Annual General Meeting
Company presentation

30 NOVEMBER 2023 | ASX: NAG

DISCLAIMER

The material in this presentation has been prepared by Nagambie Resources Limited ("Company").

This presentation may not be reproduced, redistributed or passed on, directly or indirectly, to any other person, or published, in whole or in part, for any purpose without prior written approval of the Company. This presentation and the material contained in it is for information purposes only. This presentation is not an offer or invitation for subscription or purchase of, or a recommendation in relation to, securities in the Company and neither this presentation nor anything contained in it shall form the basis of any contract or commitment.

This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their jurisdiction. Failure to do so may result in a violation of rules in such a jurisdiction.

This presentation is not financial product or investment advice. It does not consider the investment objectives, financial situation and particular needs of any investor. Before making an investment in the Company, an investor or prospective investor should consider whether such an investment is appropriate to their particular investment needs, objectives and financial circumstances, seek legal and taxation advice as appropriate and consult a financial adviser if necessary.

This presentation may contain forward-looking statements. Forward-looking statements include those containing such words as "anticipate", "estimates", "forecasts", "should", "could", "may", "ideal", "intends", "will", "expects", "plans" or similar expressions. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward looking statements contained in this announcement will actually occur and investors are cautioned not to place undue reliance on these forward looking statements. The Company does not undertake to update or revise forward looking statements, or to publish prospective financial information in the future regardless of whether new information, future events or any other factors affect the information contained in this presentation, except where required by applicable law or the ASX Listing Rules. It is believed that the expectations reflected in these statements are reasonable, but they may be affected by a range of variables and changes in underlying assumptions which could cause actual results or trends to differ materially. The Company does not make any representation or warranty as to the accuracy of such statements or assumptions.

This presentation has been prepared by the Company based on information currently available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of the Company or its subsidiaries or affiliates or the directors, employees, agents, representatives or advisers of any such party, nor any other person accepts any liability for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it, including without limitation, any liability arising from fault or negligence on the part of the Company or its subsidiaries or affiliates or the directors, employees, agents, representatives or advisers of any such party.

Exploration decline

Exploration development contains the following development:

- Twin decline
- Decline link drives
- Decline Stockpiles
- Decline Sumps
- Level accesses from Haulage decline
- Return airways
- Crosscut drives
- Ore drives on the top 2 levels

ANTIMONY

- Antimony is one of only six minerals listed as critical in the **US, Canada, Europe, Japan, China and Australia**
- Total world reserves are approximately **2,000,000 tonnes**

ANTIMONY

Antimony

Historically and economically, antimony is the second most important metallic commodity in Victoria, after gold (Geological Survey of Victoria).

Main uses of Antimony

- As an alloy to harden lead and tin for uses in lead-acid batteries, bullets, cable coverings and machine bearings
- As a fire retardant in paints, plastics, rubber and textiles
- In semiconductor technology, diodes and infrared detectors.

