Key Information	Further Information
<p><b>Risk factors</b></p> <p>Potential investors should be aware that subscribing for Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in Section 4, including (but not limited to) risks in respect of:</p> <p>(c) <b>Resource Risk:</b> There is inherent uncertainty with mineral resource and ore reserve estimates. Regardless of JORC Code or other status, there is a risk that actual mining performance will not deliver performance in line with mineral resource and ore reserve estimates.</p> <p>(d) <b>Exploration &amp; Development Risks:</b> Mineral exploration and development are high-risk undertakings. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. The future exploration and development activities of the Company may be affected by a range of factors, including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.</p> <p>(e) <b>Future capital and funding requirements:</b> The Company has no operating revenue and is unlikely to generate any operating revenue unless and until its projects are successfully developed and production commences. Any inability to obtain additional financing, if required, would have a material adverse effect on the Company's business, financial condition and results of operations.</p> <p>(f) <b>Environmental Risk:</b> Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or noncompliance with environmental laws or regulations.</p> <p>(g) <b>General market risks:</b> Share market conditions may affect the value of the Company's Securities regardless of the Company's operating performance. The Company is exposed to general market and economic condition risks including adverse changes in levels of economic activity, exchange rates, interest rates, commodity prices, government policies, inflation, events affecting global financial liquidity, employment rates and industrial disruption.</p>	Section 4
<p><b>Use of funds</b></p> <p>No funds will be raised as a result of the Offer.</p>	Section 3.2

## 1. Details of the Offer

### 1.1 Background

On 29 July 2024, the Company announced a placement to raise approximately \$2.3 million (before costs) through the issue of 88,461,538 Shares (**Placement**) at an issue price of \$0.026. The Placement included a one (1) for one (1) free-attaching Unquoted Option exercisable at \$0.032, expiring two (2) years from the date of issue (**Placement Options**). The Placement was conducted in two tranches. The first tranche of 39,622,098 Shares under the Placement was issued on 6 August 2024. The second tranche of 48,839,456 Shares (**Tranche 2 Placement Shares**) was issued on 25 September 2024 (due to rounding, the Company issued an additional 16 Tranche 2 Placement Shares).

In connection with the Placement, the Company:

- (a) announced an offer to Eligible Shareholders under a share purchase plan to raise up to \$500,000 (before costs), with the ability to accept oversubscriptions in accordance with the Listing Rules by the issue of Shares at \$0.026 each (**SPP Shares**), with one (1) free-attaching SPP Option for every one (1) SPP Share subscribed for and issued under the share purchase plan (**SPP**); and
- (b) agreed to issue 9,000,000 Joint Lead Manager Options as partial consideration for joint lead manager and bookrunner services provided by the Joint Lead Managers (**Joint Lead Manager Options**).

On 4 September 2024, the Company announced that the SPP was oversubscribed with the Company receiving valid applications for 23,153,822 SPP Shares pursuant to the SPP, raising a total of \$602,000 (before costs). On 6 September 2024, the Company completed the SPP and issued 23,153,822 SPP Shares to SPP Subscribers.

Shareholder approval for the issue of the Placement Options, Tranche 2 Placement Shares, SPP Options and Joint Lead Manager Options was obtained at the Company's general meeting convened on 19 September 2024 (**Meeting**). Due to rounding, an additional 16 Tranche 2 Placement Shares were issued under the Company's existing placement capacity under Listing Rule 7.1.

### 1.2 SPP Options Offer

The SPP Options Offer is an offer of up to 23,153,822 SPP Options on the basis of one (1) free attaching SPP Option for every one (1) SPP Share subscribed for and issued under the SPP.

No funds will be raised from the issue of the SPP Options.

Shareholder approval for the issue of the SPP Options offered under the SPP Options Offer was obtained at the Meeting.

The SPP Options offered under the SPP Options Offer will be exercisable at \$0.032 each on or before 5:00pm (AWST) on the date which is two (2) years from the date of issue and otherwise on the terms set out in Section 5.1. All of the Shares issued upon exercise of the SPP Options will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5.3 for further information regarding the rights and liabilities attaching to the Shares.

