

ASX RELEASE

12 February 2024

Acusensus Identified as Apparent Successful Vendor in United States Work Zone Speed Contract Tender

Acusensus Limited (ASX:ACE) (**Acusensus**) announces that one of its subsidiaries, Acusensus, Inc., recently participated in a tender run by the Washington State Department of Transportation (**WSDOT**) in the United States to identify a vendor to provide end-to-end field and back-office services to support a new state-wide speed safety camera program for work zones. This tender was released following the successful passage of Senate Bill 5272 in Washington State, which is aimed at improving safety for road-side workers.

Following the completion of the evaluation of the offers received by WSDOT, Acusensus, Inc. has been identified as the Apparent Successful Vendor as part of this tender process. The designation of Apparent Successful Vendor does not mean a final award is guaranteed. An award will depend upon the successful development and execution of a contract between Acusensus, Inc. and WSDOT.

The Board has taken the view to release this information ahead of contract finalisation as Acusensus has now been made aware that other participants in the process have been notified that Acusensus, Inc. is the Apparent Successful Vendor. If an award is made, it is expected to commence in mid-2024 and will consist of multiple enforcement cameras over a multi-year base period.

Regardless of whether Acusensus is ultimately successful in finalising a contract with WSDOT, achieving preferred supplier status in the WSDOT tender process is significant validation of Acusensus' competitiveness in supplying advanced speed enforcement solutions on an international stage.

Acusensus will keep the market updated.

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority.

Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Brisbane, Sydney, Las Vegas (United States) and London (UK).
