The successful Placement validates Anson's strategy to accelerate the development of the Green River Lithium Project, which has significant infrastructure advantages and is in an advanced stage of permitting.

Anson's Executive Chairman, Mr. Bruce Richardson stated:

"We are delighted by the support for the Placement in the current lithium market environment, demonstrating investor appetite for progressing the Green River development strategy. We welcome new shareholders who have realised the potential of "US Made" lithium and appreciate how advanced our Green River Project really is in this context. The funds raised will allow for Anson to continue to optimise the Green River Project, produce bulk samples for qualification by offtakers and expand our lithium Resource."
