

ASX Announcement | 30 April 2024

Quarterly Activities Report For the Quarter Ending 31 March 2024

Loyal Lithium Limited (**ASX:LLI**) (**Loyal Lithium, LLI** or the **Company**) is pleased to provide its Quarterly Activity Report for period ended 31 March 2024 (**Quarter** or **Reporting Period**).

CORPORATE HIGHLIGHTS

- Continuation of the development of Loyal Lithium as a North American focused lithium led battery minerals company, pursuing growth opportunities via exploration and collaboration with battery metals focused allied individuals and companies.
- Drill core assays from maiden drill program and subsequent drill program confirmed world class lithium and tantalum grades at the Trieste Lithium Project, where a major lithium hub is developing with activity by Rio Tinto/Midland Exploration, Azimut/SEQUEM and Winsome Resources' (ASX:WRI).
- With A\$5.0m in funding LLI is well positioned for further exploration in the next quarter and throughout 2024.

OPERATIONS HIGHLIGHTS

TRIESTE LITHIUM PROJECT:

- During the Quarter, high grade channel sample assay results were announced⁽¹⁾ from three of the six spodumene bearing dykes.
- The Company released an extensive geological analysis that provided insights into the unique geological setting and exposed the potential scale of the Project⁽²⁾:
- Analysis identified two highly prospective areas within the project, namely, the underexplored Trieste Greenstone Discovery Trend and the 20km² Metasediment Fault Flow Zone.
- The Project has already yielded a significant find in the 2023 first field season, with six spodumene bearing pegmatite dykes discovered⁽³⁾, however this new analysis and interpretation indicates high potential for additional new discoveries within these areas.
- A major lithium discovery was also released during the Quarter, with drill core assay results from the October 2023 Dyke #01 drilling campaign, confirming a major lithium discovery at the Trieste Lithium Project. The near surface high-grade drill intercepts included 40.0m at 1.2% Li₂O⁽⁴⁾.

- During the Quarter, Loyal Lithium executed an additional winter drilling program at the Trieste Lithium Project, targeting Dyke #04 and Dyke #05, two of the six spodumene bearing dykes.
- World class lithium and tantalum grades were reported for Dyke #05 drill core assay results. The drill core assay results included intercepts of 31.8m of 2.2% Li₂O and 499ppm Ta₂O₅ from 2.9m, and 28.6m of 1.7% Li₂O and 1,050ppm Ta₂O₅ from 6.5m⁽⁵⁾.
- Exploration planning for the upcoming 2024 summer field program is in the advanced stages.
- Several high-resolution geophysics methodologies assessed to characterise the pegmatite signatures, search for their potential extensions on trend and at depth, and the links between the pegmatite dykes.
- Subsequent to the Quarter, the Company determined that the recent advances in mobile Magnetotellurics (MTm) technology, including a broad band frequency probe, will be suitable to investigate and differentiate between highly resistive rock types (i.e. pegmatitic and metamorphic) to a depth of 600+ metres⁽⁶⁾.
- At present there are six known spodumene pegmatite dykes located within a 20km² fertile metasediment hosted Fault Flow Zone, where the 2023 summer field program discovered a unique cluster of spodumene bearing dykes and prolific boulders containing visual spodumene mega-crystals and large tantalum oxide crystals⁽⁷⁾. Drilling at three of the six known pegmatite dykes has confirmed that mega-crystals of spodumene and tantalum oxides persist at depth with both high-grade lithium and tantalum drill intercepts reported.
- The Trieste Lithium Project is strategically located along the Trieste Greenstone Belt and connected to multiple spodumene bearing lithium projects of Rio Tinto/Midland Exploration, Azimut/SEQUEM and Winsome Resources' (ASX:WRI) Adina-Jamar project with a JORC Inferred Mineral Resource Estimate of 59 Mt at 1.12% Li₂O⁽⁸⁾.
- In September 2023, Loyal Lithium and Winsome Resources signed a collaboration Memorandum of Understanding (MOU) on a range of objectives mutually applicable to the respective companies' and their James Bay Lithium projects⁽⁹⁾. The MOU is a strategic move towards minimising environmental and stakeholder impacts, and to achieve a low-cost domestic Lithium supply and positions the Trieste Greenstone region as a key player in the emerging North American Lithium supply chain. The strategic acquisition of the Renard processing facility and infrastructure by Winsome Resources further solidifies and accelerates the development pathway for the region.

For personal use only

- Subsequent to the Quarter, more thick high grade lithium drill core assay results were announced for Dyke #04. The drill core assay results included intercepts of 32.8m of 1.2% Li₂O 27.6m and 31.1m of 1.5% Li₂O from 19.9m⁽¹⁰⁾.

HIDDEN LAKE LITHIUM PROJECT:

- The 2023 summer field program discovered additional spodumene dykes to extend the total mineralised strike length to 3,250m - a notable 44% increase⁽¹¹⁾.
- Four of the seven main dykes have been drill-tested to a limited depth of 30-50 metres, with all 10 drill holes intercepting high-grade spodumene of up to 1.81% Li₂O.
- Historical metallurgical test work indicates consistency across spodumene rich dykes with very simple mineralogy of predominantly coarse-grained spodumene, quartz, and feldspars, with low impurities (<0.25% FeO). New in-house test work is in progress to understand, confirm and build upon this precious work.
- Dense Media Separation (DMS) pilot plant produced a high-grade concentrate of 6.11% Li₂O from a 400kg bulk sample with minimal loss to tailings.
- Historical drill core samples and data were delivered for environmental and geotechnical analysis for an in-house strategic open pit mining/processing option optimisation study.
- Strategically located 65km east of Yellowknife, with notable infrastructure connecting the Project to the rest of Canada.
- A Land Use Permit has been issued to Loyal enabling further exploration work, including drilling. Collaborative discussions are underway with the First Nation and JV Partner.

