

## Megado to Acquire Major European Copper Project

### HIGHLIGHTS

- Agreement executed to acquire an 80% interest in a major European Copper Project
- Project consists of 12 permits (under application) covering an area of 956km<sup>2</sup> of historically copper producing strata along approximately 200km of strike E-W
- Assay results from rock fragments taken from former operating mine include 9.66% Cu and 141g/t Ag (Refer table 2 below)
- Copper is a strategic critical mineral under the EU's 2024 Critical Raw Materials Act
- Megado to issue 175m ordinary shares for 80% of Iberian Copper Pty Ltd which in turn owns 100% of the Project
- An additional two tranches of 175m performance rights to be allotted with Mineral Resource Estimate based milestones
- Issue of securities in connection with the transaction are subject to shareholder approval
- Non-renounceable rights issue on a one for two ordinary share basis at 1.2c per ordinary share to be completed
- Non-brokered 38m share placement to be completed at 1.2c per share with a further 12m shares to be issued, subject to shareholder approval

**Megado Minerals Limited** (ASX: **MEG**) (**Megado** or the **Company**) is pleased to advise it has entered into an agreement to acquire an 80% interest in Iberian Copper Pty Ltd (**ICPL**) (the **Acquisition**) which in turn owns a 100% interest in Iberian Copper SL that owns the Iberian Copper Project (the **Project**). The issue of securities in connection with the Acquisition is subject to shareholder approval.

The Company is also pleased to initiate a non-renounceable pro rata rights issue on a one for two fully paid ordinary share (**Share**) basis at 1.2c per Share (**Entitlement Offer** or **Rights Issue**). In addition to the Entitlement Offer, the Company has secured commitments for a placement of 50m Shares at 1.2c per Share, in two tranches (**Placement**). With the first tranche of 38m Shares to be issued utilising the Company's available placement capacity under Listing Rule 7.1 and a further 12m Shares to be issued, subject to shareholder approval.

### Iberian Copper Project Overview

The Project is located in Northern Spain in the provinces of Navarra and Aragón (refer Figure 1 below). The Project includes 12 permits (under application) covering an area of 956km<sup>2</sup> (refer Table 1 below).

The Project is targeting the North Spanish Oligocene region that saw copper oxide mining activity through to the 1970s. The permits contain at least 12 historic copper mines with over 50 copper occurrences established in an exploration program completed in the 1970s by the Spanish Government and Asturiana de Zinc (now Glencore) (refer Figure 2 below). The copper occurrences recorded were copper oxides in sandstones and conglomerates. The Project is likely to include multiple targets with the possibility of more than one discrete project. A works program is being developed to establish multiple high priority targets for drilling activities.

