Eligible Shareholders who take up their Entitlement in full may apply for Additional New Shares (representing New Shares not taken up under the Entitlement Offer) in excess of their Entitlements at the same price as under the Entitlement Offer (**Top Up Facility**).

2.7 Shortfall

In the event that there are a number of New Shares for which valid applications are not received (including applications under the Top Up Facility) before the Entitlement Offer closes (**Shortfall Shares**), those Shortfall Shares shall be dealt with as shortfall for the purposes of, and in accordance with, the Underwriting Agreement.

In the event the Underwriting Agreement is terminated, the Directors reserve the right, subject to the requirements of the Listing Rules and the Corporations Act, to place all or any of the Shortfall Shares at their discretion to one or more investors by way of a Shortfall Offer.

Any Shortfall Shares must be issued no later than three (3) months after the Closing Date of the Entitlement Offer. All Shortfall Shares will be issued on the same terms as New Shares being offered under the Entitlement Offer (including the Offer Price).

The Directors reserve full discretion as to the allocation of Shortfall Shares, in accordance with the Shortfall allocation policy set out in Section 2.8

2.8 Shortfall allocation policy

Allocation and allotment of any Additional New Shares under the Top Up Facility or Shortfall Shares to be placed by Directors in accordance with clause 2.7, will be made having regard to the following policy:

- (a) There is no guarantee that Eligible Shareholders will be successful in being allocated any of the Additional New Shares that they apply for under the Top Up Facility, or that applicants for Shortfall Shares will receive any Shortfall Shares applied for.
- (b) The Directors reserve the right, at their discretion, to issue to an Eligible Shareholder a lesser number of Additional New Shares under the Top Up Facility than the number for which the Applicant applies, or to reject an Application, or to not proceed with placing Additional New Shares under the Top Up Facility.
- (c) The Directors also reserve the right to issue to an Applicant a lesser number of Shortfall Shares than the number for which the Applicant applies, or to reject an Application, or to not proceed with placing the Shortfall.
- (d) Additional New Shares or Shortfall Shares will not be issued to any persons for whom Shareholder approval is required, including under Listing Rule 10.11 (including substantial Shareholders of the Company, any Related Party or any of their associates) unless Shareholder approval is obtained as required by Listing Rule 10.11.
- (e) Where an application for Additional New Shares under the Top Up Facility or an application for Shortfall Shares under the Shortfall Facility is unsuccessful, in whole or in part, the relevant Application Monies will be refunded by the Company (without interest) in accordance with the provisions of the Corporations Act.
- (f) The Directors will not exercise their discretion to allocate Additional New Shares under the Top Up Facility or Shortfall Shares under the Shortfall Facility where it is aware that to do so would result in a breach of the Corporations Act, the Listing Rules or any other relevant legislation or law. Eligible Shareholders wishing to apply for Additional New Shares or applicants for Shortfall Shares must consider whether or not the issue of the Additional New Shares or Shortfall Shares applied for would breach the Corporations Act or the Listing Rules, having regard to their own circumstances.
- (g) For the avoidance of doubt, the Company will not allocate or issue Additional New Shares or Shortfall Shares in a way that results in a Shareholder's voting power exceeding 19.9% of the Company's Shares.

2.10 ASX Listing

Application for Official Quotation of the New Shares to be offered pursuant to the Entitlement Offer has been made or will be made within seven days of the date of this Offer Booklet.

If the New Shares are not admitted to Official Quotation by ASX before the expiration of three months after the date of issue of this Offer Booklet, or such period as varied by ASIC, the Company will not issue any

New Shares and will repay all Application Monies for the Entitlement Offer within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares offered for subscription.

2.11 Ineligible Shareholders

The Entitlement Offer is being extended to Eligible Shareholders who have a registered address in Australia and New Zealand, or for certain sophisticated, institutional or other limited numbers of Shareholders, in jurisdictions where the Company is satisfied that it is lawful to make the Entitlement Offer and issue the New Shares under the Entitlement Offer.

All Shareholders who do not satisfy the criteria to be Eligible Shareholders, are Ineligible Shareholders. Ineligible Shareholders are not entitled to participate in the Entitlement Offer, unless the Company otherwise determines. The restrictions upon eligibility to participate in the Entitlement Offer arise because the Company has determined, pursuant to ASX Listing Rule 7.7.1(a) and section 9A(3)(a) of the Corporations Act, that it would be unreasonable to extend the Entitlement Offer to Ineligible Shareholders. This decision has been made after having regard to the relatively small number of Shareholders in the jurisdictions in which the Ineligible Shareholders are located, the relatively small number and value of New Shares to which those Shareholders would otherwise be entitled and the potential costs of complying with legal and regulatory requirements in the jurisdictions in which the Ineligible Shareholders are located in relation to the Entitlement Offer.