SCOTTY LITHIUM PROJECT:

- Drilling results, geophysical and USGS structural data were used to create a 3D model Exploration Target, with a range of 460 million tonnes at 1,145 ppm to 837 million tonnes at 1,175 ppm at a 700ppm lithium cut-off-grade^(12, 13). The potential quantities and grades are conceptual in nature and there has been insufficient exploration to estimate a Mineral Resource and the Company is uncertain if further exploration will result in the estimation of a Mineral Resource.
- The Scotty Lithium Project is located north of the mining town of Beatty, 220km from Las Vegas and 330km from Tesla's Nevada Gigafactory with existing all-weather roads and power infrastructure within proximity.

BRISK LITHIUM PROJECT:

- Due to wildfires in James Bay preventing exploration during much of the 2023 summer field exploration season, the planned field program was rescheduled, with the priority being to complete field work at the Trieste Lithium Project, southeast of Brisk.
- An inaugural field program at Brisk was completed in 2022 with the following highlights ⁽¹⁴⁾:
 - More pegmatite outcrops discovered at Area 1 than originally anticipated.
 - Area 1 and Area 2 considered prospective for lithium, and further field work is recommended. Area 1 in the southeast has an east striking interpreted pegmatite not sampled previously that is the highest priority target.
 - Multiple samples containing highly fractionated pegmatites with indicator elements and mineralogy were obtained, including lithium, tantalum, niobium, beryllium, and bismuth, tourmaline, apatite, and garnet.
 - The southwest pegmatite body at Area 3 is highly continuous, with above background rubidium detected in the geochemical signature.

WESTERN AUSTRALIA:

- Divestment and JV options continue to be sought⁽¹⁵⁾. A mining lease application was submitted across the Providence JORC Inferred Gold resource of 16,400 oz at 2.5 g/t.⁽¹⁶⁾

FINANCE UPDATE

Cash available to the Company as at 31 March 2024 was A\$3.5m which excludes over A\$1.5m in Sales Tax refunds and Quebec Mining Tax credits which are forecast to be returned to the Company over the coming months. Therefore, with A\$5.0m in funding LLI is well positioned for further exploration in the next quarter and throughout 2024.

Payments for the Quarter included:

- Exploration and Evaluation Expenditure during the Quarter was A\$2.424m. Full details of exploration activity during the Quarter are set out in this report and relate primarily to exploration costs at the Trieste Lithium Project, with minor works at Hidden Lake and in Western Australia.
- Payment to related parties of the Company and their associates during the Quarter was A\$49,000.

The Company's disclosure required by ASX Listing Rule 5.3.4 regarding a comparison of its actual expenditure to date since re-listing on 2 August 2023 against the 'Use of Funds' statement in its Re-compliance Prospectus dated 5 June 2023 (Section 3.9) and Supplementary Prospectus dated 27 July 2023 (Section 3.7) ("**Prospectus**") is included in the attached Appendix 5B.

OPERATIONS UPDATE

For personal use only

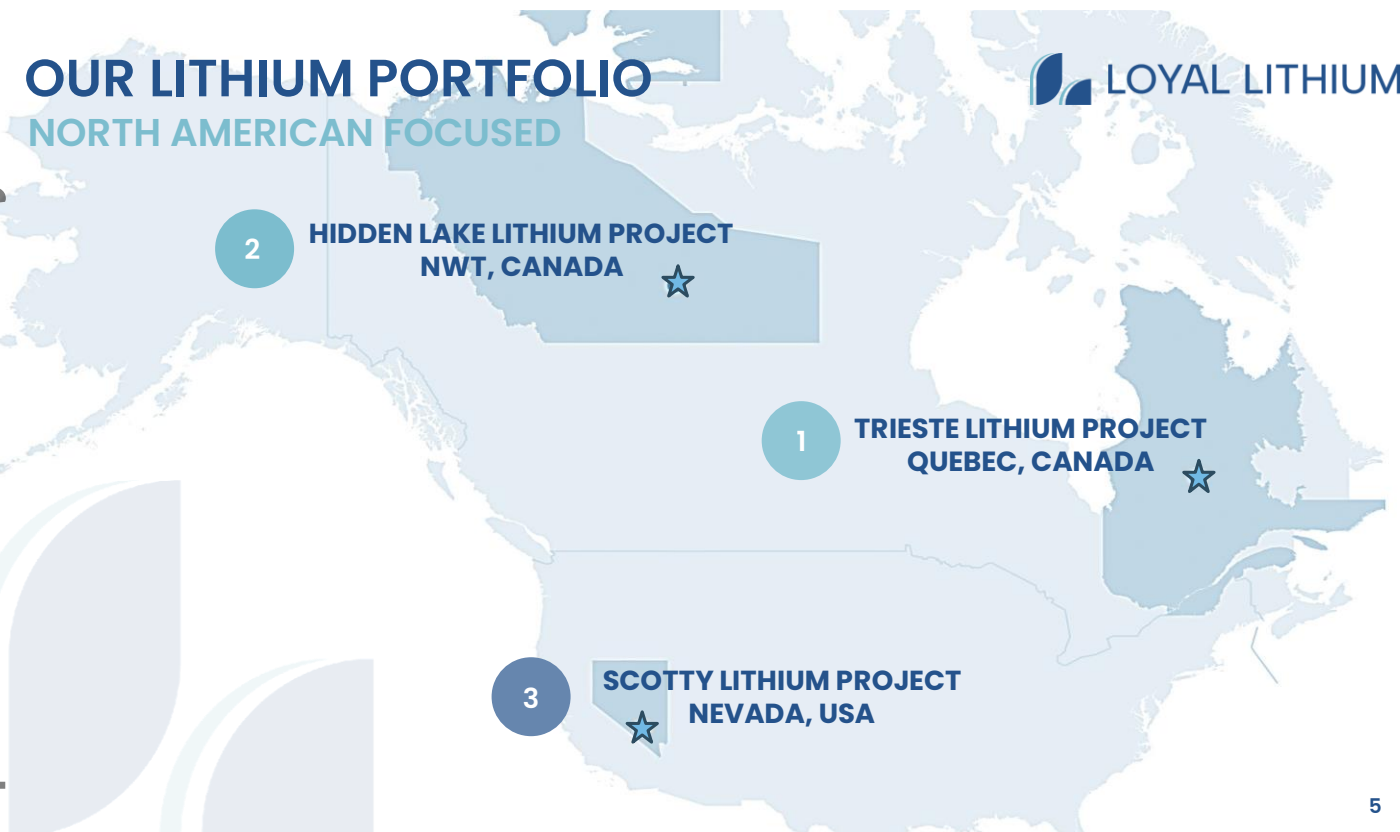

Figure 1 – Loyal Lithium’s three core Lithium Projects: Well positioned to supply the Emerging North American Battery Supply Chain.

