SECURITIES EXCHANGE LISTING

The Company is listed on the Australian Securities Exchange Ltd (ASX) and the Frankfurt Stock Exchange (FSE).

ASX Code: KM1

FSE Code: 6OB

For personal use only

CHAIRMAN'S LETTER

Dear Shareholders,

Welcome to Kali Metals Limited's (ASX: KM1) first Annual Report. This is clearly a milestone for the Company as it marks our first year as a listed entity on the Australian Securities Exchange (ASX) since our successful listing in January 2024.

Kali has been established from the strategic spin out of a portfolio of Australian lithium assets, initially held by ASX-listed Kalamazoo Resources Limited (ASX: KZR), and with the lithium mineral rights of TSX-listed Karora Resources Inc's (TSX: KRR) across a range of projects south of Kalgoorlie in Western Australia, the Northern Territory, New South Wales and Victoria.

Following completion of our Initial Public Offering (IPO) which successfully raised the maximum \$15 million, the Company is pleased to announce that Kali Metals has established a strong platform to execute our strategy to explore and develop one of the largest and most prospective exploration portfolios across Australia's hard-rock lithium fields.

Upon listing, Kali Metals held an enviable 3,854km² portfolio of lithium projects across Western Australia, New South Wales and Victoria. Our Western Australia tenure is strategically located adjacent to some of the world's largest hard rock mines and deposits, including those held by one of our major shareholders, Mineral Resources Limited (ASX: MIN).

The primary objective of the IPO was to raise funds to explore and develop our highly prospective lithium exploration tenure, with a strong focus on the Higginsville Lithium District in the Eastern Yilgarn region, WA. Despite challenging market conditions for lithium, Kali Metals has progressed its exploration program as promised and is emerging into a leading critical minerals exploration company.

In our initial months as a listed company, improving our understanding of the geology at Higginsville has been our key focus. Our early-stage activities at Higginsville culminated in a maiden drilling campaign at our Spargoville Project, one of eight projects areas identified within the Companies Higginsville district.

The early drilling results have provided the necessary momentum to initiate follow up drilling at not only Higginsville, but across our project portfolio in the Pilbara and Lachlan Fold Belt, where exploration activities are set to accelerate in the new financial year.

I would like to extend my heartfelt thanks to our inaugural Managing Director, Graeme Sloan, whose leadership was instrumental in our successful IPO. While Mr. Sloan has retired from his role as Managing Director, he continues to support Kali Metals in his new capacity as a Non-Executive Director.

We are pleased to welcome Paul Adams, an experienced mining executive with a wealth of technical expertise and commercial acumen, as our new Managing Director. Paul, previously a Non-Executive Director of Kali Metals, was appointed to replace Mr. Sloan, and is now leading the Company through its critical exploration phase.

In conclusion, I would like to express my deep appreciation to all of Kali Metals' employees for their hard work and commitment to successfully guide the Company through its IPO process and our first year as a publicly listed entity. I also extend my sincere thanks to our shareholders for the unwavering support and confidence in Kali Metals since our inception, through our IPO, and into our ongoing activities.

We are now firmly on the path to accelerating our exploration programs, with the intention of making Australia's next major lithium discovery. The past financial year has been a positive step forward for Kali Metals, and we anticipate another busy and productive year ahead. We look forward to keeping you updated on our progress as we continue this exciting journey.

Yours sincerely,
Luke Reinehr
Non-Executive Chairman

The Directors present their report, together with the financial statements, on Kali Metals Limited ("the Company" or "the Group" or "Kali") and the entity it controls for the year ended 30 June 2024. The Company was incorporated as a private company (Kali Metals Pty Ltd) on 31 August 2021 and on 21 April 2023 the Company converted to a public company (Kali Metals Limited). The Group was a wholly owned subsidiary of Kalamazoo Resources Limited ("Kalamazoo") and on 29 December 2023, the Group demerged from Kalamazoo following the issue of shares for the acquisition of various mining assets.

DIRECTORS

The following persons were directors of the Company during the whole of the financial period and up to the date of this report, unless noted otherwise:

- Luke Reinehr Non-Executive Chairman (appointed 31 August 2021)
- Paul Adams Managing Director (commenced 01 July 2024, previously Non-Executive Director appointed on 31 August 2021)
- Graeme Sloan Non-Executive Director (commenced 01 July 2024, previously Managing Director appointed on 19 May 2023)
- John Leddy Non-Executive Director (appointed 19 May 2023)
- Simon Coyle Non-Executive Director (appointed 19 May 2023)

PRINCIPAL ACTIVITIES

The Group is a minerals exploration Group with a focus on lithium and other critical minerals. Following the successful admission to the ASX Official List on 8 January 2024, the Group has rights to explore across three highly prospective lithium regions, being the Pilbara region of Western Australia, the Eastern Yilgarn region in Western Australia, and the Lachlan Fold Belt region across Victoria and New South Wales. The lithium projects across these regions consist of:

- a) Higginsville Project
- b) DOM's Hill Project
- c) Marble Bar Project
- d) Pear Creek Project
- e) Jingellic Project
- f) Tallangatta Project

OPERATING RESULTS

The loss of the Group after providing for income tax for the year ended 30 June 2024 was \$1,042,908 (2023: loss of \$1,068,132).

REVIEW OF OPERATIONS

Initial Public Offer and Commencement of Trading

Kali Metals ("Kali" or "the Company") is an Australian resources company which successfully commenced trading on the Australian Securities Exchange (ASX) on 8 January 2024. The Company's Initial Public Offering (IPO) was heavily oversubscribed, raising the maximum amount of \$15 million (before costs) through the issuance of 60,000,000 shares at \$0.25 per share.

Kali Metals was formed from the spin-out of Australian lithium assets owned by Kalamazoo Resources Limited (ASX: KZR) and the lithium mineral rights of Canadian gold miner Karora Resources Inc. (TSX: KRR).

Bell Potter Securities Limited and Canaccord Genuity (Australia) Limited acted as Joint Lead Managers for the IPO, with Grant Samuel as the financial adviser and Gilbert + Tobin as the legal adviser.

For personal use only

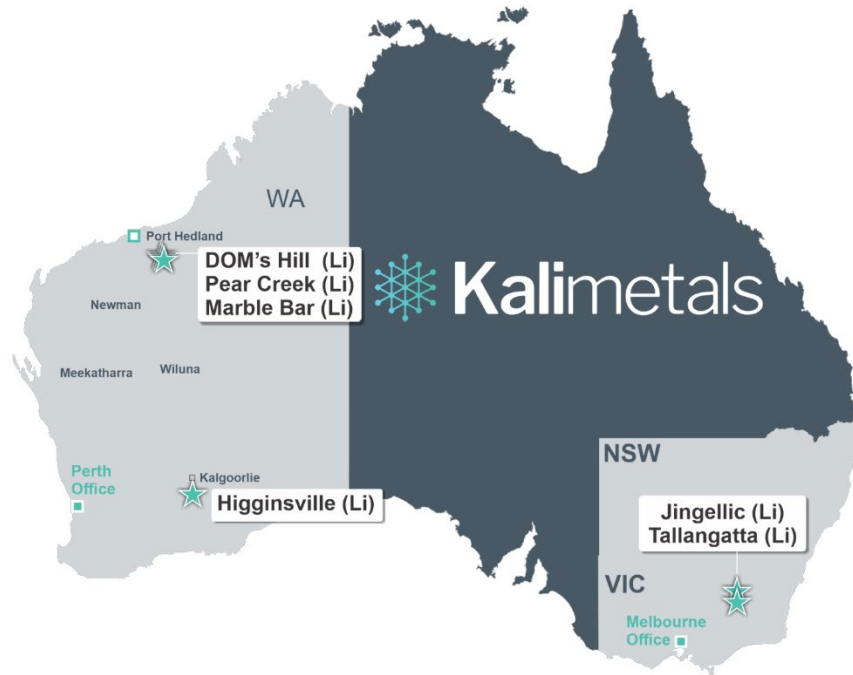

Figure 1. Kali's portfolio of Australian lithium assets

Kali Metals has a portfolio of lithium exploration projects spanning Western Australia (WA), New South Wales (NSW), and Victoria (VIC). The portfolio covers 3,854 km², with key projects located near some of the world's largest hard rock (spodumene) mines in the Pilbara and Eastern Yilgarn regions of WA. Notable projects (refer Figure 1) include:

1. **Eastern Yilgarn, WA:** Higgsville Lithium Project
2. **Pilbara Region, WA:** DOM's Hill, Marble Bar, and Pear Creek Lithium Projects
3. **NSW/VIC:** Jingellic and Tallangatta Lithium Projects

Funds raised from the IPO are due to be allocated to exploring and developing Kali's lithium tenure, with a primary focus on the Higgsville Lithium Project. Additionally, the funds covered IPO expenses, listing costs, and general working capital.

Two of Kali's Pilbara lithium projects (DOM's Hill and Marble Bar) are fully funded by SQM as part of a joint venture. SQM are currently solely funding the exploration activities at the project to earn an initial 30% and up to 70% in the DOM's Hill and Marble Bar Project.

Higgsville Lithium District, Western Australia

Kali Metals' Higgsville Lithium District spans approximately 1,571km², with the Company holding 100% of the lithium and associated battery mineral rights across all tenements. Within this district, eight projects (Figure 2) have been identified as having a geological setting conducive to hosting lithium-caesium-tantalum ("LCT") pegmatites. Some areas already have mapped outcropping pegmatites with identified spodumene, while others show pegmatite occurrences within existing drilling intercepts from an extensive historical gold drilling database. Kali's exploration team is prioritizing exploration programs based on prospectivity, enabling a systematic approach across the entire Higgsville Lithium District.

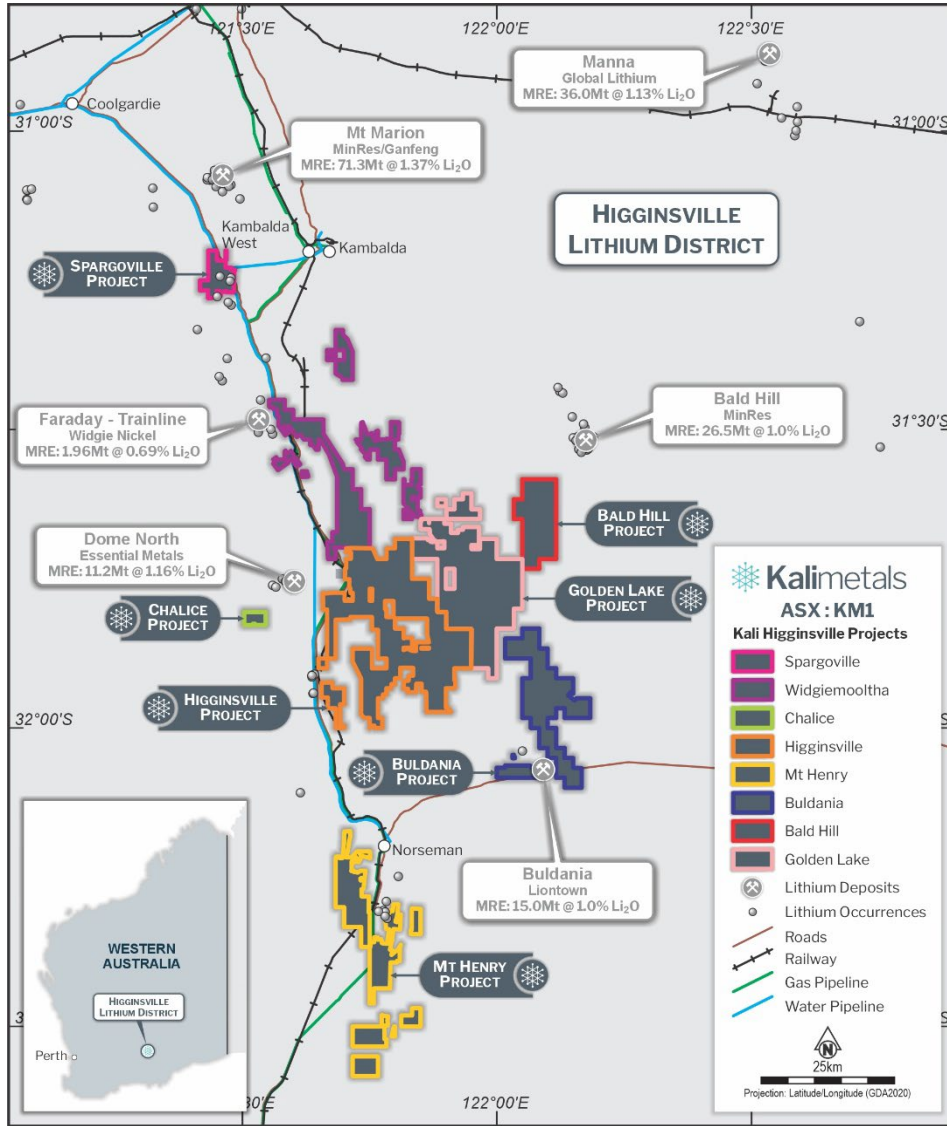

Figure 2. Higginsville Lithium District

Exploration Programs

Once Kali Metals was listed, the Company's exploration team quickly commenced exploration on the highest priority targets, based on prospectivity. This approach has been designed to optimise exploration across the entire district.

