# CHAIRPERSON'S LETTER

During the past financial year, Patriot Lithium achieved the significant milestone of listing on the Australian Securities Exchange (ASX) on December 9, 2022, which facilitated the acceleration of an exciting exploration program. The portfolio of exploration projects that has been assembled is focused on North American opportunities, a region that is rapidly becoming the global preference for high-grade, hard rock lithium exploration.

The successful Initial Public Offering (IPO) raised A\$10 million and delivered the necessary funds to drive our initial exploration plans in the US states of South Dakota, Wyoming and Arizona but also the staking of multiple new greenfields projects in Ontario, Canada.

We welcomed Mr. Nick Vickery as our Managing Director and Chief Executive Officer on April 12, 2023. Mr. Vickery has a strong background of experience in the lithium industry, most notably from his senior executive role with Covalent Lithium. His leadership has already added positive direction to our operations, by prioritising the opportunities within the portfolio and accelerating activity when early reconnaissance success has justified increased attention.

The early reconnaissance in Ontario quickly uncovered the significant potential of the newly staked claims, particularly those forming Patriot's Gorman project in the North-West, where an 8km outcropping pegmatite trend was discovered.

Quickly realising the potential scale and significance of this find, we moved promptly to explore the area further during the remainder of the Ontario exploration season. This exploration confirmed lithium mineralisation across at least 5.2km of the pegmatite trend, with rock chip sample results of up to 3.7% Li<sub>2</sub>O. We have now completed 3 phases of exploration on Gorman, conducting significant mapping and sampling to analyse the potential mineralization and scale of the project with a view to identifying drill targets to test in 2024.

As we reflect on the year's achievements and look ahead to the future, I want to express my gratitude to the Patriot team, our dedicated shareholders and exploration partners who have played a crucial role in our journey so far.

I am confident that the year ahead will bring more exciting discoveries and more opportunities for Patriot to grow. Our Company is well-positioned to capitalise on the high-quality project portfolio that has been assembled and we look forward to sharing our journey with our shareholders.

# **Review of Operations**

# **Operational Update:**

The successful IPO in December provided the capital required for Patriot Lithium to immediately commence multiple exploration activities over 100% owned Projects in North America.

The initial focus was on the proven high grade Black Hills District in South Dakota (Keystone and Tinton West Projects) and the emerging high grade Pegmatite Belt in Arizona (Wickenburg Project).

While conducting initial exploration activities at these locations, Patriot strategically acquired seven new projects through a staking program within the highly prospective North-western region of Ontario (Gorman, Forester, Birkett, Pak East, Dryden, Bull, and Sydney Projects). The new projects significantly expanded the Company's portfolio of prospective land packages by adding over 1,000 km² and increased the availability of opportunities to capitalise on the growing lithium demand in North America.

#### **Ontario Activities**

Subsequent to financial year end, Patriot's exploration team completed a first-pass reconnaissance exploration at the Gorman Project, identifying an impressive 8km-long pegmatite trend along trend from Frontier Lithium's world-class PAK-Spark lithium project.

High-grade rock chip assays up to 3.7%  $\text{Li}_2\text{O}$  have verified that lithium is present within at least a 5.2km sub section of this trend, which is open along strike in both directions, further validating the potential scale of the Gorman Project. Of the 102 rock chip samples submitted for assaying from the Gorman Project, 37 returned >1.0%  $\text{Li}_2\text{O}$ , 18 returned >2.0%  $\text{Li}_2\text{O}$  and 9 returned >3.0%  $\text{Li}_2\text{O}$ .

Patriot followed this initial work up with a soil sampling program to determine the potential geometry and spatial extents of these mineralized zones away from the areas of outcrop exposure, with the goal of providing an expanded footprint of mineralisation to provide compelling targets for a maiden drill program currently planned for the first half of 2024 (subject to obtaining all relevant permits and approvals). This results from this program are currently being processed.

In addition, Patriot expanded its claim package at the Gorman Project, adding approximately 34 km<sup>2</sup> of potential strike prospectivity, bringing the total claim area to approximately 354 km<sup>2</sup>.

#### **Black Hills Activities**

Initial prospecting conducted by PAT earlier in the year identified outcrops of potentially lithium-bearing pegmatites within its Keystone Project in the Black Hills.

