceptance Form.

The Underwriter Parties take no responsibility for any part of this Retail Information Booklet or the Entitlement or Acceptance Form or any action taken by you on the basis of that information. To the maximum extent permitted by law, each of the Underwriters exclude and disclaim all liability (including for fault or negligence) for any direct, indirect, consequential or contingent loss or damage whatsoever arising from the use of an part of this Retail Information Booklet or the Entitlement and Acceptance Form or otherwise arising in connection with either.

The Underwriter Parties make no recommendation as to whether you or your related parties should participate in the Retail Entitlement Offer nor do they make any representations or warranties, express or implied, to you concerning the Entitlement Offer or any such information, and by returning your personalised Entitlement and Acceptance Form or otherwise paying for your New Shares through BPAY® or EFT in accordance with the instructions on your personalised Entitlement and Acceptance Form you represent, warrant and agree that you have not relied on any statements made by the Underwriter Parties in relation to the New Shares or the Offer generally and you further expressly disclaim that you are in a fiduciary relationship with any of them.

4.13 Disclaimer of representations

No person other than the Company is authorised to give any information, or to make any representation, in connection with the Retail Entitlement Offer that is not contained in this Retail Information Booklet.

Any information or representation that is not in this Retail Information Booklet may not be relied on as having been authorised by the Company, or its related bodies corporate or affiliates, in connection with the Retail Entitlement Offer. Except as required by law, and only to the extent so required, none of the Company or its Beneficiaries or any other person, warrants or guarantees the future performance of the Company or any return on any investment made pursuant to this Retail Information Booklet.

4.14 Foreign jurisdictions

This Retail Information Booklet has been prepared to comply with the requirements of the securities laws of Australia and New Zealand.

This Retail Information Booklet, the Investor Presentation, any accompanying ASX Announcements and the Entitlement and Acceptance Form do not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or to any person who is acting for the account or benefit of any person in the United States (to the extent such person holds Shares and is acting for the account or benefit of a person in the United States) or in any jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer. No action has been taken to register or qualify the Retail Entitlement Offer or the New Shares, or otherwise permit the offering of the New Shares, in any jurisdiction other than Australia and New Zealand. Return of the personalised Entitlement and Acceptance Form will be taken by the Company to constitute a representation by you that there has been no breach of any such laws. Eligible Retail Shareholders who are nominees, trustees or custodians should see Section 2.11.

The distribution of this Retail Information Booklet (including in electronic format) outside Australia and New Zealand may be restricted by law. If you come into possession of this

Retail Information Booklet, you must observe such restrictions. In particular, this document or any copy of it must not be distributed in the United States. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

Foreign exchange control restrictions or restrictions on remitting funds from your country to Australia may apply. Your application for New Shares is subject to all requisite authorities and clearances being obtained for the Company to lawfully receive your Application Monies.

New Zealand

The New Shares are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021.

This document has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority under the Financial Markets Conduct Act 2013. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

United States

This Retail Information Booklet, the Investor Presentation, any accompanying ASX Announcements and the Entitlement and Acceptance Form do not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or to any person in the United States or any person who is acting for the account or benefit of any person in the United States (to the extent such person holds Shares and is acting for the account or benefit of a person in the United States).

Neither the Retail Entitlements nor the New Shares have been, or will be, registered under the U.S. Securities Act or the securities laws of any state or other jurisdiction of the United States. Accordingly, the Retail Entitlements may not be issued to, or taken up or exercised by, and the New Shares may not be offered or sold, directly or indirectly, to, persons in the United States or persons acting for the account or benefit of persons in the United States (to the extent such person holds Shares and is acting for the account or benefit of a person in the United States).

The New Shares under the Retail Entitlement Offer may only be offered and sold outside the United States in “offshore transactions”, as defined in Rule 902(h) under the U.S. Securities Act in reliance on Regulation S under the U.S. Securities Act.

4.15 Ineligible Shareholders

All Shareholders who do not satisfy the criteria to be Eligible Retail Shareholders or Eligible Institutional Shareholders are Ineligible Shareholders. Ineligible Shareholders are not entitled to participate in the Entitlement Offer, unless the Company otherwise determines.

The restrictions upon eligibility to participate in the Entitlement Offer arise because the Company has determined, pursuant to ASX Listing Rule 7.7.1(a) and section 9A(3)(a) of the Corporations Act, that it would be unreasonable to extend the Entitlement Offer to Ineligible Shareholders. This decision has been made after taking into account the relatively small number of Ineligible Shareholders, the number and value of New Shares to which those Ineligible Shareholders would otherwise be entitled and the potential costs of complying with the applicable legal and regulatory requirements in the jurisdictions in which the Ineligible Shareholders are located in relation to the Entitlement Offer.

The Company, in its absolute discretion, may extend the Entitlement Offer to any Shareholder if it is satisfied that the Entitlement Offer may be made to the Shareholder in compliance with all applicable laws. The Company, in its absolute discretion, reserves the right to determine

whether a Shareholder is an Eligible Retail Shareholder, Eligible Institutional Shareholder or an Ineligible Shareholder. To the maximum extent permitted by law, the Company and its related bodies corporate and affiliates disclaims any duty or liability (including for fault or negligence) in respect of such determination and the exercise or otherwise of that discretion.

4.16 Withdrawal of the Offer

Subject to applicable law, the Company reserves the right to withdraw all or part of the Offer and the information in this Retail Information Booklet at any time, in which case the Company will refund Application Monies in relation to New Shares not already issued in accordance with the Corporations Act and without payment of interest. In circumstances where New Shares have already been allotted under the Institutional Entitlement Offer and the Placement, the Company may only be able to withdraw (to the extent permitted by law) the Entitlement Offer with respect to New Shares to be issued under the Retail Entitlement Offer.