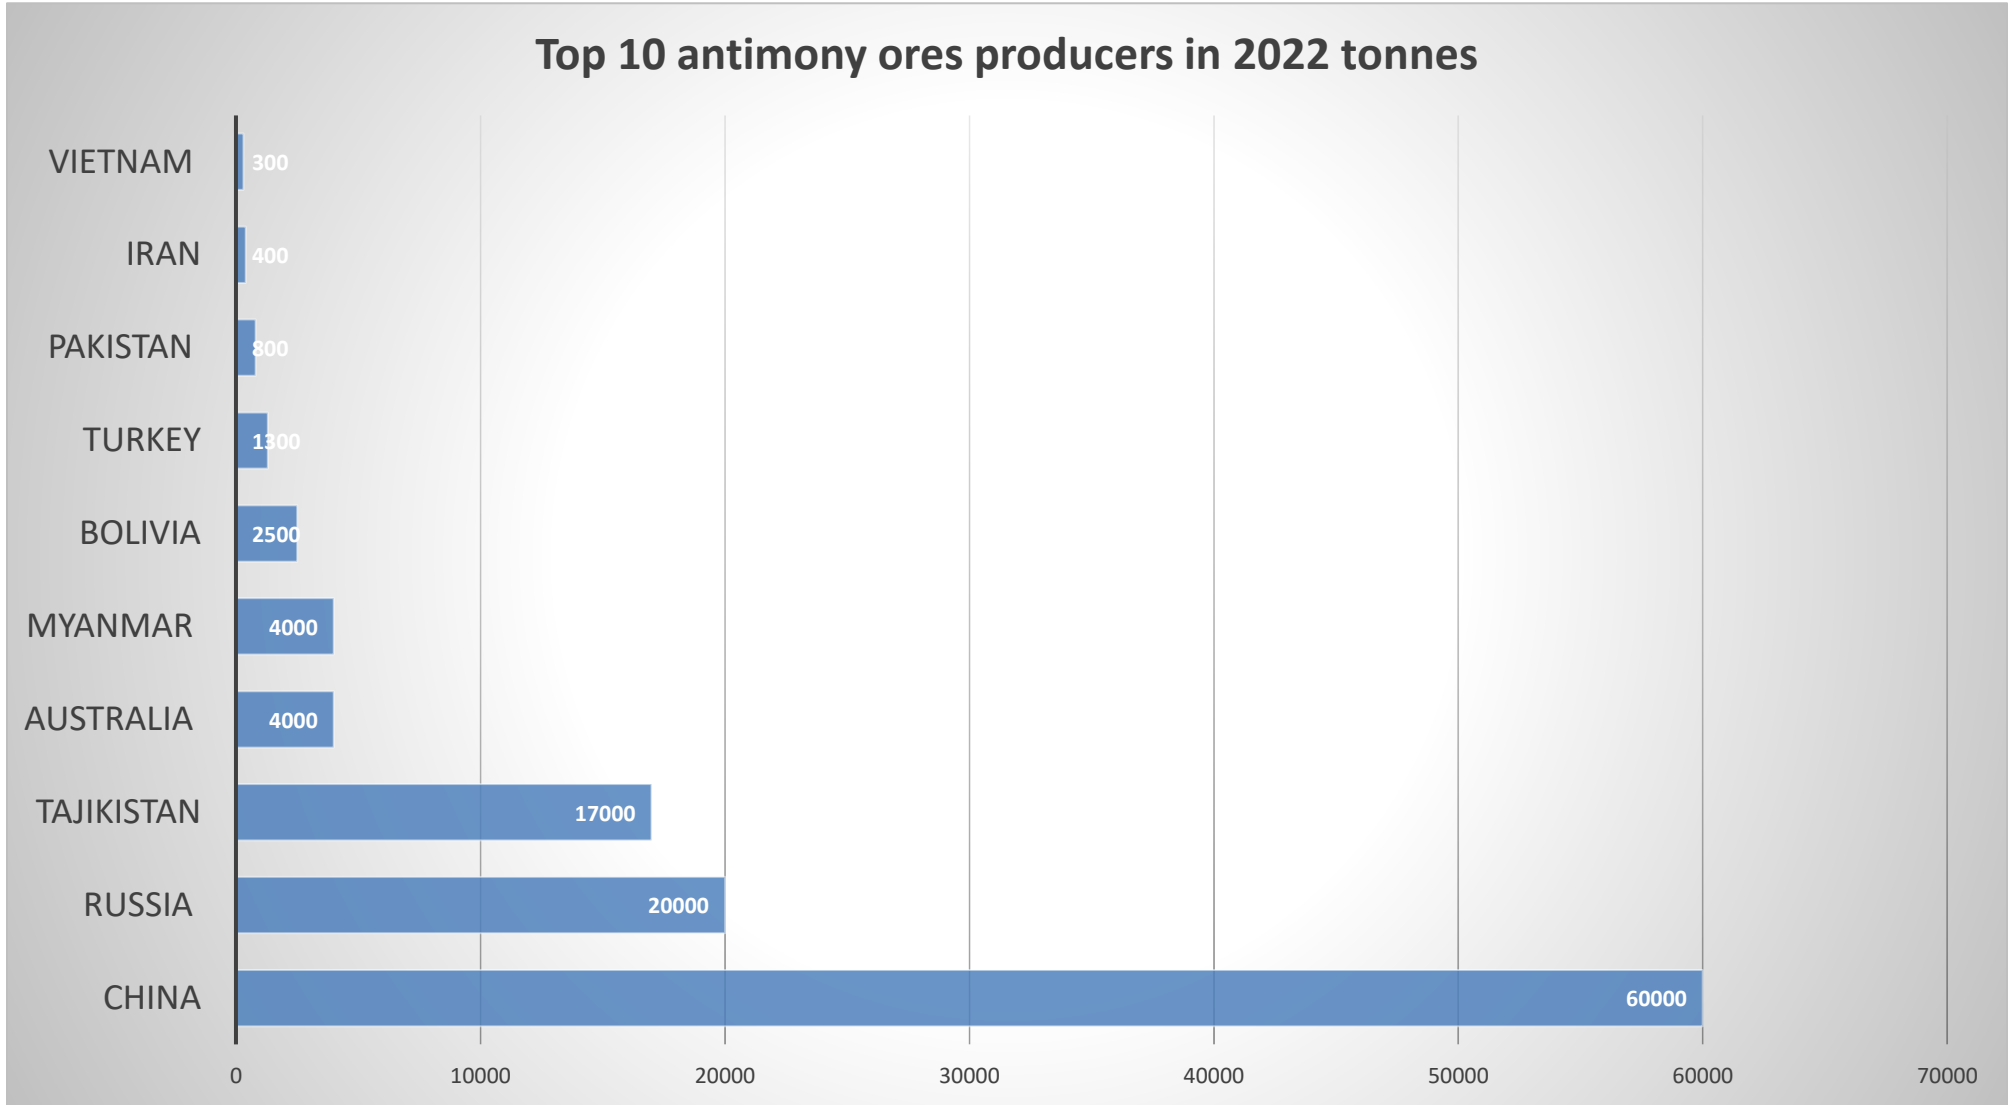

New and emerging uses of Antimony

Decarbonisation uses: Solar PV panel glass manufacturing, solar cells, long duration liquid metal batteries (Ambri), enabling electronic circuitry.

