FORWARD LOOKING STATEMENTS

Statements and material contained in this presentation, particularly those regarding possible or assumed future performance, production levels or rates, commodity prices, resources or potential growth of the Company, industry growth or other trend projects are, or may be, forward looking statements. Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties and are based on the assumptions, estimates, analysis and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management of the Company believes to be relevant.

Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of commodities, the actual results of current exploration, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

DISCLAIMER

No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisors and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this presentation, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom. To the maximum extent permitted by the law, the Company disclaims any obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

COMPETENT PERSON STATEMENT

The information in this announcement that relates to exploration results and the Exploration Target for the Mulga Tank Project complies with the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code) and has been compiled and assessed under the supervision of Dr Caedmon Marriott, Managing Director of Western Mines Group Ltd. Caedmon is a member of the Australasian Institute of Mining and Metallurgy, the Australian Institute of Geoscientists and the Society of Economic Geologists. Caedmon has sufficient experience that is relevant to the styles of mineralisation and type of deposits under consideration, and to the activity being undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Caedmon consents to the inclusion in this presentation of the matters based on his information in the form and context in which it appears.

MONETARY VALUES

Unless otherwise stated, all dollar values are in Australian Dollars (A\$). The information in this presentation remains subject to change without notice.

A NICKEL EXPLORATION COMPANY

For personal use only

WESTERN MINES GROUP COMPANY OVERVIEW

• **Exceptional flagship project** – discovery of a major komatiite hosted nickel sulphide mineral system under cover in WA

• “Globally significant” – JORC Exploration Target 350Mt to 2,200Mt at 0.24-0.35% Ni

• Exploration team lead by **WA nickel expert** Dr Ben Grguric

• Nickel market at cyclical lows – significant discovery for the upswing

• **Tight capital structure** with ~\$20m market cap

• Recent investment from Dundee Corporation – international mining fund

• **Highly leveraged to ongoing exploration success**

KEY TAKEAWAYS FROM THE INDONESIA NICKEL CONFERENCE

For personal use only

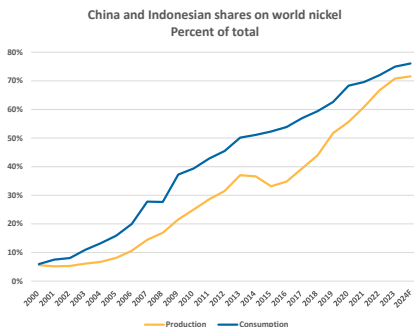

Indonesia growing to ~75% global production

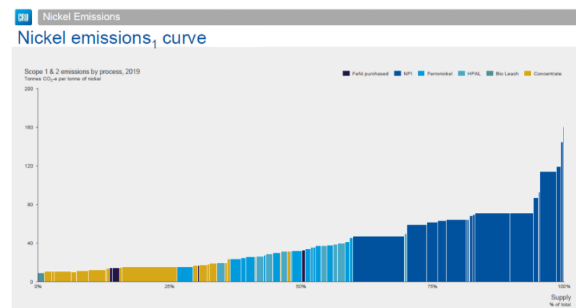

- But a lot of that RKEF-NPI is cash cost US\$15,000/t, setting a hard floor in pricing, and grades are falling further

Its ~90% owned and consumed by China – where will the western world get its nickel supply from?

- Australian sulphide producers are the lowest quartile in CO₂ intensity – nickel is ~36% of the CO₂ budget of an EV

WESTERN SULPHIDE DEPOSITS ABLE TO PRODUCE AT <\$15,000/T WILL BECOME INCREASINGLY VALUABLE AND STRATEGIC ASSETS

NICKEL: ITS TIME TO PICK A SIDE

For personal use only

BATTLE OF CLEAN GREEN NICKEL SULPHIDE VERSUS DIRTY NICKEL LATERITE

NICKEL LATERITE

Around four times more energy and CO2 intensive than sulphide, large surficial deposits in tropical regions such as Indonesia are extremely environmentally destructive

HIGH-GRADE MASSIVE NICKEL SULPHIDE

High value per tonne deposits, hard to find on a size and scale that will meet supply shortfall e.g. major Nova Bollinger discovery "only" ~325,000t of contained Ni

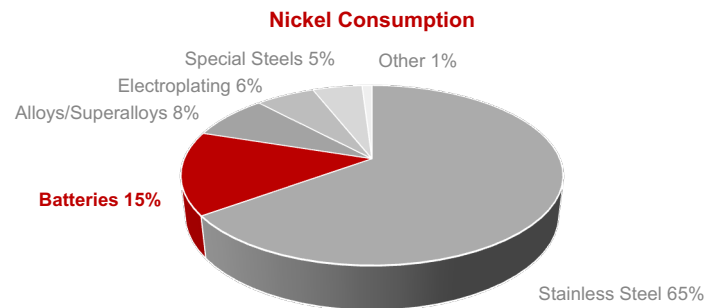

LARGE LOW-GRADE DISSEMINATED NICKEL SULPHIDE

Largest nickel mines in the world, nickel "equivalent" of copper porphyry, economies of scale, deposits >1Mt of contained Ni able to supply +30kt/yr Ni for multiple decades, readily produce high-grade Ni concentrate

