CDE SAND PLANT VISIT

Dome’s Chairman and fellow Director Mr Tsubata were invited to inspect an operating sand plant to gain a practical understanding of the type of plant that could be used at Sigatoka (see Plates 1 and 2). The plant was designed and constructed by CDE Global Australia Pty Ltd.

At its Sigatoka project, Dome proposes to recover magnetite concentrate as well as construction sand and gravel products using similar sand washing and screening processes.

SIGATOKA (SPL1495) Updates

DFS And EIA Progress

Work on studies needed to complete the Sigatoka Feasibility Study have continued during the September quarter.

The Sigatoka Environmental Impact Assessment (EIA) report has been fully compiled in accordance with the Terms of Reference set out by the Fiji Department of Environment. This critical study is currently being scrutinised to ensure it meets the requirements of the DOE before submission. The EIA report along with the feasibility study are important parts of an application for a Mining Lease at Sigatoka.

Emergency De-silting and Dredging Works for Flood Mitigation Purposes

On August 10th the Ministry of Agriculture and Waterways (MAW) placed an advertisement for Expressions of Interest (EOI) for “Emergency Rivers/Creeks Desilting Works for Flood Mitigation Purpose”. Dome immediately submitted its EOI and is currently awaiting a response from the works committee.

ABOUT DOME

Dome is an Australian mining company that listed on the ASX on the 22 October 2013. The Company is focussed on gold, copper and iron and industrial sands in Fiji, where it holds three highly prospective exploration tenements. Dome's objective is to become a major force in the mining industry of Fiji by the discovery and development of mineral resources within its Fijian tenements.

Sigatoka is a heavy mineral sand project containing abundant magnetite. Drilling to establish an initial resource estimate for the project has been completed, and final stages of a definitive feasibility study are now underway. Commencement of production at Sigatoka by conventional sand mining and wet processing is anticipated.

Dome's other projects are the Ono Island epithermal gold project, where an initial exploration diamond drilling was completed in early July 2018, and the Nadrau project, where additional exploration programs for copper-gold porphyry deposits are warranted.

Dome's Board and Management team has a high level of experience in Fiji, and the Company has been actively exploring in Fiji since 2008.