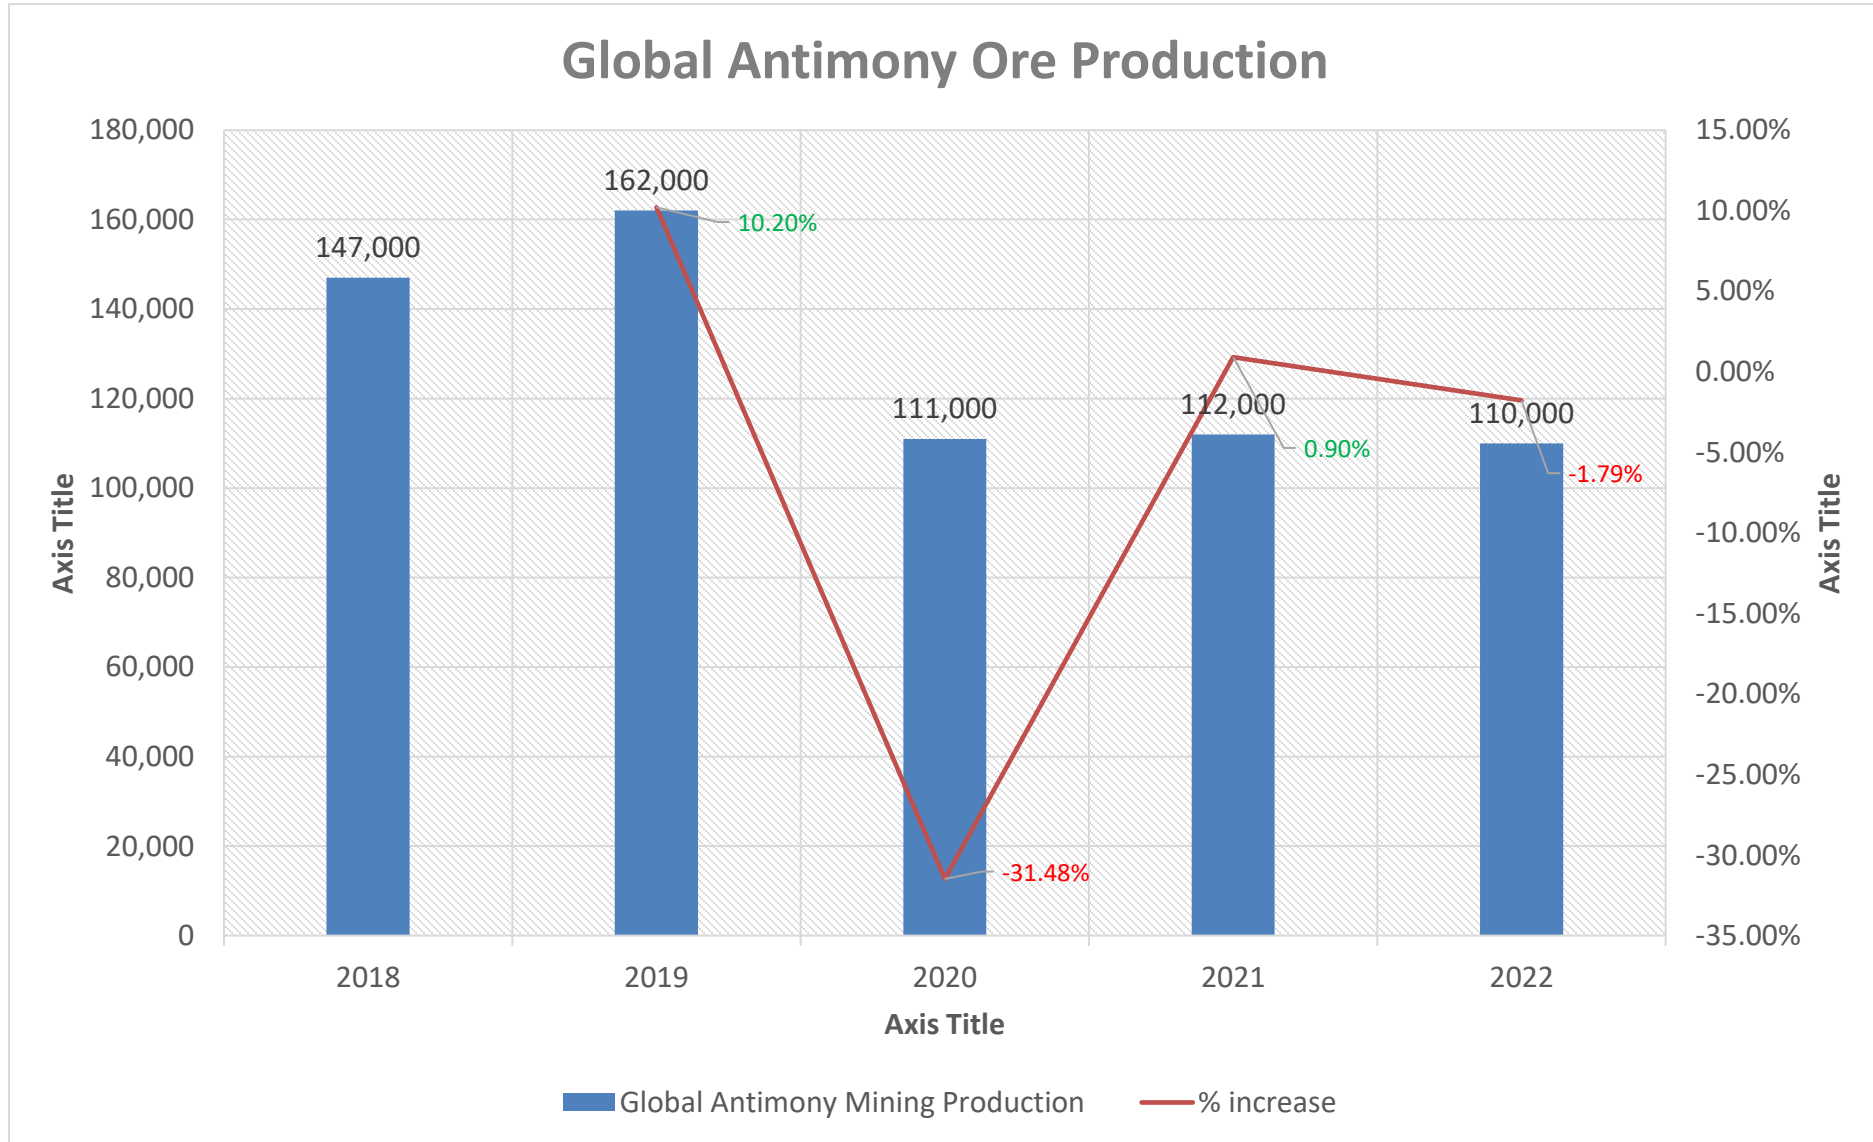

Defence uses: armour piercing bullets, night vision goggles, infrared sensors, precision optics, laser sighting, explosive formulations, hardened lead for bullets and shrapnel, ammunition primers, tracer ammunition, tritium production, flares, military clothing, and communication equipment.

