**Freedom Care Group Holdings' Non-Executive Chairman Zoran Grujic, said:** *"We are thrilled by Freedom's financial performance over the short time since it listed in November 2023. This period has seen the Company continue to build on its already strong presence in the complex cases segment of the NDIS market. Looking ahead, we are now investigating a number of expansion initiatives that will be financed by the proceeds from our recent successful IPO raise. This broad-based growth strategy, which has organic and non-organic components, is expected to accelerate the upscaling in our operations, which will in turn further bolster our operational and financial metrics."*

### Good organic growth seen underpins profitability

Freedom's Financial Statements disclose revenues of \$19.7 million and a net loss before tax of (\$0.2 million) for the period until 31 December 2023. This result is a 54% increase in revenue over the prior period and a 90% increase of the same period last year.

Whilst the group had a positive increase in revenues the profitability before tax was a loss of \$0.2 million.
