

AVITA Medical Announces Exclusive Distribution Agreement with Stedical Scientific

VALENCIA, Calif., January 10, 2024 (GLOBE NEWSWIRE) — AVITA Medical, Inc. (NASDAQ: RCEL, ASX: AVH) (the “Company”), a commercial-stage regenerative medicine company focused on first-in-class devices and autologous cellular therapies for skin restoration, today announced it has entered into an exclusive multi-year distribution agreement with Stedical Scientific, Inc. to commercialize PermeaDerm® Biosynthetic Wound Matrix in the United States. PermeaDerm is cleared by the Food and Drug Administration as a transparent matrix for use in the treatment of a variety of wound types until healing is achieved.

Under the terms of the agreement, AVITA Medical will hold the exclusive rights to market, sell, and distribute PermeaDerm products, including any future enhancements or modifications, within the United States. The initial term is for five years, with the option to renew for an additional five years, contingent upon meeting certain minimums. The Company expects the gross margin from the sale of PermeaDerm to be 50% of the average sales price.

“Our partnership with Stedical Scientific is an important step in expanding our portfolio and addressing the unmet needs of our patients,” said Jim Corbett, Chief Executive Officer of AVITA Medical. “AVITA Medical and Stedical Scientific are ideal partners given the complementary nature of our products, the overlap of call points, and the strength of our footprint and sales force. We anticipate these synergies will allow us to effectively leverage our established commercial presence, enhancing the integration of PermeaDerm into our portfolio. This strategic collaboration underscores our commitment to delivering innovative solutions and improving outcomes for those we serve.”

PermeaDerm is a biosynthetic matrix that facilitates wound healing while also providing a high level of permeability and biocompatibility. For burn or wound procedures treated with Spray-On Skin™ Cells from the RECELL® System, PermeaDerm can be applied to further aid in healing. PermeaDerm is eligible for reimbursement in the U.S. across inpatient and outpatient settings.

“We are thrilled to mark this important growth milestone with AVITA Medical, who shares our goal of treating millions of patients suffering from a broad spectrum of wounds,” said Lin Sun, Chairman of Stedical Scientific. “AVITA Medical has an established presence in the U.S. wound care market, further validating the clinical and commercial value of PermeaDerm. This collaboration will expand our reach to more patients, physicians, and hospitals with a compelling portfolio of solutions that improve care and surgical performance. We look forward to a long and successful partnership.”

About AVITA Medical, Inc.

AVITA Medical® is a commercial-stage regenerative medicine company transforming the standard of care for skin restoration with innovative devices and autologous cellular therapies. At the forefront of our platform is the RECELL® System, approved by the Food and Drug Administration for the treatment of thermal burn wounds and full-thickness skin defects, and for repigmentation of stable depigmented vitiligo lesions. RECELL harnesses the regenerative properties of a patient's own skin to create Spray-On Skin™ Cells, delivering a transformative solution at the point-of-care.

RECELL enables improved clinical outcomes. This breakthrough technology serves as the catalyst for a new treatment paradigm enabling improved clinical outcomes.

In international markets, our products are approved under the RECELL System brand to promote skin healing in a wide range of applications including burns, full-thickness skin defects, and vitiligo. The RECELL System is TGA-registered in Australia, received CE-mark approval in Europe and has PMDA approval in Japan.