You agree that to the maximum extent permitted by law any Application Monies paid by you to the Company will not entitle you to receive any interest and that any interest earned in respect of Application Monies will belong to the Company.

4.17 Privacy

As a Shareholder, the Company and the Share Registry have already collected certain personal information from you. If you apply for New Shares, the Company and the Share Registry may update that personal information or collect additional personal information for the purposes of:

- (a) processing your application and assessing your exercise of your Retail Entitlements and acceptance of the New Shares;

Section 5 - Australian taxation considerations

5.1 Introduction

This Section is a general summary of the Australian income tax, GST and stamp duty implications of the Retail Entitlement Offer for certain Eligible Retail Shareholders.

The taxation implications of the Retail Entitlement Offer will vary depending upon your particular circumstances. Accordingly, you should seek and rely upon the professional advice of your own taxation or financial advisor before determining the particular taxation treatment that will apply to you.

Neither the Company nor any of its officers or employees, nor its taxation and other advisers, accepts any liability (including for fault or negligence) or responsibility in respect of any statement concerning taxation consequences, or in respect of the taxation consequences.

The comments in this Section deal only with the Australian taxation implications of the Retail Entitlement Offer if you:

- are an individual, company or complying superannuation entity that is a resident for Australian income tax purposes; and
- hold your Shares on capital account.

The comments do not apply to you if you:

- are not a resident of Australia for Australian income tax purposes or are exempt from Australian income tax;
- hold your Shares as revenue assets or trading stock (which will generally be the case if you are a bank, insurance company or carry on a business of share trading);
- are subject to the taxation of financial arrangements regime in Division 230 of the *Income Tax Australia Act 1997*; or
- acquired the Shares in respect of which the Retail Entitlements are issued under any employee share scheme or where the New Shares are acquired pursuant to any employee share scheme.

This taxation summary is necessarily general in nature and is based on the Australian tax legislation and administrative practice in force as at the date of this Retail Information Booklet. It does not take into account any financial objectives, tax positions, or investment needs of Eligible Retail Shareholders. It is strongly recommended that each Eligible Retail Shareholder seek their own independent professional tax advice applicable to their particular circumstances.

5.2 Issue of Retail Entitlement

The issue of the Retail Entitlement should be non-assessable non-exempt income and should not, in itself, result in any amount being included in your assessable income.

5.3 Exercise of Retail Entitlement

You will acquire New Shares where you exercise all or part of your Retail Entitlements under the Retail Entitlement Offer.

No Australian income tax liability should arise for you on the exercise (i.e. taking up) of your Entitlements.

If you take up all or some of your Entitlement, you will acquire New Shares with a cost base for Australian CGT purposes equal to the Offer Price payable by you for those New Shares plus certain non-deductible incidental costs you incur in acquiring them.

New Shares will be taken to have been acquired on the day you exercise the Entitlements.

5.4 Lapse of Retail Entitlement

If you do not take up all or part of your Retail Entitlement in accordance with the instructions set out above, then that Retail Entitlement will lapse and you will not receive any consideration for your Retail Entitlement that is not taken up. There should be no tax implications for you from the lapse of all or part of your Retail Entitlement.

5.5 Taxation in respect of Dividends on New Shares

Any future dividends or other distributions made in respect of New Shares will be subject to the same income taxation treatment as dividends or other distributions made on Existing Shares held in the same circumstances.

5.6 Disposal of New Shares

The disposal of New Shares will constitute a disposal for CGT purposes.

On disposal of a New Share, an Eligible Retail Shareholder will make a capital gain if the capital proceeds received on disposal exceed the cost base of the New Share. An Eligible Retail Shareholder will make a capital loss if the capital proceeds are less than the reduced cost base of the New Share. The cost base of New Shares is described above in Section 5.3.

Eligible Retail Shareholders that are individuals, trusts or complying superannuation entities that have held their New Shares for 12 months⁶ or more at the time of disposal should be entitled to apply the applicable CGT discount factor to reduce the capital gain (after offsetting capital losses). The CGT discount factor is 50% for individuals and trusts and 33.33% for complying superannuation entities.

New Shares will be treated for the purposes of the CGT discount as having been acquired when you exercise your Retail Entitlement. Accordingly, to be eligible for the CGT discount, the New Shares must be held for at least 12 months⁷ after the date that you exercised your Retail Entitlement.

If you make a capital loss, you can only use that loss to offset other capital gains from other sources (i.e. the capital loss cannot be used against taxable income on revenue account). However, if the capital loss cannot be used in a particular income year, it can be carried forward to use in future income years, providing certain tests are satisfied.

5.7 Provision of TFN and/or ABN

The Company may be required to withhold tax from you on payments of dividends that are not fully franked, at the specified rate, and remit such amounts to the ATO, unless you have provided an ABN, TFN, or you have informed us that you are exempt from quoting your TFN or ABN.

You are not required to provide your TFN or ABN to the Company, however you may choose to do so. If you have previously quoted your ABN, TFN, or have notified us that an exemption

⁶ The ATO measures the period of 12 months for this purpose exclusive of both the acquisition date and the disposal date.

⁷ As above.

from quoting your TFN/ABN exists, that quotation or exemption will also apply in respect of any New Shares acquired by you.

5.8 GST and stamp duty

No Australian GST or stamp duty should be payable by you in respect of the issue, exercise or lapse of Retail Entitlements, or the acquisition of New Shares pursuant to the Retail Entitlement.