### 1.3 Bonus Options Offer

The Bonus Options Offer is an offer to Eligible Optionholders of one (1) Bonus Option for every one (1) SPP Option exercised on or before the Early Exercise Date.

The Bonus Options are contingent on exercise of the SPP Options. No funds will be raised from the issue of the Bonus Options, other than in respect of funds received on exercise of the SPP Options.

As the Bonus Options are contingent on exercise of the SPP Options, the Company will rely upon Listing Rule 7.2 Exception 9 to issue the Bonus Options without Shareholder approval as the issue of the SPP Options have been approved by Shareholders at the Meeting and will be issued in compliance with the Listing Rules.

The Bonus Options offered under the Bonus Options Offer will be exercisable at \$0.06 each on or before 5:00pm (AWST) on the date which is three (3) years from the date of issue of the SPP Options and otherwise on the terms set out in Section 5.2. All of the Shares issued upon exercise of the Bonus Options will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5.3 for further information regarding the rights and liabilities attaching to the Shares.

### 1.4 Purpose of the Offer

The primary purpose of making the Offer available under this Prospectus is to provide disclosure to investors on the terms of the New Options and to remove the need for an additional disclosure document to be issued upon the sale of any Shares that are issued upon conversion of any New Options that are issued under the Offer.

The Offer is being made such that the relief provided under *ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/80* with respect to the on-sale provisions of section 707 of the Corporations Act is available.

Specifically, if the New Options are issued with disclosure under this Prospectus, then the Shares issued upon the exercise of any of the New Options can be on-sold within 12 months of their issue, without a disclosure document for the on-sale offer.

### 1.5 Eligibility of the Offer

### 3.2 Use of funds

No funds will be raised as a result of the Offer.

The Company will receive \$0.032 and \$0.06 for each SPP Option and Bonus Option exercised, respectively. If all SPP Options are issued and exercised, the Company will receive approximately \$740,922 (before costs). If all SPP Options are issued prior to the Early Exercise Date, such that 23,153,822 Bonus Options are issued, and all these Bonus Options are exercised, the Company will raise approximately \$1,389,229 (before costs) in additional funds.

There is no certainty that any of the SPP Options or Bonus Options (if any) will be exercised.

It is currently intended that any funds raised by the exercise of the New Options will be applied towards:

- (a) exploration activities on the Company's tenements; and
- (b) general working capital.

The application of funds will depend on when New Options are exercised and the status of the Company's projects and requirements at the relevant time.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

### 3.3 Substantial Shareholders

Based on available information as at the date of this Prospectus, those persons which together with their associates have a voting power in 5% or more of the Shares on issue are set out below:

Substantial Shareholder	Number of Shares	Voting Power <sup>1</sup>
Regal Funds Management Pty Ltd and its associates (together, <b>Regal</b> )	37,241,724 <sup>2</sup>	13.79%

**Notes:**

1. Based on 270,116,094 Shares on issue as at the date of this Prospectus.
2. Comprising 11,600,698 Shares set out in Regal's Form 604 dated 10 September 2024 and 25,641,026 Tranche 2 Placement Shares subscribed for and issued to Regal on 25 September 2024.

The Offer will not have an effect on the quantity of Shares held by existing Shareholders as only Options are being offered under this Prospectus.

### 3.4 Diluting effect of the Offer

On the assumptions that:

- (a) all of the New Options offered under this Prospectus are issued and exercised into Shares; and
- (b) no other Securities are issued or exercised (including the Options and Performance Rights currently on issue),

the diluting effect on the percentage interest of existing Shareholders would be 14.63%.

### 3.5 Effect of the Offer on control of the Company

The Company is of the view that the Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company. No new investor or existing Shareholder will have a voting power greater than 20% as a result of the completion of the Offer.

While the final percentage interests held by Shareholders is entirely dependent on the extent to which they are SPP Subscribers and to the extent to which they and other SPP Subscribers exercise their SPP Options and Bonus Options (if any), the Company expects that the potential effect of the issue of SPP Options and Bonus Options under the Offer on the control of the Company will be minimal and not material.

### 3.6 Financial effect of the Offer

The Offer (assuming all New Options are issued) will not have a material effect on the Company's financial position.