ANTIMONY

ANTIMONY KEY THEMES

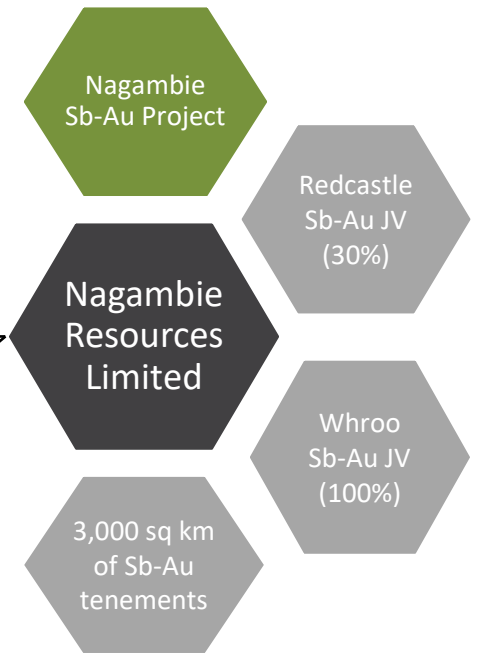

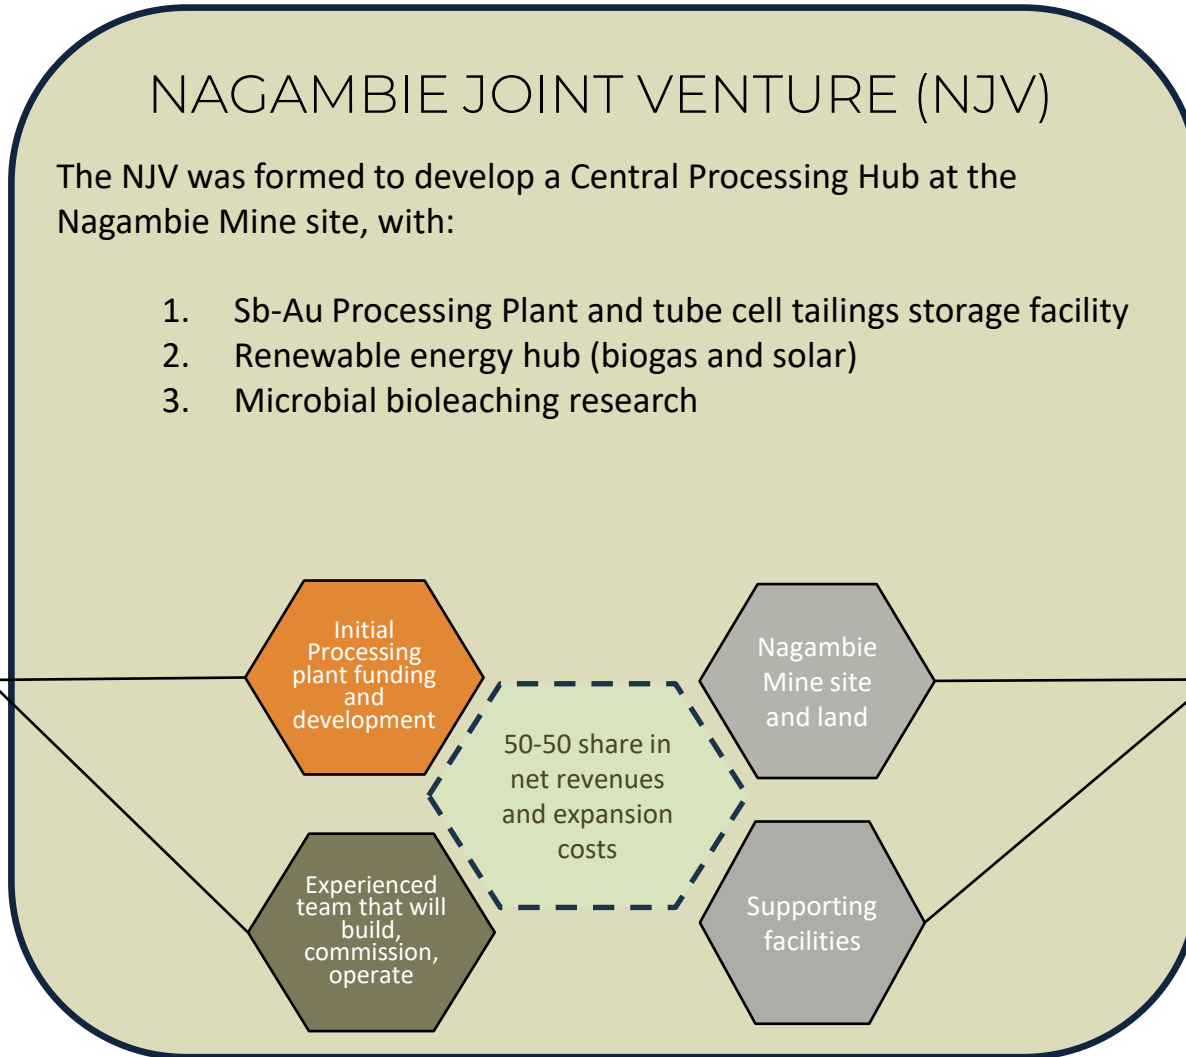

1. The antimony industry is influenced by the interplay of global economic recovery, growing applications in emerging sectors, and the impact of events like the pandemic.
 - Antimony ore resources are unevenly distributed globally
 - Governments exercise strict control and management over the extraction and export
 - Political turmoil may lead to interruptions in the local production and export of antimony ore.
2. Supply and Demand currently in balance
 - COVID shutdowns in China impacted supply
 - Slowing global economic growth has resulted in falling demand, which balanced the fall in supply
2. Demand predicted to be soft in the short term but likely to experience growth in the long term
 - Traditional demand (fire-retardant, lead-acid batteries etc) continues to soften as global economic growth slows
 - New application in the renewable energy sector has strong potential to drive long term growth
3. Antimony prices will likely see a steady and slow decline through mid-2024 before recovering
4. Existing smelters will increasingly compete for reliable supply of antimony
5. As with gold, the ethical supply of antimony is likely to be an important factor for end users in advanced economies

