### Outlook

Post the COVID19 years we continue to experience the secondary effects of flooding the world economy with cash through global stimulus packages distributed during 2020 and 2021. These actions have led to a sharp rise in inflation, forcing Central Banks around the world to lift interest rates at an aggressive rate. We expect to see further challenges emerge following high inflation and rising interest rates over the short to medium term.

However, as we have explained many times before, despite times of uncertainty there are always opportunities to invest within equity markets. Our goal is to always invest in high quality businesses with a strong balance sheet, competitive advantage and managed by capable and trustworthy people. We seek to invest in businesses that will pay us an attractive and sustainable dividend stream throughout the cycle.

In this environment we target those companies that are more defensive in nature and display a competitive advantage. Those companies who have pricing power and the ability to pass on prices to their customers to ensure continued profitability, earnings growth and dividend growth for our shareholders should perform well. We aim to invest in these businesses at a reasonable price with a view of holding them for the long-term.

BKI holds a portfolio of high-quality dividend paying stocks and has no debt. We are well positioned to take advantage of any market opportunity which may present itself over the year ahead with 8.3% of the portfolio currently in cash.