2.12 Nominees, trustees and custodians

Nominees, trustees and custodians that hold Shares on behalf of others should note that the Entitlement Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee, trustee or custodian or the identity or residence of any beneficial owners of Shares. If any nominee, trustee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to determine that indirect participation by the beneficiary in the Entitlement Offer does not breach any laws or regulations in the relevant jurisdiction. Return of a duly completed Entitlement and Acceptance Form or Application Form will be taken by the Company to constitute a representation that there has been no breach of those laws and regulations.

2.13 Underwriting

Taylor Collison Limited is acting as Lead Manager and Underwriter of the Entitlement Offer pursuant to the Underwriting Agreement.

The terms of the Underwriting Agreement are summarised in section 6.5.

The Underwriter is not a related party of the Company for the purposes of the ASX Listing Rules and Corporations Act.

Sub-underwriting arrangements with Directors

The Company's Chair, Ines Scotland, and Executive Director, Sue-Ann Higgins through their nominated entities, have agreed to sub-underwrite \$100,000 and \$50,000, respectively worth of Shortfall Shares at the Offer Price on the terms of a sub-underwriting commitment letter.

No fee is payable to Ms Scotland or Ms Higgins in connection with the sub-underwriting.

The Sub-underwriting commitment letters will terminate if the Offer is withdrawn or if the Underwriting Agreement terminates. The sub-underwriting commitment letters are otherwise on standard terms.

3 Your Options and how to apply

3.1 Your Options

As an Eligible Shareholder, your options are to:

- (a) subscribe for all or part of your Entitlement (see Section 3.2);
- (b) subscribe for **all** of your Entitlement **and** apply for Additional New Shares in the Top Up Facility (see Section 3.3);
- (c) do nothing, in which case your Entitlement will lapse (see Section 3.4).

3.2 Subscribe for all or part of your Entitlement

If you wish to subscribe for all or part of your Entitlement, follow the instructions on your personalised Entitlement and Acceptance Form and pay the subscription amount by either EFT or BPAY®.

The Entitlement and Acceptance Form sets out the number of New Shares you are entitled to subscribe for.

3.3 Subscribe for all of your Entitlement and apply for Additional New Shares in the Top Up Facility

Eligible Shareholders who take up their Entitlement in full may, in addition to their Entitlement, apply for Additional New Shares by paying the relevant subscription amount for the Additional New Shares that the Eligible Shareholder wishes to apply for at the same time as payment for your full Entitlement in accordance with the Entitlement and Acceptance Form.

Section 2.8 provides details of the manner in which Additional New Shares under the Top Up Facility will be allocated.

3.4 Allow your Entitlement to lapse

If you are an Eligible Shareholder and do not wish to accept your Entitlement, you are not obliged to do anything.

If you take no action, your Entitlement will lapse. You will receive no benefit or New Shares and your Entitlement will become Shortfall Shares.

The number of Shares you hold as at the Record Date and the rights attached to those Shares will not be affected if you choose not to accept any of your Entitlement. Your percentage ownership in the Company will be diluted because the issue of New Shares under the Entitlement Offer will increase the total number of Shares on issue.

3.5 Payment methods

Payments may only be made by electronic funds transfer (EFT) or BPAY®

Your personalised instructions on your Entitlement and Acceptance Form include instructions on how to make payment by EFT or BPAY®. A BPAY® Reference Number is included the form for payments via BPAY® and a unique payment reference number is included in the form for payments by EFT.

If you have more than one shareholding and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of the shareholdings only, use the BPAY® Reference Number or unique payment reference number specific to that shareholding as set out in the applicable Entitlement and Acceptance Form. If you use the same BPAY® Reference Number or

unique payment reference number for more than one of your shareholdings, this will result in your application monies being applied to your Entitlement in respect of only one of your shareholdings.

Shareholders do not need to complete and return the Entitlement and Acceptance Form, however you must ensure that payment is made in accordance with the instructions on the form so that payment is received by no later than 5.00pm AEDT on the Closing Date.

It is your responsibility to ensure that your BPAY® payment or payment by EFT is received by the Share Registry by no later than 5.00pm (AEDT) on the Closing Date. You should be aware that your financial institution may implement earlier cut off times with regards to electronic payment and you should therefore take this into consideration when making payment. The Company will not be responsible for any delays in the receipt of any BPAY® or EFT payment.

3.6 No payments by cheque or money order

In light of the potential for delays in postage times, and the period the Entitlement Offer is open, it is considered unlikely that Entitlement and Acceptance Forms that are posted with a payment by cheque will be received by the Company in time for the Company to accept under the application. Accordingly, **payments must be made by BPAY® or by EFT** and may not be made by cheque.