Patriot's initial exploration efforts encouraged a follow-up exploration program which identified a new, fractionated, potentially lithium-fertile pegmatite trend located 3.5km from the historic high-grade Etta, Edison and Hugo lithium mines near Keystone. These highly encouraging results inspired a comprehensive follow up program of systematic mapping and sampling across the Black Hills claims, which is currently ongoing.

The priority of this current program is to systematically map and sample the previously identified, potentially Libearing pegmatites, followed by additional exploration across the Keystone and Tinton West claim package to identify new outcrops not evident in satellite imagery.

Further to these exploration efforts, Patriot expanded its claim holdings in the Black Hills, adding approximately 15 km² to the Keystone Project and 4 km² to the Tinton West Project.

### **Arizona Activities**

At the Wickenburg Project in Arizona, Patriot's early reconnaissance identified promising signs of spodumene at the Dove target.

Subsequent mapping revealed two significant pegmatites trends, Dove West and Dove East, running sub-parallel to each other and traceable in outcrop for more than 400 meters.

Subsequent early exploration was extremely encouraging, including:

- Detailed mapping which further expanded the prospective LCT pegmatite swarm at Wickenburg, expanding the exploration area to ~2x2km.
- Rock chip sampling from Dove West, Dove East and Mammoth pegmatites which returned numerous anomalous results up to 1.35% Li2O, with spodumene selectively sampled at Dove West and returning grades of up to 5.88% Li2O
- Soil sampling over the Dove, Mammoth and Vulture pegmatites which defined a ~450m long and up to 70m wide zone of lithium and associated multi-element anomalism over the Dove West pegmatite, a ~410m long and up to 30m wide zone of lithium and associated multi-element anomalism over the Dove East pegmatite and a ~400m long and up to 100m wide zone of lithium and associated multi-element anomalism over the Mammoth pegmatite.

Rock chip and soil sampling programs were followed by a preliminary scout drilling program, which was paused after identifying possible faulting affecting the subsurface mineralisation.

# **Going Forward**

The company remains committed to building on our high-quality portfolio of hard rock lithium assets in North America and applying a systematic approach to exploration. This approach will assist in identifying and defining quality lithium mineralisation and allow the team to prioritise the most suitable projects. This approach is designed to deliver maximum value for shareholders and drive the success of Patriot Lithium into the future.

The willingness of the US government to invest in battery technology and manufacturing capability, demonstrated by the introduction of the US Inflation Reduction Act, is further encouraging development across the North American electric vehicle supply chain, including critical minerals such as lithium.

This growing downstream activity and demand, together with the prospectivity and historic under-exploration of the region, are key drivers that create the strategic rationale for Patriot's continuing North American lithium focus.

#### **MATERIAL BUSINESS RISKS**

The Group considers the following to be the key material business risks:

### Additional requirements for capital

The Company's capital requirements depend on numerous factors. The Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

# Risk of failure in exploration, development or production

Payment of compensation is ordinarily necessary to acquire participating interests. Also, surveying and exploratory drilling expenses (exploration expenses) become necessary at the time of exploration activities for the purpose of discovering resources. When resources are discovered, it is necessary to further invest in substantial development expenses.

There is, however, no guarantee of discovering resources on a scale that makes development and production feasible. The probability of such discoveries is considerably low despite various technological advances in recent years, and even when resources are discovered the scale of the resource does not necessarily make commercial production feasible. For this reason, the Group conservatively recognizes expenses related to exploration investment in our consolidated financial statements.

To increase recoverable resources and production, the Group plans to always take an interest in promising properties and plans to continue exploration investment. Although exploration and development (including the acquisition of interests) are necessary to secure the resources essential to the Group's future sustainable business development, each type of investment involves technological and economic risks, and failed exploration or development could have an adverse effect on the results of the Group's operations.

### Overseas Business Activities and Country Risk (Geopolitical Risk)

The Group engages in exploration activities outside of Australia, mainly in Canada and the United States of America. The success of the Group's operation depends on the political stability in this country and the availability of qualified and skilled workforce to support operations. While the operations of the Group in these countries is currently very stable, a change in the government may result in changes to the foreign investment laws and these assets could have an adverse effect on the Group's operational results.

To manage this risk, the Group ensures that all significant transactions in these countries are supported by robust contracts between the company and third parties. We have a system in place for parent company level to continuously check the country risk management before any significant investment is made. Furthermore, we have developed a mechanism to counter legal risk, where foreign subsidiaries and management can receive appropriate legal guidance regarding matters such as important agreements and lawsuits in foreign locations.