TRIESTE LITHIUM PROJECT

The Trieste Lithium Project is a large scale spodumene pegmatite project that hosts six spodumene mineralised dykes, located along the emerging lithium rich Trieste Greenstone Belt (Figure 2), connected to multiple spodumene bearing lithium projects of Rio Tinto/Midland Exploration, Azimut/SEQUEM and Winsome Resources’ (ASX:WR1) Adina-Jamar project with a JORC Inferred Mineral Resource Estimate of 59 Mt at 1.12% Li₂O⁽⁹⁾. During the extensive and focused 2023 field program, the Company discovered six spodumene bearing pegmatite dykes, consisting of aligned implied continuous outcrops, within a 20km² fertile metasedimentary rock host zone, located between the Trieste Greenstone Belt and the Tilly granite. The dykes are situated within metasediment host rock, with several high-value greenstone targets, as well as other metasediment targets, yet to be fully explored.

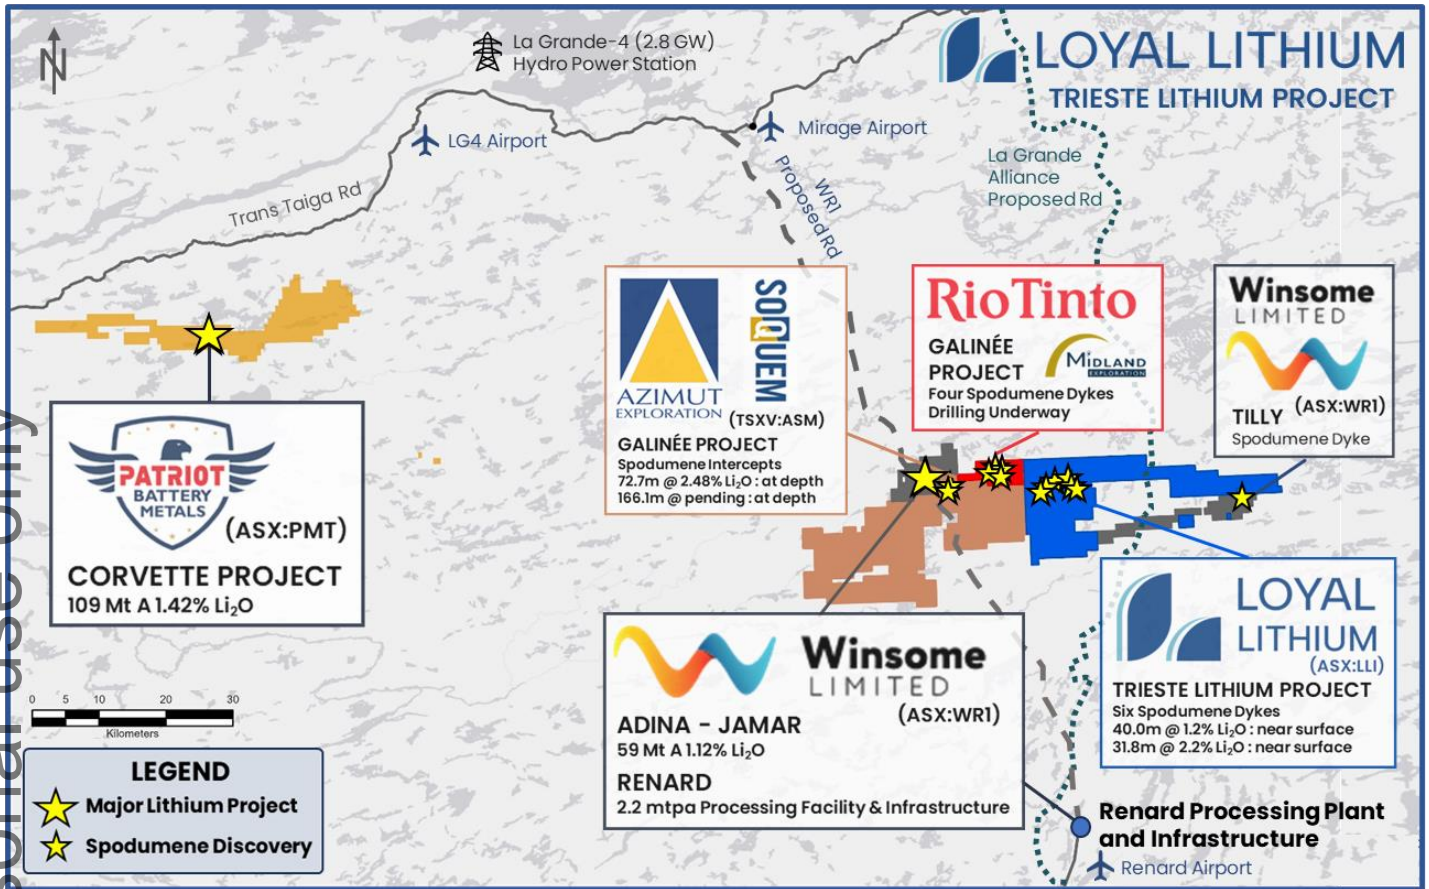

Figure 2: Location of the Trieste Lithium Project, and other nearby projects, located in Quebec, Canada.

The Company completed its maiden drilling program at Dyke #01 in October 2023 that hosts spodumene mega crystals at surface confirmed by high grade lithium assay results. The assay results from the maiden drilling program were reported during Q1 2024⁽⁴⁾, with notable near surface assay results of 40.0m of 1.2% Li₂O from 15.0m and 28.8m of 1.1% Li₂O from surface. The drill core assay results exhibit high grade lithium from surface and follow the previously announced channel ⁽¹⁾ and rock chip ⁽³⁾ sample assay results. The channel results were released in Q1 2024.