As such, **Applicants do NOT need to return their completed Entitlement and Acceptance Forms** to the Company.

3.7 Representations and warranties

By making a payment by BPAY® or EFT for the Entitlement Offer or Shortfall Shares you will be deemed to have:

- (a) acknowledged that you have fully read and understood this Offer Booklet and the Entitlement and Acceptance Form or Application Form in their entirety, and you acknowledge the matters, including the risks summarised in the Investor Presentation, and make the warranties and representations and agreements contained in this Offer Booklet and the Entitlement and Acceptance Form or Application Form, as the case may be;

- (f) acknowledged that none of the Company or its related bodies corporate, affiliates and none of its or their respective directors, officers, partners, employees, representatives, agents, consultants or advisers, guarantees the performance of the Company, nor do they guarantee the repayment of capital nor the exercise of any of the Company's discretions referred to in this Offer Booklet;
- (g) declared that you are in compliance with all relevant laws and regulations (including, without limitation, section 1043A of the Corporations Act and laws and regulations designed to restrict terrorism financing and/or money laundering);
- (h) agreed to provide any requested substantiation of your eligibility to participate in the Entitlement Offer and your holding of Shares on the Record Date; and

- (i) If you are a sophisticated, professional, institutional or other Shareholder or potential Investor in a jurisdiction outside of Australia or New Zealand and the Entitlement Offer or Shortfall Facility is extended to you, you further warrant, represent and agree that:
- (i) it is lawful for the Company to offer the New Shares, Additional New Shares or Shortfall Shares to you and for you to accept the offers without the Company being required to take any further action in the relevant jurisdiction concerned;
 - (ii) you are responsible for ensuring that your applying for New Shares, Additional New Shares or Shortfall Shares and your receipt of those Shares does not breach any laws or regulations in the relevant jurisdiction; and
 - (iii) that there has been no breach of any such laws and regulations and all necessary approvals and consents have been obtained by you to the extension of the Entitlement Offer or Shortfall Facility to you, your acceptance of the Entitlement Offer or your Application for Shortfall Shares under the Shortfall Facility.

4 Purpose and Effect of the Entitlement Offer

4.1 Purpose and Use of Funds

If the Entitlement Offer is fully subscribed, the Company will raise up to approximately \$1,561,837.

The funds raised from the Entitlement Offer are intended to be used by the Company in accordance with the table below for:

- (a) Strategic review and value add programs at Livingstone Gold Project in WA;
- (b) Progressing the Millenium Copper & Cobalt project near Cloncurry in Queensland;
- (c) Advancing MBK's MENA strategy; and
- (d) General working capital and costs of the Entitlement Offer.

Proposed Use of Funds	
Livingstone and Millennium programs	\$750,000
Advancing MENA strategy	\$350,000
Costs of the Entitlement Offer	\$117,000
Working Capital	\$344,837
Total	\$1,561,837

The table is a statement of current intentions as of the date of this Offer Booklet. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on that basis where appropriate.

In the event that the Underwriting Agreement is terminated and the Entitlement Offer is not fully subscribed, the Board reserves the right to alter the priority and proportions in which funds raised are applied.

Further details regarding the use of funds and the Company's proposed work programs are set out in the Entitlement Offer Announcement and the Investor Presentation which is attached to this Offer Booklet.

4.2 Financial impact

The principal effect of the Entitlement Offer, assuming the Entitlement Offer is fully subscribed, will be to increase the cash reserves of the Company by \$1,561,837 before allowing for costs and expenses.

4.3 Effect of the Entitlement Offer on capital structure

The effect of the Entitlement Offer on the Company's capital structure, assuming the Entitlement Offer is fully subscribed, is expected to be as follows:

	Number of Shares	Number of Options	Number of Performance Rights
As at the date of this Offer Booklet ¹	390,459,291	4,000,000	14,775,240
To be issued under the Entitlement Offer ²	97,614,823		
Underwriter Options ³		5,000,000	
Number on issue after the Entitlement Offer	488,074,114⁴	9,000,000	32,055,024⁵

Notes:

1. Unlisted Options exercisable at \$0.07 expiring 7 September 2025
2. Assuming the Entitlement Offer is fully subscribed and no other Shares are issued prior to the Closing Date and subject to rounding of fractional entitlements.
3. Issue of Lead Manager Options exercisable at \$0.032 expiring 2 years from the date of issue
4. Subject to rounding of fractional entitlements
5. Note that of the 14,775,240 Performance Rights on issue at the date of this announcement, 5,390,625 lapse on 30 November 2024 as vesting conditions are not satisfied, and shareholder approval is being sought to issue a further 22,670,409 Performance Rights at the Annual General Meeting to be held on 28 November 2024. The total Performance Rights after the Entitlement Offer assumes that approval is obtained.

