1. CORPORATE INFORMATION

The preliminary financial report of LiveHire Limited (referred to as the Company or LiveHire) and its controlled entity (collectively the Group) for the financial year ended 30 June 2024 (the Financial Year) and covers LiveHire as an entity as required by the Corporations Act 2001. LiveHire is a for-profit entity.

The financial statements are presented in Australian dollars.

LiveHire is a company limited by shares incorporated in Australia whose shares are publicly traded on the Australian Securities Exchange (listed on ASX on 8 June 2016).

The address of the registered office and principal place of business is C/-CD Plus Corporate Services, Level 42 Rialto South Tower, 525 Collins Street, Melbourne VIC 3000. The principal activities of the Group during the year were the continued development and deployment of the LiveHire Talent Acquisition & Engagement Platform through both its software as a service ("SaaS") and direct sourcing channels. There have been no significant changes in the nature of these activities during the year.

2. **BASIS OF PREPARATION**

The Financial Report for the year ended 30 June 2024 is in the process of being audited by Ernst & Young and is likely to contain material uncertainty related to the Going Concern paragraph in the Independent Auditor's Report.

This report does not include all of the notes normally included in an Annual Financial Report. Accordingly, this report is to be read in conjunction with the financial report for the year ended 30 June 2023 and any public announcements made by LiveHire during the reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

Going Concern

For the financial year ended 30 June 2024, the Group incurred a net loss after tax of \$8,702,096 (2023: \$14,122,075). Cash flows from operating activities was an outflow of \$4,462,021 (2023: \$9,559,599) and cash flows from investing activities was an inflow of \$616,914 (2023: \$1,843,128 outflow). As at 30 June 2024 the Group has cash and cash eguivalents of \$3,083,606 (2023: \$4,760,956) and a net current liability position of \$1,605,365 (2023: net current asset position \$2,993,156).

The Directors believe the going concern basis of accounting is appropriate, having regard to the Group's cash flow forecasts. These forecasts include the Directors' expectation of growth in operating revenues and further reduction in the Group's cost base as well as expected changes in the business' capital structure involving new debt or equity funding becoming available to the Group.

To continue as a going concern the Group requires sufficient funds to meet its financial obligations. The generation of sufficient funds is dependent upon future revenue growth and a further reduction of the Group's cost base in line with the current business plan as well as additional capital. Additional equity funding may have a dilutionary effect on current LiveHire shareholders and any debt financing may involve restrictive covenants and high interest rates, impacting LiveHire's financing and operating activities.

The recent announcement, where the LiveHire board of directors has unanimously recommended an all cash takeover offer from Humanforce Holdings Pty Ltd (Humanforce), an Accel KKR portfolio company, is a critical aspect of the business' capital structure plans and ongoing viability. The current offer period is open to the end of September 2024 and the Directors currently expect that Humanforce will successfully execute on this recommended transaction.

If the Group is unable to generate sufficient funds from its operating activities and the current transaction is not able to complete by the end of the current offer period, and new sources of debt or equity are not able to be secured, there will be a material uncertainty that exists in relation to the Group's ability to continue as a going concern and, therefore whether it would be required to realise its assets and extinguish liabilities other than in the ordinary course of business, and at amounts that differ from those stated in the financial report.

This financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts nor to the amounts and classification of liabilities that might be necessary should the Group not continue as a going concern.

RECOGNITION AND MEASUREMENT

Revenue

Revenues are either recognised over time or at a point in time. The following specific recognition criteria must also be met before revenue is recognised. Payment terms for all fees with customers are generally 14 to 30 days.

3. REVENUE FROM CONTRACTS WITH CUSTOMERS AND OTHER INCOME(CONT)

Hosting and maintenance fees

Hosting and maintenance fees relate to recurring subscription fees for the right to access the LiveHire platform. Hosting and maintenance fee revenue is recognised on a straight-line basis from the date of which the LiveHire platform is implemented with the customer and the customer is granted access to the LiveHire platform over the period the SaaS arrangement is in place using an output method based on time elapsed as the customer simultaneously receives and consumes the benefit provided by LiveHire's services.

Implementation fees relate to work performed in setting up new clients on the LiveHire platform. Implementation fee revenue is recognised on a straight-line basis over the expected contract life of the respective SaaS arrangement using an output method based on time elapsed as the customer simultaneously receives and consumes the benefit provided by LiveHire's services. The performance obligation for implementation is not capable of being distinct from hosting and maintenance fees given they are not sold separately by the Company and they do not provide benefit to the customer without the hosting and maintenance fee.

Integration fees and Professional Services fees

Integration fee revenue relates to work performed for clients in integrating the LiveHire platform and other softwares.