Subsequent to the maiden drilling campaign, and within Q1 2024, the Company completed an additional drilling program, targeting Dyke #04 and Dyke #05, with both dykes showing spodumene mega crystals at surface. The drill assay results from both dykes exhibit similar high grade results that were intersected when drilling Dyke #01⁽²⁾, with notable near surface results of 32.8m of 1.2% Li₂O from 27.6m (Dyke #04) and 31.8m of 2.2% Li₂O from 2.9m (Dyke #05).

Spodumene mega crystals were identified within the drill core of both dykes, with drillhole KS24-005 reporting a high grade intercept of 4.0m of 5.2% Li₂O, within the greater lithium interval of 16.0m at 1.4% Li₂O. The two drilling campaigns have a cumulative total of 41 drillholes and 3,644m of drilling with notable drill intersect assay results summarised in Table 1 and Figure 3.

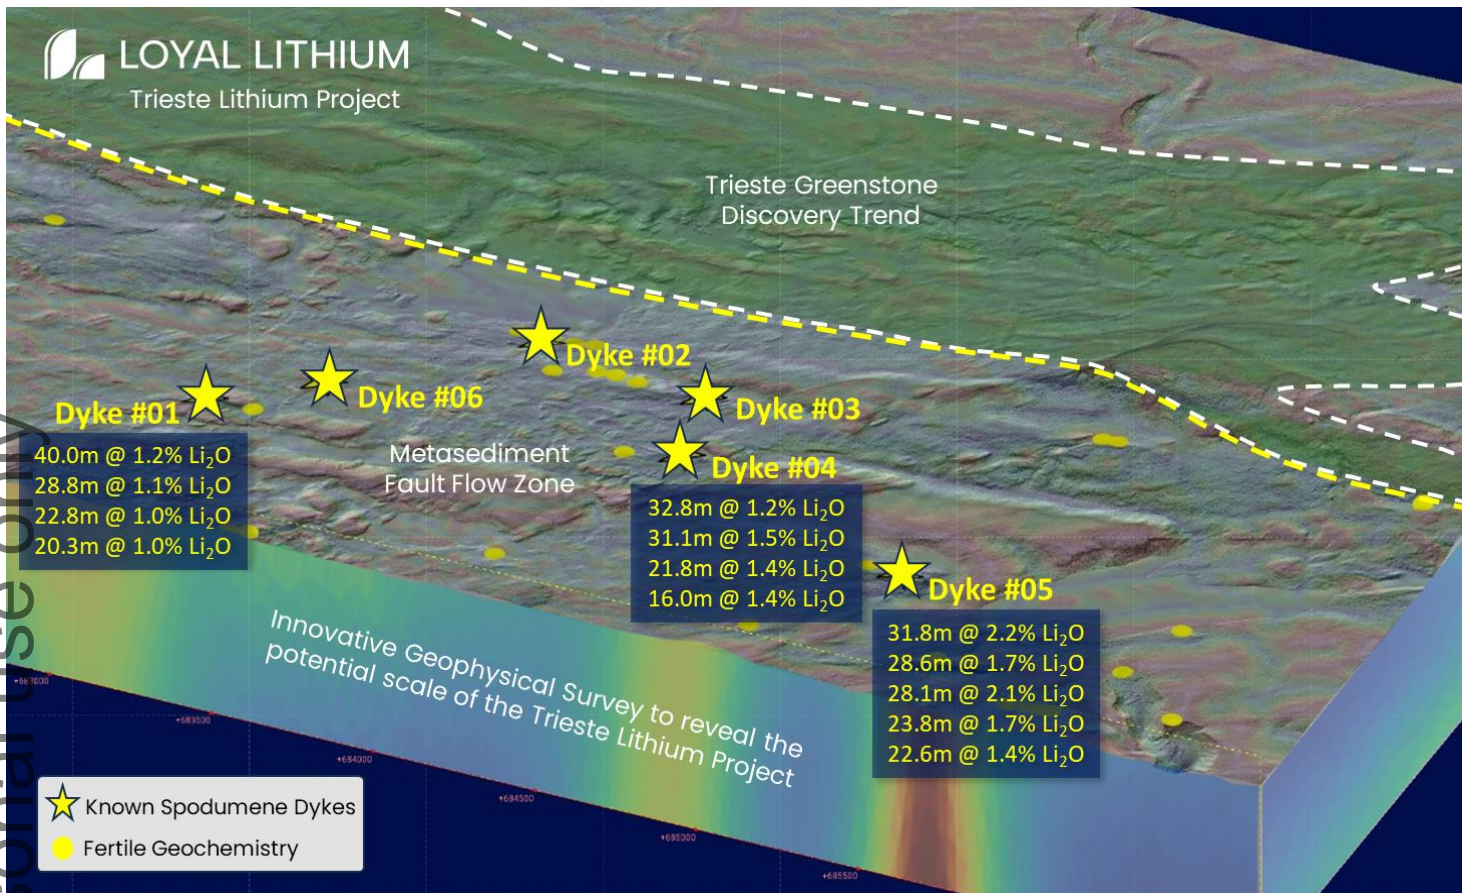

Figure 3: Trieste Lithium Project – An example depth of inspection output against the Trieste backdrop with notable drill assay results shown for Dyke #01, Dyke #04, and Dyke #05.

The Company has completed the field and drilling campaigns with the support of its in-country geological partner, Dahrouge Geological Consulting (DGC). The field observations of spodumene occurring within the dykes was confirmed by members of the Ordre des Géologues du Québec, and by the JORC Competent Person (CP), with many large mega spodumene crystals identified across the five original discovered dykes. The Company continues to utilise DGC and plans on completing the upcoming filed season with DGC as well, which is in the advanced stages of planning. In Q1 2024, Loyal Lithium announced a planned innovative geophysical survey to reveal the potential scale of the Trieste Lithium Project with a focus on mobile Magnetotellurics (MTm).