4.4 Effect on control

The potential effect that the Entitlement Offer will have on the control of the Company will depend on various factors, including the level of take up by Eligible Shareholders of their Entitlements, the allocation of Additional New Shares via the Top Up Facility and the allocation of Shortfall Shares under the Shortfall Facility.

If all Eligible Shareholders subscribe for their full Entitlement, and there is no Top Up Facility or Shortfall Facility, then each Eligible Shareholder's percentage ownership interest (and voting power) in the Company will remain the same and there will be no effect on the control of the Company.

If an Eligible Shareholder does not take up all of their Entitlement its percentage ownership interest (and voting power) in the Company will be diluted. The proportionate shareholding interest of the Ineligible Shareholders will be diluted because those Ineligible Shareholders are not entitled to participate in the Entitlement Offer.

The dilution effect of the Entitlement Offer on Shareholdings will vary with the number of New Shares taken up by Eligible Shareholders, the number of Additional New Shares taken up in the Top Up Facility, and the number of Shortfall Shares taken up under the Shortfall Facility, if any.

The Company does not expect that the Entitlement Offer will have a material effect on the control of the Company. No Eligible Shareholder or other investor will have a voting power greater than 20% as a result of the Entitlement Offer or the Placement.

Based on publicly available information at the date of this Offer Booklet, the Company's substantial holders are set out in the table below.

Substantial Holder	Shares	% Shareholding at Record Date
Kinvest Limited	77,701,000	19.90%

Any increase in the voting power of the substantial Shareholders set out above will depend upon whether they choose to participate in the Entitlement Offer and the extent to which the Entitlement Offer is subscribed, whether they participate in the Top Up Facility, and whether they participate in the Shortfall Facility, if any.

5 Risk factors

The New Shares offered under the Entitlement Offer are considered highly speculative.

There are a number of risk factors that could potentially impact the Company and any investment in the Company. Eligible Shareholders and prospective new Investors should consider the risk factors described in the Summary of Key Risks in the Investor Presentation, together with information contained elsewhere in this Offer Booklet and the publicly available information about the Company, including previous disclosures made by the Company in accordance with its periodic and continuous disclosure obligations, before deciding whether to participate in the Entitlement Offer.

The Summary of Key Risks in the Investor Presentation ought not to be taken as exhaustive of the risks faced by the Company or by Investors in the Company. Other factors not specifically referred to may in the future materially affect the financial performance of the Company and the value of the Company's Shares. Therefore, the New Shares, the Additional New Shares or Shortfall Shares to be issued pursuant to this Offer Booklet carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Eligible Shareholders and potential Investors should consult their professional advisers before deciding whether to participate in the Entitlement Offer or the Shortfall Facility.

In particular, the Company has an obligation under the ASX Listing Rules (subject to certain exceptions) to notify the ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price or value of its shares. That information is available to the public from the ASX (at www.asx.com.au) and the Company's website (at www.metalbank.com.au).

- (b) The Lead Manager Options are exercisable at any time prior to 5.00pm (AEDT) on the Option Expiry Date which is 2 years from the date of issue (which is expected to be 5 December 2024, and accordingly, the expiry date is expected to be 4 December 2026).
- (c) Lead Manager Options not exercised on or before the Option Expiry Date will automatically lapse.
- (d) The Lead Manager Options are exercisable wholly or in part by completing an option exercise form delivered to the Company's Share Registry, accompanied by payment of \$0.032 per Lead Manager Option and received by it any time on or before 5.00pm (AEDT) on the Option Expiry date.

- (k) If there is a bonus issue to the holders of Shares, the number of ordinary shares over which the Lead Manager Option is exercisable will be increased by the number of ordinary shares which the holder of the Lead Manager Option would have received if the Lead Manager Option had been exercised before the record date for the bonus issue.
- (l) In the event of any re-organisation (including reconstructions, consolidations, subdivision, and reduction of capital) of the issued capital of the Company, the Lead Manager Options will be re-organised as required by the Listing Rules, but in all other respects the terms of exercise will remain unchanged.

JORC Code

It is a requirement of the ASX Listing Rules that the reporting of ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves (JORC Code). Investors outside Australia should note that while ore reserve and mineral resource estimates of the Company in this document comply with the JORC Code (such JORC Code-compliant ore reserves and mineral resources being "Ore Reserves" and "Mineral Resources" respectively), they may not comply with the relevant guidelines in other countries and, in particular, do not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) Industry Guide 7, which governs disclosures of mineral reserves in registration statements filed with the SEC. Information contained in this presentation describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws. You should not assume that quantities reported as “resources” will be converted to reserves under the JORC Code or any other reporting regime or that the Company will be able to legally and economically extract them.

