Directors' Report

For the half-year ended 31 December 2023

REVIEW OF OPERATIONS

During the period covered by this report the Company evaluated various mineral exploration opportunities which resulted in the execution of an option agreement with ASX Listed Horizon Minerals Limited (ASX: HRZ) ("Horizon") to acquire an 85% interest in Horizon's Baden-Powell and Windanya gold projects. Exploration at the projects by Dundas Minerals commenced in September 2023. Also in September 2023, the Company announced the sale of four of its Dundas project exploration licences to ASX listed West Cobar Metals (ASX:WC1), with Dundas Minerals retaining the gold, copper and nickel exploration rights on three of the four sale tenements for a period of two years.

A summary of the key activities undertaken during the period are set out below:

Exploration

Baden-Powell and Windanya: The primary exploration focus of the Company during the period covered by this report has been gold exploration at the Baden-Powell and Windanya projects. The projects are subject to an option agreement between the Company and Horizon. The terms of the option are: an initial cash payment of \$125,000 and the issue of \$250,000 Dundas Minerals fully paid ordinary shares to Horizon – these were completed in September 2023. Dundas is required to spend \$500,000 on exploration at the projects during the two year option period which expires on 28 August 2025, and make an anniversary cash payment of \$125,000 in August 2024. The option fee to acquire an 85% Joint Venture Interest in the projects is \$1,000,000 payable as cash or shares, or a combination of cash and shares at the election of Dundas Minerals. The option is exercisable at any time following the anniversary fee payment and the expenditure of the minimum exploration amount.

In September 2023, Dundas Minerals completed an extensive auger soil sampling program across both the Baden-Powell and the Windanya project tenements. In excess of 1,600 samples were collected and assayed for gold and various other elements. Results from the sampling program were announced during late October and early November 2023. Significant gold in soil sample anomalies were returned from various samples at the Olympia and Baden-Powell North prospects (Figure 1), and at the Aquarius and Scorpio prospects within the Windanya project (Figure 2). In December 2023 the Company announced the completion of an initial reverse circulation (RC) drilling program at the Windanya project as an initial test of the gold in soil anomalies. Thirty five (35) RC drill holes were completed, eighteen (18) at the Aquarius prospect, twelve (12) at Scorpio and five (5) at the Capricorn gold deposit. Assay results from the drilling were announced on 6 February 2024.

Directors' Report

For the half-year ended 31 December 2023

Dundas project: In September 2023, Dundas engaged ASX listed Sensor Ltd (ASX: S3N), a specialist minerals targeting company, to re-invert and model the Company's SkyTEM airborne electromagnetic (AEM) survey data across the northeast portion of the Dundas project area, using Sensor's proprietary 2.5D model inversion technology (Figure 3). The purpose of this work was to identify possible nickel/copper exploration targets which had not been fully understood by Dundas and/or were previously ranked as lower prospectivity. Results from the modelling were received in October 2023, and were encouraging. A soil sampling program was subsequently completed across the anomaly, with assay results received in December 2023. No significantly anomalous results were returned from the sampling program and consequently no further exploration, such as drilling, is currently planned for the anomaly.

Also in September 2023, the Company announced that it had entered into a binding agreement with ASX listed West Cobar Metals Limited (ASX: WC1) ("West Cobar") to sell four of its Dundas Project exploration licences (Figure 4). West Cobar is developing a rare earths elements (REEs) project in the area. Consideration for the sale comprised the issue by West Cobar to Dundas of 5 million fully paid ordinary shares and a \$20,000 cash payment. Dundas Minerals retains the exploration and development rights for nickel (Ni), Copper (Cu) and Gold (Au) on the three northern tenements. The sale transaction finalised in November 2023, with both the cash payment and WC1 shares received by Dundas Minerals. At 31 December 2023, the WC1 shares were valued at \$380,000.

<u>Corporate</u>

In November 2023, the Company initiated its first ever Share Purchase Plan (SPP). The SPP provided eligible shareholders the opportunity to apply for up to \$30,000 of new Dundas Minerals shares at \$0.056 per share without incurring brokerage or other transaction costs.

The Company was delighted to receive valid applications for 6,955,355 new fully paid ordinary shares to raise a total of \$389,500, before costs. Each Dundas director made application for the maximum \$30,000 of new shares in the SPP, as did a number of existing shareholders. The Company is very pleased with the level of shareholder participation in the SPP. Proceeds from the SPP are to be applied towards the initial drilling program at the Company's Windanya gold project, ongoing exploration expenses, costs of the SPP, and general working capital

On 20 November 2023, the Company's annual general meeting of shareholders was held, with all resolutions put to the meeting passed via poll.