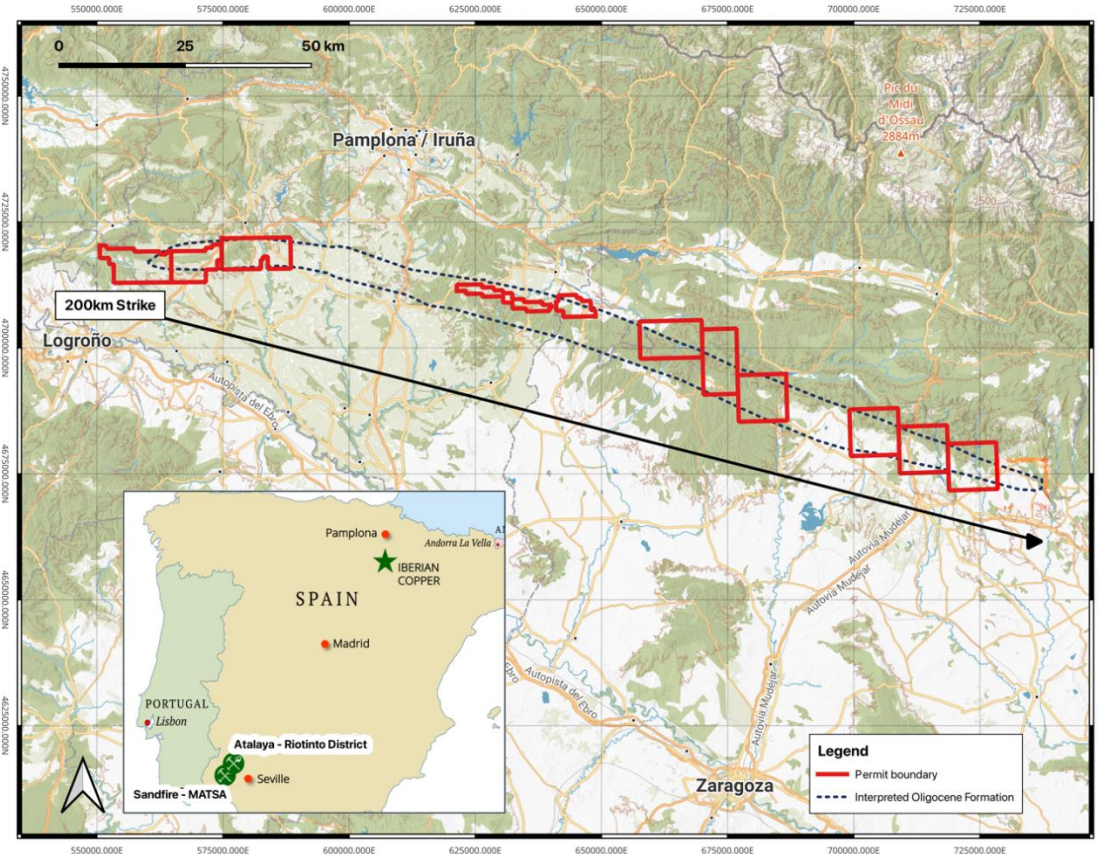

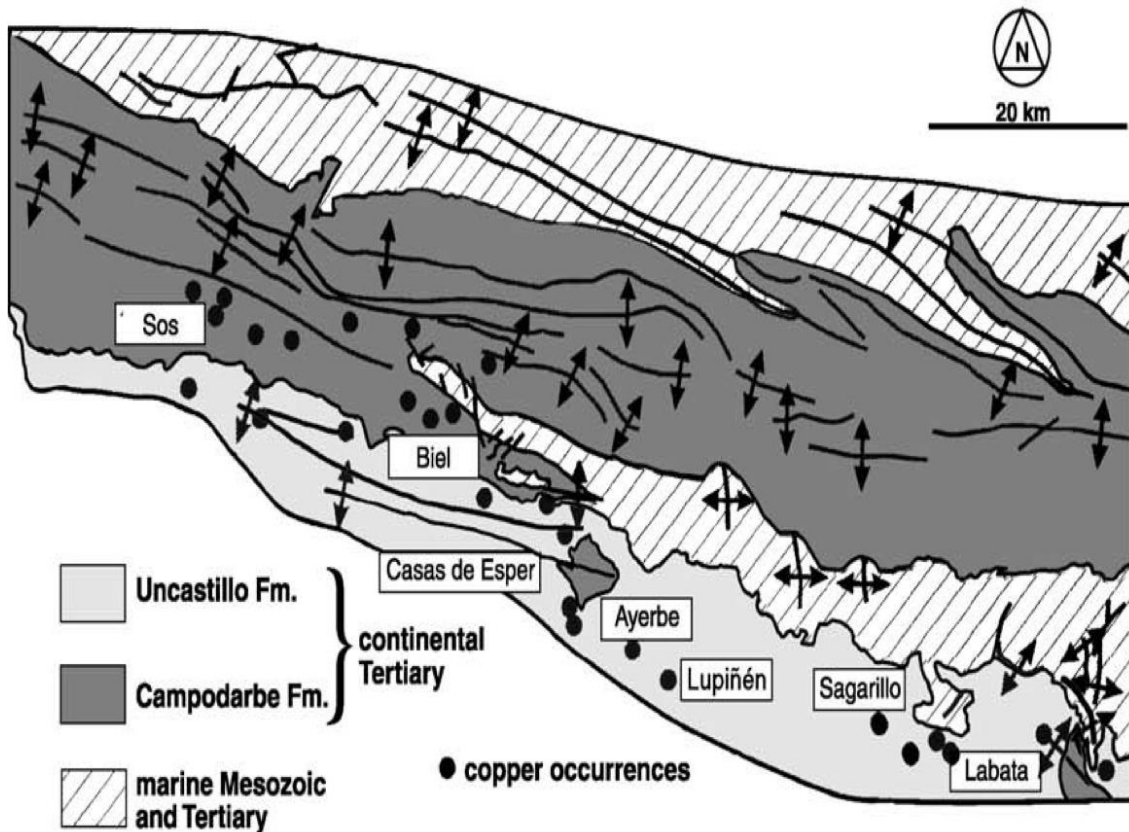

Figure 1 - Map showing location of permits and Oligocene Formation

Table 1 - Table showing permit details

| Permit Name | Region  | Permit Type   | Km <sup>2</sup> | Interest |
|-------------|---------|---------------|-----------------|----------|
| ESLAVA      | Navarra | Investigation | 84.3            | 100%     |
| ETAYO       | Navarra | Investigation | 59.1            | 100%     |
| SOLANA      | Navarra | Investigation | 86.7            | 100%     |
| CÁSEDA      | Navarra | Investigation | 34.5            | 100%     |
| ARÁS        | Aragón  | Investigation | 27.3            | 100%     |
| QUITERIA    | Aragón  | Exploration   | 97.2            | 100%     |
| BIEL        | Aragón  | Exploration   | 94.5            | 100%     |
| MURILLO     | Aragón  | Exploration   | 94.5            | 100%     |
| LA SOTONERA | Aragón  | Exploration   | 94.5            | 100%     |
| SABAYÉS     | Aragón  | Exploration   | 94.5            | 100%     |
| CASTILSABÁS | Aragón  | Exploration   | 94.5            | 100%     |
| LABATA      | Aragón  | Exploration   | 94.5            | 100%     |
|             |         | <b>Total</b>  | <b>956.1</b>    |          |

Subías et al, 2003 - *A model for the diagenetic formation of sandstone-hosted copper deposits in Tertiary sedimentary rocks, Aragón (NE Spain): S/C ratios and sulphur isotope systematics.*

**Exploration Results**

Modest rock fragment sampling was completed in July 2024 designed to test relevant element and oxide grades from the former St Emilia operating mine (refer figure 3). Two samples were taken with one weighing 2.1kgs and the other weighing 377g. The samples were sent to SGS Labs in Huelva, Spain for crushing, pulverizing and splitting before being sent to SGS Labs in Lakefield, Canada for geochemical assessment. Select results are shown in Table 2 below. A full summary of results is shown in Appendix 1.

**Table 2 - Select results from rock chip sampling from St Emilia historic mine**

| Select Assay Results from two rock chip samples |      |                     |                     |
|---|------|---------------------|---------------------|
| Element   | Unit | Emilia Escombrera 2 | Emilia Escombrera 3 |
| Cu  | %    | 9.66                | 1.51                |
| Ag  | g/t  | 141                 | 12                  |

