Hillgrove Delivers 13% Increase in Copper for the Quarter

Operational Update:

- Copper production increases by 13%, the third quarter in a row
- Underground mined tonnes delivered to the plant improved by 33%
- Production drilling improved by 64%, Kanmantoo is at the required production metres for full production

Commenting on the third quarter improvements, Hillgrove’s Managing Director, Bob Fulker stated:

“In my first full quarter as Managing Director it is pleasing to see both produced copper tonnes and mined tonnes delivered to the surface heading toward full production rates, additionally, the improved production drilling and development metres will enable the delivery of the coming quarters’ production.”

September 2024 Quarter Results Investor Call

Hillgrove Resources will host an investor update conference. Date, time and registration details for the **Conference Call** will be released on the ASX platform closer to the date.

End
