

## ASX Announcement

4 July 2023

### Change in Auditor

**Globe Metals & Mining Limited** (ASX: GBE) (“Globe” or “Company”) advises that, in accordance with ASX Listing Rule 3.16.3, BDO Audit Pty Ltd (**BDO**) has been appointed as auditor of the Company effective from the date of this announcement.

The change follows the resignation of Ernst & Young as Globe’s auditor in accordance with section 329(5) of the *Corporations Act* 2001 (Cth) (**Act**) and ASIC’s consent to the resignation. The change in auditor has occurred due to the Company tendering the audit service.

BDO’s appointment is effective until the 2023 Annual General Meeting of the Company. In accordance with section 327B of the Act, a resolution will be put to shareholders at the 2023 Annual General Meeting to appoint BDO as auditor of the Company.

#### Authorisation for Release

This announcement has been authorised for release by the Company Secretary.

#### About the Kanyika Niobium Project

The Kanyika Niobium Project is located in central Malawi, approximately 55km northeast of the regional centre of Kasangu and is secured by Large-Scale Mining Licence No. LML0216/21 which grants the Company security of tenure and the right to mine niobium, tantalum, and deleterious uranium.

Drilling programs totalling 33.8 kilometres of percussion and core drilling have defined the extent of mineralisation. Structured and progressive engineering studies have resulted in the current (JORC 2012) Mineral Resource Estimate (refer below) and given rise to significant improvements and simplifications in the process flowsheet, from that first imagined.

In addition, Globe has undertaken substantial metallurgical optimisation work and commissioned a pilot plant to demonstrate and further optimise metallurgical processes. Metallurgical optimisations studies have improved recoveries from 62% in 2012 to 75% today, through simple novel patented metallurgical processes.

The Kanyika operations will produce a pyrochlore mineral concentrate that contains both niobium and tantalum in commercially valuable volumes to be shipped to a refinery for advanced processing into high purity materials.

A Mineral Resource Estimate for the Kanyika Niobium Project under the 2012 JORC guidelines was reported to ASX on 11 July 2018 as follows:

Table 1: MRE for KNP using a 1,500 ppm Nb<sub>2</sub>O<sub>5</sub> lower cut

| Category     | Resource (Mt) | Nb <sub>2</sub> O <sub>5</sub> (ppm) | Ta <sub>2</sub> O <sub>5</sub> (ppm) |
|--------------|---------------|--------------------------------------|--------------------------------------|
| Measured     | 5.3           | 3,790                                | 180                                  |
| Indicated    | 47            | 2,860                                | 135                                  |
| Inferred     | 16            | 2,430                                | 120                                  |
| <b>TOTAL</b> | <b>68.3</b>   | <b>2,830</b>                         | <b>135</b>                           |

Table 2: MRE for KNP using a 3,000 ppm Nb<sub>2</sub>O<sub>5</sub> lower cut

| Category     | Resource (Mt) | Nb <sub>2</sub> O <sub>5</sub> (ppm) | Ta <sub>2</sub> O <sub>5</sub> (ppm) |
|--------------|---------------|--------------------------------------|--------------------------------------|
| Measured     | 3.4           | 4,790                                | 220                                  |
| Indicated    | 16.6          | 4,120                                | 160                                  |
| Inferred     | 2.8           | 4,110                                | 190                                  |
| <b>TOTAL</b> | <b>22.8</b>   | <b>4,220</b>                         | <b>190</b>                           |

### Mineral Resource Estimates

The information in this report that relates to Mineral Resources is extracted from the report titled “Kanyika Niobium Project – Updated JORC Resource Estimate” released to the Australian Securities Exchange (ASX) on 11 July 2018 and available to view at [www.globemm.com](http://www.globemm.com) and for which Competent Persons’ consents were obtained. Each Competent Person’s consent remains in place for subsequent releases by the Company of the same information in the same form and context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent.

The Company confirms that is not aware of any new information or data that materially affects the information included in the original ASX announcement released on 11 July 2018 and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the original ASX announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons’ findings are presented have not been materially modified from the original ASX announcement.

Full details are contained in the ASX announcement released on 11 July 2018 titled “Kanyika Niobium Project – Updated JORC Resource Estimate” available to view at [www.globemm.com](http://www.globemm.com).
