

GENUS AWARDED SUBSTATION WORKS FOR QUEENSLAND ALDOGA SOLAR FARM PROJECT

HIGHLIGHTS:

- Genus has been awarded a contract by ACCIONA Energia for the Aldoga 275kV Solar Farm substation design and construction works (Substation Works) in Queensland
- Contract for the Substation Works approximately \$40 million
- The Aldoga Solar Farm development and 275kV Substation will be a flagship renewable energy project on land leased by Economic Development Queensland

National essential power and communications infrastructure provider GenusPlus Group Ltd (ASX: GNP) (**Genus or the Company**) has been awarded a contract by ACCIONA Energia to perform the design and construction of the Substation Works for the Aldoga Solar Farm development in Queensland.

The Aldoga Solar Farm development and 275kV Substation will be a flagship renewable energy project built on land leased from Economic Development Queensland (EDQ) as part of the Queensland Government's aim to increase renewable energy supply, generate jobs and support economic growth for the future.

The Aldoga Solar Farm and Substation site is located approximately 20 kilometres northwest of the city of Gladstone in Central Queensland. The substantial scale of this project will contribute significantly to the Queensland Government's target of achieving 50 per cent renewable energy by 2030. ACCIONA Energia will build, own, and operate the Aldoga Solar Farm and 275kV Substation.

Genus will undertake the detailed design, procurement, installation and associated civil works for the new 275kV Substation, with the contract having an approximate value of \$40 million to be delivered over a 12-month period in 2024. Genus will engage with circa 70 personnel to complete the project using significant local content from regional Queensland.

Genus Managing Director David Riches said Genus was pleased to be increasing its presence on the East Coast through its involvement in the delivery of this important project, and building on its relationship with ACCIONA Energia.

"Genus is pleased to be increasing its presence on the East Coast through its involvement in this flagship project which is aimed at providing significant benefits to Queenslanders. The award on this contract highlights the strength of our customer relationships and our reputation for reliable delivery, and the Company looks forward to building on its existing relationship with ACCIONA."

The Board of the Company has authorised the release of this announcement to the market.

ABOUT GENUSPLUS

GenusPlus Group Ltd is a specialist power and communications infrastructure and services provider operating across Australia. With years of practical experience across Australia, we design, build and maintain electrical transmission and distribution networks, substations and battery systems.

We enable customers to integrate new generation technology into traditional networks and support emerging networking solutions, meeting the demands of a carbon neutral economy.

Capitalising on our expertise in power networks and using the world's best knowledge and technology, we also specialise in delivering integrated, efficient and scalable communication network solutions, including network design, and fixed and wireless infrastructure supported by real time network management expertise and capability.