This cutting-edge survey will utilise a suite of advanced sensors, including the latest in MTm technology, to identify structural corridors that may contain lithium-bearing structures and reveal the project's potential scale. The survey is expected to investigate and differentiate between highly resistive rock types to a depth of 600+ meters and expose conductive features within the 20km² Metasediment Fault Flow Zone. Anticipated to generate a detailed 3D model, this survey will aid in pinpointing both surface and subsurface drilling targets, building upon the high-grade lithium and tantalum assays from previous drilling programs (Figure 3).

Table 1: Trieste Lithium Project – Notable Assay Results from Dyke #04 and Dyke #05.

Trieste Lithium Project Dyke #04 & #05 Notable Drill Assay Intercepts (NAD83z18)											
Dyke ID	Hole ID	Easting	Northing	Elevation (m)	Dip	Azimuth	From (m)	To (m)	Length (m)	Lithium Grade Li ₂ O%	Tantalum Grade Ta ₂ O ₅ ppm

		<i>Including</i>					11.8	15.8	4.0	5.2	23
Dyke #05	TR24-011	685275	5906040	571	-45	0	34.2	49.7	15.4	1.4	60

The Metasedimentary host exhibits a Specific Gravity (Sg) of less than 2.8 g/cm³ which is like pegmatitic waste, comprising predominantly quartz and feldspars. Intercepts calculated using pegmatite rock type and/or a 0.20% Li₂O cut-off grade at margins, minimum 2m thickness and up to 6.1m of internal dilution.

HIDDEN LAKE LITHIUM PROJECT

The Hidden Lake Lithium Project is strategically located 65 km east of Yellowknife, the capital of the Northwest Territories, and is located within the emerging Yellowknife Lithium District adjacent to an all-weather highway to the south and east, and Li-FT Power’s (CSE: LIFT; FSE: WS0) properties to the North.

For personal use only

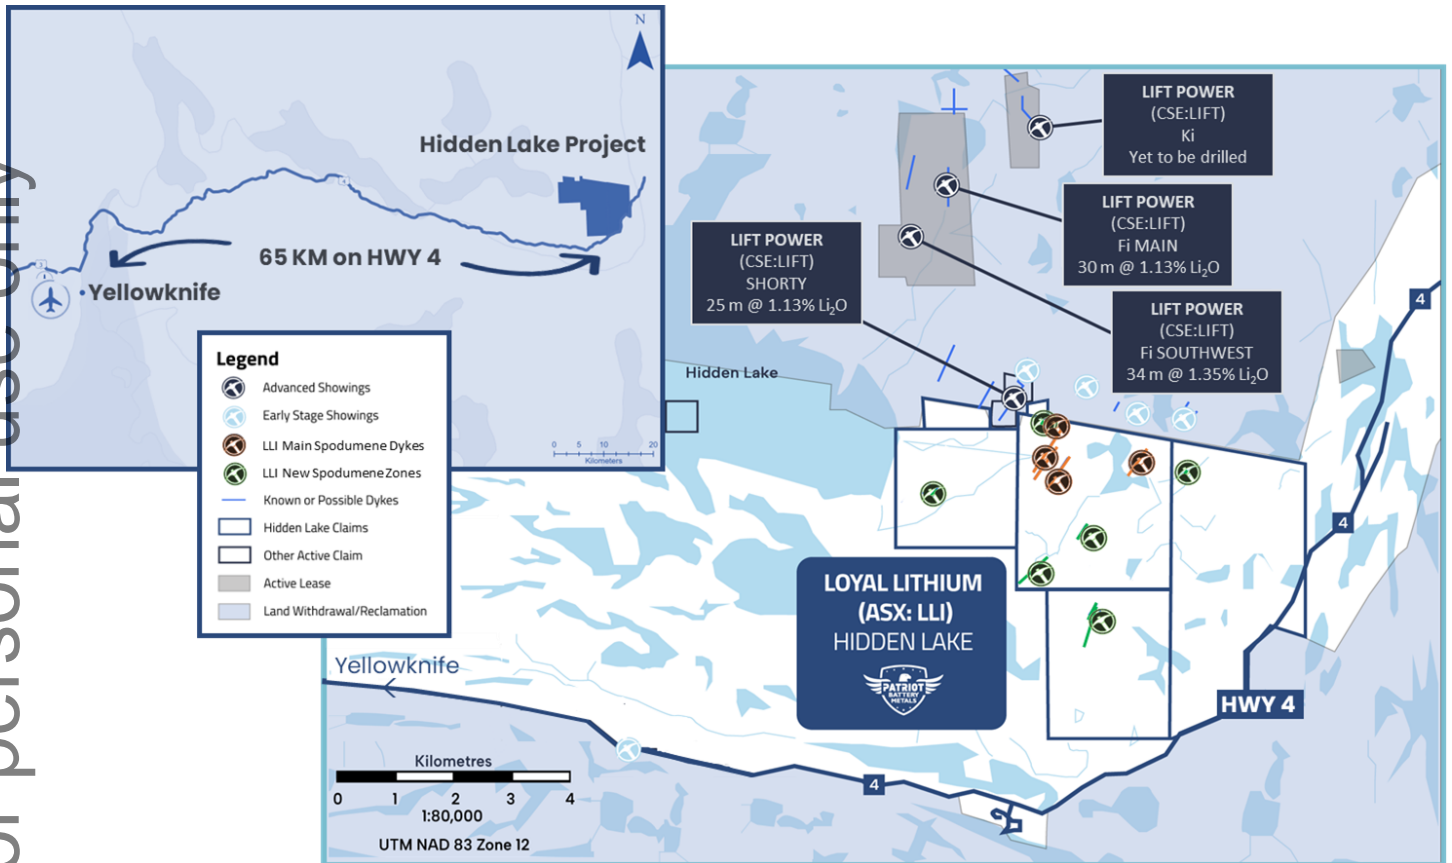

Figure 4 – Hidden Lake Lithium Project: Yellowknife, Northwest Territories, Canada.

