Operational Overview

During the half, Infomedia continued to increase its product footprint across regions, building greater critical mass. Our investment in Infodrive (DaaS) is enabling the Company to scale this product globally. Additionally, Infomedia continues to build out a new analytics solution leveraging the existing data assets and to further diversify future revenue streams.

Infomedia is shortening its delivery time driving faster revenue realisation. Additionally, we are upgrading the enterprise systems with an initial focus on our project management tool to provide better prioritisation and resource allocation which will drive improved commercial outcomes for the business.
