Altium CEO Mr Aram Mirkazemi commented, “Our Cloud-First Strategy is transforming our product portfolio from stand-alone desktop design software to a connected cloud-based design platform providing mid-market customers with access to enterprise capabilities. We are also gaining increasing traction in the enterprise market, where Altium 365 is proving to be a game-changer for our prospects of succeeding with enterprise customers. As an example of this, we recently closed a significant multi-million-dollar, multi-year contract with Renesas Electronics Corporation (a global semiconductor provider) who have decided to standardize on Altium design software with the view to streamline their go-to-market and customer engagement leveraging Altium 365.”

“Furthermore, we are connecting Octopart to Altium Designer to create a transformative outcome for the industry and as we invest in both *make* and *buy* bolt-on capabilities through M&A that will deepen the value proposition and reach of Octopart”, said Mr Mirkazemi.

Mr Mirkazemi further added, “Adoption of Altium 365 continues to grow in strength capturing the interest of the wider engineering community and providing a strong basis from which to monetize beyond PCB designers.”

Altium Interim CFO Mr Richard Leon commented, “Beyond our Cloud-First Strategy, the investment that we made in the digitization of our transactional sales in the mid-market is beginning to be rewarded. Altium has returned to its pre-COVID form with Americas delivering a strong financial performance across all metrics. The Americas increased revenue by 32.3%, increased new software licences by 17% and increased subscriptions by 10%. This bodes well, as the United States is our leading market and I expect our performance in other western economies to follow the same pattern in time.”

Mr Leon further noted, “What is remarkable is that Altium is performing strongly while investing more than ever before in transformation to deliver a sustainable long-term financial performance. We made a number of significant leadership hires during the fiscal year to support our drive toward our aspirational goal of US\$500 million in revenue by fiscal 2026. In fiscal 2024, we will continue to invest in our enterprise sales and cloud platform business to expand our total addressable market (TAM).”

Outlook

Altium provides guidance for the 2024 financial year of:

- Revenue of US\$315 million to US\$325 million (20%-23% growth), comprising:
 - US\$250 million to US\$255 million for Design Software (23%-26% growth)
 - US\$65 million to US\$70 million for Cloud Platform (Octopart and Smart Manufacturing) (8%-16% growth)
- Underlying EBITDA margin of 35%-37%

Dividend