Geochemical Program

A large-scale geochemical sampling program commenced in January 2024, initially focusing on the Spargoville and Widgiemooltha projects, with over 20,000 soil samples planned to refine lithium anomalies identified in earlier surveys.

Within the Spargoville Project, results extended the Flynn-Giles prospect anomaly to the north – northeast, whilst the early positive results received from the Parker-Grubb prospect anomaly have identified a lithium anomaly with a strike length of over ~2.0kms to the northeast in parallel to the main Flynn-Giles anomaly trend (Refer Figure 3).

The first results of the geochemical program highlighted a large-scale lithium system with multiple trends of anomalies spanning over a combined strike of ~4km, an area size that exceeded initial expectations.

For personal use only

Highlights of the rock chip sampling program results include^{1,2}

Spargoville Project:

- | | | |
|--------------------------|---------|-------------------------|
| 1. Flynn-Giles Prospect | KCSA071 | 5.05% Li ₂ O |
| 2. Parker-Grubb Prospect | KCSA049 | 3.69% Li ₂ O |
| 3. Flynn-Giles Prospect | KCSA070 | 2.64% Li ₂ O |
| 4. Flynn-Giles Prospect | KCSA069 | 2.57% Li ₂ O |

For personal use only

Figure 3. Spargoville Project Map showing soil survey and rock chip results

¹ ASX: KM13 February 2024 “More High-Grade Lithium at Higginsville Lithium District” ASX: KM10 January 2024 “Spodumene identified at Higginsville Lithium District”

² ASX: KM10 January 2024 “Spodumene identified at Higginsville Lithium District”

The initial phase of the soil sampling program at the Widgiemooltha Project focused on an area identified through prior ground fieldwork, which revealed outcropping LCT pegmatites. The survey results indicate a significant anomaly extending over 800 meters, aligned with the pegmatite trends in the northern sector of the Widgiemooltha Project. Notably, the anomaly shows a broader response on the eastern side of the outcropping pegmatites, suggesting a potential extension of the pegmatite system's width beneath the shallow alluvial cover. High-grade lithium values from rock chip samples, distributed along the pegmatite trends, are illustrated in Figure 4.

Widgiemooltha Project:

- | | | |
|----------------------|---------|-------------------------|
| 1. Arc Prospect | KCSA080 | 2.21% Li ₂ O |
| 2. Wireless Prospect | KCSA085 | 2.14% Li ₂ O |
| 3. Arc Prospect | KCSA082 | 1.60% Li ₂ O |

For personal use only

Figure 4. Widgiemooltha Project area with Soil sampling anomaly trend and rock chip sample results

Geological Findings:

X-ray Diffraction (XRD) and Scanning Electron Microscope (SEM) analysis confirmed spodumene as the dominant mineral in multiple areas, with significant lithium mineralization (up to 5.05% Li₂O₃) detected in rock chip samples from Spargoville and Widgiemooltha.

The Flynn-Giles and Parker-Grubb prospects within the Spargoville Project have shown substantial spodumene-bearing pegmatite trends, extending up to 2kms.

Quantitative Sample Analysis

During the reporting period, eight pegmatite samples, believed to contain weathered spodumene, were selected across the Spargoville and Widgiemooltha Projects to determine whole rock mineralogy and confirm spodumene presence. Samples from historic workings at the Flynn-Giles Prospect and outcropping pegmatites at Widgiemooltha were analysed. The results have enhanced the exploration team's ability to visually identify weathered spodumene and lithium content in the field for future exploration activities (Refer Table 1). The samples were submitted to RSC for XRD analysis, with two (KCSA080 and KCSA085) undergoing further SEM-automated mineralogy analysis (Refer Table 2).

Table 1. State of weathered Spodumene observed in samples taken from workings at Flynn-Giles

Samples	Project	State of Weathering
KCSA069	Spargoville Project	Significantly
KCSA070	Spargoville Project	Partially
KCSA071	Spargoville Project	Minor

Table 2. The results of the rock chip sampling XRD analysis program

Samples	Project	Assay Li2O (%)	Spodumene (wt.%)	Quartz (wt.%)	Albite (wt.%)	Muscovite (wt.%)	Microcline (wt.%)	Orthoclase (wt.%)
KCSA071	Spargoville	5.05	67.2	21.1	0.8	2.3	<0.1	<0.1
KCSA080	Widgiemooltha	2.21	45.4	28.9	18.0	4.6	3.1	>0.1
KCSA085	Widgiemooltha	2.14	43.2	40.9	10.3	4.0	1.6	<0.1

KCSA087	Widgiemooltha	0.63	8.3	34.1	49.4	1.6	6.6	<0.1

Phase 1 Drilling Program

During the reporting period, Kali completed its maiden Reverse Circulation (RC) drilling program at the Higginsville District, focusing on outcropping pegmatites and known spodumene occurrences by expanding exploration along strike and down dip. This tested the Flynn-Giles and Green Flame prospect areas.

The program was designed to test beneath outcropping pegmatites and associated geochemical anomalies to ascertain the potential for lithium mineralisation. The program consisted of relatively shallow RC drilling, with the deepest hole testing approximately 100m below surface (vertical).

The results from the Phase 1 drilling program were announced post-reporting period. The maiden drill program has been fundamental to expanding the Company's knowledge of the geological setting at the Flynn-Giles and Green Flame prospects, and the Spargoville Project more broadly. The results from the first phase of RC drilling have provided the Company with lithium mineralised drill intersections containing Spodumene and significant information to assist in understanding the geology of the host rocks, the nature of the pegmatite systems within the Spargoville Project and facilitate the identification of targets for future drilling programs.

For personal use only

Historic Data Analysis:

A dedicated team has been established to undertake an analysis of Karora Resources' extensive historical gold drilling database to better understand lithium-bearing pegmatites logged in over 755 lithological entries. This information will guide the re-logging, sampling, and assay of historic drill cores, accelerating the identification of lithium intersections at depth.

Pilbara Project, Western Australia

Kali's Pilbara Projects include DOM's Hill and Marble Bar, which are located adjacent to the world-class lithium deposits Pilgangoora 305Mt @ 1.10% Li₂O and Wodgina 259Mt @ 1.17% Li₂O. Kali and SQM have an Earn-in Agreement, which covers the DOM's Hill and Marble Bar Projects. Under this agreement, SQM has the right to earn up to a 70% stake by contributing A\$12 million in funding over four years.

Figure 5. Kali Metals Pilbara Projects

Southern Lachlan Fold Belt, Victoria & NSW

Jingellic Lithium Project

The Jingellic Project located in the Lachlan Fold Belt, NSW, is an 'early mover' play in an emerging LCT pegmatite province consisting of the 100% owned EL9403 and EL9507, plus the LCT and tin-tungsten rights to EL8958 (shaded blue in Figure 6). This tenement package covers approximately a total of 1,220 km².

On 7 March 2024, Kali exercised the option outlined in its Prospectus dated 3 November 2023, and entered into a binding acquisition agreement with Mining and Energy Group Pty Ltd (MEG) to acquire MEG's tin-tungsten and lithium-caesium-tantalum rights at the strategic EL8958 tenement. This acquisition has expanded Kali's footprint in the Jingellic Lithium Project by an additional 226 km², enhancing its Lachlan Fold Belt Project in Southern New South Wales. The \$225,000 option fee was paid in scrip, based on the 30-day volume-weighted average price of Kali shares prior to the Option Expiry Date on 3 March 2024. The acquisition connects two central tenements of the Jingellic Lithium Project, enabling continuous exploration across the Lachlan Fold Belt. Previous exploration at EL8958 has identified tin anomalies along regional fault lines, and Kali plans to incorporate this promising new landholding into its ongoing exploration program.

For personal use only

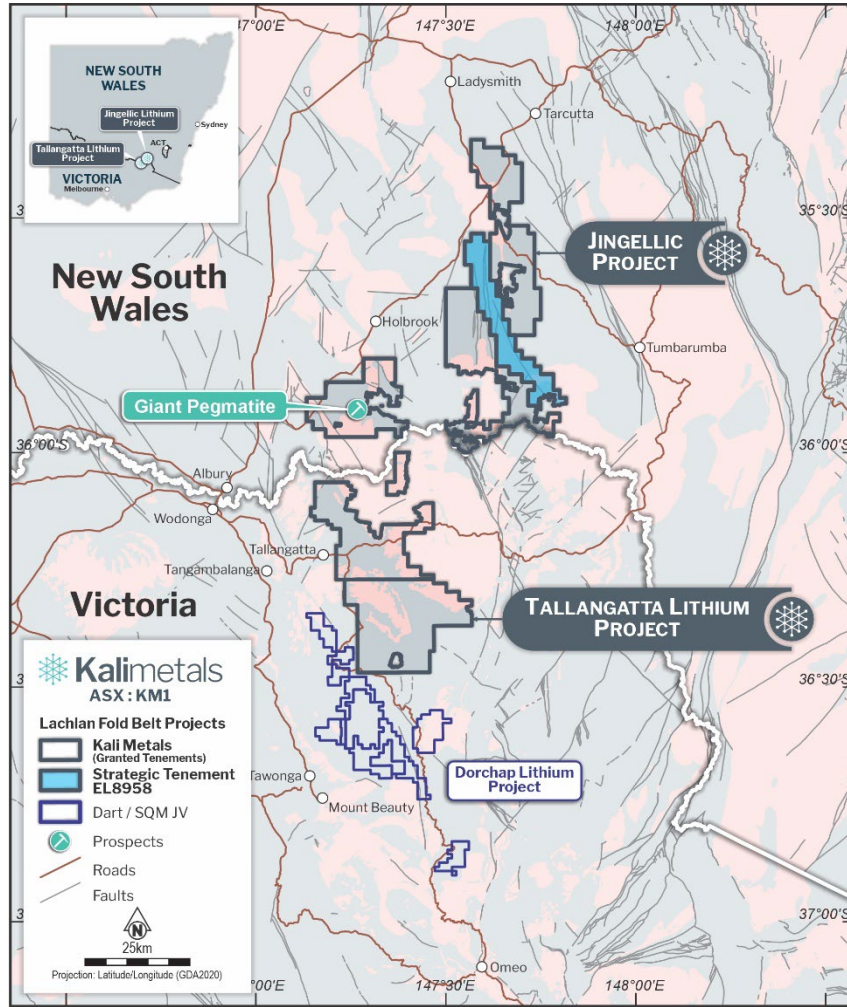

Figure 6. Location map of Kali Metals' Jingellic and Tallangatta Projects

The Company's initial exploration efforts concentrated on the highly promising Sweetwater Creek area (EL9403), which includes the "Giant Pegmatite"³. Rock chip sampling over a ~50m strike length confirmed significant lithium mineralisation, with assays revealing concentrations ranging from **0.66% - 1.54% Li₂O** (Figure 7 and Figure 8; Table 3 and Table 4). The strong correlation between lithium and pathfinder elements such as caesium, tantalum, tin, and beryllium underscores the Giant Pegmatite's classification as an LCT-type deposit, bolstering the Company's exploration model for this emerging region.

