Preliminary Financial Report, FY 2023

31 August 2023

# Message from the CEO

We are pleased to share our preliminary financial report today. This should be read as a precursor to the annual report which we will release in September. The annual report will include a much more detailed analysis of the performance of the business over the past year and a preview of what's to come.

The highlights of today's update are the 455% increase in revenue YoY while reducing cash used in operations by 42% YoY.

As discussed in our most recent 4C, the company is currently working on integrating our core brands and services, to leverage the data from each to bring our customers world-class services and increase sales. To this end, and since our last update, we have deployed an updated version of Vinyl.com based on early customer feedback. We have optimised our technical workflow and taken development of Vinyl.com fully in-house.

We have also begun the important work of bringing together the Jaxsta and Vampr creator functionalities with updates to our mobile platforms shipping at regular intervals.

Our focus for the next 12 months will remain on increasing our revenues and moving towards profitability.

I look forward to sharing our annual report in the coming weeks where we will elaborate on the above and also schedule an investor presentation where we will have the opportunity to discuss progress with investors.

- the Company registers a full year net profit of \$2,500,000 at which time 50% of the note is converted automatically.

On 24 June 2022, the shareholders authorised the Company to enter into an additional tranche of the prior convertible note agreement with Songtradr Inc. for a principal value of \$3,000,000. Conversion would result in the issue of 142,857,143 fully paid ordinary Jaxsta shares at a price of \$0.021 per share for the principal value of the note. All the conditions of the original convertible note remain and in addition the Company agreed to appoint two directors proposed by Songtradr and enter into a cost reduction and growth plan agreed to by Songtradr. The Company completed those requirements by the completion of the shareholder approval. Additionally, as a consequence of the variation of the note, the original note of \$1,420,000 would change the conversion price from \$0.035 to \$0.021, resulting in the potential issue of a further 27,047,619 ordinary shares.

The noteholder at their option can convert or seek repayment of the note at the expiration of the term of the note. The note has an anti-dilution clause that adjust the conversion price if certain circumstances occur before the final redemption date. The note has a term of up to 3 years and carries a coupon rate of 7.5% which will be accrued and paid at the end of the term or capitalised and converted at the time of conversion or repayment. The note is secured by a first ranking security over the assets of the Company and its subsidiaries. The noteholder has issued a conversion notice to be executed for Tranche #1 to be converted at the Tranche #1 expiry date of 9 September 2023.

## Note 8. Borrowings and derivative financial instruments (continued)

The second tranche also includes a separate option to invest a further \$3,000,000 under an option agreement with an exercise price of \$0.021 per share. The option has a life of three years and can only be exercised if Tranche #2 is partially or fully converted and up to the amount of Tranche 2 converted into shares.

- (i) **Tranche 1** - Under the requirements of AASB 9 *Financial Instruments*, the change in terms of the notes requires derecognition of the original note and recognition of the new note, with the difference recognised in the profit or loss. The note is considered a hybrid financial instrument that contains a financial liability host and an embedded derivative based on the fair value of the conversion option that are not closely related. The financial liability host and the embedded derivative components have therefore been bifurcated and valued separately.

As of 30 June 2023, the tranche 1 host liability is recorded at \$1,597,155 (2022: 846,483) and the derivative liability has been measured at \$1,121,058 (2022: \$557,919) after recording a fair value gain for the year of \$346,610 (2022: loss of \$111,436). This reflects the current nature of the debt and represents interest and principal.

- (ii) **Tranche 2** - The note is considered a hybrid financial instrument that contains a financial liability host and an embedded derivative based on the fair value of the conversion option that are not closely related. The financial liability host and the embedded derivative components have therefore been bifurcated and valued separately.

As of 30 June 2023, the tranche 2 derivative liability has been measured at \$2,850,072 (2022: \$1,013,502), after recording a fair value loss of \$2,823,041 and an interest expense of \$373,370.

On 1 June 2023, the Company entered into a one year convertible note agreement with one of the vendors of Vampr, as part of the transaction for a principal amount of US\$258,000. The noteholder has the right to convert the note at a conversion price of A\$0.05. The note carries a 10% interest rate. The note is considered a single combined instrument at FVTPL. The Company recognised a fair value loss of \$28,923.

The total fair value loss on re-measurement of the derivative liability components as at 30 June 2023 was \$2,448,508 (2022: gain of \$366,150).