During the Summer 2023, Loyal Lithium engaged its in-country geological partner, Dahrouge Geological Consulting, to conduct an extensive field mapping and sampling program at the Hidden Lake Lithium Project in the NWT, Canada. A program was conducted on 315 individual outcrops, identified via acquired high resolution visible and infrared satellite imagery and reprocessed lithium channel combination imagery. A total of 298 samples were collected for assay analysis during the fieldwork, 269 outcrop and 29 channel samples. The Company also conducted LiDAR and orthophoto airborne surveys across the entire property. Loyal Lithium was fortunate that the 2023 field program was completed prior to the forest fire induced evacuation orders at Yellowknife, NWT.

The four previously discovered spodumene bearing pegmatite dykes, with a cumulative strike length of 2,250m, were drilled in 2018 to a limited depth of 30–50 metres, with 10 drill hole intercepts of up to 1.81% Li₂O.

Results from the 2023 summer field program were received during the last Quarter, and the Company announced that it had increased the collective surface mineralization strike length at Hidden Lake, from 2,250m to around 3,250m, a massive 44% increase in strike. This was determined through the analysis of both rock chip and channel samples collected from newly identified spodumene bearing outcrops, discovered during this 2023 summer field program.

For personal use only

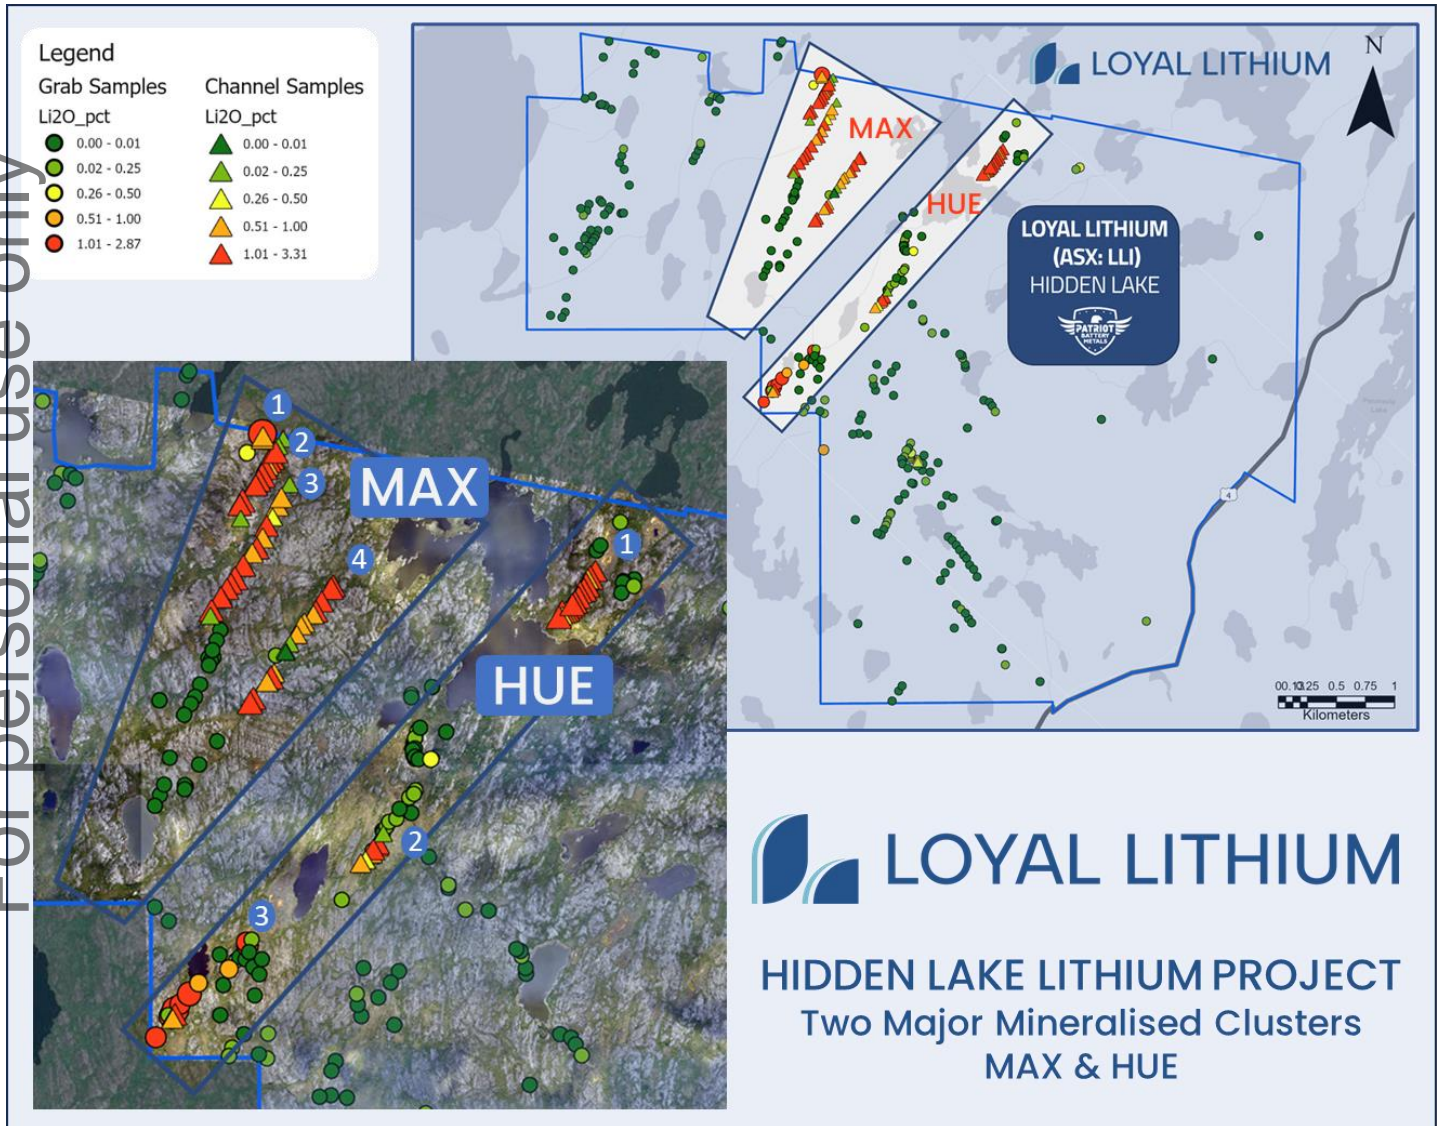

Figure 5 – Hidden Lake Lithium Project: Yellowknife, Northwest Territories, Canada.