XRD analysis of the rock chip samples from the Giant Pegmatite has confirmed that Spodumene is the dominant lithium-bearing mineral phase in two out of the three samples with the other sample containing the lithium-bearing mineral petalite (Table 3).

³ Refer KM1 ASX Announcement, 7 March 2024.

In February 2024, Kali completed a ~50 km² airborne LiDAR survey over the Sweetwater Creek prospect, identifying several previously unknown pegmatite dykes. Among these, the "BFG Pegmatite," consisting of two dykes merging over a ~1km strike extent, exhibited highly fractionated characteristics, confirming its LCT affinities.

For personal use only

Figure 7. Sweetwater Creek prospect surface geochemical program location map

Figure 8. Sweetwater Creek prospect LiDAR enhanced hillshade image depicting newly identified pegmatite dykes at the BFG prospect

The Sweetwater Creek area also hosts historical tin mines, including the Mullengandra and McLurg's tin mines, where recent reviews of historical data have revealed tantalum alongside high-grade tin mineralisation, enhancing the area's potential. However, these historical findings require independent validation through further sampling.

For personal use only

Within the Company's tenements at the nearby McLurg's Gully tin mine, located ~1.1kms North West of the Mullengandra tin mine, one historical quartz vein rock chip sample reported 11.4% Sn and 1060 ppm tantalum associated with coarse nuggety cassiterite mineralisation⁴. A historical data review has recently been completed, revealing that these high-grade tin-bearing workings also contain elevated amounts of tantalum, adding to the potential prospectivity of the area (Table 6).

Additionally, Kali has completed a soil geochemistry sampling program over the Sweetwater Creek prospect, with approximately 600 samples collected across a 13.7 km² area. The results are currently undergoing compilation, QAQC analysis, and interpretation.

Kali secured NSW government approvals to conduct low-impact exploration activities within the Mullengandra and Woomargama State Conservation Areas, which are highly prospective for both LCT-bearing pegmatites and tin-tantalum mineralisation (EL9403 and EL9507). This access enables Kali to advance its exploration strategy with further soil geochemistry sampling programs in these areas.

Additionally, Kali has completed a soil geochemistry sampling program and received NSW government approvals to conduct exploration within key State Conservation Areas.

POST REPORTING PERIOD ACTIVITY

Spargoville

Post-reporting period, Kali reported assay results from its Phase 1 drill program at Spargoville (refer Table 8 and Table 9, Figure 10 and Figure 11). The program aimed to test beneath outcropping pegmatites and geochemical anomalies for lithium potential, with drilling reaching depths of up to 100m.

Figure 11. Completed RC drilling at Green Flame prospect targeting outcropping LCT pegmatites

The results have been instrumental in enhancing the Company’s understanding of the geological setting at the Flynn-Giles and Green Flame prospects. Key findings include fertile spodumene-bearing LCT pegmatites within ultramafic host rock, with pegmatites up to 16m thick and dipping shallowly to the east. These insights will be critical for designing the Phase 2 drill program at the Walton, Parker-Grubb, and Flynn-Giles East prospects.

For personal use only

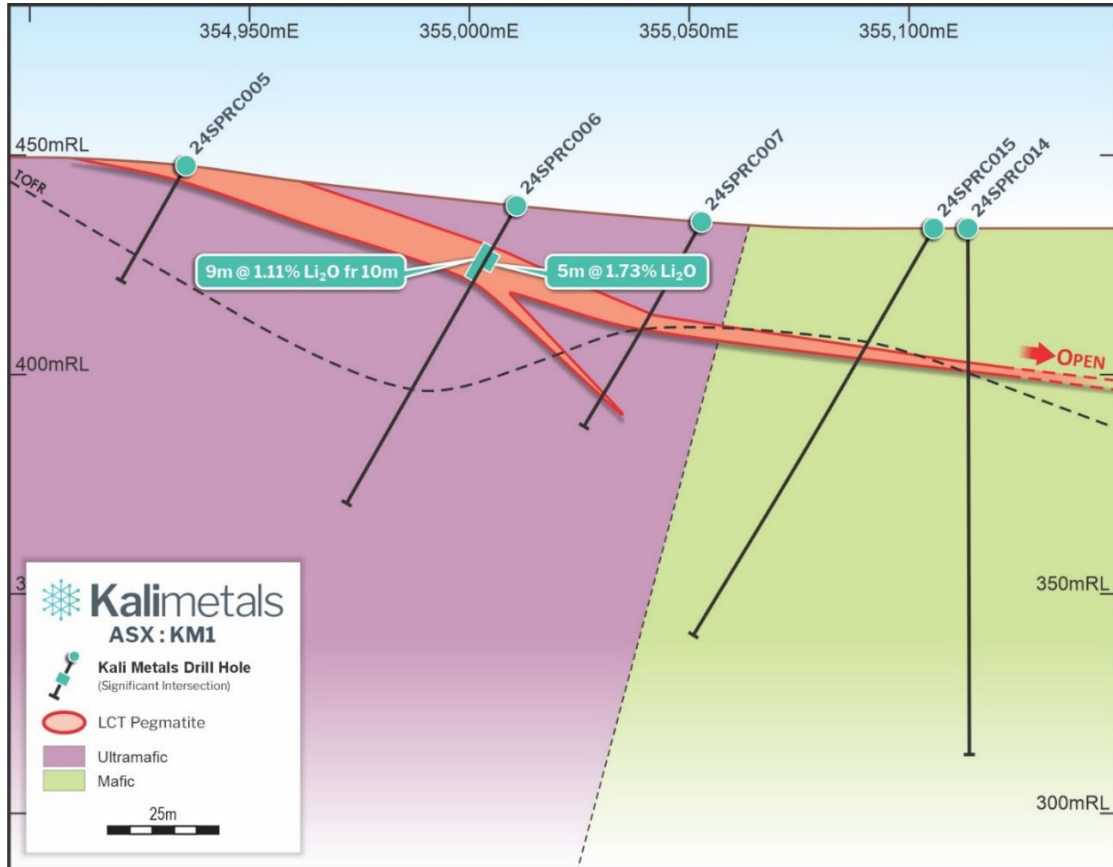

Figure 12. Cross-section A-A' looking north with drill intersections and modelled pegmatites

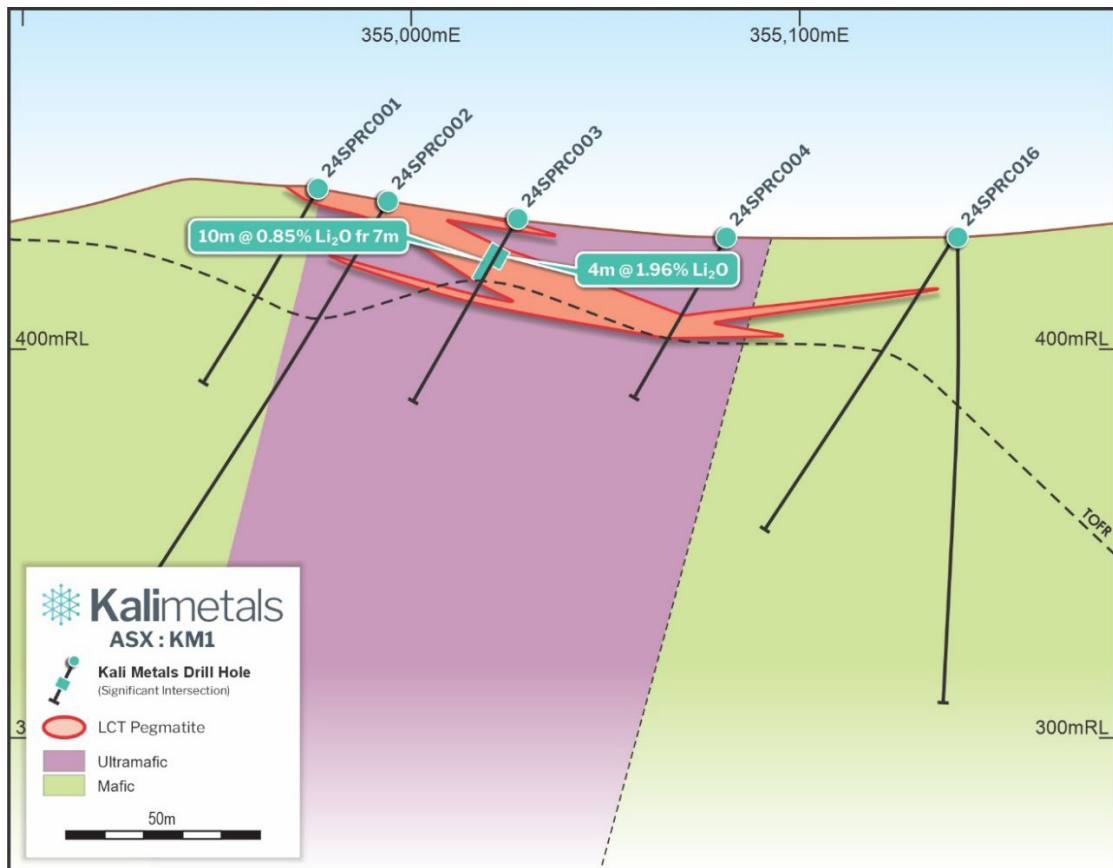

Figure 13. Cross-section B-B' looking north with drill intersections and modelled pegmatites

Kali announced the completion of an initial review of historic drill core at the Spargoville Project with preliminary findings identifying numerous intersected pegmatites. The drilling was mostly focused on gold mineralisation with zero or little focus on the Lithium potential of the new area. The early stages of the review focused on the area around Karora's, now Westgold Resources', Spargo's Reward open pit gold mine.

The Company is now conducting a detailed review of these historic intersections, with the aim of creating an inventory of follow up lithium targets. The results of the review, assisted by interpretation of the geology from Kali's maiden reconnaissance drilling program at the Flynn-Giles Prospect, where spodumene-hosting LCT pegmatites were intersected (9m @ 1.1% Li₂O from 7m)⁶, has shown there are multiple occurrences of spodumene beneath the Spargo's Reward open pit which are interpreted to potentially outcrop to the west (Refer Figure 14).