Exploration Targets

It should be noted that any Exploration Targets described in this presentation are conceptual in nature and there is insufficient information to establish whether further exploration will result in the determination of Mineral Resources. As a Cautionary statement, an Exploration Target is a statement or estimate of the exploration potential of a mineral deposit in a defined geological setting where the statement or estimate, quoted as a range of tonnes and a range of grade, relates to mineralization where there has been insufficient exploration to estimate a Mineral Resource. The potential quantity and grade of an Exploration Target is conceptual in nature, there has been insufficient exploration to estimate an additional Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant ASX announcements and News Releases. In the case of Mineral Resource estimates and Ore Reserve estimates, all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original ASX announcements or News Releases. The information in this Presentation, that relates to MBK Exploration Results, Mineral Resources and Exploration Target statements is based on information compiled or reviewed by Mr Trevor Wright. Since entering into two agreements with the Jordan Ministry for Energy and Mineral Resources (MEMR) in July 2023 MBK has:

Three copper project areas granted

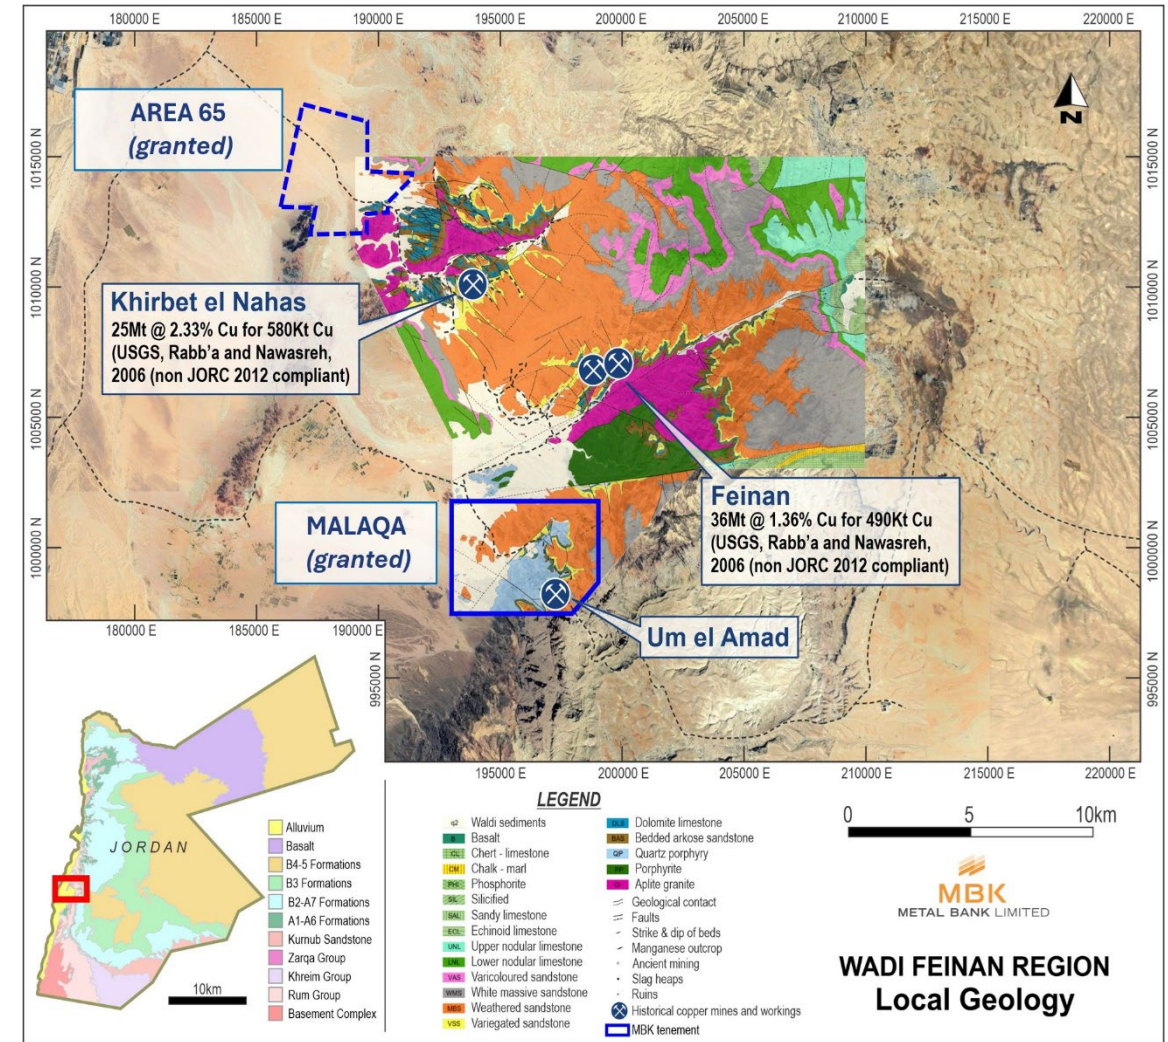

Conducted five field programs including mapping, stream, rock chip and channel sampling