## EU Initiatives to Support Critical Minerals' Projects

On 23 May 2024, the European Critical Raw Materials Act (the **Act**) came into force. The legislation is designed to enhance the EU's capabilities in sourcing, processing and recycling critical raw materials. The EU has identified 34 critical minerals. It has also identified a subset of 17 critical minerals referred to as "strategic" raw materials. This list includes copper.

Under the Act, the EU is targeting at least 10% of its annual consumption for internal EU extraction and at least 40% of its annual consumption for internal EU processing. Selected strategic projects that include strategic raw materials are legislated to benefit from support for access to finance and shorter permitting timeframes (a maximum of 27 months for extraction projects).

In addition to the above, the Spanish Government has grant schemes for critical minerals' projects and the European Investment Bank has project finance support initiatives.

## Acquisition Terms

Subject to the receipt of shareholder approval for the issue of the consideration securities in connection with the Acquisition, Megado intends to complete a share swap with the current shareholders of ICPL (**Vendors**) to acquire 80% of the fully paid ordinary shares in ICPL. As consideration for the Acquisition, Megado will pay the following consideration to the Vendors (collectively, the **Consideration Securities**):

1. 175m Shares in Megado;
2. 175m Class A Performance Rights; and
3. 175m Class B Performance Rights.

The Performance Rights will be converted into Shares on a one for one basis subject to the achieving Project related milestones. The milestones for the Performance Rights are:

1. Class A Performance Rights

The Iberian Copper Project recording a total JORC Code compliant Mineral Resource Estimate of at least:

- a. 10m tonnes of 1% Cu equivalent; or
- b. 5m tonnes of 1.5% Cu equivalent; or
- c. 3m tonnes of 3% Cu equivalent.

2. Class B Performance Rights

The Iberian Copper Project having a total JORC Code compliant Mineral Resource Estimate with at least 200,000 tonnes of contained copper equivalent.

The Performance Rights expire if the milestones are not achieved within five years from the date of completion of the Acquisition (**Sunset Date**).

Following completion of the Acquisition, the Vendors will retain a 20% free carry in ICPL until the Company's Board makes a final investment decision to commence construction of a mine, following which, standard dilution terms will apply. If the Vendors' do not provide funding pro rata to their interest in ICPL and their interest in ICPL is diluted to 10% or less then the Company will have the option to acquire their interest in exchange for granting a 2.0% net smelter return royalty over the Iberian Copper Project.