For personal use only

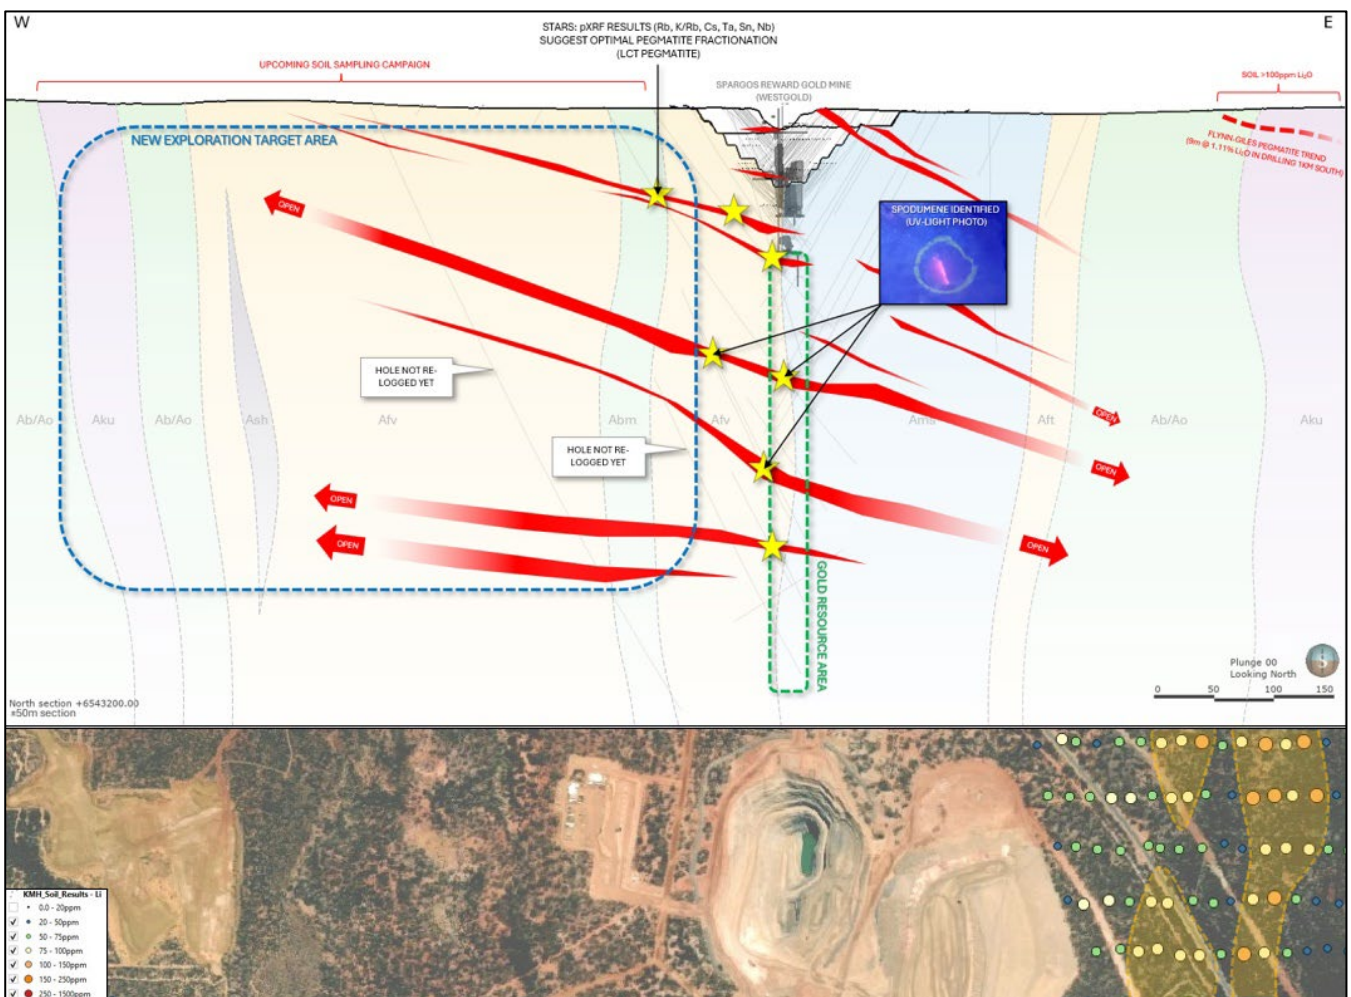

Figure 14. Cross Section beneath Spargo's Reward illustrating preliminary results of review of Westgold's historic drill core (pegmatites marked in red)

The review revealed that within a 1km radius of the Spargo's Reward Gold Mine, 170 pegmatite intervals have been identified across 41 diamond drill holes and 37 RC holes. Reported results in Table 8. A preliminary 3D geology model has been generated (Refer Figure 14), interpreting a dozen gently dipping pegmatites in the region immediately associated with the Spargo's Reward mine. These pegmatites dip between 5° and 30° to the east. At least three pegmatites appear to have suitable true thickness of minimum 10m.

Based on the Company's initial p-XRF spot analysis, numerous samples within the pegmatites contain significantly elevated levels of lithium pathfinder elements, including caesium, rubidium, tin, tantalum and niobium (Refer Table 8), suggesting that these are LCT pegmatites.

⁶ Refer to ASX announcement on 6 August 2024 – "Drill Core Review Yields Major New Targets at Spargoville".

Spodumene was also observed in several holes (Refer Table 8), confirmed with the use of a longwave UV light. This spodumene will be sent for XRD analysis and mineral verification. As a result of this work, the area to the west of the Spargo's Reward open pit is considered a high priority of interest for the Kali exploration team. Several key drillholes in this area are yet to be re-logged and examined with pXRF and UV light, and Kali looks forward to following up investigation of these drillholes.

Maiden RC drilling results from Widgiemooltha

At the Widgiemooltha Project, the Company completed its initial RC drilling program, with the best intercept being **10m @ 1.06% Li₂O⁷** from 43m. Refer to Figure 15 and Table 9 & Table 10).

The first-pass RC drilling program at the Widgiemooltha Project has intersected a series of subparallel steeply west-dipping LCT pegmatites hosted within a mafic sequence (with minor felsic units), in close proximity to a felsic sequence to the west. The host lithium mineral is spodumene.

Drilling was conducted at approximately 120m line spacing by 40m spacing along lines. The two northern sections are 320m apart due to topography constraints.

Competent Person Statement

The information in this report that relates to Data and Exploration Results is based on and fairly represents information and supporting documentation compiled and reviewed by Mr Jeremy Burton a Competent Person who is a Member of the Australian Institute Geoscientists (AIG) and Senior Geologist at Kali Metals. Mr Burton has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he has undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Burton consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward Statements

This report may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Kali's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential", "should," and similar expressions are forward-looking statements. Although Kali believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

For personal use only

Previously Reported Results

The information in this announcement that relates to previously reported Exploration Results was previously announced in Kali's ASX announcements. Kali confirms that it is not aware of any new information or data that materially affects the information included in the original announcements.

FINANCIAL

As at 30 June 2024, the Group had net assets of \$21,896,689 (2023: \$1,102,587 net asset deficiency) including cash and cash equivalents and short term deposits of \$9,627,079 (2023: \$91,931) and capitalised exploration and evaluation assets of \$13,137,803 (2023: \$717,218).

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

On 8 May 2023, the Group's parent Group, Kalamazoo, announced that it proposed to:

- spin-out the Marble Bar Project and DOM's Hill Project to the Group; and
- undertake an in-specie distribution of 25% of the Shares to be held by Kalamazoo in the Group (In-specie Shares) to Kalamazoo Shareholders (Kalamazoo In-specie Distribution).

The transfer of the DOM's Hill and Marble Bar Projects to the Group and the Kalamazoo In-specie Distribution was subject to the required approvals of Kalamazoo Shareholders under the ASX Listing Rules and the Corporations Act, which were obtained on 18 December 2023.

On 20 December 2023, the Group received conditional approval from the ASX for admission to the Official List.

On 22 December 2023, the Group and Kalamazoo entered into a Deed of Debt Forgiveness whereby the borrowings from Kalamazoo to the Group were forgiven. This was followed by the issue of 37,862,900 of the Group's shares to Kalamazoo for the tenement and mineral rights acquisition related to the Marble Bar Project and DOM's Hill Project. Following the completion of these tenement and mineral rights transfer, Kali demerged from the Kalamazoo Group on 29 December 2023.

Kalamazoo and Sociedad Quimica y Minera ("SQM") had previously entered into the SQM Earn-in Agreement which entitles SQM to earn-in up to a 70% interest in the Marble Bar Project and DOM's Hill Project. The Group, Kalamazoo and SQM have entered into a deed of assignment and assumption dated 30 August 2023 under which Kalamazoo will assign its rights, and the Group will assume the obligations of Kalamazoo, under the SQM Earn-in Agreement. The assignment has taken effect upon completion occurring under the Tenement Sale Agreement.

On 2 May 2023, the Group, Kalamazoo, and Karora Resources Limited ("Karora Group") entered into a Shareholder's Deed to govern the activities of the Group prior to listing. The Shareholder's Deed provided for the issue of 1 million Founder Shares at \$0.05 per share each to Kalamazoo and Karora Group. On 22 December 2023, post obtaining Kalamazoo's shareholder approval, the Founders shares were issued to Kalamazoo and Karora.

On 22 December 2023, the Group also issued 13,120,000 ordinary shares as part of pre-IPO Seed Raising for \$1.64 million before costs.

On 22 December 2023, the Group completed the tenement acquisition (P15/6778) from James Mansen as trustee for Wildcard (WA) Pty Ltd. Consideration paid as part of the tenement acquisition was \$75,000 cash plus 300,000 consideration shares at \$0.25 per share. The tenement sale agreement was originally entered on 17 October 2023.

For personal use only

On 29 December 2023, the Group completed a Share Sale transaction with Karora Group, whereby Avoca Mining Pty Ltd, a wholly owned subsidiary of Karora, has agreed to sell, and the Group has agreed to buy 100% interest in Karora Lithium Pty Ltd ("Karora Lithium"). Prior to the completion of the Share Sale transaction, Karora Lithium entered into a Mineral Rights Agreement with Karora Group's subsidiaries being Avoca Mining Pty Ltd, Avoca Resources Pty Ltd, Polar Metals Pty Ltd and, Corona Minerals Pty Ltd (together, the **Grantors**) which will grant the Higginsville Lithium Rights to Karora Lithium prior to completion of the Share Sale Agreement. Each Mineral Rights Agreement continues until the relevant Higginsville Lithium Rights have been relinquished or the relevant tenements have expired or otherwise terminated. The Grantor cannot relinquish a tenement, or part of it, without first offering the relevant area to Karora Lithium for no consideration. Under each Mineral Rights Agreement, Karora Lithium has agreed to grant and pay each Grantor a 1% net smelter return royalty (**Royalty**) payable with respect to any Higginsville Lithium Rights (and any other minerals it is entitled to retain under the Mineral Rights Agreement) produced or extracted by Karora Lithium or any of its Related Bodies Corporate in respect of their Relevant Tenements.

On 8 January 2024, Kali successfully listed on the ASX and raised \$15 million before costs through the issue of 60,000,000 ordinary shares.

On 7 March 2024, Kali exercised the option with Mining and Energy Group Pty Ltd (MEG) to add MEG's tin-tungsten and lithium-caesium-tantalum rights at its EL8958 to Kali's Lachlan Fold Belt Project in NSW. This acquisition was completed on 10 July 2024.

There were no other significant changes in the state of affairs of the Group during the financial period.

DIVIDENDS

There were no dividends declared or paid during the financial period. No recommendation for the payment of a dividend has been made by the Directors.

MATTERS SUBSEQUENT TO THE END OF THE FINANCIAL PERIOD

Mr Paul Adams, previously Non-Executive Director of Kali Metals, was appointed as Kali's new Managing Director, effective from 1 July 2024. Mr Adams has over 20 years of mining industry experience, including exploration, operational roles, and equities research focused on small to mid-cap resource companies. At the time of appointment he was also an Executive Director at Kalamazoo Resources Limited, a major shareholder in Kali Metals, and a Non-Executive Director at Meeka Metals Limited. Mr Adams previously served as Managing Director of Spectrum Metals Ltd. Mr Adams has a Geology Degree (Honors) from Derbyshire University and a Graduate Diploma in Applied Finance and Investment.

Mr Graeme Sloan, Kali Metals inaugural Managing Director, transitioned to Non-Executive Director on 1 July 2024.

Mr Mladen Stevanovic was appointed as the Company's new Exploration Manager on 22 July 2024. With nearly 20 years of international experience across lithium, gold, copper, nickel, and base metals, Mr Stevanovic has led exploration teams responsible for significant discoveries in Europe, Australia, and Africa, and provided technical expertise for Adriatic Metals' acquisition and start-up. He has served as Chief Geologist at Gorno polymetallic mine, Principal Geologist for Gold Fields, and Exploration Manager at Liatam Mining, where he worked on the Bald Hill Lithium and Tantalum Mine. Mr Stevanovic holds advanced degrees in geology and currently serves as a Non-Executive Director at Lykos Metals.