Extensive surface mineralisation was grouped within two major mineralised clusters (MAX & HUE), consisting of 7 inferred spodumene bearing pegmatite dykes. The Company has received a Land Use Permit to enable the commencement of a drilling program, which will target the mineralised clusters of MAX & HUE, whilst additional drilling locations also included at the other newly identified spodumene bearing zones elsewhere on the project.

The Hidden Lake Lithium Project benefits from a high-resolution aeromagnetics survey, orthographic imagery, and LiDAR data to refine drill targets and assess future development options.

A Land Use Permit was issued to Loyal December quarter by the Northwest Territories Mackenzie Valley Land and Water Board (MVLWB). This permit was finalised after receiving MVLWB letters of conformity the current quarter. The Land Use Permit entitles Loyal to conduct operations including, a) Mineral exploration drilling; b) Use of equipment, vehicles, and machines; c) Use and storage of fuel; d) Operation, and maintenance of camps; e) Construction, operation, and maintenance of winter roads.

SCOTTY LITHIUM PROJECT

The Scotty Lithium Project covers 56.5 km² of active claims, 67 km north of the mining town of Beatty and is accessible year-round via HWY 95 and HWY 267. The project is also strategically located via HWY 95, only 189 km northwest of Las Vegas, 330km from Tesla's Nevada Gigafactory and 517 km from Reno in the Tier 1 mining jurisdiction of Nevada, USA, proximal to existing power infrastructure. The Scotty Lithium Project is adjacent to the existing Nevada Lithium Ltd (CSE:NVLH) Bonnie Claire Project with similar geology and large drill intercepts of lithium mineralisation. Scotty is less than 100km from Albemarle's operational Silver Peak Mine in Clayton Valley (NYSE: ALB) and Ioneer's Rhyolite Ridge Lithium-Boron Project (ASX:INR).

The basin's 5.7km western edge offers the potential for a cost-effective mining solution due to its surface alluvial fan rocks, providing excellent accessibility for surface mining. Nevada Lithium's (CSE:NVLH) neighbouring Bonnie Claire Project has successfully produced battery grade lithium carbonate from its sedimentary basin drill cores.

The Scotty Lithium Project has strong mineralisation, with assay results from its inaugural sonic drilling campaign with average grades of 1,120ppm lithium (700ppm cut-off-grade), with a peak lithium value of 4,007ppm. The campaign consisted of 3 sonic drill holes, with an average depth of 171m for a total of 513m. These results allowed for an independent consultant determined JORC Exploration Target for the Project of 460 million tonnes (Mt) at 1145 ppm to 837 Mt at 1175 ppm at a 700ppm cut-off-grade, indicating a potentially significant large sediment hosted lithium resource. The potential quantities and grades are conceptual in nature and there has been insufficient exploration to estimate a Mineral Resource and the Company is uncertain if further exploration will result in the estimation of a Mineral Resource.