#### **Environmental**

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive.

#### Climate risk

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including
  events such as increased severity of weather patterns and incidence of extreme weather events and longer-term
  physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change
  the industry in which the Company operates.

Fees and payments to non-executive directors reflect the demands which are made on, and the responsibilities of, the directors. Non-executive directors' fees and payments are reviewed annually by the board. The Chairperson's fees are determined independently to the fees of non-executive directors based on comparative roles in the external market.

#### **Directors' fees**

Non-executive directors' fees are determined within an aggregate directors' fee pool limit of \$300,000, which is periodically recommended for approval by shareholders.

Remuneration of executives consists of an un-risked element (base pay) and performance-based bonuses based on performance in relation to key strategic, non-financial measures linked to drivers of performance in future reporting periods.

The table below set out summary information about the Group's earnings and movement in shareholder wealth for the year to 30 June 2023:

	30 June 2023 \$	30 June 2022 \$

Diluted earnings/(loss) per share (cents)	(8.11)	(3.53)

No dividends have been paid for the year to 30 June 2023 (2022: \$nil).

### **REMUNERATION REPORT - Audited (continued)**

A. Principles used to determine the nature and amount of remuneration (continued)

#### Additional fees

A Director may also be paid fees or other amounts as the Directors determine if a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director.

A Director may also be reimbursed for out of pocket expenses incurred as a result of their directorship or any special duties.

### **Retirement allowances for directors**

Superannuation contributions required under the Australian Superannuation Guarantee Legislation continue to be made and are deducted from the directors' overall fee entitlements where applicable.

# **Executive pay**

In determining executive remuneration, the Board aims to ensure that remuneration practices are:

- competitive and reasonable, enabling the company to attract and retain key talent;
- aligned to the company's strategic and business objectives and the creation of shareholder value;
- transparent; and
- acceptable to shareholders.

The executive remuneration framework has three components:

- base pay and benefits, including superannuation;
- short-term performance incentives; and
- long-term incentives through participation in the Patriot Lithium Employee Securities Incentive Plan.

# Base pay

Executives receive their base pay and benefits structured as a total employment cost (TEC) package which may be delivered as a combination of cash and prescribed non-financial benefits at the executives' discretion.

Executives are offered a competitive base pay that comprises the fixed component of pay and rewards.

Base pay for executives is reviewed annually to ensure the executive's pay is competitive with the market. An executive's pay is also reviewed on promotion.

There are no guaranteed base pay increases included in any executives' contracts.

There are no short-term incentives outstanding.

### **Benefits**

No benefits other than noted above are paid to Directors or management except as incurred in normal operations of the business.

# **Short term incentives**

No benefits other than remuneration disclosed in the remuneration report are paid to Directors or management except as incurred in normal operations of the business.

### Long term incentives

No benefits other than remuneration disclosed in the remuneration report are paid to Directors or management except as incurred in normal operations of the business.

#### **Remuneration consultants**

The Company did not engage any remuneration consultants during the year.

The Company will engage independent remuneration consultants should it look to make any changes to director fee levels to ensure they are in line with market conditions and any decisions are made free from undue influence from members of the Company's KMP's.

### **REMUNERATION REPORT - Audited (continued)**

A. Principles used to determine the nature and amount of remuneration (continued)

### Remuneration Policy, Link to performance and elements of remuneration

The remuneration of an executive Director will be decided by the Board, without the affected executive Director participating in that decision-making process.

In accordance with the Constitution, the total maximum remuneration of non-executive Directors is initially set by the Board and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$300,000 per annum.

In addition, a Director may be paid fees or other amounts for example, and subject to any necessary Shareholder approval, non-cash performance incentives such as Options) as the Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director.

Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in the performance of their duties as Directors.

The Board reviews and approves the remuneration policy to enable the Company to attract and retain executives and Directors who will create value for Shareholders having regard to the amount considered to be commensurate for a company of its size and level of activity as well as the relevant Directors' time, commitment and responsibility. The Board is also responsible for reviewing any employee incentive and equity-based plans including the appropriateness of performance hurdles and total payments proposed

### INDEPENDENT AUDITOR'S REPORT

To the members of Patriot Lithium Limited

# Report on the Audit of the Financial Report

### Opinion

We have audited the financial report of Patriot Lithium Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2023, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including a summary of significant accounting policies and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2023 and of its financial performance for the year ended on that date; and
- (ii) Complying with Australian Accounting Standards and the Corporations Regulations 2001.

### Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

# Carrying value of exploration and evaluation expenditure

### Key audit matter

As disclosed in Note 8 to the Financial Report, the carrying value of capitalised exploration and evaluation expenditure represents a significant asset of the Group.

Refer to Note 8 of the Financial Report for a description of the accounting policy and significant judgments applied to capitalised exploration and evaluation expenditure.

In accordance with AASB 6 Exploration for and Evaluation of Mineral Resources ("AASB 6"), the recoverability of exploration and evaluation expenditure requires significant judgment by management in determining whether there are any facts or circumstances that exist to suggest that the carrying amount of this asset may exceed its recoverable amount. As a result, this is considered a key audit matter.

### How the matter was addressed in our audit

Our procedures included, but were not limited to the following:

- Obtaining a schedule of the areas of interest held by the Group and for a sample, assessing whether the rights to tenure of those areas of interest remained current at balance date, which included obtaining and assessing supporting documentation such as license status records;
- Considering the Group's intention to carry out significant ongoing exploration programmes in the respective areas of interest by holding discussions with management, and reviewing the Group's budget, ASX announcements and directors' minutes;
- Considering whether any such areas of interest had reached a stage where a reasonable assessment of economically recoverable reserves existed;
- Considering whether any facts or circumstances existed to suggest impairment testing was required;
- Verifying, on a sample basis, acquisition costs capitalised during the year for compliance with the recognition and measurement criteria of AASB 6 and the Group's accounting policy; and
- Assessing the adequacy of the related disclosures in Notes 1 (n)(ii) and 8 to the Financial Report.

# Accounting for share-based payments

### Key audit matter

As disclosed in Note 14 to the Financial Report, during the financial year ended 30 June 2023, the Group agreed to issue options and performance rights to key management personnel, employees and consultants, which have been accounted for as share-based payments.

Refer to Note 1 (g) to the Financial Report for a description of the accounting policy and Note 1(n) (i) for the significant estimates and judgments applied to these arrangements.

Share-based payments are a complex accounting area and due to the complex and judgmental estimates used in determining the fair value of the share-based payments, we consider the accounting for share-based payments to be a key audit matter.

#### How the matter was addressed in our audit

Our procedures included, but were not limited to the following:

- Reviewing the relevant agreements to obtain an understanding of the contractual nature and terms and conditions of the share-based payment arrangements;
- Holding discussions with management to understand the share-based payment transactions in place;
- Reviewing management's determination of the fair value of the share-based payments granted, considering the appropriateness of the valuation methodology used;
- Assessing inputs used in the calculation of the fair value of rights and options granted, using internal specialists where required;
- Assessing the allocation of the share-based payment expense over the relevant vesting period;
   and
- Assessing the adequacy of the related disclosures in Note 1 (n)(i) and Note 14 to the Financial Report.

### Other information

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 30 June 2023, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act* 

2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

# Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website (<a href="http://www.auasb.gov.au/Home.aspx">http://www.auasb.gov.au/Home.aspx</a>) at:

### 15. Summary of significant accounting policies

### (a) Basis of preparation

The financial report is a general-purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board ("AASB") and the Corporation Act 2001.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions to which they apply. The financial statements and notes also comply with International Financial Reporting Standards as issued by the International Accounting Standard Board (IASB). Material accounting policies adopted in the preparation of this financial report are presented below. They have been consistently applied unless otherwise stated.

The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards. The consolidated financial statements have been prepared on a going concern basis which contemplates the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

#### Historical cost convention

The financial statements have been prepared under the historical cost convention.

### Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the consolidated entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 1(n).

### (b) New and amended standards adopted by the entity

The consolidated entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

### (c) Principles of Consolidation

The consolidated financial statements incorporate the assets, liabilities and results of entities controlled by Patriot Lithium at the end of the reporting period. A controlled entity is any entity over which Patriot Lithium has the ability and right to govern the financial and operating policies so as to obtain benefits from the entity's activities.

Where controlled entities have entered or left the Group during the year, the financial performance of those entities in included only for the period of the year that they were controlled. A list of controlled entities is contained in note 16 to the financial statements.