NAGAMBIE JOINT VENTURE

NAGAMBIE JOINT VENTURE

ORE SOURCES FOR PROCESSING PLANT

For personal use only

Unique proposition

- A new long-term supply
 - GCM's mines will provide first ores for processing
 - Ores from NRL's Sb-Au Project are targeted to be processed in the medium term
 - Likely to unlock numerous other (third party owned) ore deposits
- GCM and NRL are promoting this unique proposition to refiners and antimony end users

“No other group globally can develop a new long-term ‘green’ supply of antimony from a Tier 1 jurisdiction, that is de-risked through associated gold production and renewable energy generation”

MINERALISED ORE BIOLEACHING PROJECT

For personal use only

Stage	Status
Stage 1	Completed
	Federal Government's Innovation Connection Program grant \$50,000 Working with a Perth-based laboratory
	Outcome: Identified that both native and externally sourced bacteria were able to leach gold when suitable conditions were provided
Stage 2	Larger scale column tests Well advanced
	Federal Government's Innovation Connection Program grant \$50,000 Perth-based laboratory contribution \$55,000
	<ul style="list-style-type: none"> Column tests have been completed, Samples of leachate and residue have been collected and are being analysed.
	The researchers expect to have results by December 2023 to determine the success of gold extraction
Next Stage (Stage 3)	Take to technology into the field and conduct small in-field trials

Stage 1: Shake flasks used for bioleaching experiment.

