ASX ANNOUNCEMENT

ASX:WSR

Mindoolah Gold Mining Centre Field Program Completed

HIGHLIGHTS

- ☆ ***Open pit and surface mapping carried out over the entire centre***
- ☆ ***Focus on quartz veins as potential hosts for gold mineralisation***
- ☆ ***Samples collected and being finalised: assay processing time 4-5 weeks***
- ☆ ***Drill program approval process underway***
- ☆ ***Non-core projects Winjangoo and Parker Dome divested***

Westar Resources Limited (ASX: **WSR**) (**Westar** or the **Company**) is pleased to announce that the field mapping and sampling program covering the Mindoolah Mining Centre, part of the Mindoolah Gold Project (**Mindoolah** or the **Project**) located 70km from Cue WA, has been completed.

The majority of open pits were mapped successfully, with the field team focusing on identifying structural controls on quartz veins which are potential hosts for gold mineralisation. Surface mapping was also completed, focusing on quartz veins and signs of historical exploration activities.

Samples taken from quartz veins are being finalised with assay results expected in 4-5 weeks. In parallel, the drill program approval process has commenced.

Westar Executive Director and CEO Jason Boladeras commented:

“The field team has done a fantastic job mapping the open pits and surface area covering the historic Mindoolah Gold Mining Centre. We look forward to receiving the assay results in approximately late October. Along with the results, mapping and sampling information gathered will be instrumental in helping design the drill program.”

Open Pit mapping at the Mindoolah Mining Centre, Mindoolah Gold Project.

Non-core projects divested

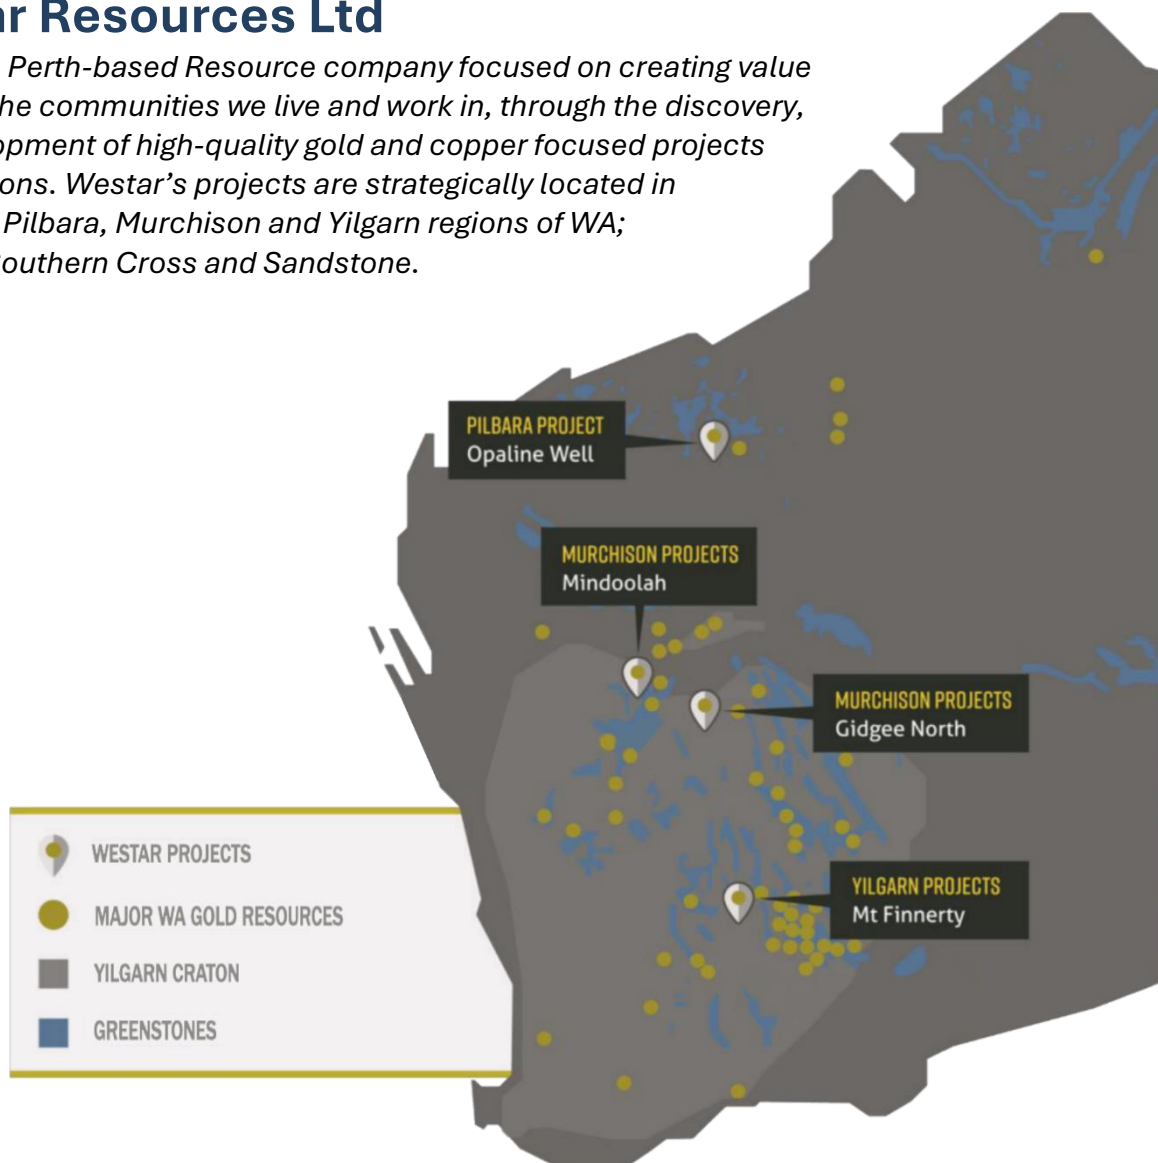

As part of Westar's strategy to reduce costs and focus on its core gold and copper assets with the best possibility of exploration success, two non-core projects have been divested: Winjangoo and Parker Dome. A final geological review determined that limited exploration upside remained and that the costs to maintain and explore these tenements would be better redirected to drilling priority targets at Mindoolah and Gidgee North.

Westar continues to search for advanced gold or copper focused projects located in supportive jurisdictions.

About Westar Resources Ltd

Westar Resources is a Perth-based Resource company focused on creating value for shareholders and the communities we live and work in, through the discovery, acquisition and development of high-quality gold and copper focused projects in supportive jurisdictions. Westar's projects are strategically located in the highly prospective Pilbara, Murchison and Yilgarn regions of WA; near Nullagine, Cue, Southern Cross and Sandstone.

For personal use only

For the purpose of Listing Rule 15.5, this announcement has been authorised by the board of Westar Resources Ltd.