Frankfurt Stock Exchange

Kali dual listed on the Frankfurt Stock Exchange (Open Market) in July 2024 under the ticker code 6OB, broadening its investor base and enhancing its visibility in European markets. The Frankfurt Stock Exchange is Europe's third-largest and the world's twelfth-largest by market cap. To support its promotional efforts, Kali has engaged AXINO Media GmbH, a German investor relations group, known for assisting Australian companies in boosting trading volumes on the Frankfurt Exchange. Kali looks forward to welcoming new European investors.

No matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial periods.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

The Directors are not aware of any developments that might have a significant effect on the operations of the Company in subsequent financial years not already disclosed in this report.

The material business risks faced by the Company that are likely to impact the financial prospects of the Company, and how the Company manages these risks are:

Exploration Risk

Mineral exploration and development are high-risk undertakings, and there is no assurance that exploration of the tenements will result in the discovery of an economic deposit. Even if an apparently viable deposit is identified there is no guarantee that it can be economically exploited. The Company's future exploration activities may be affected by a range of factors including geological conditions, limitations on activities due to permitting requirements, availability of appropriate exploration equipment, exploration costs, seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, and many other factors beyond the control of the Company.

In the opinion of the Directors, any further disclosure of information regarding likely developments in the operations of the Company and the expected results of these operations in subsequent financial years may prejudice the interests of the Company and accordingly, further information has not been disclosed.

Future capital needs

The Company's current capital is sufficient, at the issue date of this report, to meet its current planned exploration activities. Future activity that is unable to be planned for has the potential to draw down available capital. While unplanned activity will be considered and align with shareholders requirements, it could require additional funding to be obtained. Funding via additional equity will dilute shareholdings, and if debt financing is a viable option, it would likely be subject to restrictions. Depending if unplanned activity is undertaken, the Company may need to reduce the scope of its exploration programmes to ensure sufficient capital is maintained. There is no guarantee that suitable, additional funding will be able to be secured by the Company.

Environmental

With the Company's tenure residing within Western Australia, Victoria, and New South Wales, the Company is subject to the state and federal laws and regulations concerning the environment. Mechanised exploration will impact the local environment along with any advanced development and production activities. In undertaking exploration activities, the Company intends to comply with all environmental laws.

Inherent risks when completing exploration activities include, but are not limited to, land disturbance and the disposal of waste products. An incident involving incorrect disposal of waste products could result in delays to exploration, additional costs to remediate the location and any legislative penalties.

For personal use only

The Company has procedures implemented to minimise the occurrence of environmental impacts and any subsequent penalties; however the nature of the activity does involve environmental risks.

Heritage

With the Company's tenure residing within Western Australia, Victoria, and New South Wales, the Company is subject to the state and federal laws and regulations concerning Native Title and Heritage rights and interests. The Company is required to ensure that tenure has been adequately surveyed and considered before commencing any activity that would disturb the natural environment and its surroundings.

The Company complies with required legislation regarding Native Title and Heritage requirements, and where suitable, engages a third party to ensure that all requirements are met.

While all care is taken to ensure rights and interests are maintained, there is a level of risk inherent in the exploration activity that is unable to be fully mitigated.

General market risks

The Company is exposed to general market and economic condition risks including adverse changes in levels of economic activity, exchange rates, interest rates, commodity prices, government policies, employment rates and industrial disruption.

ENVIRONMENTAL REGULATION

The Company is subject to significant environmental regulation in respect of its exploration activities. Tenements in Victoria, Western Australia and New South Wales are granted subject to adherence to environmental conditions with strict controls on clearing, including a prohibition on the use of mechanised equipment or development without the approval of the relevant Government agencies, and with rehabilitation required on completion of exploration activities. These regulations are controlled by the Department of Jobs, Precincts and Regions (Victoria), the Department of Mines, Industry Regulation and Safety (Western Australia), and the NSW Department of Industry.

The Company conducts its exploration activities in an environmentally sensitive manner and is not aware of any breach of statutory conditions or obligations.

INFORMATION ON DIRECTORS

The names and details of the Directors of the Company in office as at the date of this report and anytime during the financial year are:

Name:	Luke Reinehr
Title:	Non-Executive Chairman
Qualifications:	LLB, BA
Experience and expertise:	With over 25 years of experience spanning various management levels, Luke has held key roles as a partner, director, CEO, and chairman in resource and technology companies both in Australia and internationally.
Other current directorships:	Kalamazoo Resources Limited
Former directorships (last 3 years):	None
Special responsibilities:	Member of Audit and Risk Management Committee (ARC)
Interests in shares:	919,575 ordinary shares
Interests in options:	None
Interest in performance rights:	2,410,154 Performance Rights

For personal use only

For personal use only

Name: Graeme Sloan
Title: Managing Director up to 30 June 2024 and transitioned into Non-Executive Director on 1 July 2024.
Qualifications: BAppSc (Mining Engineering), Dip (Mine Surveying), FCMM Cert WA, Member AUSIMM, Member AICD, and ESG Directors Course.
Experience and expertise: Graeme is a qualified mining engineer with over 35 years' experience as a managing director/chief executive officer, non-executive director, chairman and member of audit, risk and sustainability committees and general manager of operations. He has held roles in corporate affairs, operational management, technical and project development and has worked in Australia and North and South America holding senior technical roles for ASX, TSX and AIM listed companies.
Other current directorships: Golden Horse Minerals Limited (formerly Altan Rio Limited)
Former directorships (last 3 years): None
Special responsibilities: Member of Audit and Risk Management Committee (ARC)
Interests in shares: 800,000 ordinary shares
Interests in options: None
Interest in performance rights: 3,016,682 Performance Rights

Name: Paul Adams
Title: Non-Executive Director up to 30 June 2024 and transitioned into Managing Director on 1 July 2024.

Performance Rights Class A	28 Jun 2023	4,680,647	\$0.00	28 Jun 2026
Performance Rights Class A	12 Mar 2024	1,451,812	\$0.00	28 Jun 2026
Performance Rights Class B	28 Jun 2023	4,680,644	\$0.00	28 Jun 2026
Performance Rights Class B	12 Mar 2024	1,451,812	\$0.00	28 Jun 2026

MEETINGS OF DIRECTORS

Considering the Company's relatively small size, the Board has determined that the Company's interests are most effectively served by the full Board undertaking the duties traditionally delegated to Committees.

During the financial year, 5 meetings of Directors were held. Attendances by each Director during the year were as follows:

Directors	Directors' Meetings	
	Number Eligible to Attend	Number Attended
Luke Reinehr	5	5
Graeme Sloan	5	5
Paul Adams	5	5
Simon Coyle	5	5
John Leddy	5	4

For personal use only

REMUNERATION REPORT (AUDITED)

The remuneration report details the key management personnel remuneration arrangements for the consolidated entity, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration
- Details of remuneration
- Service agreements
- Share-based compensation
- Additional information
- Additional disclosures relating to key management personnel

Principles used to determine the nature and amount of remuneration

The Company's remuneration policy is structured to align the objectives of executive key management personnel with those of shareholders and the business. This is achieved through a fixed remuneration component and long-term incentives tied to key performance areas that impact the Company's financial outcomes. The remuneration committee conducts a review of executive compensation, taking into account the Company's performance, individual executive performance, and comparative data from similar industries and other listed companies. The Board believes this remuneration policy is both appropriate and effective in attracting and retaining top executive talent, while fostering alignment between the goals of Directors, Executives, and Shareholders.

The remuneration committee considers the following factors in establishing the nature and amount of remuneration for the Company's executive key management personnel:

- The remuneration policy, which outlines the terms and conditions for executive key management personnel, was developed by the remuneration committee and approved by the Board;
- All executive key management personnel receive a base salary, determined by factors such as length of service and experience, along with superannuation where applicable; and
- The remuneration committee conducts an annual review of executive key management personnel packages, considering the Company's performance, individual executive performance, and comparable data from industry sectors.

The Company operates as an exploration entity, making its performance inherently speculative. To attract and retain top executive talent, key management personnel are compensated at market rates comparable to those in similar roles within the industry. No remuneration consultants were engaged for the year ended 30 June 2024.

The Company has established the Kali Metals Limited Incentive Plan (**Incentive Plan**) to assist in the motivation, retention and reward of certain employees and Directors engaged by the Company or any of its subsidiaries (**Participants**). The Incentive Plan is designed to align the interests of Participants more closely with the interests of Shareholders. All awards granted under the Incentive Plan to Participants will be Performance Rights, Options or Shares.

Performance rights have previously been issued to executive key management personnel to provide a mechanism to participate in the future development of the Company and an incentive for their future involvement with and commitment to the Company.

For personal use only

Further options and performance incentives may be issued as the Company moves from an exploration entity to a producing entity, and key performance indicators such as profits and growth can be used as measurements for assessing executive key management personnel performance.

Executive key management personnel receive a superannuation guarantee contribution where required by the government, which was 11% for the year ended 30 June 2024, and do not receive any other retirement benefits. All remuneration paid to executive key management personnel is valued at the cost to the Company and expensed. Performance Rights given to executive key management personnel are valued using the Hoadley valuation model.

Non-Executive Directors remuneration

Under the Constitution, the Company in general meeting may determine the maximum aggregate remuneration to be provided to or for the benefit of the Non-Executive Directors as remuneration for their services as a Director. Further, under the ASX Listing Rules, the total amount of directors fees paid to the Directors (subject to certain exceptions) must not exceed in aggregate in any financial year the amount fixed by the Company's members in general meeting.

Initially, and until a different amount is determined, the maximum aggregate Directors' remuneration for the purposes of the ASX Listing Rules and the Constitution is \$400,000 per annum. This amount excludes, among other things, amounts payable to any executive Director under any executive services agreement with the Group or any special remuneration which the Board may granted to the Directors for special exertions or additional services performed by a Director for or at the request of the Company.

The following annual base fees (excluding superannuation) are payable to Directors:

Director Fees	\$
Chairman	85,000
Non-Executive Directors	50,000

Directors will receive no additional fees for being a member of the Audit and Risk Management Committee and/or Remuneration and Nomination Committee.

Details of remuneration

Names and positions held of the Company's key management personnel in office at any time during the financial year are:

Key Management Personnel	Position
Graeme Sloan	Managing Director/CEO (until 30 June 2024, then transitioned into Non-Executive Director)
Luke Reinehr	Non-Executive Chairman
Paul Adams	Non-Executive Director (until 30 June 2024, then transitioned into Managing Director)
Simon Coyle	Non-Executive Director
John Leddy	Non-Executive Director
Nick Madders	Company Secretary (appointed 1 August 2023)
Silfia Morton	Chief Financial Officer (appointed 1 December 2023)
Bernard Crawford	Chief Financial Officer (resigned on 1 October 2023)

Details of the remuneration of key management personnel of the consolidated entity are set out in the following tables.

	Short-term benefits	Post-employment benefits	Long-term benefits	Share-based payments		Total	Proportion of Remuneration Related to Performance

TOTAL					\$753,536

¹ Mr Crawford's performance rights were subsequently cancelled following his resignation and the expenses reversed in accordance with AASB 2: share-based payments.

The fair value of the Performance Rights has been calculated using the share price at valuation date. The key inputs used for the valuation are detailed below:

	Tranche A - KM1PRA	Tranche B - KM1PRB	Tranche A - KM1PRA36	Tranche B - KM1PRB60
Number of performance rights	5,434,819	5,434,817	300,000	300,000
Underlying share price	\$0.25	\$0.25	\$0.44	\$0.44
Value per right	\$0.25	\$0.25	\$0.44	\$0.44
Total Fair Value	\$1,358,705	\$1,358,704	\$130,500	\$130,500

Additional information

The Directors assess performance of the Company with regards to the achievement of both operational and financial targets with a current focus on exploration targets. Executive key management personnel are issued performance rights to encourage the alignment of personal and shareholder interests.

