Objective 2: Provide Capital Growth and Income

- Looking back since the IPO of the Company until 31 October 2024:
  - Pre-tax NTA is higher than the \$2.00 IPO price, assisted by portfolio outperformance and strong recent returns from Australian small cap shares;
  - Distributed dividends (and franking credits) have been a strong additional driver of shareholder returns over the period and have increased significantly since the Company increased its dividend payout since Q3 2021.

## SEC Pre-tax NTA + Cumulative Dividends / Franking Credits

1 Pre-tax NTA per share values are shown as at the dates noted. Dividend and franking credit values represent the cumulative amount of dividends paid by the Company during the period from IPO through to each period end date.

2 A 26% corporate tax rate applied to franking credits for dividends paid during year ended 30 June 2021. A 30% corporate tax rate applied to franking credits for other years.

# Chairman's Address

## Spotlight on Dividends

- Total FY24 quarterly dividends of 12.0 cents per share
- Target dividend yield was increased to 6% of post-tax NTA p.a. (8.6% p.a. including franking) from the June 2024 quarter, paid quarterly at 1.5% of post-tax NTA
- Sept 2024 quarterly dividend of 3.5 cents per share paid recently on 12 November

# Chairman's Address

# Outlook

---

- Waves of selling across small cap complex with large industry funds exiting, retail investors deleveraging and hedge funds either reducing beta or shorting
- Compounded by a withdrawal of buying in anything with “warts” particularly earnings weakness whether it is perceived or real and/or companies with debt
- Market repeating past cycles of crowding into "growth" complex for perceived safety
- The valuation dispersion providing a significant opportunity for long term investors
- We are well positioned in a diverse range of companies covering value to growth (at a reasonable price)