Professional services revenue relate to assistance provided to clients when utilsiing the LiveHire platform. Integration fee and professional services fee revenue are recognised at a point in time when the services are provided, as this reflects when the customers have received benefit from the service.

Direct Sourcing Revenue

Direct sourcing revenue relates to use of the LiveHire platform for contingent hiring.

Direct sourcing revenue is recognised at a point in time when the services are provided, as this reflects when the customers have received benefit from the service. Direct sourcing revenue is measured based on customer usage each period of the LiveHire services.

Deferred Revenue

Deferred revenue is recognised if a payment is received from a customer before the Group transfers related services. Deferred revenue is recognised as revenue when the Group performs the services under the contract. Deferred revenue relates primarily to hosting, maintenance and implementation fees that are recognised over time.

The above table includes the amounts invoiced on existing contracts expected to be recognised in the future which relates to performance obligations that are unsatisfied at the reporting date.

Reseller Revenue

Reseller revenue is recognised over the life of the reseller arrangement and is when the Group sells software that is developed by another partner, meaning LiveHire is acting as an agent in this revenue arrangement.

This reseller revenue is calculated as gross fees less the partners percentage of these fees, as stated in contractual arrangements with this partner.

RECOGNITION AND MEASUREMENT (CONT)

Borrowing Costs

Borrowing costs are expensed in the period in which they occur as these are not directly attributable to the acquisition, construction or production of an asset. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. No borrowing costs have been capitalised in the year.

5. INCOME TAX EXPENSE

The company has unrecognised tax losses of \$58,549,220 (2023: \$53,361,516) that are available indefinitely, subject to meeting the requirements of the continuity of ownership test or same business test, for offsetting against future profits of the Company.

Accrued interest	6,876	17,650
Total trade and other receivables	1,756,563	2,207,797

RECOGNITION AND MEASUREMENT

Trade receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method. Trade receivables are non-interest bearing and are generally on terms of 14 to 30 days.

Accrued Research & Development (R&D) Tax Incentive

The R&D tax incentive relates to an Australian Government tax incentive which provides a refundable tax offset for eligible R&D activities. The R&D tax incentive is initially recognised at fair value and subsequently measured at amortised cost using the effective interest method. The R&D tax incentive is non-interest bearing.

Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO is included with other receivables or payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the ATO are presented as operating cash flows included in receipts from customers or payments to suppliers.

Net carrying amount at the end of the year	5,897,769	4,435,099

RECOGNITION AND MEASUREMENT

Software development

Software consists of capitalised development costs being an internally generated intangible asset.

Research costs are expensed in the year in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the Company is able to use or sell the asset; the Company has sufficient resource and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis from the time they are first available for use and over the period of their expected benefit, being their finite life of five years.

A summary of the useful lives of intangible assets is as follows:

Intangible asset	Useful life
Software	5 years

Impairment of intangible assets

If events or changes in circumstances indicate that the intangible assets may be impaired, the Company will carry out an impairment test on the asset to determine if a portion should be expensed to the statement of profit or loss and other comprehensive income.

9. INTANGIBLE ASSETS (CONT)

RECOGNITION AND MEASUREMENT

Key estimate: Useful lives of intangible assets

The company determines the estimated useful lives and related amortisation charges for its software development asset. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Key judgement: Costs to be capitalised

The company determines development costs to be capitalised by allocating the salaries of product and technology employees against activities which are assessed against criteria for capitalising costs. The criteria for development costs to be capitalised are detailed above under Software development.

ARRIVED ACQUISITION

On 6 July 2023, the Group completed the acquisition of the business assets of Arrived Workforce Connections Inc. ("Arrived") following shareholder approval. The non-cash consideration for the transaction included the following:

- 8,457,142 fully-paid ordinary shares issued on 11 July 2023 on completion of the acquisition.
- Contingent consideration based on the achievement of two milestones:
- 12,869,565 fully-paid ordinary shares based on the achievement of the Integration Condition of the agreement on 7 November 2023.
- The second milestone for contingent consideration is only payable upon the Group entering into an agreement for sale of the shift scheduling product within 12 months of completion date (by 7 July 2024). If satisfied, the Group must issue \$1,480,000 in fully-paid ordinary shares if the share price is above \$0.115, or a maximum of 12,869,565 shares using a floor price of \$0.115.
- As at 30 June 2024 and on "7 July 2024" subsequent to year end (12 months after completion date), this milestone was not met.

The Group has determined that this acquisition is to be accounted for as an asset acquisition. The asset has been fair valued by estimating a depreciated replacement cost. The software asset will be amortised over a 5 year useful life on a straight line basis. This is consistent with the Group's policy for all software intangible assets. The amortisation expense is included in the Amortisation of software development asset line in Note 4.