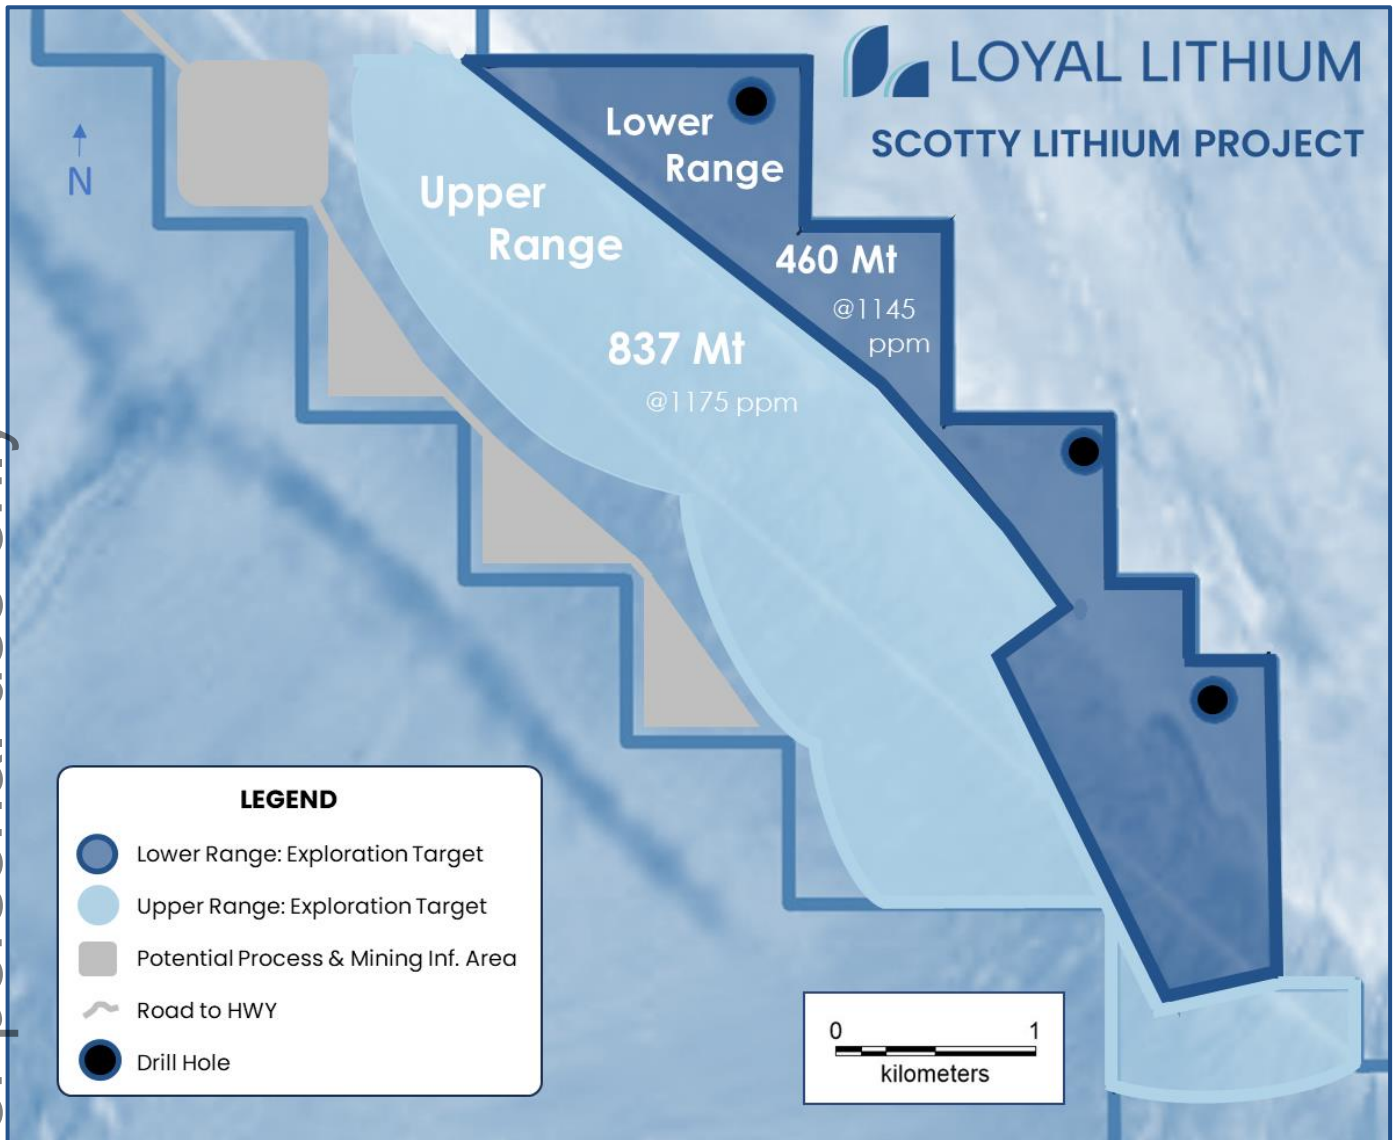

Figure 6 – Scotty Lithium Project – Map showing the Exploration Target domains.

BRISK LITHIUM PROJECT

A total of 192 mining claims covering 98.5km² were acquired in 2022, which are divided into six separate claim blocks, extending over 70km in an east-west direction.

The Brisk Lithium Project contains several targets generated in the 2022 field campaign at Areas 1, 2 and 3 that require further field testing. Due to the capacity constraints of geological contractor availability during summer 2023 shortened field season, the Company prioritised fieldwork at the Trieste Lithium Project, the site of a major lithium discovery. A field program is planned at Brisk during the 2024 Canadian summer to test many more pegmatites identified in air photos, especially in the southeast of Area 1 if resources are available after exploration at Trieste.

For personal use only

Figure 7 – Brisk Lithium Project.

WESTERN AUSTRALIA PROJECTS:

The conclusions from both the August and November 2022 Strategic Reviews ⁽¹⁴⁾ lists all West Australian gold and base metal assets as better suited for joint venture or divestment with the following highlights:

- At the Monger North Project a mining lease application was applied for across Loyal Lithium’s 16,400 oz gold JORC Inferred Mineral Resource Estimate during the quarter, which is open in two directions, with increasing gold grade found in fresh rock.
- Monger South Project: VMS style silver-zinc-copper outcrop assays linked with FLEM geophysics survey conductor anomaly drill target and other one Daisy Milano Trend concealed gold ultrafine soils anomalies.

About Loyal Lithium

Loyal Lithium Limited (**ASX: LLI**) is a well-structured listed resource exploration company with projects in Tier 1 North American mining jurisdictions in the Northwest Territories, Canada, James Bay Lithium District in Quebec, Canada and Nevada, USA. Through the systematic exploration of its projects, the Company aims to outline JORC compliant resources, creating significant value for its shareholders.

Future Performance

This announcement may contain certain forward-looking statements and opinion. Forward-looking statements, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties, assumptions, contingencies and other important factors, many of which are outside the control of the Company and which are subject to change without notice and could cause the actual results, performance or achievements of the Company to be materially different from the future results, performance or achievements expressed or implied by such statements. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward-looking statements or other forecast. Nothing contained in this announcement, nor any information made available to you is, or and shall be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of Loyal Lithium Limited.

Qualified and Competent Person

The information in this announcement that relates to exploration results, is based, and fairly reflects, information compiled by Mr D. Allingham, who is the Company's geologist. Mr Allingham is a Fellow of the Australian Institute of Geoscientists. Mr Allingham has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a *Competent Person* as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results and Mineral Resources (JORC Code). Mr Allingham consents to the inclusion in the announcement of the matters based on the information in the form and context in which it appears.

Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities		
7.2	Credit standby arrangements		
7.3	Other (please specify)		
7.4	Total financing facilities		
7.5	Unused financing facilities available at quarter end		
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(2,661)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(157)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(2,818)
8.4 Cash and cash equivalents at quarter end (item 4.6)	3,510
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	3,510
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	1.25
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer:	No, a lower level of net operating cash flow is expected due to lower cost exploration works the next two quarters.
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	Yes, as an exploration company, we rely on external funding, including the Canadian Flow-Through funding, as such we are always prepared to raise capital when required. Additionally, it's important to note that the Company anticipates receiving over A\$1.5 million in Sales Tax refunds and Quebec Mining Tax credits in the second half of 2024.
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer:	Yes, the Company has always been successful in raisings capital when required.
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2024.....

Authorised by:**Board of Directors**.....
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

Quarterly Report Disclosure – 31 March 2024

Based on exploration undertaken post the listing of the Company on ASX, the Company has previously announced to ASX its decision to investigate the potential divestment or joint venture of the Monger North, Monger South and Gibraltar Projects. Consequently, other than in order to maintain those projects in good standing pending any such divestment or joint venture decision, the Company will not be incurring further exploration expenditure on those projects. For further information please see the ASX release "Operations Update" dated 26 August 2022, and ASX release "Western Australian Operations Update" dated 10 November 2022.
