ASX Announcement

CTME purchases multiple cold spray systems to enhance research capability

TKF Systems significantly enable the Spanish Technology Centre to enhance its clients' manufacturing capabilities.

Titomic Limited (ASX: TTT), the world's leading provider of cold spray solutions, today announces a significant equipment sale worth EUR 300,000 (AUD 495,000) to the leading Spanish technology centre and engineering solutions provider, Fundación Centro Tecnológico Miranda de Ebro (CTME).

Titomic's systems have proven to be highly effective in overcoming longstanding manufacturing challenges and provide highly desirable outcomes across a wide range of industries, including defence and aerospace; proving an excellent complement to CTME as it excels in researching, developing, and integrating advanced manufacturing technologies for critical sectors such as aerospace, defence, and automotive.

Titomic's cold spray systems enhance CTME's capacities, providing the specialised utility of low and medium pressure cold spray to their processes, enabling the application of metals and alloys at lower temperatures and opening new avenues for research and knowledge transfer to its manufacturing clients.

The sale includes Titomic's D623 medium-pressure and D523 low-pressure cold spray systems, alongside a powder feeder and an Integrated Spray Booth. The Integrated Spray Booth is equipped with dust suction and an XYZ robot for precise manipulation of the spray head, ensuring seamless transitions between the D523 and D623 systems based on the specific application requirements.

Essentially acting as a versatile 3-in-1 system, this setup enhances operational flexibility, enabling CTME to leverage the distinct capabilities of each system within a single, integrated environment. This configuration is designed to broaden CTME's operational scope, facilitating the provision of diverse cold spray applications concurrently.

The purchase is associated with CTME's participation in the SURFERA-PLUS project. It is financed by the Centre for Industrial Technological Development through the Spanish Ministry of Science and Innovation. CTME has been awarded a grant for Excellence Technological Centres as part of this project

This sale demonstrates Titomic's ongoing global expansion and reflects the rising demand for its advanced manufacturing solutions. Titomic remains committed to satisfying this demand and providing innovative companies with the means to remain competitive in key regions across the globe.

Herbert Koeck, Managing Director of Titomic, commented:

"This transaction with CTME is a testament to the demand for Titomic's cutting-edge cold spray technology in the global market. By equipping CTME with Titomic's advanced systems, we are enabling CTME to remain at the forefront of manufacturing innovation, offering their clients unparalleled quality and efficiency."

Juan José García Ruiz, Director of CTME, commented:

"The integration of Titomic's advanced cold spray technology into our operations significantly enhances our capabilities. It aligns perfectly with our mission to continually seek out and implement the latest technologies to offer our clients the most innovative solutions."

ABOUT TITOMIC LIMITED

Titomic Limited (ASX: TTT) is an Australian public company specialising in large integrated solutions for industrial-scale metal additive manufacturing, using its patented cold spray additive manufacturing (Cold Spray AM) technology. Titomic provides Cold Spray AM solutions, OEM production and R&D services to the global Aerospace, Defence, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all of its Cold Spray AM activities from its Melbourne Head Office, as well as through local presence in the USA and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit www.titomic.com.

FORWARD LOOKING STATEMENTS

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects," "intends," "plans," "believes," "seeks," "estimates," "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercialising technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