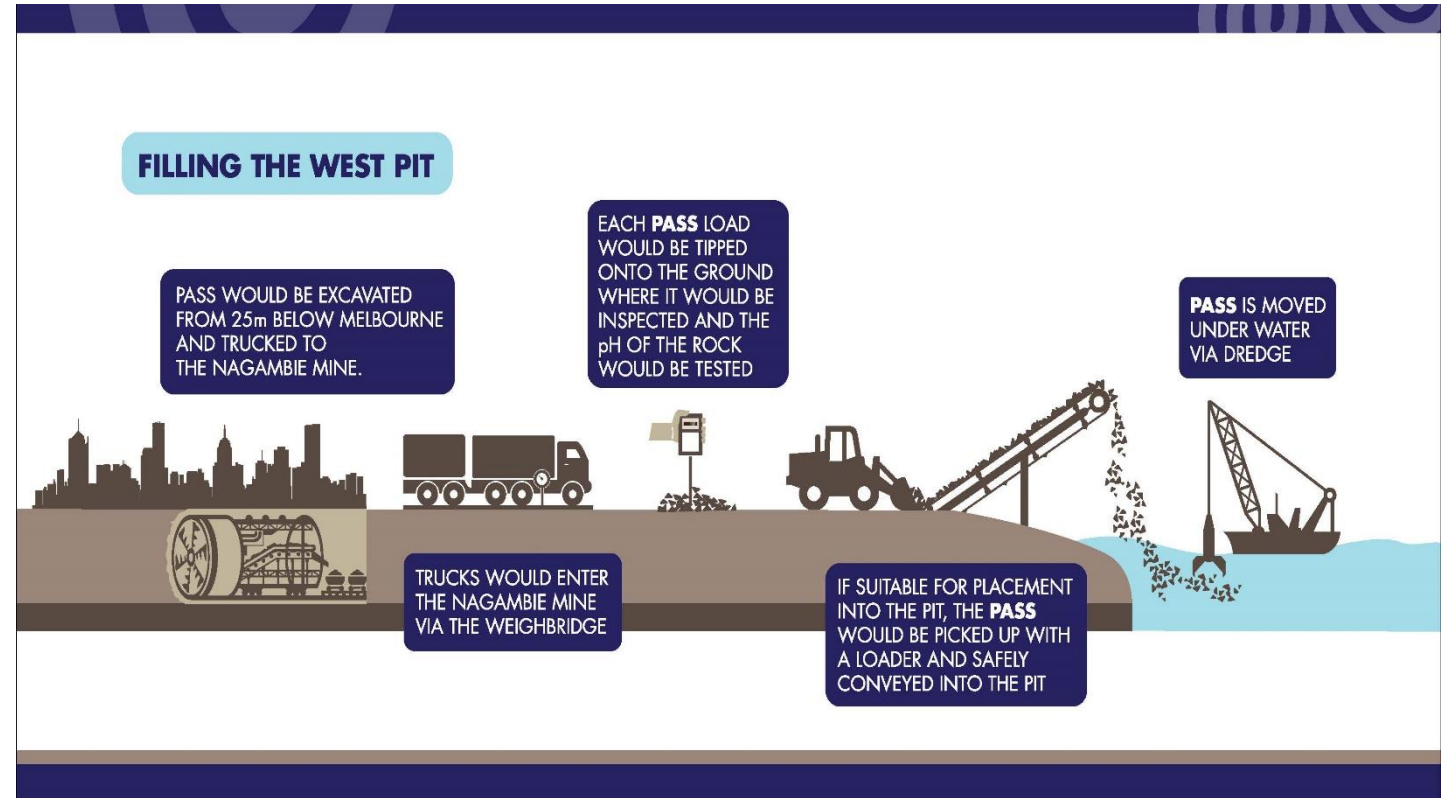

REALISING VALUE FROM NON GOLD ASSETS

PASS PROJECT

NRL has an EPA-approved Environment Management Plan to store PASS in the legacy water-filled pits at the Nagambie Mine as part of the proposed rehabilitation of those pits.