In preparing the consolidated financial statements, all intragroup balances and transactions between entities in the consolidated Group have been eliminated in full on consolidation.

Non-controlling interests, being the equity in a subsidiary not attributable, directly or indirectly, to a parent, are reported separately within the equity section of the Consolidated Statement of Financial Position and the Consolidated Statement of Profit or Loss and Other Comprehensive Income. The non-controlling interests in the net assets comprise their interests at the date of the original business combination and their share of changes in equity since that date.

#### (d) Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

For the year ended 30 June 2023

### 1. Summary of significant accounting policies (continued)

### (e) Good and Services Tax (GST)

Revenues, expenses and assets are recognised net of GST except where GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the statement of cash flow on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authorities are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

### (f) Impairment of non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cashgenerating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cashgenerating unit.

For the year ended 30 June 2023

#### 1. Summary of significant accounting policies (continued)

#### (g) Share-based payment transactions

The Group measures the cost of equity-settled transactions by reference to the fair value of the equity instrument at the date at which they are granted when the fair value of goods and/or services cannot be determined. The fair value of options granted is measured using the Black-Scholes option pricing model. The fair value of performance rights granted is measured using the Monte Carlo model where required. The model uses assumptions and estimates as inputs. Some performance rights value is determined with reference to the share price on the grant date.

The cost of the equity settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ('vesting date'). The cumulative expense recognised for equity settled transactions at each reporting date until vesting date reflects (i) the extent to which the vesting year has expired and (ii) the number of awards that, in the opinion of the Directors of the Company, will ultimately vest.

No adjustment is made for the likelihood of the market performance conditions being met as the effect of these conditions is included in the determination of fair value at grant date. The statement of comprehensive income charge or credit for a year represents the movement in cumulative expense recognised at the beginning and end of the year. No expense is recognised for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition. Where the terms of an equity settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any increase in the value of the transaction as a result of the modification, as measured at the date of the modification.

Where an equity settled award is cancelled, it is treated as if it had vested on the date of the cancellation, and any expense not yet recognised for the award is recognised immediately. However if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award, as described in the previous paragraph.

The cost of equity-settled transactions with non-employees is measured by reference to the fair value of goods and services received unless this cannot be measured reliably, in which case the cost is measured by reference to the fair value of the equity instruments granted.

#### Right of use assets (h)

A right of use assets is recognized at the commencement date of a lease. The right of use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right of use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Group expect to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right of use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

For the year ended 30 June 2023

### 1. Summary of significant accounting policies (continued)

The Group has elected not to recognize a right of use asset and corresponding lease liability for short term leases with terms of 12 months or less and leases of low value assets. Lease payments on these assets are expensed to profit or loss as incurred.

#### (i) Lease liabilities

A lease liability is recognized at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right of use asset, or to profit or loss if the carrying amount of the right of use asset is fully written down.

### (j) Contributed Equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

### (k) Earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Company, excluding any costs of servicing equity other than ordinary shares;
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year and excluding treasury shares (Note 4).

#### (l) Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

### (m) Parent entity information

The financial information for the parent entity, Patriot Lithium Limited, disclosed in Note 19 has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries and associates are accounted for at cost in the financial statements of Patriot Lithium Limited. Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

### (ii) Financial guarantees

Where the parent entity has provided financial guarantees in relation to loans and payables of subsidiaries for no compensation, the fair values of these guarantees are accounted for as contributions and recognised as part of the cost of the investment.

### (iii) Share-based payments

The grant by the Company of options and performance rights over its equity instruments to the employees of subsidiary undertakings in the Group is treated as a capital contribution to that subsidiary undertaking. The fair value of employee services received, measured by reference to the grant date fair value, is recognised over the vesting period as an increase to investment in subsidiary undertakings, with a corresponding credit to equity.

For the year ended 30 June 2023

### 1. Summary of significant accounting policies (continued)

### (n) Critical accounting estimates and judgments

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates & judgements will, by definitions, seldom equal the related actual results.

