Significant movements from 31 March 2023

Cash and cash equivalents: The decrease in cash is largely driven by funds returned to shareholders associated with the on-market share buy-back scheme; partly offset by strong cash flow generation capability of the business and interest income on cash balances.

Property, plant and equipment: The increase reflects the continued strong growth in the North America Gaming Operations installed base, up 10% compared to the prior corresponding period, and leasehold improvements primarily associated with the new Las Vegas integration centre.

Other assets: The increase mainly reflects changes in deferred tax asset relating to the Group structure changes in a prior period and increased current receivables from revenue growth.

Net working capital: The increase was mainly driven by business revenue growth.

Total equity: The change in total equity reflects the result for the period, changes in reserves due to currency movements, the on-market share buy-back and dividends paid.

¹ Consolidated EBITDA for the Group as defined in Aristocrat's Syndicated Facility Agreement (also referred to as Bank EBITDA).

Operating cash flow increased 7% to \$656 million compared to the prior corresponding period, reflecting strong business performance and underlying cash flow generation.

Interest and tax increased 33%, with higher tax payments as a result of improved business performance partially offset by higher interest income on cash balances.

Capital expenditure was largely driven by investment to support continued growth in the North America Gaming Operations installed base.

Dividends and cash returned to shareholders mainly relates to the purchase of a further \$608 million of shares through the on-market share buy-back program. Almost \$1.4 billion has been returned to shareholders from a total program size of up to \$1.5 billion.

Funding & Liquidity

The Group maintained ample liquidity and a strong balance sheet over the reporting period. The Group had committed loan facilities of \$3.0 billion as at 31 March 2024, comprising a US\$1.2 billion Term Loan A, US\$250 million Term Loan B and a US\$500 million revolving credit facility and total liquidity of approximately \$3.4 billion, comprised of cash and \$756 million of the available revolving credit facility, net of \$11 million supporting letters of credit.

The Group's facilities are summarised below:

Facility	Drawn as at 31 Mar 2024	Limit	Maturity date
Term Loan A facility	US\$1,232m	US\$1,232m	May 2027
Term Loan B facility	US\$250m	US\$250m	May 2029
Revolving facility	nil	US\$500m	May 2027
Overdraft facilities	nil	A\$8m	Annual Review

The Group's interest and debt coverage ratios are below:

* EBITDA refers to Consolidated EBITDA for the Group as defined in Aristocrat's Syndicated Facility Agreement (also referred to as Bank EBITDA).

** Interest expense shown above includes ongoing finance fees relating to bank debt facility arrangements, such as line fees.

The Group's leverage, net (cash)/debt to EBITDA, increased to (0.1)x at 31 March 2024, from (0.2)x in the prior corresponding period.

Credit Ratings

The Group maintains credit ratings from Moody's Investor Services, Standard & Poor's and Fitch. As at 31 March 2024, Aristocrat holds credit ratings of BBB- from Standard & Poor's, Ba1 from Moody's and BBB- from Fitch.

Dividends

The Directors have authorised an interim fully franked dividend of 36.0 cents per share (A\$228 million), in respect to the period ended 31 March 2024.

The dividend is expected to be declared and paid on 2 July 2024 to shareholders on the register at 5.00pm 24 May 2024. The dividend will be fully franked.

Foreign Exchange

Given the extent of the Group's global operations, its reported results are impacted by movements in foreign exchange rates.

In the six months to 31 March 2024, the Australian dollar was, on average, weaker against the US dollar when compared to the prior corresponding period. The impact of translating foreign currency (translational impact) increased revenue by \$81 million, while increasing normalised NPATA by \$20 million on a weighted average basis when compared with rates prevailing in the respective months in the prior year. In addition, as at 31 March 2024, the cumulative effect of the retranslation of the net assets of foreign controlled entities (recognised through the foreign currency translation reserve) was a credit balance of \$542 million (compared with a credit balance of \$625 million as at 30 September 2023).

Based on the Group's typical historical mix of profitability, the major exposure to translational foreign exchange results from the Group's US dollar profits. A US 1 cent change in the US\$:A\$ exchange rate resulted in an estimated annualised \$23 million translational impact on the Group's annual normalised NPATA, based on the last 12-month period. This impact will vary in line with the magnitude and mix of overseas profits.

Exchange rates compared with prior periods for the US dollar are below.

In local currency, North America profit increased 4% to \$539 million, driven by continued growth in the Class III Premium Gaming Operations footprint, supported by the depth and strength of the portfolio.

Despite favorable mix and moderation of supply chain costs, overall margin decreased 0.7 percentage points to 57% primarily due to focused accelerated investment in refurbishing the Class II legacy installed base.

Aristocrat's Class III Premium and Class II Gaming Operations installed base grew by approximately 3,200 additional net units during the period (over 6,100 net in the 12 month period) while market-leading fee per day (FPD) remained strong at US\$55.50 across the expanded footprint, growing market share to 40%¹. The launches of NFL-themed slots, *Bank Buster*TM, and *Where's the Gold Jackpots*TM, along with continued demand for *Dragon Link*TM, *Lightning Dollar Link*TM, and *Jackpot Carnival*TM drove momentum in the period.

Notes to the financial statements

1. Business performance

This section provides the information that is most relevant to understanding the financial performance of the Group during the half-year. These financial statements have been prepared using the best available information at this time in relation to areas of significant estimates and judgements.

1-1 Segment performance

1-2 Revenues

1-3 Expenses

1-4 Earnings per share

1-5 Dividends

1-6 Income tax and deferred tax assets

1-1 Segment performance

(a) Identification of reportable segments

The activities of the entities in the Group are predominantly the development, assembly, sale, distribution and service of games and systems.