Best practice management of large volumes of wet PASS

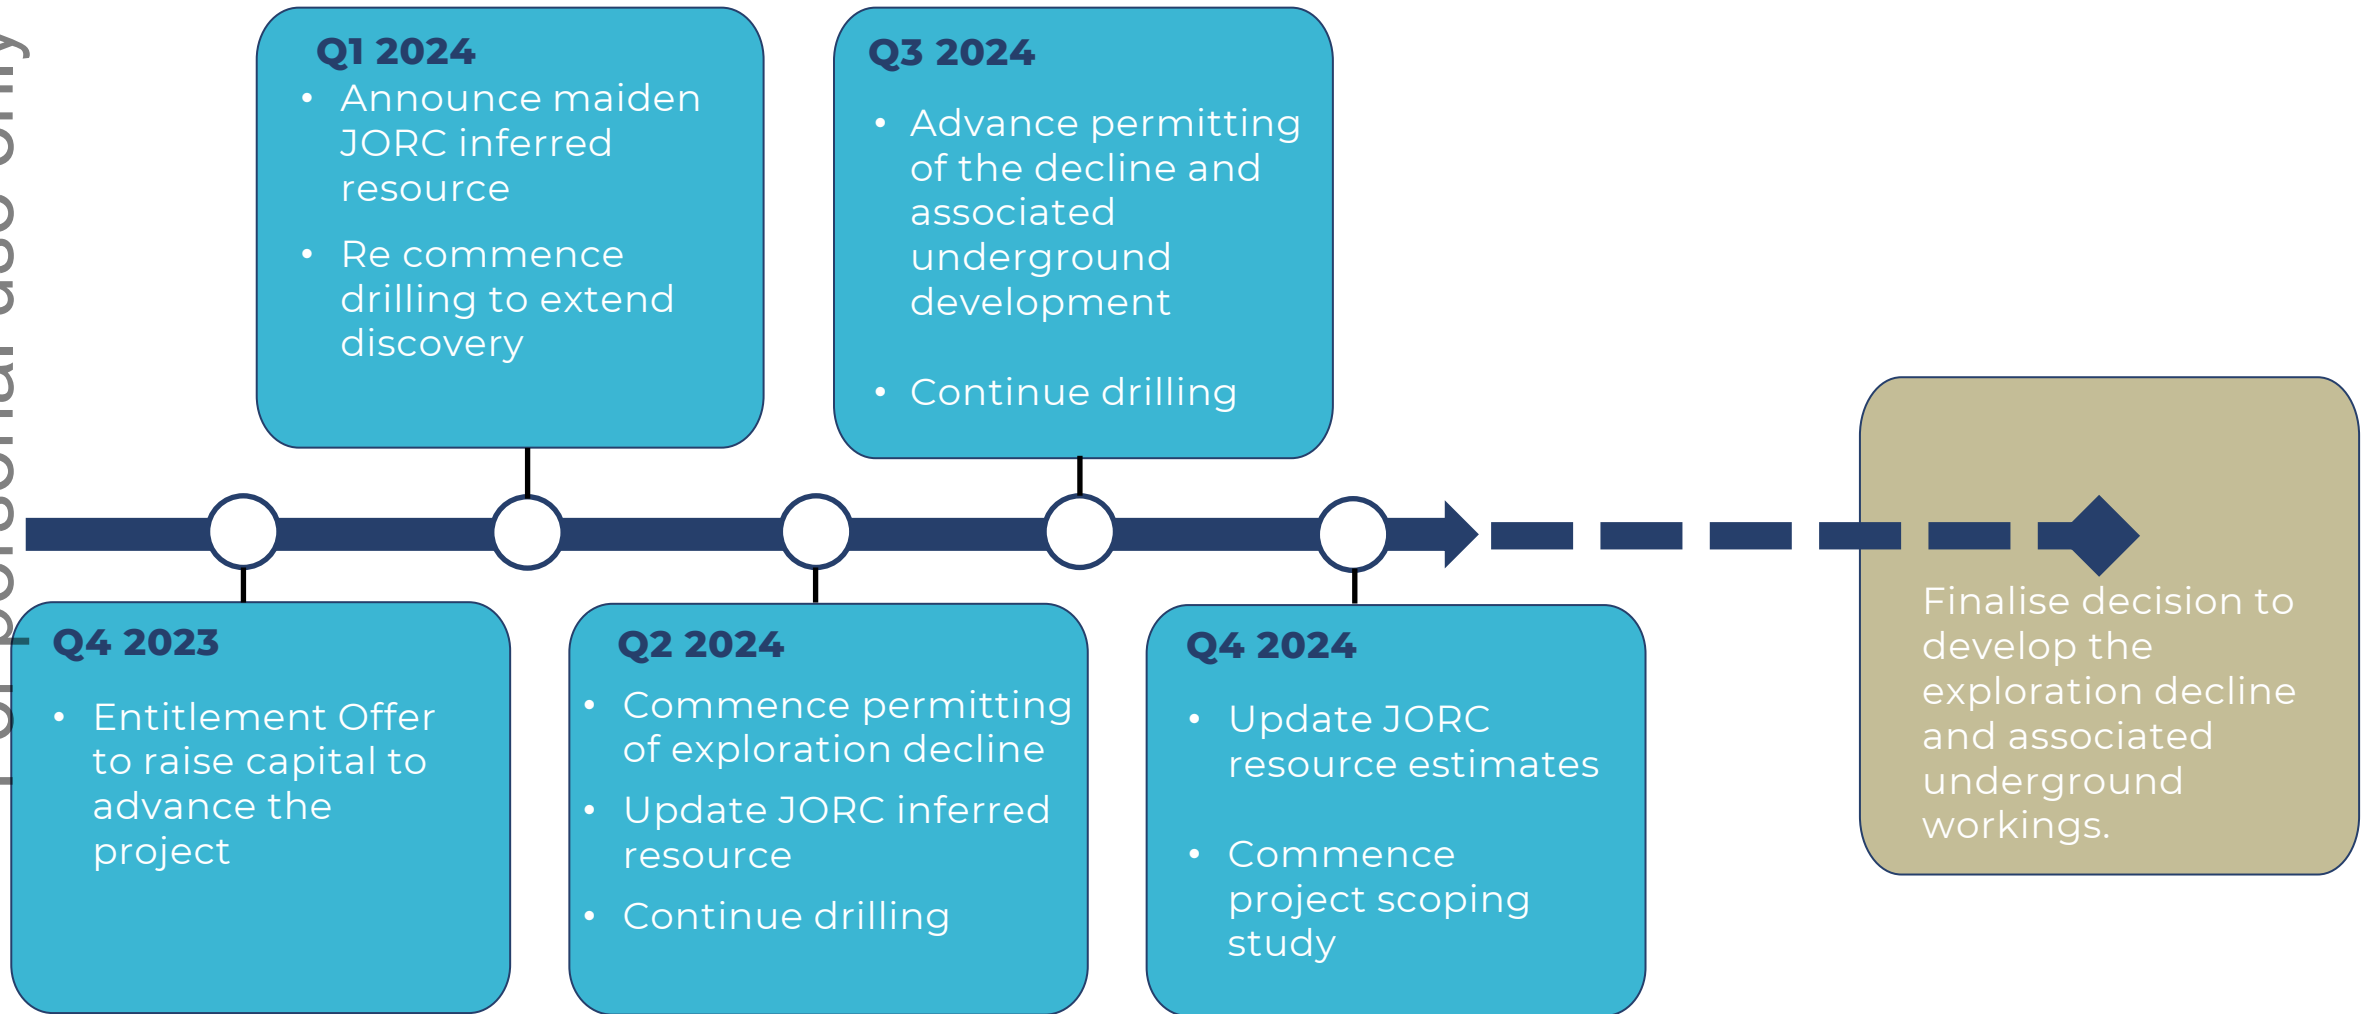

NRL is a PASS disposal bidder for the North East Link Project (tunnelling due to commence in mid 2024) and has bid for the Suburban Rail Loop East Project.