In addition to the above consideration, Megado has agreed to pay \$100,000 to the Vendors to cover some of their expenses incurred to date in progressing the Project.

The Company notes that Directors Anthony Hall and Aaron Bertolatti are non-controlling shareholders of ICPL, with Mr Hall holding approximately 7.7% and Mr Bertolatti holding approximately 4.8% of the shares on issue in ICPL. Both Mr Hall and Mr Bertolatti will, subject to shareholder approval, receive Consideration Securities in proportion to their holdings in ICPL.

## Corporate Initiatives to Support Acquisition

### Non-renounceable Rights Issue

A non-renounceable rights issue will be undertaken on a one Share for every two Share basis at a Share price of 1.2c to raise up to A\$1,526,733 (before costs) (**Entitlement Offer**). A total of 127,227,779 shares may be issued. Shareholders who are eligible with registered addresses inside Australia, New Zealand, Canada and Spain as at 5.00pm AWST on 11 November 2024 will be entitled to participate in the Entitlement Offer.

The share price of 1.2c is a 29.4% discount to the last traded share price and a 25.3% discount to the 20 day VWAP.

The key dates are set out below:

| Date             | Action   |
|------------------|--|
| 5 November 2024  | Announcement of non-renounceable rights issue          |
| 5 November 2024  | Lodgement of Prospectus with ASIC and ASX              |
| 8 November 2024  | Shares quoted on an "Ex" basis                         |
| 11 November 2024 | Record date to determine entitlements                  |
| 12 November 2024 | Issue of Placement Shares                              |
| 14 November 2024 | Relevant documents dispatched to eligible shareholders |
| 22 November 2024 | Last day to extend the Entitlement Offer               |
| 27 November 2024 | Closing date for acceptance of offer and payment       |
| 4 December 2024  | Announcement of results                                |
| 4 December 2024  | Issue of new Shares pursuant to the Entitlement Offer  |
| 9 December 2024  | Holding statements dispatched to shareholders          |

The dates are indicative only and may change.

A shortfall may arise if the aggregate of the total valid applications received for Shares under the Entitlement Offer is less than the total number of Shares offered under the Entitlement Offer (**Shortfall Shares**). The Board has appointed Oracle Capital Pty Ltd and Corporate Advisory Pty Ltd to help place the Shortfall Shares on a best endeavours basis. Neither will receive any fees from the Company for performing this function. The Company will have a period of three months from the closing date to place the Shortfall Shares.

### Non-brokered Placement

The Company has binding commitments to complete a non-brokered 50m share placement (**Placement**) on the following terms:

- a total of 50m Shares (**Placement Shares**) to be issued at 1.2c per Share representing a 29.4% discount to the Company's last traded price on 31 October 2024;
- 38m Placement Shares to be issued under Company's 15% capacity under ASX Listing Rule 7.1;

- 12m Placement Shares to be issued to the Directors or their nominees subject to shareholder approval; and
- Expected issue of placement shares on 12 November 2024.

The purpose of the Placement is to progress exploration activities on the Iberian Copper Project. The only costs of the Placement relate to ASX listing fees for the new 50m Shares. The participants in the Placement will not be eligible to participate in the Entitlement Offer.

#### Director, Management and Consultant Options

It is proposed to issue the following options to Directors (**Director Options**). The options will be unlisted with and will have an exercise price of 3.5c and an expiry date of five years from the issue date.

|                    |            |
|--------------------|------------|
| - Anthony Hall     | 10,000,000 |
| - Aaron Bertolatti | 6,000,000  |
| - Bradley Drabsch  | 2,000,000  |

The issue of the Director Options will be subject to shareholder approval.

In addition, the Company will also seek shareholder approval to issue 20,000,000 unquoted options (on the same terms as the Director Options) to in-country management and non-related consultants of the Company (**Management and Consultant Options**).

Further details in respect of the Director Options and the Management and Consultant Options will be provided in the relevant Notice of Meeting.