### (i) Share based payment transactions

The group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

### (ii) Carrying value of Exploration and evaluation expenditure

Acquired exploration and evaluation assets are carried at acquisition value less any subsequent impairment for each identifiable area of interest. All ongoing exploration and evaluation expenditure, subsequent to initial acquisition, is expensed and recognised in the Statement of Profit or Loss. These costs are only carried forward to the extent that the Group's rights of tenure to that area of interest are current and that the costs are expected to be recouped through the successful commercial development or sale of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Costs in relation to an abandoned area are written off in full against profit in the period in which the decision to abandon the area is made.

Each area of interest is also reviewed annually, and acquisition costs written off to the extent that they will not be recoverable in the future.

For the year ended 30 June 2023

**Note 1** -. Deferred tax assets and liabilities are required to be measured at the tax rate that is expected to apply in the future income year when the asset is realised or the liability is settled. The Directors have determined that the deferred tax balances be measured at the tax rates stated.

### Significant accounting policy

The income tax expense (revenue) for the period comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

For the year ended 30 June 2023

### 3. Income tax (continued)

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the period as well unused tax losses.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the period as well unused tax losses.

Current and deferred income tax expense (income) is charged or credited directly to equity instead of the profit or loss when the tax relates to items that are credited or charged directly to equity.

Deferred tax assets and liabilities are ascertained based on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets also result where amounts have been fully expensed but future tax deductions are available. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates enacted or substantively enacted at reporting date. Their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where a legally enforceable right of set-off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

### 4. Earnings per share

Basic earnings per share amounts are calculated by dividing net profit/(loss) for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

The group has made a loss so the potential of ordinary shares being issued from the exercise of performance rights and options has been excluded due to their anti-dilutive effect.

The following reflects the income and share data used in the total operations basic and diluted earnings per share computations:

Basic and diluted profit/(loss) per share	2023	2022
Loss used to calculate basic and diluted profit/(loss) per share	(5,033,242)	(755,169)
Basic and diluted profit/(loss) per share from continuing operations (cents per share)	(8.11)	(3.53)
		2022
Weighted average number of ordinary shares		No.
Weighted average number of ordinary shares outstanding during the year used in calculating basic EPS	62,030,413	21,405,359
Weighted average number of ordinary shares outstanding during the year used in calculating diluted EPS	62,030,413	21,405,359

For the year ended 30 June 2023

### 5. Dividends paid or proposed

The Directors do not recommend the payment of a dividend and no amount has been paid or declared by way of a dividend to the date of this report.

### 6. Cash and cash equivalents

Refer to Note 12 on financial instruments for details on the Company's exposure to risk in respect of its cash balance.

### Significant accounting policy

For cashflow statement presentation proposed, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in rate.

Current	<b>4</b>	<del></del>
GST receivable	101,369	23,392
	101,369	23,392

### Significant accounting policy

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less an allowance for impairment, once they become over due by more than 60 days. A separate account records the impairment.

An allowance for a doubtful debt is made when there is objective evidence that the Group will not be able to collect the debts. The criteria used to determine that there is objective evidence that an impairment loss has occurred include whether the Financial Asset is past due and whether there is any other information regarding increased credit risk associated with the Financial Asset. Bad debts which are known to be uncollectible are written off when identified.

### Past due but not impaired

The Group did not have any receivables that were past due as at 30 June 2023. The Group did not consider a credit risk on the aggregate balances as at 30 June 2023. For more information, please refer to Note 12 Financial Instruments, Risk Management Objectives and Policies.

### Significant accounting policy

**Exploration and Evaluation Expenditure** 

Acquired exploration and evaluation assets are carried at acquisition value less any subsequent impairment for each identifiable area of interest. All ongoing exploration and evaluation expenditure, subsequent to initial acquisition, is expensed and recognised in the Statement of Profit or Loss. These costs are only carried forward to the extent that the Group's rights of tenure to that area of interest are current and that the costs are expected to be recouped through the successful commercial development or sale of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Costs in relation to an abandoned area are written off in full against profit in the period in which the decision to abandon the area is made.

Each area of interest is also reviewed annually, and acquisition costs written off to the extent that they will not be recoverable in the future.

Ultimate recoupment of exploration and evaluation expenditure carried forward is dependent on successful development and commercial exploitation or, alternatively, sale of the respective areas.

For the year ended 30 June 2023

#### Significant accounting policy

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 2 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method. Trade payables are non-interest bearing and are normally settled on 30-day terms. Other payables are non-interest bearing and have an average term of 2 months. All amounts are expected to be settled within 12 months. Please refer to Note 12 on Financial Instruments for further discussion on risk management.

