

### CHAMPION IRON ANNOUNCES A GRADUAL RETURN OF ITS WORKFORCE FOLLOWING PREVENTIVE MEASURES IN RESPONSE TO NEARBY FOREST FIRES

**Montréal, July 15, 2024** (Sydney, July 16, 2024) - Champion Iron Limited (TSX: CIA) (ASX: CIA) (OTCQX: CIAFF) ("Champion" or the "Company") announces a gradual return of its workforce to its Bloom Lake mine ("Bloom Lake") following a preventive evacuation and temporary shut down of operations on July 12, 2024 (Montréal time), in response to nearby forest fires.

With the forest fires subsiding and following the evacuation pre-alert being lifted for the town of Fermont, located near the Company's Bloom Lake mine, Champion initiated a progressive return of its workforce. While the forest fires remain active north of Bloom Lake, recent events did not affect the Company's and third parties' infrastructure, which should enable a gradual ramp-up of production and rail shipments from Bloom Lake to Sept-Îles. The timing and resumption of full operational activities remain subject to the availability of railway services.

The Company continues to collaborate with local authorities and the railway operator to expedite a return to normal operations, while prioritizing the safety of its employees and the community. Champion salutes the work of its dedicated employees and partners, who ensured the effective deployment of emergency measures in response to recent events.

The Company expects to provide additional information as the situation evolves.

#### About Champion Iron Limited

Champion, through its wholly-owned subsidiary Quebec Iron Ore Inc., owns and operates the Bloom Lake Mining Complex, located on the south end of the Labrador Trough, approximately 13 km north of Fermont, Québec. Bloom Lake is an open-pit operation with two concentrators that primarily source energy from renewable hydroelectric power. The two concentrators have a combined nameplate capacity of 15 Mtpa and produce low contaminant high-grade 66.2% Fe iron ore concentrate with a proven ability to produce a 67.5% Fe direct reduction quality iron ore concentrate. Benefiting from one of the highest purity resources globally, the Company is investing to upgrade half of the Bloom Lake mine capacity to a direct reduction quality pellet feed iron ore with up to 69% Fe. Bloom Lake's high-grade and low contaminant iron ore products have attracted a premium to the Platts IODEX 62% Fe iron ore benchmark. The Company ships iron ore concentrate from Bloom Lake by rail, to a ship loading port in Sept-Îles, Québec, and has delivered its iron ore concentrate globally, including in China, Japan, the Middle East, Europe, South Korea, India and Canada. In addition to Bloom Lake, Champion owns a portfolio of exploration and development projects in the Labrador Trough, including the Kamistiatusset Project, located a few kilometres south-east of Bloom Lake, and the Cluster II portfolio of properties, located within 60 km south of Bloom Lake.
