SCEE awarded Collie Battery Switchyard works

- SCEE Electrical awarded by Synergy the Switchyard works for the Collie Battery Energy Storage System
- Switchyard works value circa \$50m
- Takes total value of awards for the Collie Battery project to circa \$210m

Award

Southern Cross Electrical Engineering Limited (“SCEE Group”) is pleased to announce that its subsidiary SCEE Electrical has been awarded the Collie Battery Energy Storage System 330kV Switchyard Package, as a contract variation to the Balance of Plant Contract with Synergy for the 500 MW/2000 MWh Collie Battery Energy Storage System (“CBESS 1”) that was recently announced to the ASX on 6 May 2024. The contract variation value is circa \$50 million, and the works under the variation are scheduled for completion in the second quarter of calendar year 2025.

The 330kV Switchyard Package will include civil and structural works, 330kV overhead line gantries, installation, testing and commissioning support of 330kV/33kV transformers, circuit breakers, surge arrestors, current/voltage transformers, a 330kV control room and a communications and SCADA system, all tying into the Western Power network.

Comment

Commenting on the award, SCEE Group Managing Director Graeme Dunn said “I am very pleased that Synergy has awarded us this further package of works at what will eventually be one of the largest battery energy storage systems in Australia.

This brings the total value of work for us on this project to approximately \$210m already, and I note there are many further battery projects to come here in Western Australia and in the rest of the country to support Australia reaching its net zero emissions targets.”