For the year ended 30 June 2023

### (c) Terms and conditions of issued capital

Ordinary shares have the right to receive dividends as declared and, in the event of winding up the Group, to participate in proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held.

Ordinary shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Group.

### (d) Capital risk management

The Group's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns to shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The Group's capital includes ordinary share capital, partly paid shares and financial liabilities, supported by financial assets.

The Group's capital includes mainly ordinary share capital and financial liabilities supported by financial assets.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Due to the nature of the Group's activities, being mineral exploration, the Group does not have ready access to credit facilities, with the primary source of funding being equity raisings. Therefore, the focus of the Group's capital risk management is the current working capital position against the requirements of the Group to meet exploration programmes and corporate overheads. The Group's strategy is to ensure appropriate liquidity is maintained to meet anticipated operating requirements, with a view to initiating appropriate capital raisings as required.

### 12. Financial instruments

#### Financial risk management

The Group's activities expose it to a variety of financial risks including market risk (interest rate risk, foreign exchange risk and price risk), credit risk and liquidity risk. The Groups overall risk management program focuses on the unpredictability of the financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group does not use derivative financial instruments; however the Group uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate and other price risks and aging analysis for credit risk.

Risk management is carried out by the Board of Directors with assistance from suitably qualified external and internal advisors. The Board provides written principles for overall risk management and further policies will evolve commensurate with the evolution and growth of the Group.

#### (a) Market risk

### (i) Interest Rate Risk

The Group hold cash at bank with variable interest rates. The interest rate is low and changes in the interest rates will have minimal impact to the Group.

### (ii) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk from various currency exposures. Foreign exchange risk arises from future commitments, assets and liabilities that are denominated in a currency that is not the functional currency of the group. Currently there are no foreign exchange hedge programmes in place. However, the consolidated groups treasury function manages the purchase of foreign currency to meet operational requirements.

As at 30 June 2023 the consolidated group's net exposure to foreign exchange risk was as follows:

	Currency	2023	2022
		\$	\$
Functional currency of individual entity is: AUD			
Net Foreign currency Financial Assets Cash and cash equivalents	USD	72,408	-

The effect of a 10% strengthening of the USD against the AUD at the reporting date on the USD-denominated asserts carried within the AUD functional currency would, all other variable held constant, have resulted in an increased post-tax loss for the year end and decrease in net assets of AUD \$6,583 (2022: nil).

### (b) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted the policy of dealing with creditworthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company measures credit risk on a fair value basis. The Company does not have any significant credit risk exposure to a single counterparty or any Group of counterparties having similar characteristics.

The carrying amount of financial assets recorded in the financial statements, net of any provisions for losses, represents the Company's maximum exposure to credit risk without taking account of the fair value of any collateral or other security obtained.

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings:

	2023	2022
	\$	\$
Cash and cash equivalents AA-	5,092,180	347,160
Total	5,092,180	347,160

For the year ended 30 June 2023

### 12. Financial instruments (continued)

### (c) Maturity analysis of financial liabilities

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profits of financial assets and liabilities. As at reporting date the Group had sufficient cash reserves to meet its requirements. The Group therefore had no credit standby facilities or arrangements for further funding in place.

The financial liabilities of the Group at reporting date were trade payables incurred in the normal course of the business. These were non-interest bearing and were due within the normal 30-60 days terms of creditor payments. The Group does not consider this to be material to the Group and have therefore not undertaken any further analysis of risk exposure.

### 13. Operating segments

Operating segments that meet the quantitative criteria of AASB 8 are reported separately. However, an operating segment that does not meet the quantitative criteria is still reported separately where information about the segment would be useful to the users of the financial statements.

The Group operating segments have been determined with reference to the monthly management accounts used by the Chief Operating Decision maker to make decisions regarding the Group's operations and allocations of working capital. Due to the size and nature of the Group, the Board as a whole has been determined as the Chief Operating Decision Maker.

Information reported to the Group's Board of Directors for the purpose of resource allocation and assessment of performance is more specifically focused on the exploration and development of mineral resource projects. The Group's reportable segments under AASB 8 are therefore as follows:

- mineral exploration industry within the United States of America ("US").
- mineral exploration industry within Canada.
- Other sector.

In prior period there was only one segment being mineral exploration within USA.