Options and performance rights issued to executive key management personnel may be subject to market-based price hurdles, non-market vesting conditions, and the exercise price of options is set at a level that encourages executive key management personnel to focus on share price appreciation. The Board believes this policy will be effective in increasing shareholder wealth. On the resignation of executive key management personnel, any vested options and performance rights issued as remuneration are retained by the relevant party.

The following table shows the Company's net loss since the Company was admitted to the official list of the ASX on 8 January 2024, as well as the Company's share prices at the end of the financial year.

	2024 \$
Net loss	1,042,852
Share price at year-end	0.235
Earnings per share (cents)	(1.44)

Additional disclosures relating to key management personnel

Shareholding

Note:

- Mr Crawford resigned from his position as the Company's Chief Financial Officer in October 2023.

Other transactions with key management personnel and their related parties

The Company entered into a sub-lease agreement with Golden Horse Minerals (Aust) Pty Ltd ("Golden Horse"), of which Mr Sloan is a director. The sub-lease agreement covered office rent, variable outgoings, and common office-related expenses up to the end of February 2024. The total amount paid to Golden Horse for the financial year ended 30 June 2024 is \$40,335.

In May 2024, the Company leased a new head office at 34 Colin Street, West Perth, WA, and simultaneously entered into a sub-lease agreement with Golden Horse. Under this agreement, Golden Horse will pay the Company \$5,000 (excluding GST) per month to lease a portion of the head office. The total amount received from Golden Horse for the financial year ended 30 June 2024 was \$5,879, which includes the monthly rent and its share of office amenities.

During the financial year, Makalu Capital Pty Ltd, of which Mr Adams is a director, received \$28,621 for geological consulting services provided to the Company.

The Company's previous parent entity, Kalamazoo Resources Limited, has provided an interest free, unsecured loan with no set repayment date to the Company in order for the Company to meet its expenditure commitments on its tenements and working capital. The Company received conditional approval from the ASX for admission on 20 December 2023, and subsequently on 22 December 2023, the Company entered into a formal Deed of Forgiveness with Kalamazoo whereby \$350,000 was repaid back to Kalamazoo and the remaining loan balance was forgiven.

This concludes the remuneration report, which has been audited.

For personal use only

INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

The Company has indemnified the directors and executives of the Company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract to insure the directors and executives of the Company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

INDEMNITY AND INSURANCE OF AUDITOR

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the company or any related entity.

PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied to the Court under section 237 of the *Corporations Act 2001* for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

NON-AUDIT SERVICES

Details of the amount paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in Note 21 to the financial statements.

The directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*.

The directors are of the opinion that the services as disclosed in Note 21 to the financial statements do not compromise the external auditor's independence requirements of the *Corporations Act 2001* for the following reasons:

- All non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- None of the services undermine the general principles relating to auditor independence as set out in APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* issued by the Accounting and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the Company, acting as an advocate for the Company or jointly sharing economic risks and rewards.

DECLARATION OF INDEPENDENCE BY GLYN O'BRIEN TO THE DIRECTORS OF KALI METALS LIMITED

As lead auditor of Kali Metals Limited for the year ended 30 June 2024, I declare that, to the best of my knowledge and belief, there have been:

1. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
2. No contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Kali Metals Limited and the entity it controlled during the period.

Glyn O'Brien

Director

BDO Audit Pty Ltd

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1: CORPORATE INFORMATION

The financial report of Kali Metals Limited for the year ended 30 June 2024 was authorised for issue in accordance with a resolution of the Directors on 27 September 2024.

Kali Metals Limited is a for-profit company incorporated in Australia and limited by shares. The nature of the operation and principal activities of the entity are described in the attached Directors' Report.

The principal accounting policies adopted in the preparation of these financial statements are set out below and have been applied consistently to all periods presented in the financial statements.

NOTE 2: SUMMARY OF MATERIAL ACCOUNTING POLICIES

Basis of preparation

These general-purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the *Corporations Act 2001*, as appropriate for for-profit oriented entities.

Compliance with IFRS

The financial statements of Kalamazoo Resources Limited also comply with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

New or amended Accounting Standards and Interpretations adopted

The Company has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ("AASB") that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted. These are not expected to have any significant impact on the Group's financial statements.

a) Basis of measurement

Critical accounting estimates and judgements

The preparation of financial reports requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

Significant accounting judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements.

Capitalisation of exploration and evaluation expenditure

The Group has capitalised exploration and evaluation expenditure on the basis either that this is expected to be recouped through future successful development (or alternatively sale) of the Areas of Interest concerned or on the basis that it is not yet possible to assess whether it will be recouped.

For personal use only

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Significant accounting estimates and assumptions

The carrying amount of certain assets and liabilities are often determined based on estimates and assumptions of future events. The key estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of certain assets and liabilities within the next annual reporting period are:

Impairment of capitalised exploration and evaluation expenditure

The future recoverability of capitalised exploration and evaluation expenditure is dependent on a number of factors, including whether the Group decides to exploit the related lease itself or, if not, whether it successfully recovers the related exploration and evaluation asset through sale. Factors that could impact the future recoverability include the level of reserves and resources, future technological changes, costs of drilling and production, production rates, future legal changes (including changes to environmental restoration obligations) and changes to commodity prices.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined using the Black Scholes model or Trinomial model. Should the assumptions used in these calculations differ, the amounts recognised could significantly change.

Asset Acquisition

When an asset acquisition does not constitute a business combination, the assets and liabilities are assigned a carrying amount based on their relative fair values in an asset purchase transaction and no deferred tax will arise in relation to the acquired assets and assumed liabilities as the initial recognition exemption for deferred tax under AASB 112 applies. The acquisition of an entity that meets the concentration test (AASB 2018-6) would be accounted for as an asset acquisition not a business combination. No goodwill will arise on the acquisition and transaction costs of the acquisition will be included in the capitalised cost of the asset. Assets acquired during the year were exploration expenditure. Estimates and judgement are required by the Group, taking into consideration all available information at the acquisition date, to assess the fair value of assets acquired, liabilities and contingent liabilities assumed.

b) Functional and presentation currency

The financial statements are presented in Australian dollars, which is Kali's functional and presentation currency.

c) Revenue

The Group recognises revenue as follows:

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

For personal use only

Note: Comparative figures have been restated to ensure consistency of presentation with current year format. The overall tax position has not changed.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

NOTE 4: INCOME TAX (CONTINUED)

Accounting Policy:

Kali Metals is not considered a base rate entity for income tax purposes for the 2024 income year and is therefore subject to income tax at a rate of 30% (2023: 25%). Kali was a member of the Kalamazoo Resources Limited ("KZR") tax consolidated group up to 29 December 2023.

NOTE 5: CASH AND RESTRICTED CASH

Additions	200,065	-
Depreciation charge for the year	(9,030)	-
Net carrying amount	191,035	-

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Accounting Policy

Each class of property, plant and equipment is carried at cost less, where applicable, any accumulated depreciation and impairment losses.

The Group's depreciation method applied to Property, plant and equipment is straight-line for useful life of 3-5 years.

NOTE 8: NON-CURRENT ASSETS – RIGHT OF USE ASSETS

	2024 \$	2023 \$
At cost – Right of use assets	276,599	-
Accumulated amortisation	(15,367)	-
Total Right of use of assets	261,232	-

Accounting Policy

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Company expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Company has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets.

NOTE 9: NON-CURRENT ASSETS – EXPLORATION AND EVALUATION ASSETS

	2024 \$	2023 \$
Exploration and evaluation assets	16,250,675	717,218
Capitalised cost at the beginning of the period	717,218	1,124,478
Tenements assets acquisition (i), (ii), and (iii)	9,018,989	-
Exploration expenditure incurred during the period	3,401,596	341,671
Impairment of exploration and evaluation assets	-	(748,931)
Capitalised cost at end of the period	13,137,803	717,218

Accounting Policy

Exploration and evaluation expenditure, including the costs of acquiring licences, are capitalised as exploration and evaluation assets on an area of interest basis. Costs incurred before the Company has obtained the legal rights to explore an area are recognised in the statement of profit or loss and other comprehensive income.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified from exploration and evaluation expenditure to mining property and development assets within property, plant and equipment and depreciated over the life of the mine.

Key Estimates, Judgments and Assumptions

Impairment of exploration and evaluation expenditure

The ultimate recoupment of the value of exploration and evaluation assets is dependent on the successful development and commercial exploitation, or alternatively, sale, of the exploration and evaluation asset.

Impairment tests are carried out on a regular basis to identify whether the asset carrying values exceed their recoverable amounts. There is significant estimation and judgement in determining the inputs and assumptions used in determining the recoverable amounts.

The key areas of judgement and estimation include:

- Recent exploration and evaluation results and resource estimates;
- Environmental issues that may impact on the underlying tenements; and
- Fundamental economic factors that have an impact on the planned operations and carrying values of assets and liabilities.

Carrying value of exploration and evaluation expenditure

The ultimate recoupment of costs carried forward for exploration and evaluation is dependent on the successful development and commercial exploitation or sale of the respective mining areas. The Company assessed the carrying value of its capitalised exploration and evaluation expenditure for indicators of impairment as at 30 June 2024 and concluded that impairment testing of the project was not triggered.

During the year the Company booked an impairment expense of \$nil (2023: \$748,931). This primarily related to a partial write down of the carrying value of the Pear Creek Project reflecting the Company's estimation of its recoverable value.

The Group entered into various acquisition agreements during the year, comprising the following:

- ***Marble Bar Project and DOM's Hill Project***

The Company entered into a tenement sale agreement with Kalamazoo for the acquisition of tenement and mineral rights related to the Marble Bar Project and DOM's Hill Project. The Company issued 37,862,900 of the Company's shares to Kalamazoo as part of the consideration paid for the tenement and mineral rights. The assets were transferred prior to Kali demerging from Kalamazoo. The acquisitions of the tenement and mineral rights were classified as a transfer within a controlled Group under AASB 10: Consolidated Financial Statements. In accordance with the applicable standard, the tenement and mineral rights were initially recognised and measured at cost. In this instance, the Company has applied the carrying value of the tenement assets at the date of transfer, which was \$576,774.

- ***Mansen Tenement***

The tenement sale agreement was originally entered on 17 October 2023. On 22 December 2023, the Company completed the tenement acquisition (P15/6778) from James Mansen as trustee for Wildcard (WA) Pty Ltd. Consideration paid as part of the tenement acquisition is \$75,000 cash plus 300,000 consideration shares at \$0.25 per share.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The acquisitions the Mansen tenement was deemed to be asset acquisition under AASB 6: Exploration for and Evaluation of Minerals Resources. Under an asset acquisition, the value of the assets acquired is allocated on a relative fair value approach. As the consideration for the assets was made through the issue of Consideration Shares and in the case of the Mansen Licence, an additional \$75,000 of cash consideration, this required the provisions of AASB 2: Share-Based Payments to be applied. The Company determined the fair value of the Consideration Shares to be equivalent to the Offer price of \$0.25. The fair value of the assets could not be estimated reliably and therefore, the value of the tenements and mineral rights acquired was accounted for at the purchase consideration implied by the fair value of the Consideration Shares plus cash consideration, totalling \$150,000.

