

16th September, 2024

TARGETING CASH FLOW BREAK-EVEN 2024.

NEW RESPIRI/CERAS PARTNERSHIP TO INITIALLY DELIVER A\$1M+ CONTRACT WITH COVENANT HEALTH INC.

Highlights

- *Respiri enters partnership with Ceras to deliver remote patient services for Covenant Health Inc.*
- *Initial contract is for 750+ patients at an average PPPM (per patient per month) of \$80 amounting to US\$720,000 (~A\$1.1M) and access to a target patient audience pool of 20,000*
- *Revenues will be recognized by Respiri with a (pppm) SaaS fee of US\$8, payable to Ceras.*
- *The contract is immediate and revenue will contribute to monthly profitability target by the end of 2024.*

Respiri Limited (ASX:RSH; OTCQB:RSHUF) ("Respiri"), an eHealth Company supporting respiratory healthcare management and remote patient monitoring (RPM) in the USA, is pleased to announce that it has partnered with Ceras, a healthcare technology and AI organisation, to deliver remote patient services for Covenant Health Inc, a Massachusetts based healthcare system, combining the Respiri world class onboarding and clinical team and the Ceras clinical monitoring IT platform and Artificial Intelligence (AI) capabilities. All revenues will be recognized by Respiri with a per patient per month (pppm) SaaS fee of US\$8, payable to Ceras.

The initial phase of the contract will see 750+ patients commenced on the program which will generate approximately **US \$720,000 (~A\$1.1M)** in annualised revenues at a ppm of about **US\$80**. These services will commence in early October and are expected to grow significantly from the **2,200** average annual hospital discharges and **18,515** Medicare-insured patients, that the Covenant healthcare system manages. Given that Respiri has capacity to on-board some three hundred new patients a week and that this proven model is easily scaled, **the Covenant contract is an immediate and significant revenue contribution to the Company's pursuit of monthly profitability by the end of 2024.** The initial contract term with Covenant is three years with automatic annual renewal and contract termination only on a material breach of contract by either parties.

The program will broaden the scope of services offered by Covenant Health. Expanded services offered by Respiri will help optimize enrolment for Covenant patients and will help reduce healthcare costs. Specifically:

- The integration with Covenant's EPIC EMR (Electronic Medical Records) system will enable more streamlined patient onboarding with less disruption to the provider's workflow and is completed. The integration will also expedite processing of claims and payment for the services rendered by Respiri/Ceras. This will streamline workflow, reduce work burdens, and significantly improve expected payment reconciliation timelines.

Respiri/Ceras's unique model will identify high risk patients that are most likely to respond to the reimbursed programs, resulting in reduced medical events, improved patient health outcomes and reduced healthcare delivery costs. Respiri/Ceras and Covenant Health have developed protocols that will help effectively measure the impact of the program utilizing ongoing Covenant physician outcome data.

Respiri CEO, Marjan Mikel said *"To be selected by Covenant as partner in helping pioneer new standards of patient care that span the transition from hospital to successful home care is an exciting opportunity. Their vision of extending care beyond the "hospital" is very much aligned with our own Care Beyond the Clinic edict and will lead to significant improvements in patient care delivery and overall patient well-being."*

Further Mr Mikel said. *"Partnering with Ceras also allows us to continue to explore and develop our AI and platform capabilities in healthcare delivery which is a future necessity with new and existing clients and a sweet spot for Ceras."*

Like us, Ceras also has a very healthy client sales pipeline where our collaborative services will be seen as very attractive patient-centric solutions. We are confident of announcing more contracts from our collaboration with Ceras in the very near future."

Respiri continues to make significant progress across the US mainland and is in advanced discussions with a number of other potential clients which it hopes to finalize in the coming months. Further, the Respiri/Ceras's collaboration will continue to drive significant improvements in patient access, onboarding, and management which the Company is confident will generate more contracted business and improvements in ppm and Respiri looks forward to keeping investors abreast of its progress.

Stephen Grubbs, President & CEO of Covenant Health, said *"We, at Covenant Health, strive to remain at the forefront of innovation when it comes to patient care and we see the remote patient care solutions that Respiri/Ceras provide as a significant contribution to our high standard of care and a source of further differentiation. We manage close to 20,000 Medicare patients and more than 2,000 patient discharges from our hospitals every year. We see these services as an enhancement to care that is offered to our patients."*