Extended mineralisation at Um el Amad (Malaqa) to over 800m in strike and identified several new target areas

Identified and acquired exploration rights over a new priority bulk tonnage stratiform copper oxide target (Area 65) through reconnaissance scouting in Wadi Araba

Identified and acquired exploration rights to a further priority target area (Area 47) with a large zoned geochemical signature plus copper sulphide (present as chalcopyrite) supportive of a porphyry/intrusion-related system

MBK plans to progress all three projects to drilling status for drilling in the same campaign

Summary of Key Risks

Introduction

There are a number of risk factors that could potentially impact the Company and any investment in the Company. Shareholders and prospective new Investors should consider the risk factors described below, together with the publicly available information about the Company, including previous disclosures made by the Company in accordance with its periodic and continuous disclosure obligations, before deciding whether to invest in the Company. The below list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by Investors in the Company. Other factors not specifically referred to may in the future materially affect the financial performance of the Company and the value of the Company's securities.

Financing Risk, Underwriting Risk and Additional Funding

The Company may not raise sufficient funds from the Capital Raising to fund its planned activities. There is no guarantee that the Entitlement Offer will be fully subscribed. The Company has entered into an Underwriting Agreement with the Underwriter on terms set out in the Appendix pursuant to which the Underwriter has agreed to fully underwrite the Entitlement Offer subject to the terms and conditions set out in the Underwriting Agreement. The obligations of the Underwriter are conditional on certain customary matters, including the Company delivering certain certificates, sign-offs and opinions. If certain events occur, the Underwriter may also terminate the Underwriting Agreement. Termination of the Underwriting Agreement may have an adverse impact of the amount of proceeds raised under the Entitlement Offer. In these circumstances, the Company may need to place the Shortfall or source alternative funding to meet its capital needs. There is no certainty that the Shortfall would be placed or alternative funding could be obtained on satisfactory terms or at all.

Further, the Company as an exploration company will have no operating revenue and is unlikely to generate any revenue from operations in the short to medium term. In the future the Company will require further funding in addition to amounts raised under the Capital Raising. The Company's future capital requirements, and the Company's ability to satisfy those requirements, depend on numerous factors, many of which are beyond the control of the Company. If the Company is unable to raise sufficient funds from the Capital Raising or in the future it may be required to scale back its activities, delay or postpone exploration and development, dispose of assets or consider funding alternatives, which could include additional equity funding, debt funding, joint venture or farm-out arrangements, sale of assets or other funding arrangements such as streaming finance or convertible loans. Any additional equity funding may have a dilutionary impact on a shareholder's holding in the Company, or a negative impact on the Company's share price. Any funding alternatives, if available, may involve restrictions on the Company's activities.

Exploration risks

The mineral tenements of the Company are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. Exploration activities require substantial expenditure on exploration surveys, drilling, sampling, analysis, studies to establish the presence, extent and estimate grade of mineralisation. Even if significant mineralisation is discovered, it may take additional time and substantial financial investment to determine whether sufficient Ore Reserves exist to support a development decision. There can be no assurance that exploration of the Company's mineral tenements, or any other mineral tenements and mining properties that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, availability of equipment, services and skilled personnel, native title or indigenous process, changing government regulations and many other factors beyond the control of the Company. Losses resulting from any of these risks could have a material adverse effect on the Company's financial resources or could result in a total loss of the assets affected, and accordingly, may affect the market price of the Company's securities. The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its mineral tenements and mining properties and obtaining all required approvals for its activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the mineral tenements and mining properties and possible relinquishment of the mineral tenements and mining properties.

