

4DMedical expands with Jones Radiology contract

8 July 2024

Highlights

- 4DMedical has signed a commercial contract with Jones Radiology, an operator of 29 diagnostic and interventional radiology clinics across South Australia and Alice Springs
- The commercial contract follows a successful pilot at three of Jones Radiology's Adelaide clinics and will further expand patient access to 4DMedical's XV Technology® platform in Australia

Melbourne, Australia, 8 July 2024: Respiratory imaging technology company 4DMedical Limited (ASX:4DX, "4DMedical", or the "Company") today announces the signing of a commercial contract with Jones Radiology, a leading provider of diagnostic imaging services in South Australia.

Contract expands commercial rollout of XV Technology® in Australia

Jones Radiology is a doctor owned and operated medical imaging practice offering a comprehensive range of diagnostic and interventional radiology services. With 29 clinics across Adelaide, regional South Australia and Alice Springs, the contract with Jones Radiology expands the network of diagnostic imaging sites that provide patients and their referring doctors with 4DMedical's revolutionary XV Technology®-enabled ventilation reports.

The contract follows a successful pilot of CT LVAS™ at three of Jones Radiology's Adelaide clinics where scans were referred from both specialists and GPs.

The partners envisage that most referrals will be for the Company's CT LVAS™ product, which utilises widely available Computed Tomography (CT) imaging infrastructure, but the contract also facilitates access to 4DMedical's XV LVAS® product via fluoroscopy as required by referring doctors. Ventilation reports will be delivered and billed on a Software-as-a-Service (SaaS) model on terms in line with those of the Company's other partners.

Both parties are committed to working together to promote and market the services to referring clinicians to mutual benefit.

Jones Radiology Chief Operating Officer, Sarah Woon said:

The patients who will benefit from this technology have usually found accurate diagnosis elusive and will now benefit from 4DMedical's rich and detailed scan outputs leading to greatly improved outcomes. We are excited to partner with 4DMedical to provide our referrers and patients a clearer picture using their CT LVAS™ technology.

4DMedical MD/CEO and Founder, Andreas Fouras said:

We are delighted to be working with Jones Radiology. The agreement announced today means that more patients and clinicians, particularly in South Australia, will have access to the insights that only XV Technology® can provide.

I am especially pleased to note that once again a pilot of our technology has directly resulted in strong interest from doctors to use our products in their clinical practices. This agreement demonstrates a shared commitment from Jones Radiology and 4DMedical to improve patient outcomes.

I am excited that our network now includes Jones Radiology as we continue to expand the availability of advanced respiratory imaging across Australia.

About 4DMedical

4DMedical Limited (ASX:4DX) is a global medical technology company that has created a step change in the capacity to accurately and quickly understand the lung function of patients with respiratory diseases.

Through its flagship patented XV Technology[®], 4DMedical enables physicians to understand regional airflow in the lungs and identify respiratory deficiencies earlier and with greater sensitivity as they breathe. This technology powers 4DMedical's FDA-cleared XV Lung Ventilation Analysis Software (XV LVAS[®]) – the first modality to dynamically quantify ventilation throughout the lungs, and its Computed Tomography-enabled counterpart software, CT LVAS[™].

XV LVAS[®] and CT LVAS[™] reports are prepared using 4DMedical's Software as a Service delivery model using existing hospital imaging equipment or the Company's revolutionary XV Scanner.

In December 2023, 4DMedical acquired Imbio, a leader in artificial intelligence medical imaging solutions for chronic lung and cardiothoracic diseases. Imbio's regulatory-cleared solutions transform the way patients are discovered, diagnosed, and treated, enabling physician productivity and more personalised care for patients.