### 3.7 Expenses of the Offer

The expenses of the Offer will be met from the funds raised under the SPP.

Please refer to Section 5.11 for further details on the estimated expenses of the Offer.

## 4. Risk Factors

As with any investment in Securities, there are risks involved. This Section identifies the major areas of risk associated with an investment in the Company but should not be taken as an exhaustive list of the potential risk factors to which the Company and its security holders are exposed. Potential investors should read the entire Prospectus and consult their professional advisers before deciding whether to apply for New Options.

The Directors consider that the following summary represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

### 4.1 Risks specific to the Company

#### (a) Exploration & development risk

Potential investors should understand that mineral exploration and development are high-risk undertakings. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration and development activities of the Company may be affected by a range of factors, including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

In addition, the construction of any proposed development may exceed the expected timeframe or cost for a variety of reasons out of the Company's control. Any delays to project development could adversely affect the Company's operations and financial results and may require the Company to raise further funds to complete the project development and commence operations.

#### (b) Future capital and funding requirements

The Company has no operating revenue and is unlikely to generate any operating revenue unless and until its projects are successfully developed and production commences. The future capital requirements of the Company will depend on many factors including its business development activities. Should the Company require additional funding, there can be no assurance that additional financing will be available on acceptable terms or at all. Any inability to obtain additional financing, if required, would have a material adverse effect on the Company's business, financial condition and results of operations.

In order to successfully develop its projects and for production to commence, the Company will require further financing in the future, in addition to amounts raised pursuant to the SPP or on exercise of any New Options. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price or may involve restrictive covenants which limit the Company's

operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its activities and this could have a material adverse effect on the Company's activities, including resulting in the Tenements being subject to forfeiture, and could affect the Company's ability to continue as a going concern.

The Company may undertake additional offerings of Shares and of securities convertible into Shares in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(c) **Mineral rights sharing on gold rights Tenements**

The Company is party to mineral rights sharing agreements. Despite all efforts to mitigate foreseeable issues, there is an inherent risk with mineral rights sharing agreements that the parties' activities overlap, or interfere, with each other and that this cannot be resolved within the parameters of the agreement. Accordingly, there is an increased risk of dispute that may cause delays, or costs, to the Company in trying to progress its activities.

Given the nature of mineral rights sharing agreements, there is a greater degree of co-ordination required in respect of activities on the Tenements, including some longer negotiation periods and a process for the parties to evaluate a proposed mining area for a period of 6 months in order to ascertain whether there may be any competing resources. As a consequence of this, there is a risk that this may cause the Company's ability to undertake activities, or to progress from exploration to mining, to be delayed.

(d) **New projects and potential acquisitions**

The Company will actively pursue and assess other new business opportunities in the resources sector. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, and/or direct equity participation.

The acquisition of projects (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the Directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

## 4.2 Risks relating to the mining industry generally

(a) **Resource risk**

There is inherent uncertainty with mineral resource and ore reserve estimates. Regardless of JORC Code or other status, there is a risk that actual mining performance will not deliver performance in line with mineral resource and ore reserve estimates.

(b) **Operating risk**

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining; difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs; adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its Tenement interests. Unless and until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(c) **Environmental risks**

The operations and proposed activities of the Company are subject to Australian laws and regulations in respect to the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or noncompliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.

(d) **Title and grant**

Interests in all tenements in Western Australia are governed by state legislation and are evidenced by the granting of licenses or leases. Each license or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could be exposed to additional costs, have its ability to explore or mine the Tenements reduced or lose title to or its interest in the Tenements if license conditions are not met or if insufficient funds are available to meet expenditure commitments.

If in the future, the term of any of the Tenements are not renewed or extended, the Company may suffer damage through loss of the opportunity to discover and/or develop any mineral resources on these Tenements.

(e) **Land-owner and access risk**

The Company will be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users/owners and others who may have an interest in the area covered by a mining tenement. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations. If the Company is unable to resolve such compensation claims on economic terms, this could have a material adverse effect on the business, results or operations and financial condition of the Company and any delays or costs in respect of conflicting third-party rights, obtaining necessary consents, or compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas. Access to land for exploration purposes can be affected by land ownership, nature reserves and national parks, government regulation and environmental restrictions.