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and the effects of inflation and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

Reserve and Resource estimates and Exploration Targets

Reserve and reserves estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource and reserves estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. The variables on which estimates of resources and reserves are made include a number of factors and assumptions such as historical production, assumed effects of regulation by government agencies, assumptions regarding future prices and future capital and operating costs, all of which may vary considerably from those initially planned or used in determining any such resources or reserves. Changes in any underlying assumptions that affect either the cost of recovery or the viability of recovery of any resource will affect any calculation of reserves. No assurance can be given that any mineral reserves and resources that are estimated by the Company will be recovered or that they will be recovered at the rates estimated. Mineral reserve and resource estimates may require revision (either up or down) based on actual production experience. Furthermore, a decline in the market price for natural resources that the Company may discover or invest in could render reserves containing relatively lower grades of these resources uneconomic to recover and may ultimately result in a restatement of reserves.

The Company has estimated exploration targets for some of its exploration projects. Exploration targets are conceptual in nature and there is insufficient information to establish whether further exploration will result in the determination of Mineral Resources under the JORC Code. An exploration target is a statement or estimate of the exploration potential of a mineral deposit in a defined geological setting where the statement or estimate, quoted as a range of tonnes and a range of grade, relates to mineralization where there has been insufficient exploration to estimate a Mineral Resource under the JORC Code. The potential quantity and grade of an exploration target is conceptual in nature, there has been insufficient exploration to estimate an additional Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Executive Management and Key Personnel

The responsibility of overseeing the day-to-day operations and the Company's strategic management depends substantially on its Directors and senior management. There can be no assurance that there will be no detrimental impact on the Company if one or more of these persons cease their involvement with the Company. The ability of the Company to achieve its objectives depends on the access to personnel and external contractors who have the required skills and qualifications or who can provide technical expertise and other services. If the Company cannot secure personnel or external contractors or if the services of the present personnel and external contractors cease to become available to the Company, this may affect the Company's ability to achieve its objectives.

Summary of Key Risks - continued

Title, permit and approval risks

The mineral tenements and permits held by the Company are subject to the applicable mining acts and regulations in Australia and in Jordan. Mineral tenements and permits are also subject to periodic renewal. There is no guarantee that current or future mineral tenements and mining properties or future applications for production mineral tenements and mining properties will be approved. Further, if renewed, renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the mineral tenements and mining properties comprising the Company's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company. Mineral tenements and permits also carry annual expenditure and work commitments and reporting obligations, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interests in, one or more of its tenements if conditions are not met or if sufficient funds are not available to meet work and expenditure commitments.

In addition to mineral tenements and permits, exploration, development and mining operations require other regulatory approvals, licences and permits under applicable mining laws, environmental regulations and other laws, such as environment permits, planning approvals, development and construction approvals, heritage agreements and clearances, water use licences, discharge licences, mine work plan approvals, approvals for vegetation clearing. In addition, the company may need to negotiate access and compensation arrangements with underlying private landholders. The success of the Company's operations depends on its ability to obtain (on a timely basis) and maintain all regulatory or other approvals for its existing and future operations. The process for obtaining approvals may be delayed due to exercise of government discretions, protracted government decision making, objections from stakeholders and third parties and other matters. Delays or difficulties obtaining relevant approvals or obtaining conditional or limited approvals, may interfere with the Company's current or planned operations which could impact on the financial position and/or performance of the Company.

Mine development and operational risks

Possible future development of a mining operation at any of the Company's projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, access to transport, infrastructure and economic supplies of power and water, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services. If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, pandemics, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement of hazardous weather conditions and fires, explosions, accidents or other external force majeure events. No assurance can be given that the Company will achieve commercial viability through successful exploration, development or mining of its projects and treatment of ore. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

Environment risks

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds and may cause environmental harm. It is the Company's intention to conduct its activities to the highest standard of environmental obligations, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. Nevertheless, there are inherent risks in the Company's activities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production, which could subject the Company to extensive liability. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations. Environmental approvals are required for exploration, development and mining activities and delays in obtaining such approvals can result in delays to anticipated exploration programs or mining activities. New environmental laws, regulations or stricter enforcement policies, if implemented, may oblige the Company to incur significant expense and undertake significant investment and could have a material adverse effect on its business, financial conditions and results of operations.

Following cessation of any production from any future operations, the Company will be required to participate in rehabilitation programs, removal of disused plant and equipment and where necessary, restoring the environment that has been disturbed in the course of operations. The cost of that participation may be considerable if operations result in significant environmental liabilities being incurred. In such a case, any allowance made for rehabilitation may possibly be inadequate.

Native title and cultural heritage

The Company's activities in Australia are subject to Native title and heritage legislation. If native title or native title claims exist or native title rights are determined over areas covered by the Company's tenements, the ability of the Company to gain access to mineral tenements for exploration, or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. Additionally, cultural heritage legislation may require cultural heritage surveys and clearances before certain activities are undertaken on the Company's tenements and may require agreement with traditional owner groups that may delay proposed activities and result in increased costs. Where designated cultural heritage sites are identified within tenements, the Company must ensure that its operations do not interfere with or impact upon those sites and such sites may lead to restrictions on the areas that the Company will be able to explore and mine.