- *Higginsville Lithium Project*

On 27 December 2023, the Company completed Share Sale transaction with Karora Group, whereby Avoca Mining Pty Ltd, a wholly owned subsidiary of Karora, has agreed to sell, and the Company has agreed to buy 100% interest in Karora Lithium Pty Ltd. Prior to the completion of the Share Sale transaction, Karora Lithium Pty Ltd entered into Mineral Rights Agreement with Karora Group's subsidiaries being Avoca Mining Pty Ltd, Avoca Resources Pty Ltd, Polar Metals Pty Ltd and, Corona Minerals Pty Ltd (together, the Grantors) which will grant the Higginsville Lithium Rights to Karora Lithium Pty Ltd prior to completion of the Share Sale Agreement. Under each Mineral Rights Agreement, Karora Lithium Pty Ltd has agreed to grant and pay each Grantor a 1% net smelter return royalty (Royalty) payable with respect to any Higginsville Lithium Rights (and any other minerals it is entitled to retain under the Mineral Rights Agreement) produced or extracted by Karora Lithium Pty Ltd or any of its Related Bodies Corporate in respect of their Relevant Tenements.

Management have assessed that the acquisition of Karora Lithium Pty Ltd (now Kali Lithium Pty Ltd) does not constitute a business and the acquisitions of Higginsville Lithium Rights were deemed to be an asset acquisition as it met the asset concentration test. Under the asset acquisition, the value of the assets acquired is allocated on a relative fair value approach. The fair value of the assets could not be reliably measured therefore the fair value of equity was used to determine the fair value of assets acquired. As the consideration for the assets was primarily made through the issue of 30,797,000 Consideration Shares, this required the provisions of AASB 2: Share-Based Payments to be applied. The Company determined the fair value of the Consideration Shares to be equivalent to the Offer price of \$0.25, totalling \$7,699,250.

Allocation to the net identifiable assets is as follows:

	Fair Value \$
<i>Consideration and Transaction costs</i>	
Fair Value of consideration share issued to vendor	7,699,250
Transaction costs capitalised	387,629
	8,086,879
<i>Allocation to the net identifiable assets is as follows</i>	
Assets	
Exploration and Evaluation Asset	8,086,879
	8,086,879

There were no other identifiable assets acquired or assumed liabilities. Refer to Note 16 for exploration commitments at reporting date.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

NOTE 10: TRADE AND OTHER PAYABLES

	2024 \$	2023 \$
Trade creditors	804,514	335,731
Other payables and accruals	601,496	12,000
	1,406,010	347,731

. The amounts are unsecured and are usually paid within 30 days of recognition.

NOTE 11: CURRENT LIABILITIES – BORROWINGS

	2024 \$	2023 \$
Loan – Kalamazoo Resources Limited ¹	-	1,481,365
Loan – Mostia Dion Nominees Pty Ltd ²	-	50,000
Loan – Karora Resources Inc. ³	-	50,000
	-	1,581,365

Accounting Policy:

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

¹ The Company's parent, Kalamazoo Resources Limited, has provided an interest free, unsecured loan with no set repayment date to the Company in order for the Company to meet its expenditure commitments on its tenements and working capital requirement. Kalamazoo loaned an additional \$410,000 during the period ended 31 December 2023. After receiving Kalamazoo shareholder approval on 18 December 2023, Kalamazoo and the Company entered a Deed of Forgiveness, resulting in repayment of borrowings of \$350,000 and the forgiveness of the remaining borrowing balance, being \$1,514,724.

² In addition, Mostia Dom Nominees Pty Ltd has provided an interest free, unsecured loan with no set repayment date to the Company. The loans were subsequently settled via issue of 400,000 ordinary share of the Company.

³ Karora Group provided an interest-free, unsecured loan with no set repayment date to the Company. During the period, Karora Group loaned an additional \$300,000. \$50,000 of the loans were subsequently settled via the issuance of 1,000,000 ordinary share of the Company, and the remaining balance of \$300,000 was repaid to Karora Group during the period.

Closing Balance at 30 June 2024	11,970,632	771,823

¹ During the period, the Company issued 5,738,081 Tranche A incentive performance rights (KM1PRA) and 5,738,081 Tranche B incentive performance rights (KM1PRB) to directors and employees. Subsequently, one of the employees resigned, and 605,530 performance rights held by the employee were cancelled on 5 April 2024.

² On 8 January 2024, the Company granted 901,813 Tranche A incentive performance rights (KM1PRA) and 901,812 Tranche B incentive performance rights (KM1PRB) to an employee. The employee subsequently resigned, and these performance rights were cancelled on 7 June 2024.

³ On 12 March 2024, the Company granted 550,000 Tranche A incentive performance rights (KM1PRA36) and 550,000 Tranche B incentive performance rights (KM1PRB60) to an employee and consultant.

The above performance rights have the following vesting conditions:

- Tranche A Incentive Performance Rights will vest on the date the Company announces a JORC Code compliant indicated resource estimate of an aggregate of at least 10Mt of lithium at a minimum grade of 1% Li₂O across any of its projects within 36 months from the date of issue; and
- Tranche B Incentive Performance Rights will vest on the date the Company announces a JORC Code compliant indicated resource estimate of an aggregate of at least 30Mt of lithium at a minimum grade of 1% Li₂O across any of its projects within 60 months from the date of issue.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The fair value of the Performance Rights has been calculated using the share price at valuation date. The key inputs used for the valuation are detailed below:

	Tranche A (KM1PRA)	Tranche A (KM1PRB)	Tranche A (KM1PRA)	Tranche A (KM1PRB)	Tranche 1 (KM1PRA36)	Tranche 2 (KM1PRB60)
Number of performance rights	5,738,081	5,738,081	901,813	901,812	550,000	550,000
Grant date	29 Dec 2023	29 Dec 2023	8 Jan 2024	8 Jan 2024	12 Mar 2024	12 Mar 2024
Underlying share price	\$0.25	\$0.25	\$0.25	\$0.25	\$0.44	\$0.44
Value per right	\$0.25	\$0.25	\$0.25	\$0.25	\$0.44	\$0.44
Total Fair Value	\$1,434,520	\$1,434,520	\$225,453	\$225,453	\$242,000	\$242,000

○ **Recognised share-based payment expense**

	2024
	\$
Expense arising from performance rights settled share-based payment transactions	771,824

NOTE 14: EARNING PER SHARE

Basic earnings per share amounts are calculated by dividing net profit/(loss) for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year. The following reflects the income and share data used in the total operations basic and diluted earnings per share computations:

	2024	2023
	\$	\$
Basic and diluted profit/(loss) per share		
Basic and diluted profit/(loss) per share (cents per share)	(1.44)	(10,681)
Profit/(Loss)		
Profit/(loss) used in the calculation of basic and diluted earnings per share is as follows:		
Profit/(Loss) for the period	(1,042,852)	(1,068,132)
Weighted average number of ordinary shares		
Weighted average number of ordinary shares outstanding during the period used in calculating basic and diluted EPS	72,240,634	100

Note: Non-dilutive securities – As at balance date 3,990,321 unlisted options which represent potential ordinary shares were not considered dilutive for the purpose of calculating the diluted loss per share for the year ended 30 June 2024 as they would decrease the loss per share.

NOTE 15: DIVIDENDS

There were no dividends declared or paid during the financial period.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

NOTE 16: COMMITMENTS AND CONTINGENT ASSET AND LIABILITIES

Commitments

In order to maintain an interest in the exploration tenements in which the Company is involved, the Company is committed to meet the conditions under which the tenements were granted. The timing and amount of exploration expenditure commitments and obligations of the Company are subject to the minimum expenditure commitments required as per the *Mineral Resources (Sustainable Development) Act 1990* (Victoria), the *Mining Act 1978* (Western Australia) and the *Mining Act 1992* (NSW), and these may vary significantly from the forecast based upon the results of the work performed which will determine the prospectivity of the relevant area of interest.

These obligations are not provided for in the financial report and are payable as follows:

	2024	2023
	\$	\$
<i>Exploration expenditure</i>		
Within one year	3,197,254	615,940
After one year but not more than five years	1,622,281	2,120,577
Greater than five years	1,451,675	Nil
	6,271,210	2,736,517

If the Company decides to relinquish certain exploration tenements and/or does not meet these obligations, assets recognised in the statement of financial position may require review to determine the appropriateness of carrying values. The sale, transfer or farm-out of exploration rights to third parties will reduce or extinguish these obligations.

On 29 December 2023, the Group completed a Share Sale transaction with Karora Group, whereby Avoca Mining Pty Ltd, a wholly owned subsidiary of Karora, has agreed to sell, and the Group has agreed to buy 100% interest in Karora Lithium Pty Ltd ("Karora Lithium"). Prior to the completion of the Share Sale transaction, Karora Lithium entered into a Mineral Rights Agreement with Karora Group's subsidiaries being Avoca Mining Pty Ltd, Avoca Resources Pty Ltd, Polar Metals Pty Ltd and, Corona Minerals Pty Ltd (together, the **Grantors**) which will grant the Higginsville Lithium Rights to Karora Lithium prior to completion of the Share Sale Agreement. Each Mineral Rights Agreement continues until the relevant Higginsville Lithium Rights have been relinquished or the relevant tenements have expired or otherwise terminated. The Grantor cannot relinquish a tenement, or part of it, without first offering the relevant area to Karora Lithium for no consideration. Under each Mineral Rights Agreement, Karora Lithium has agreed to grant and pay each Grantor a 1% net smelter return royalty (**Royalty**) payable with respect to any Higginsville Lithium Rights (and any other minerals it is entitled to retain under the Mineral Rights Agreement) produced or extracted by Karora Lithium or any of its Related Bodies Corporate in respect of their Relevant Tenements.

For personal use only

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Contingencies

On 27 December 2023, the Company completed Share Sale transaction with Karora Group, whereby Avoca Mining Pty Ltd, a wholly owned subsidiary of Karora, has agreed to sell, and the Company has agreed to buy 100% interest in Karora Lithium Pty Ltd. Prior to the completion of the Share Sale transaction, Karora Lithium Pty Ltd entered into Mineral Rights Agreement with Karora Group's subsidiaries being Avoca Mining Pty Ltd, Avoca Resources Pty Ltd, Polar Metals Pty Ltd and, Corona Minerals Pty Ltd (together, the Grantors) which will grant the Higginsville Lithium Rights to Karora Lithium Pty Ltd prior to completion of the Share Sale Agreement. Under each Mineral Rights Agreement, Karora Lithium Pty Ltd has agreed to grant and pay each Grantor a 1% net smelter return royalty (Royalty) payable with respect to any Higginsville Lithium Rights (and any other minerals it is entitled to retain under the Mineral Rights Agreement) produced or extracted by Karora Lithium Pty Ltd or any of its Related Bodies Corporate in respect of their Relevant Tenements.

As at the reporting date, there has been no other material change in the commitments and contingencies since 30 June 2024.

NOTE 17: RELATED PARTY DISCLOSURE

Parent entity

The Company was a wholly owned subsidiary of Kalamazoo Resources Limited. The Company received conditional approval from the ASX for admission on 20 December 2023, and subsequently on 29 December 2023, the Company demerged from Kalamazoo Resources Limited.

Subsidiaries

Interests in subsidiary are set out in Note 18.

Loans from related parties

The Company's previous parent entity, Kalamazoo Resources Limited, has provided an interest free, unsecured loan with no set repayment date to the Company in order for the Company to meet its expenditure commitments on its tenements and working capital (refer Note 16). The Company received conditional approval from the ASX for admission on 20 December 2023, and subsequently on 22 December 2023, the Company entered into a formal Deed of Forgiveness with Kalamazoo whereby \$350,000 was repaid back to Kalamazoo and the remaining loan balance was forgiven.

Other related party transactions

The Company entered into a sub-lease agreement with Golden Horse Minerals (Aust) Pty Ltd ("Golden Horse"), of which Mr Sloan is a director. The sub-lease agreement covered office rent, variable outgoings, and common office-related expenses up to the end of February 2024. The total amount paid to Golden Horse for the financial year ended 30 June 2024 is \$40,335.