Access is critical for exploration and development to succeed and the ability to be able to negotiate satisfactory commercial arrangements with landowners, farmers and occupiers is often essential.

Several of the Tenements overlap various file notation areas, pastoral leases and 'C' Class Reserves.

Many of the Tenements overlap miscellaneous licences held by third parties, some of which are the subject of access agreement in respect to the co-ordination of activities on these tenements. These miscellaneous licences co-exist with the Tenements.

(f) **Native title claims and Aboriginal heritage**

In the future if the existence of native title claims occur over the area covered by the Tenements, or a subsequent determination of native title over the area occurs, this will not impact the rights or interests of the holder provided the Tenements have been or will be validly granted in accordance with the *Native Title Act 1993* (Cth) (**NT Act**).

If any of the Tenements were not validly granted in compliance with the NT Act, this may have an adverse impact on the Company's activities. The Company is not aware of any circumstances to indicate that any of the Tenements were not or will not be validly granted in accordance with the NT Act.

The grant of any future tenure to the Company over areas that are covered by registered claims or determinations will likely require engagement with the relevant claimants or native title holders (as relevant) in accordance with the NT Act. The Directors will closely monitor the potential effect of native title claims involving the Tenements in which the Company has or may have an interest.

There remains a risk that additional Aboriginal sites may exist on the land the subject of the Tenements. The existence of such sites may preclude or limit mining activities in certain areas of the Tenements.

(g) **Third party tenure risks**

Under Western Australian and Commonwealth legislation, the Company may be required, in respect of exploration or mining activities on the Tenements, to recognise the rights of, obtain the consent of, and/or pay compensation to the holders of third-

party interests which overlay areas within the Tenements, including other mining tenure, pastoral leases or petroleum tenure.

The Company will continue to be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users and others who may have an interest in the area covered by a Tenement. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations. If the Company is unable to resolve such compensation claims on economic terms, this could have a material adverse effect on the business, results or operations and financial condition of the Company.

Any delays or costs in respect of conflicting third-party rights (for example, in relation to the assignment of any access agreements or the relocation of existing infrastructure on any existing miscellaneous licences that overlap with a Tenement), obtaining necessary consents, or compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas.

(h) **Competition risk**

The industry in which the Company is involved is subject to domestic and global competition, including major mineral exploration and production companies. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

The Company's current and future potential competitors may include entities with greater financial and other resources than the Company which, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these entities.

(i) **Third party contractor risks**

The Company is unable to predict the risk of insolvency or managerial failure by any of the third party contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's activities.

(j) **Joint venture parties, agents and contractors**

The Company is unable to predict the risk of financial failure or default by a participant in any future joint venture to which the Company may become a party. Further, the Company is unable to predict the risk of insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's operations.

(k) **Reliance on key personnel**

The Company is reliant on a number of key personnel and consultants, including members of the Board. The loss of one or more of these key contributors could have an adverse impact on the business of the Company.

(l) **Staffing**

It may be difficult for the Company to attract and retain suitably qualified and experienced people given the current high demand in the industry and relatively small size of the Company, compared with other industry participants.

(m) **Climate change**

There are a number of climate-related factors that may affect the Company's business. Climate change or prolonged periods of adverse weather and climatic conditions (including floods, hail, drought, water, scarcity, temperature extremes, frosts, earthquakes and pestilences) may have an adverse effect on the Company's ability to access its projects and therefore the Company's ability to carry out services.

Changes in policy, technological innovation and consumer or investor preferences could adversely impact the Company's business strategy, particularly in the event of a transition (which may occur in unpredictable ways) to a lower-carbon economy.

(n) **Occupational health and safety**

Site safety and occupational health and safety outcomes are a critical element in the reputation of the Company and its ability to retain and be awarded new contracts in the resources industry. While the Company has a strong commitment to achieving a safe performance on site, a serious site safety incident could impact upon the reputation and financial outcomes for the Company.

Additionally, laws and regulations as well as the requirements of customers may become more complex and stringent or the subject of increasingly strict interpretation and/or enforcement. Failure to comply with applicable regulations or requirements may result in significant liabilities, to suspended operations and increased costs.