Safety

Safety is of critical importance in the planning, organization and execution of the Company's exploration and operational activities. Although MBK is committed to providing and maintaining a working environment in which its employees are not exposed to hazards that will jeopardise an employee's health and safety, or the health and safety of others associated with its business, MBK is unable to guarantee that it can completely eliminate hazards. Any workplace incidents (including loss of life incidents) may adversely affect the reputation of the Company and its exploration and operational activities, may lead to significant fines and penalties and could result in an indefinite shut down of a project if deemed serious enough. If any injuries or accidents occur on a worksite, this could have adverse financial implications including legal claims for personal injury, wrongful death, amendments to approvals, potential production delays or stoppages, any of which may have a material adverse effect on the financial performance and/or financial position of the Company.

Summary of Key Risks - continued

Regulatory and government risks

The exploration and mining industry is subject to extensive legislation, regulation and supervision by a number of federal, state and regulatory bodies, including regulations regarding exploration, mining, health and safety, employment, workers' compensation, native title and heritage and environmental matters, taxes and royalties. Adverse changes in government policy or laws, including additional compliance obligations, may result in delays, additional time commitment and compliance costs. Further changes in tax laws or royalties in Australia, Jordan or any jurisdiction in which the Company operates in the future, may affect the taxation treatment of the holding or disposal of the Company's securities and may adversely affect the financial performance of the Company in the future. Failure to observe all relevant regulations could expose the Company to penalties or require the Company to cease or suspend operations or be subject to increased compliance costs and accordingly may adversely affect the operations, financial position and/or performance of the Company and the market price of its Shares.

Mineral exploration, development and mining activities may be adversely affected by political and economic instability. There can be no guarantee that changes in governments or the laws within the jurisdictions in which the Company's assets are located will not adversely impact the Company's operations and activities in the future.

Social and climate change risks

Establishment of strong relationships with the community and other stakeholders is fundamental to the long term success of the Company's business. Although the Company endeavours to conduct its business in a manner which respects those communities and ensures mutually beneficial outcomes, the Company's activities may have or be perceived to have an adverse impact on local communities, cultural heritage, the environment, or other matters which may result in community concern, adverse publicity, activism, litigation or other adverse actions taken by community, environmental or other action groups. Failure to maintain and build strong relationships and such adverse actions could affect the company's social licence to operate, its reputation and lead to delays and increase costs which may adversely impact on the Company's operations, financial position and/or performance and the market price of its Shares.

Any future mining activities of the Company may be exposed to risks associated with the transition to a lower-carbon economy, including policy and legal risks, technology risks, market risk and reputation risk. Further climate change may result in physical risks, such as changes in water availability and extreme weather changes which may affect the Company's operations, supply chains, transport needs and employee safety.

Liquidity, market capitalisation and price fluctuation

The Company is a small company in terms of market capitalisation and it may not be covered by a broad base of research analysts. As a consequence, there may be relatively few buyers and sellers of securities on the ASX at any given time and the market price may be highly volatile, particularly in times of share market turbulence or negative investor sentiment. This may present difficulties for shareholders seeking to liquidate their holdings.

The market price of the shares in the Company can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration and development stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

General economic climate and investment risk

There are risks associated with any securities investment. The prices at which the securities of the Company trade may fluctuate in response to a number of factors. Furthermore, the stock market, and in particular the market for mineral resources companies, may experience extreme price and volume fluctuations that are unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the securities of the Company regardless of its operational performance.

The Company's funding position, financial performance and the market price of the Company's securities may be impacted by a variety of general global economic and business conditions, such as the general economic outlook, interest rates, inflation rates, currency fluctuations, mineral price fluctuations, changes in investor sentiment, the demand for and supply of capital and other factors beyond the control of the Company. A deterioration in these conditions could have an adverse impact on the Company's financial performance. If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company.

Changes in political environment and international conflicts

The Company's share price and ability to generate returns to Investors can be affected by changes in legislation, domestic or foreign governments and government policy. Events may occur within or outside Australia or Jordan that could impact upon the world economy, the operations of the Company and the market price of the Shares. These events include pandemics, war, acts of terrorism, civil disturbance, political intervention and natural events such as earthquakes, floods, fires and poor weather.

Risk of dilution

Shareholders who do not participate in the Entitlement Offer, or do not take up all of their entitlements under the Entitlement Offer will have their percentage shareholding in MBK diluted. Shareholders may also have their investment diluted by placement of any shortfall from the Entitlement Offer, if any, or from any future capital raisings by MBK.