10. LEASES (CONT)

RECOGNITION AND MEASUREMENT

Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

Recognition Exemption

The Group applies the recognition exemption in paragraph B3–8. The effect of using this exemption is that the group applies the low value asset exemption to leases of assets below \$15,000.

Lease terminations

During the period, the Group exited office leases (in Perth, Sydney and Melbourne) as part of the cost reduction initiative, moving to shorter term, low cost leases (i.e. co-working spaces). The difference between the value of the right of use asset and liability of leases upon exit was recognised as a gain on termination in the profit and loss.

Key judgement: Incremental borrowing rate

The Group has applied judgement to determine the incremental borrowing rate which significantly affects the amount of lease liabilities and right-of-use asset recognised. The Group applies a rate it best believes to be the rate that the Group will have to pay to obtain funds for an asset of a similar value to the right-of-use asset in a similar economic environment.

RECOGNITION AND MEASUREMENT

Trade and Other Payables

Trade and other payables represent the liabilities for goods and services received by the Company that remain unpaid at the end of the reporting period. The balance is recognised as a current liability with the amounts normally paid within 30 days of recognition of the liability. Trade payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

Employee Benefits

Short-term employee benefits

Provision is made for the Company's obligation for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The company's obligations for short-term employee benefits such as wages and salaries are recognised as part of current trade and other payables in the statement of financial position. The Company's obligations for employees' annual leave and long service leave entitlements are recognised as provisions in the statement of financial position.

PROVISIONS (CONT) 12.

Other long-term employee benefits

Provision is made for employees' long service leave and annual leave entitlements not expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service. Other long-term employee benefits are measured at the present value of the expected future payments to be made to employees.

Expected future payments incorporate anticipated future wage and salary levels, durations of service and employee departures and are discounted at rates determined by reference to market yields at the end of the reporting period on high quality corporate bonds that have maturity dates that approximate the terms of the obligations. Any remeasurements for changes in assumptions of obligations for other long-term employee benefits are recognised in profit or loss in the periods in which the changes occur.

The company's obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the company does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

In December 2023, the Group secured debt funding with Lighter Capital. The funding agreement includes two

- Tranche 1 loan amount of AUD \$1,000,000, maturity 36 months, interest rate of 3 month BBSY +14.68% and floor of 19.1% pa. Repayments will be interest only for first 12 months and principal and interest for the remaining 24 months.
- Tranche 2 loan amount of USD \$1,300,000 (AUD \$1,908,621), maturity 24 months, interest rate of WSI Prime +10.5% and floor of 19% pa. Repayments will be principal and interest for the duration of 24 months.

There is one financial covenant associated with the loan:

The Group must always ensure that, on a consolidated basis, it has no less than AUD\$300,000 credit balance in its bank accounts.

As part of the arrangement, the Group issued Lighter Capital 728,828 warrants, each with an exercise price of AUD\$0.07, and a 5 year exercise period. The warrant has been treated as a transaction cost and capitalised against borrowings, to be amortised over the term of the loans.

In September 2023, the Group secured financing with Radium Capital for \$1,012,621 in respect of the FY23 R&D refund claim. The loan had a maturity date of 31 December 2023 and interest rate of 16% p.a. The loan was fully repaid in December 2023 upon receipt of the FY23 R&D claim.

Included in the Borrowings figures is a financing arrangement for 12 months maturing 30th March 2025 for the Company's annual insurance premiums, the interest rate associated with this financing arrangement is a flat interest rate of 5.75%.

These issued rights are subject to the individuals remaining employed with the Company at vesting date. The fair value at grant date of these awards has been determined based on the grant date share price.

These issued rights contain performance based metrics and will vest over a 3 year period to 22 December 2025. The fair value at grant date of these awards has been determined based on the grant date share price in conjunction with a probability weighting of the employees achieving the internal performance metrics.

The issued rights contain market based (share price) hurdles which will be measured and which will vest over the period to 30 June 2025. The fair value at grant date of these awards has been determined using a Monte Carlo simulation.

21. IMPAIRMENT

LiveHire continues to assess its position as prescribed by accounting standard AASB136 that its assets are carried at no more than their recoverable amount. LiveHire's recent strategic review which was announced in December 2022 has seen the company look at various capital initiatives, including potential M&A. Most recently, prior to 30 June 2024, this activity had seen multiple prospective entities embark on a rigorous due diligence process to assess the LiveHire business. On Wednesday the 14th of August 2024, Humanforce (an AKKR portfolio company) made an on market takeover bid, all cash, for LiveHire at \$0.045 per share. This offer means that the value of the company based on this offer price is ~\$16.5m, which is significantly more than the current carrying value of ~\$3.2m on 30 June 2024. Based on the successful completion of the on-market takeover bid by Humanforce (AKKR) the carrying value of the business will be recoverable.