#### Pro forma capital structure

The Company's pro forma capital structure based on the effect of the Acquisition, Placement, Rights Issue, Director Options and Management and Consultant Options is as follows:

|   | Ordinary Shares    | Options           | Performance Rights |
|---|--------------------|-------------------|--------------------|
| Existing on Issue                           | 254,455,558        | 31,000,000        | -                  |
| Acquisition                                 | 175,000,000        | -                 | 350,000,000        |
| Non-renounceable Rights Issue               | 127,227,779        | -                 | -                  |
| Non-brokered Placement                      | 50,000,000         | -                 | -                  |
| Director, Management and Consultant Options | -                  | 38,000,000        | -                  |
| <b>Total</b>                                | <b>606,683,337</b> | <b>69,000,000</b> | <b>350,000,000</b> |

#### Chairman Change

Effective 5 November 2024, Anthony Hall is to replace Bradley Drabsch as Chairman of the Company. Mr Hall's remuneration will not change. Mr Drabsch will remain on the Board as a non-executive director remunerated at A\$2,500 per month.

#### **Extraordinary General Meeting to Approve Transaction**

The Directors of Megado expect to convene an Extraordinary General Meeting of the members of the Company in mid-December 2024 or early January 2025. At this meeting, it is expected that the members will vote on the issues of securities in connection with the Acquisition, as well as the second tranche of the Placement, as described above.

**Competent Person Statement**

The information in this release that relates to Exploration Results is based on information compiled by Mr Fernando Palero. Mr Palero is the chief geologist of Iberian Copper Pty Ltd. Mr Palero is a licensed professional geologist in Spain and is a registered member of the European Federation of Geologists, an accredited organisation to which the Competent Person (CP) under JORC Code Reporting Standards must belong in order to report Exploration Results, Minerals Resources or Ore Reserves through the ASX. Mr Palero has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a CP as defined in the 2012 edition of the Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC code). Mr Palero consents to the inclusion of this information in the form and context in which they occur.

**Forward Looking Statements**

This announcement contains 'forward-looking information' that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the Company's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral reserves and resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this announcement are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance, or achievements to be materially different from those expressed or implied by such forward-looking information.

## About Megado Minerals

Megado Minerals Ltd (ASX: MEG) is an ASX-listed mining exploration company. The Company's assets include the Iberian Copper Project (subject to completion of the Acquisition), North Fork Rare Earth Project in Idaho, USA and the Cyclone Lithium Project in the James Bay region in Quebec, Canada.

### Iberian Copper Project

The Project is located in the Northern Spain in the provinces of Navarra and Aragón. The Project includes 12 permits in application covering an area of 956km<sup>2</sup>.

The Project is targeting the North Spanish Oligocene region that saw copper oxide mining activity through to the 1970s. The permits cover at least 12 historic copper mines with over 50 copper occurrences established in an exploration program completed in the 1970s. The copper occurrences recorded were copper oxides in sandstones and conglomerates. The deposit is considered to be an example of "copper in red-beds".

The Project is likely to include multiple targets with the possibility of more than one discrete project. A works program is being developed to establish multiple high priority targets for drilling activities.

### Canadian Lithium and Gold Projects

The Company continues to retain a 100% interest in two highly prospective Canadian lithium / gold projects known as the Cyclone Lithium and Gold Project and the K Lithium Project. Both projects are located in the James Bay District, Quebec, Canada.

The Cyclone Lithium and Gold Project covers an area of 130km<sup>2</sup>. It is prospective for lithium, nickel and gold. The Project abuts the Aquilon Gold Project in the North West owned by TSX-V listed Sirios Resources (TSX-V:SOI). This project is currently the subject of an option agreement with Sumitomo Metal Mining Canada Ltd where it can spend up CAD14.8m to earn an 80% interest in the project. According to Sirios the project has more than 32 gold showings defined by gold grades that are among the highest ever intercepted in Quebec, including:

- 834.4 grams of gold per tonne (g/t Au) over 1.7 m (Moman showing), including 3,527.4 g/t Au over 0.4 m;
- 116.5 g/t Au over 2.3 m (Moman showing);
- 425.3 g/t Au over 0.6 m (Moman showing);
- 133.7 g/t Au over 0.8 m (Fleur-de-Lys showing);
- 26.7 g/t Au over 0.4 m (Muscovite showing)

(Refer: SOI's TSX-V Announcement dated 19 December 2022, which is reported in accordance with National Instrument 43-101 and <https://sirios.com/en/our-projects/aquilon/>)

The K Lithium Project covers an area of 16km<sup>2</sup> and is considered prospective for lithium, caesium, tantalum and rubidium.

### North Fork Rare Earth Project

The North Fork Rare Earth Project was acquired in June 2022 and is located 40 km north-west of Salmon in the Salmon-Challis National Forest, Lemhi County, Idaho. The project includes 526 unpatented mining lode claims covering approximately 45 km<sup>2</sup>.