LARGE LOW-GRADE NICKEL SULPHIDE WILL BECOME AN ESSENTIAL NEW SUPPLY

Deposit	Nickel (M&I Resource)	Ni Grade	Producing	Company
Norilsk-Talnakh (Russia)	11.3Mt	0.75%	Yes	Nornickel
Dumont (Canada)	4.4Mt	0.27%	No	Magneto Investments
Jinchuan (China)	4.4Mt	1.39%	Yes	Jinchuan Group
Sotkamo (Finland)	3.9Mt	0.23%	Yes	Terrafame
Crawford (Canada)	3.5Mt	0.23%	No	Canada Nickel
Turnagain (Canada)	3.2Mt	0.21%	No	GigaMetals
Mt Keith/Yakabindie (Australia)	2.6Mt	0.58%	Yes	BHP
Decar (Canada)	2.4Mt	0.21%	No	FPX Nickel

LARGE LOW-GRADE NICKEL CAN BE POSSIBLE IN WA

DISPELLING THE MYTHS

- **Economies of scale are king** – understood in gold or copper porphyries but seemingly not in nickel

- “...what about Nickel West?” - very limited operational data disclosed but:
- In 2007 Mt Keith (223Mt at 0.53% Ni) it was operating with >5:1 strip ratio
- Only 11.5Mtpa concentrator processing capacity

FRONTIER EXPLORATION IN A WORLD CLASS NICKEL PROVINCE

YILGARN CRATON WESTERN AUSTRALIA

- One of the world's major nickel provinces
- World-class examples of komatiite-hosted nickel deposits – Kambalda (35Mt @ 3.1% Ni), Perseverance (50Mt @ 2.3% Ni) and Mt Keith (643.7Mt @ 0.58% Ni)

MULGA TANK Ni-Cu-PGE PROJECT

- Frontier exploration play for major komatiite-hosted Ni-Cu-PGE deposits under cover
- Strategically assembled 425km² position on the under-explored Minigwal Greenstone Belt
- Mulga Tank Ultramafic Complex (WGM 100%) is a "camp scale" project

EXPLORATION MODELS ARE PERSEVERANCE AND MT KEITH

Model	PERSEVERANCE	MT KEITH

MAJOR KOMATIITE NICKEL SYSTEM UNDER COVER

- Large adcumulate dunite body (~15km²) with interpreted komatiite channel flows extending NW over >12km
- Drilling beneath sand cover - 60 out of 69 holes show nickel sulphide mineralisation
- ALL THREE MINERALISATION STYLES PRESENT – Mt Keith, Perseverance and Kambalda

ALL CRITICAL ELEMENTS OF A LARGE-SCALE WORKING SYSTEM

Critical Process	Description	Evidence
Source	Komatiite magma	✓
Pathway	Transport of komatiite magma through the crust	✓
Sulphur saturation	Addition of sulphur and sulphur saturation of undersaturated magma	✓
Chemical and physical trap	Sequestering metals into sulphides	✓
Physical concentration	Concentration of metal-rich sulphides into deposits	?

FERTILE KOMATIITE CHANNELS EXTEND 15KM

- Komatiite sequence with A-B zones logged in the *Panhandle*
- Evidence of prospective high-grade mineralisation:
 - MTD006: 0.25m at 3.8% Ni, 0.7% Cu and 0.7g/t PGE from 221.6m
 - MTD016: 0.3m at 1.57% Ni, 0.13% Cu and 0.12g/t Pt+Pd from 281.9m
- 15km strike of interpreted channels completely unexplored – waiting grant E39/2299
- Completed belt-wide MobileMT survey – further geophysics planned

RECENT \$98,000 EIS AWARD TO DRILL FIRST RC HOLES

- Four EIS holes looking to test interpreted komatiite channel geology
- First drilling to test satellite bodies emanating from the main Mulga Tank Complex

EXCITING DISCOVERY OPPORTUNITY

EXPLORATION PHILOSOPHY

- We believe multiple significant nickel deposits will be found at Mulga Tank
- We strive to do high-quality technical exploration work
- We are frugal with overheads to maximise exploration spend and minimise equity dilution
- We want to change shareholders lives through share price increase not be a lifestyle
- We offer a compelling risk vs reward and leverage to exploration success