Industrial accidents may occur in relation to the performance of the Company's services. Such accidents, particularly where a fatality or serious injury occurs, or a series of such accidents occurs, may have operational and financial implications for the Company which may negatively impact on the financial performance and growth prospects for the Company.

(o) **Insurance**

The Company intends to continue to insure its operations in accordance with industry practice. In certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(p) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include appropriate provisions for material risks and uncertainties and are considered to be fit for purpose for the proposed activities of the Company. If risks and uncertainties prove to be greater than expected, or if new currently unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

### 4.3 General risks

#### (a) General economic climate

Factors such as inflation, currency fluctuations, interest rates, legislative changes, political decisions and industrial disruption have an impact on operating costs. The Company's future income, asset values and share price can be affected by these factors and, in particular, by exchange rate movements.

General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.

Specifically, it should be noted that the current evolving conflicts between Ukraine and Russia and Israel and Palestine (**Ukraine and Gaza Conflicts**) are impacting global macroeconomics and markets generally. The nature and extent of the effect of the Ukraine and Gaza Conflicts on the performance of the Company and the value of its Shares remains unknown. The Share price may be adversely affected in the short to medium term by the economic uncertainty caused by the Ukraine and Gaza Conflicts and overall impacts on global macroeconomics. Given the situation is continually evolving, the outcomes and consequences are inevitably uncertain.

#### (b) General market risks

Share market conditions may affect the value of the Company's Securities regardless of the Company's operating performance. The Company is exposed to general market and economic condition risks including adverse changes in levels of economic activity, exchange rates, interest rates, commodity prices, government policies, inflation, events affecting global financial liquidity, employment rates and industrial disruption.

#### (c) Commodity prices

The Company's ability to proceed with the development of its mineral projects and benefit from any future mining operations will depend on market factors, some of which may be beyond its control. It is anticipated that any revenues derived from mining will primarily be derived from the sale of gold. Consequently, any future earnings are likely to be closely related to the price of gold and the terms of any off-take agreements that the Company enters into.

Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and demand for the specific commodity, prevailing commodity trading terms, general world economic conditions and the outlook for interest rates, inflation, and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities, together with the ability to fund those plans and activities. Furthermore, some products are not traded upon terminal, liquid, commodity exchanges. There is a risk therefore that the Company may not be able to secure an attractive price for its commodity products.

#### (d) Government and legal risk

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company the future performance of the Company or any return on an investment in the Company.

(e) **Litigation risks**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. As at the date of this Prospectus, there are no material legal proceedings affecting the Company.

(f) **Force majeure**

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. Significant catastrophic events – such as war, acts of terrorism, pandemics, loss of power, cyber security breaches or global threats – or natural disasters – such as earthquakes, fire or floods or the outbreak of epidemic disease – could disrupt the Company's operations and interrupt critical functions, or otherwise harm the business. To the extent that such disruptions or uncertainties result in delays or cancellations of the deployment of the Company's products and solutions, its business, results of operations and financial condition could be harmed.

(g) **Taxes and royalties**

There is a risk that the Commonwealth or Western Australian Governments may seek to introduce further, or increase existing, taxes and royalties.

(h) **Taxation**

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for Securities under this Prospectus.

(i) **Unforeseen risk**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

#### 4.4 Risks specific to the New Options

Options are, by their nature, only of value at times when the exercise price is lower than the price of the underlying shares. There is no guarantee that the New Options offered under the Offer, at any particular time, have an exercise price which is lower than the price of Shares.

As at the date of this Prospectus, the New Options are 'out of the money' and there can be no guarantee that the New Options will ever be 'in the money' at any time before the exercise period for the New Options ends.

#### 4.5 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Options offered under this Prospectus.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for New Options pursuant to this Prospectus.

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution and the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

(a) **General meetings**

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company. Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution.

- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder will, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares will have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the

Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which will be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

No dividend will carry interest as against the Company.

Subject to the Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit, under which participants may elect in respect of all or part of their Shares to receive a dividend or to forego a dividend from the Company and receive Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(e) **Shareholder liability**

As the Company will only have fully paid shares on issue, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(g) **Variation of rights**

Pursuant to section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

(h) **Alteration of Constitution**
