

Monument Gold Drill Program Complete

Key Highlights

- Drill program at the Monument Gold Project Completed at Fred's Well
- 22 AC holes completed for 1,480m over 1,200m strike with all holes reaching blade refusal
- 2 RC holes completed for 234m
- Samples collected and sent to ALS laboratory with results expected before calendar year-end
- Fred's Well is a promising gold prospect outside and along strike to Monument's 154koz Au Resource with historical drill intercepts at Fred's Well including:
 - **24m @ 3.24g/t Au** (MOAC262 from 44m) including **12m @ 6.35g/t Au**;
 - **8m @ 2.09g/t Au** (MOAC265 from 40m);
 - **8m @ 1.48g/t Au** (MOAC256 from 36m);
 - **12m @ 1.01g/t Au** (MOAC277 from 20m); and
 - **3m @ 2.98g/t Au** (MOAC374 from 72m) **ending in mineralisation**
- The Monument Gold Project covers 232km² and is located within the Laverton Gold District (Western Australia), which hosts numerous multi-million ounce gold mines, including Granny Smith, Wallaby and Sunrise Dam, and is directly adjacent to and along strike of Genesis Minerals' (ASX:GMD) 3.3Moz Au Mt Morgans Project

Si6 Metals Limited (**Si6** or **the Company**) (**ASX:SI6**) is pleased to advise that the 1,700m drill program at Fred's Well prospect at the Monument Gold Project has completed.

The Fred's Well prospect is a priority target identified at the Company's Monument Gold Project, which is adjacent to and along strike of Genesis Minerals Limited's (ASX:GMD) 3.1Moz Mt Morgan's Gold Project in the world class Laverton Gold District.

The Fred's Well prospect lies along strike from the Company's JORC-Inferred Resource of **3.3Mt @ 1.4g/t Au for 154koz gold**.

For personal use only

The drill program comprised 24-holes (22 aircore and 2 RC) for approximately 1,700 meters drilled at Fred's Well. 1,200m of strike was covered which was designed to:

- (a) infill test 350m out of 770m identified mineralised strike;
- (b) test the depth of previously drilled high grade areas; and
- (c) test for extension of the 770m mineralised strike.

About the Monument Gold Project

The Monument Gold Project is located in WA's world-class Laverton Gold District and comprises ~232km² of tenure located approximately 40km west of Laverton, adjacent and along strike of Genesis Minerals' (ASX: GMD) **3.3Moz Au Mt Morgan Project**. A Mineral Resource Estimate of 154koz of gold (see ASX announcement on 2 August 2021) was undertaken on the Korong and Waihi deposits, which occur along ~30km of relatively untested banded iron formation, interpreted to be the same unit that hosts the 1.4Moz Westralia gold deposit, located immediately southeast of Si6's Monument.

To date, only 10% of the 30km strike has been drilled with detailed reverse circulation drilling. There is currently ~20km of additional priority targets identified along the banded iron formations horizon, and multiple other syenite-intrusion style targets (approximately 60 targets remaining to be tested).

About Si6

Si6 owns 100% of the Monument Au-Ni project located near Laverton in Western Australia. This project currently has a JORC-compliant (2012) Inferred resource of 3.257 Mt @ 1.4 g/t for 154,000 ounces Au. (inferred resources calculated by CSA Global in 2021 to JORC 2012 compliance using a 0.5 g/t cut-off grade; see 2 August 2021 ASX announcement “Mineral Resources Estimate declared for Monument Gold Project” for further information).

Si6 also holds a supply critical metals portfolio via a joint venture that includes rare earth elements, lithium, gold, base and precious metals in Brazil, including licences in the “Lithium Valley” and Poços de Caldas in the state of Minas Gerais, globally known as prolific lithium and rare earth elements districts respectively. The Company also owns 70% of the Pimenta Project, a potential large-scale REE project in eastern Minas Gerais.

Si6 also holds a base and precious metals project in the Limpopo Mobile Belt in Botswana, a district known for hosting major nickel and copper producing operations. The Company’s Botswana portfolio contains three flagship projects where high-grade Cu-Ag (Airstrip and Dibete) and a Maiden JORC Inferred Resource (Maibele North) have been discovered. Maibele North currently hosts a JORC (2012) inferred resource of 2.4Mt @ 0.72% Ni and 0.21% Cu + PGE’s + Co + Au and is located within 50km of the Selebi-Phikwe mine recently acquired by TSX-listed Premium Nickel Resources Ltd (TSX-V:PNRL).

Disclaimer

In relying on the above mentioned ASX announcement and pursuant to ASX Listing Rule 5.23.2, the Company confirms that it is not aware of any new information or data that materially affects the information included in the above announcement. No material exploration data or results are included in this document that have not previously been released publicly. The source of all data or results have been referenced.

Competent Persons Statement

The information in this report that relates to Exploration Targets and Exploration Results is based on recent and historical exploration information compiled by Dr Paul Woolrich, who is a Competent Person and a Member of the Australasian Institute of Mining and Metallurgy (AusIMM). Dr Woolrich has sufficient experience that is relevant to the style of mineralisation and the type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for the reporting of Exploration Results, Mineral Resources and Ore Reserves”. Dr Woolrich consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Reference to Previous Announcements