In May 2024, the Company leased a new head office at 34 Colin Street, West Perth, WA, and simultaneously entered into a sub-lease agreement with Golden Horse. Under this agreement, Golden Horse will pay the Company \$5,000 (excluding GST) per month to lease a portion of the head office. The total amount received from Golden Horse for the financial year ended 30 June 2024 was \$5,879, which includes the monthly rent and its share of office amenities.

During the financial year, Makalu Capital Pty Ltd, of which Mr Adams is a director, received \$28,621 for geological consulting services provided to the Company.

Total	21,896,689	(1,102,587)

NOTE 20: RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

Risk management is carried out by the full Board of Directors as the Group believes that it is crucial for all board members to be involved in this process. The Board of Directors, with the assistance of advisors as required, has responsibility for identifying, assessing, treating and monitoring risks.

The Group is not subject to any externally imposed capital requirements.

a) Market risk

i) Foreign exchange risk

As all operations are currently within Australia, the Group is not exposed to any material foreign exchange risk.

ii) Commodity price risk

Given the current level of operations the Group is not exposed to commodity price risk.

iii) Interest rate risk

The Group is exposed to movements in market interest rates on cash and cash equivalents. The Group policy is to monitor the interest rate yield curve out to 120 days to ensure a balance is maintained between the liquidity of cash assets and the interest rate return. The risk is not material and sensitivity analysis does not result in a material effect on Group results or financial position.

b) Credit risk

The maximum exposure to credit risk at reporting date is the carrying amount (net of provision for impairment) of those assets as disclosed in the statement of financial position and notes to the financial statements. The only significant concentration of credit risk for the Group is the cash and cash equivalents held with financial institutions. All material deposits are held with the major Australian banks for which the Board evaluate credit risk to be minimal.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

c) Liquidity risk

The Group manages liquidity risk by continuously monitoring forecast and actual cash flows and ensuring sufficient cash is available to meet the current and future commitments of the Group. Due to the nature of the Group's activities, being mineral exploration, the Group does not have ready access to credit facilities. The financial liabilities of the Group are confined to trade and other payables and borrowings as disclosed in the statement of financial position.

The table below reflects an undiscounted contractual maturity analysis for financial liabilities. The timing of cash flows presented in the table to settle financial liabilities reflects the earliest contractual settlement dates.

	Less than six months \$	Total contractual cash flows \$	Carrying amount \$
2024			
Trade and other payables	1,406,011	1,406,011	1,406,011
Lease liabilities	263,125	263,125	263,125
	1,669,136	1,669,136	1,669,136
2023			
Trade and other payables	347,731	347,731	347,731
Borrowings	-	1,581,365	1,581,365
	347,731	1,929,096	1,929,096

d) Fair value estimation

There were no financial assets or liabilities at 30 June 2024 requiring fair value estimation and disclosure as they are either not carried at fair value or, in the case of short-term financial assets and financial liabilities, their carrying values approximate fair value. The carrying amounts and estimated fair values of financial assets and financial liabilities are as follows:

	2024 \$	2023 \$
Financial assets		
Cash and cash equivalents	3,011,924	91,931
Restricted cash	6,615,155	-
	9,627,079	91,931
Financial liabilities		
Trade and other payables	1,406,011	347,731
Borrowings	-	1,581,365
Lease liabilities	263,125	-
	1,669,136	1,929,096

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The methods and assumptions used to estimate the fair value of financial instruments are outlined below:

Cash

The carrying amount is fair value due to the liquid nature of these assets.

Payables

Due to the short-term nature of these financial rights and obligations, their carrying amounts are estimated to represent their fair values.

Fair value hierarchy

The Company classifies assets and liabilities carried at fair value using a fair value hierarchy that reflects the significance of the inputs used in determining that value. The following table analyses financial instruments carried at fair value by the valuation method. The different levels in the hierarchy have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Non-cash share issue costs: Options issued to Joint Lead Managers as disclosed at Note 13(b)	403,022	-
Net cash used for capital raising costs	<u>(1,837,245)</u>	<u>-</u>

NOTE 23: SEGMENT INFORMATION

The Company operates in one geographical segment, being Australia and in one operating category, being mineral exploration. Therefore, information reported to the chief operating decision maker (the Board of Kali Metals Limited) for the purposes of resource allocation and performance assessment is focused on mineral exploration within Australia. The Board has considered the requirements of AASB 8: *Operating Segments* and the internal reports that are reviewed by the chief operating decision maker in allocating resources and have concluded at this time that there are no separately identifiable segments

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

NOTE 24: EVENTS AFTER THE REPORTING PERIOD

Mr Paul Adams, then current Non-Executive Director of Kali Metals, was appointed as Kali's new Managing Director, effective from 1 July 2024. Mr Adams has over 20 years of mining industry experience, including exploration, operational roles, and equities research focused on small to mid-cap resource companies. At the time of appointment he was an Executive Director at Kalamazoo Resources Limited, a major shareholder in Kali, and a Non-Executive Director at Meeka Metals Limited. Mr Adams previously served as Managing Director of Spectrum Metals Ltd. Mr Adams has a Geology Degree (Honors) from Derbyshire University and a Graduate Diploma in Applied Finance and Investment.

Mr Graeme Sloan, Kali Metals inaugural Managing Director, transitioned to Non-Executive Director on 1 July 2024.

Mr Mladen Stevanovic was appointed as the Company's new Exploration Manager on 22 July 2024. With nearly 20 years of international experience across lithium, gold, copper, nickel, and base metals, Mr Stevanovic has led exploration teams responsible for significant discoveries in Europe, Australia, and Africa, and provided technical expertise for Adriatic Metals' acquisition and start-up. He has served as Chief Geologist at Gorno polymetallic mine, Principal Geologist for Gold Fields, and Exploration Manager at Liatam Mining, where he worked on the Bald Hill Lithium and Tantalum Mine. Mr Stevanovic holds advanced degrees in geology and currently serves as a Non-Executive Director at Lykos Metals.

Frankfurt Stock Exchange

Kali dual listed on the Frankfurt Stock Exchange (Open Market) in July 2024 under the ticker code 6OB, broadening its investor base and enhancing its visibility in European markets. The Frankfurt Stock Exchange is Europe's third-largest and the world's twelfth-largest by market cap. To support its promotional efforts, Kali has engaged AXINO Media GmbH, a German investor relations group, known for assisting Australian companies in boosting trading volumes on the Frankfurt Exchange. Kali looks forward to welcoming new European investors.

Spargoville Phase 1 Drill Results

The results from the Phase 1 drilling program were announced post-reporting period. The maiden drill program has been fundamental to expanding the Company's knowledge of the geological setting at the Flynn-Giles and Green Flame prospects, and the Spargoville Project more broadly. The results from the first phase of RC drilling have provided the Company with lithium mineralised drill intersections containing Spodumene and significant information to assist in understanding the geology of the host rocks, the nature of the pegmatite systems within the Spargoville Project and facilitate the identification of targets for future drilling programs.

No other matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial periods.

CONSOLIDATED ENTITY STATEMENT AS AT 30 JUNE 2024

CONSOLIDATED ENTITY STATEMENT AS AT 30 JUNE 2024

Entity name	Entity Type	Body corporates		Tax Residency
		Place formed/incorporated	% of share capital held	
Kali Metals Limited	Body corporate	Australia	N/A	Australia
Kali Lithium Pty Ltd	Body corporate	Australia	100%	Australia

Basis of Preparation

This Consolidated Entity Disclosure Statement (CEDS) has been prepared in accordance with the Corporations Act 2001. It includes certain information for each entity that was part of the consolidated entity at the end of the financial year.

Determination of Tax Residency

Section 295 (3A) of the Corporation Acts 2001 defines tax residency as having the meaning in the Income Tax Assessment Act 1997. The determination of tax residency involves judgement as there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency. It should be noted that the definitions of 'Australian resident' and 'foreign resident' in the Income Tax Assessment Act 1997 are mutually exclusive. This means that if an entity is an 'Australian resident' it cannot be a 'foreign resident' for the purposes of disclosure in the CEDS.

In determining tax residency, the consolidated entity has applied the following interpretations:

- **Australian tax residency**

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance in Tax Ruling TR 2018/5.

- **Foreign tax residency**

Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in determining tax residency and ensure compliance with applicable foreign tax legislation.

DIRECTORS' DECLARATION

The Directors of the Company declare that:

- (a) The financial statement and notes are in accordance with the *Corporations Act 2001*, and:
 - (i) Complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements;
 - (ii) Give a true and fair view of the financial position as at 30 June 2024 and of the performance for the period ended on that date; and
 - (iii) Are in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board, as stated in Note 2 to the financial statements.
- (b) In the directors' opinion, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable;
- (d) The Directors have been given the declarations by the Managing Director and Chief Financial Officer as required by section 295A of the *Corporations Act 2001*.
- (e) The information disclosed in the attached consolidated entity disclosure statement is true and correct.

This declaration is made in accordance with a resolution of the Board of Directors and is signed on behalf of the Directors by:

Paul Adams
Managing Director

Perth, Western Australia
27 September 2024

INDEPENDENT AUDITOR'S REPORT

To the members of Kali Metals Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Kali Metals Limited (the Company) and its subsidiary (the Group), which comprises the consolidated statement of financial position as at 30 June 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2024 and of its financial performance for the year ended on that date; and
- (ii) Complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Accounting for Exploration & Evaluation Assets

Key audit matter	How the matter was addressed in our audit
<p>At 30 June 2024, the Group held a significant carrying value of capitalised exploration and evaluation expenditure as disclosed in Note 9 to the Financial Report.</p> <p>As the carrying value of the capitalised exploration expenditure represents a significant asset of the Group, we considered it necessary to assess whether any facts or circumstances exist to suggest that the carrying amount of this asset may exceed its recoverable amount.</p> <p>Judgment is applied in determining the treatment of exploration and evaluation expenditure costs in accordance with Australian Accounting Standard AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i> (“AASB 6”). In particular:</p> <ul style="list-style-type: none"> • Which elements of exploration and evaluation expenditures qualify for recognition; and • Whether facts and circumstances indicate that the exploration and evaluation assets should be tested for impairment. 	<p>Our procedures included, but were not limited to the following:</p> <ul style="list-style-type: none"> • Reviewing management’s assessment of the accounting treatment of tenements acquired against the requirements of the Group’s accounting policy; • Assessing the fair value of exploration assets acquired by way of share-based payment at acquisition date; • Obtaining a schedule of the areas of interest held by the Group and assessing whether the rights to tenure of this area of interest remained current at balance date, which included obtaining and assessing supporting documentation such as license status records; • Considering the Group’s intention to carry out significant ongoing exploration programmes in the areas of interest by holding discussions with management, and reviewing the Group’s exploration budgets, ASX announcements and directors’ minutes; • Considering whether the areas of interest had reached a stage where a reasonable assessment of economically recoverable reserves existed; • Considering whether any facts or circumstances existed to suggest impairment testing was required; • Verifying, on a sample basis, exploration and evaluation expenditure capitalised during the year for compliance with the recognition and measurement criteria of AASB 6; and • Assessing the adequacy of the related disclosures in Note 9 to the Financial Report.

Other information

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 30 June 2024, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- a) the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and
- b) the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*; and

for such internal control as the directors determine is necessary to enable the preparation of:

- i) the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- ii) the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website (<http://www.auasb.gov.au/Home.aspx>) at:

https://www.auasb.gov.au/admin/file/content102/c3/ar1_2020.pdf

This description forms part of our auditor's report.

Report on the Remuneration Report

Opinion on the Remuneration Report

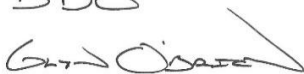

We have audited the Remuneration Report included in pages 31 to 37 of the directors' report for the year ended 30 June 2024.

In our opinion, the Remuneration Report of Kali Metals Limited, for the year ended 30 June 2024, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
