#### **Discussion of Third Quarter Results**

  - devices, as well as strong growth across our mask product portfolio.
    - Revenue in the U.S., Canada, and Latin America, excluding Software-as-a-Service, grew by 9 percent.

    - Software-as-a-Service revenue increased by 8 percent, reflecting continued organic growth in our SaaS portfolio.

- Gross margin increased by 260 basis points mainly due to reduced freight and manufacturing cost improvements. Non-GAAP gross margin increased by 240 basis points due to the same factors.
- Selling, general, and administrative expenses increased by 1 percent on a constant currency basis. SG&A expenses improved to 19.2 percent of revenue in the quarter, compared with 20.5 percent in the same period of the prior year. The modest increase in SG&A expenses reflects cost management initiatives implemented in the previous quarter.

- Net income for the quarter was \$300 million and diluted earnings per share was \$2.04. Non-GAAP net income increased by 27 percent to \$314 million, and non-GAAP diluted earnings per share increased by 27 percent to \$2.13, predominantly attributable to strong sales and gross margin as well as modest growth in operating expenses.
- Operating cash flow for the quarter was \$402 million, compared to net income in the current quarter of \$300 million and non-GAAP net income of \$314 million.
- During the quarter, we paid \$70 million in dividends and repurchased 261,000 shares for consideration of \$50 million as part of our ongoing capital management.

(A) ResMed adjusts for the impact of the amortization of acquired intangibles, restructuring expenses, field safety notification expenses, acquisition-related expenses, and associated tax effects from their evaluation of ongoing operations, and believes that investors benefit from adjusting these items to facilitate a more meaningful evaluation of current operating performance.

ResMed believes that non-GAAP diluted earnings per share is an additional measure of performance that investors can use to compare operating results between reporting periods. ResMed uses non-GAAP information internally in planning, forecasting, and evaluating the results of operations in the current period and in comparing it to past periods. ResMed believes this information provides investors better insight when evaluating ResMed's performance from core operations and provides consistent financial reporting. The use of non-GAAP measures is intended to supplement, and not to replace, the presentation of net income and other GAAP measures. Like all non-GAAP measures, non-GAAP earnings are subject to inherent limitations because they do not include all the expenses that must be included under GAAP.

(B) In order to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency fluctuations, we provide certain financial information on a "constant currency basis," which is in addition to the actual financial information presented. In order to calculate our constant currency information, we translate the current period financial information using the foreign currency exchange rates that were in effect during the previous comparable period. However, constant currency measures should not be considered in isolation or as an alternative to U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.
