Operational Efficiency Milestones Achieved

BetMakers confirms that it has reduced its total annualised staff cost by a further \$5.1 million since 30 June 2024. These operational efficiencies are expected to take full effect during 3Q FY25 and have been enabled by several initiatives, including, progress in the Company's technology roadmap and the centralisation of some corporate functions. As a result, the Company expects operating expenses to be below the \$60 million target² for FY25 communicated by the Company with its FY24 results³.

Technology Update

The upgrades of BetMakers' Australian platform customers to the Next Gen platform is progressing well. Management is pleased with the performance of the new platform as well as the feedback it has received from clients and users. BetMakers currently expects the Next Gen platform upgrades to be complete by the end of 1H FY25. BetMakers also expects to launch four new Australian platform brands onto Next Gen by the end of 1H FY25.

In addition to the upgrades of Australian platform customers, BetMakers is now implementing initiatives to complete the overhaul of Global Tote's ADW platform to a multi-tenant and modern architecture, which is expected to improve performance and reduce cloud costs for this product.

Trading Update

The Company currently expects revenue in 2H FY25 to be higher than 1H FY25, as well as benefits anticipated to be realised in 2H FY25 from lower cloud costs and the ongoing reduction in staff and operating expenses.