Management has determined the operating segments based on the reports reviewed by the chief operating decision maker. The following reportable segments have been identified:

- Aristocrat Gaming;
- Pixel United; and
- Aristocrat Interactive

These segments reflect the following changes from prior period:

- Aristocrat Interactive, which includes online Real Money Gaming, Systems Contracts and associated Service arrangements, is a new reportable segment. These were previously reported within the Americas, Australia and New Zealand and International Class III segments;
- The remaining Americas, Australia and New Zealand and International Class III segments are now combined into one Aristocrat Gaming reportable segment.

There have been no changes to the Pixel United segment. Prior period comparatives have been restated to reflect the revised reportable segments in both periods.

(b) Segment results

Segment results represent earnings before interest and tax, and before significant items, design and development expenditure, amortisation of acquired intangibles, selected intercompany charges and corporate costs.

Segment revenues and expenses are those that are directly attributable to a segment and the relevant portion that can be allocated to the segment on a reasonable basis.

Segment revenues, expenses and results exclude transfers between segments. The revenue from external parties reported to the chief operating decision maker is measured in a manner consistent with that in the statement of profit or loss and other comprehensive income.

The 2024 interim dividend had not been declared at the reporting date and therefore is not reflected in the financial statements.

1-6 Income tax and deferred tax assets

In a prior period a deferred tax asset and corresponding income tax benefit was recognised in respect of non-Australian tax deductions due to an internal reorganisation of the Group structure and corresponding change in the tax base of the Group's intangible assets. The total potential tax benefits recognised as a deferred tax asset at 31 March 2024 were \$1,412.1m (30 September 2023: \$1,453.0m). A further \$69.0m of potential tax benefits remain unrecognised at 31 March 2024 (30 September 2023: \$122.1m). The current year tax expense includes recognition of previously unrecognised benefits.

Total Group deferred tax assets at 31 March 2024 of \$1,492.1m (30 September 2023: \$1,516.8m) includes the \$1,412.1m (30 September 2023: \$1,453.0m) noted above.

Judgement is required in determining the initial recognition and the subsequent carrying value of the deferred tax assets. Deferred tax assets are only able to be recognised to the extent that utilisation is considered probable. A reassessment of the carrying amount of the deferred tax assets is performed at each reporting period.

The Organisation for Economic Co-operation and Development's (OECD) Pillar Two global minimum tax legislation has been enacted or substantively enacted in certain jurisdictions the Group operates. The legislation will be effective in those jurisdictions (and is expected to be in Australia) for the Group's financial year beginning 1 October 2024. The Group continues to monitor and evaluate the domestic implementation of Pillar Two rules by relevant countries in which the Group operates.

The Group is in the process of assessing the potential exposure arising from Pillar Two legislation. A reliable assessment and estimate of future taxes under the Pillar Two Model Rules in all jurisdictions in which the group operates is not reasonably estimable at the date of this report.

Notes to the financial statements

2. Capital and financial structure

This section provides information relating to the Group's capital structure and its exposure to financial risk.

The Directors review the Group's capital structure and dividend policy regularly and do so in the context of the Group's ability to invest in opportunities that grow the business, enhance shareholder value and continue as a going concern.

Fair value measurements

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level follows below the table.

	Level 1 \$'m		Level 2 \$'m		Level 3 \$'m		Total \$'m	
	31 March 2024	30 September 2023	31 March 2024	30 September 2023	31 March 2024	30 September 2023	31 March 2024	30 September 2023

Fair value hierarchy levels	Definition	Valuation technique
Level 1	The fair value is determined using the unadjusted quoted market price in an active market for similar assets or liabilities.	The Group did not have any Level 1 financial instruments at the end of the current and prior reporting periods.
Level 2	The fair value is calculated using predominantly observable market data other than unadjusted quoted prices for an identical asset or liability.	Derivatives used for hedging are valued using forward exchange rates at the balance sheet date. Interest rate swap contracts are valued using the present value of estimated future cashflows based on observable yield curves. The convertible bonds are not material.
Level 3	The fair value is calculated using inputs that are not based on observable market data.	The fair value of contingent consideration is based on forecasts of the performance of the entity subject to earn-out payments. A valuation of the contingent consideration based on these forecasts is performed by an external valuer annually.

There were no transfers between levels in the fair value hierarchy and no changes to the valuation techniques applied since 30 September 2023. The carrying amount of financial instruments not measured at fair value approximates fair value.

The Group and parent entity have contingent liabilities at 31 March 2024 in respect of the following matters:

- (i) a contingent liability may exist in relation to certain guarantees and indemnities given in the ordinary course of business by the Group;
- (ii) controlled entities within the Group are and may become parties to various legal actions in the ordinary course of business and from time to time. The Directors consider that any liabilities arising from this type of legal action are unlikely to have a material adverse effect on the Group; and
- (iii) controlled entities within the Group may become parties to various legal actions concerning intellectual property claims. Intellectual property claims can include challenges to the Group's patents on various products or processes and/or assertions of infringement of third party patents.

Most intellectual property claims involve highly complex issues. Often, these issues are subject to substantial uncertainties and therefore the probability of damages, if any, being sustained and an estimate of the amount of damages is difficult to ascertain. Based on the information currently available, the Directors consider that there are no current claims likely to have a material adverse effect on the Group.

Other than the matters above, there has not arisen in the interval between the end of the half-year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial reporting periods.

2. complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the *Auditor's responsibilities for the review of the half-year financial report* section of our report.

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 March 2024 and of its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
