06 December 2024

## Paulsens Gold Operation – Commissioning Commenced

Black Cat Syndicate Limited ("Black Cat" or the "Company") is pleased to provide an update on the processing facility refurbishment at the 100% owned Paulsens Gold Operation ("Paulsens").

#### **HIGHLIGHTS**

The processing facility refurbishment has progressed safely, efficiently and to plan, with the focus now turning to dry and wet commissioning of the respective operating circuits. Recent activities include:

- Completion of dry commissioning of the crushing circuit and commencement of wet commissioning to build a lowgrade crushed stockpile for use during commissioning.
- Installation and setup of the new Knelson gravity concentrators.
- Delivery and installation of the 415-volt switch board for power station #1 motor control centre.
- Repairs to fuel tanks and pipelines plus installation of fuel systems into the power station #1 fuel farm.
- Installation and testing of the 5 x 880 KVA generators at power station #1.
- Ball mill liner installation and seasonal charge of grinding media.
- Delivery and installation of the oxygen storage tank.
- Commencement of connection of pipework for the CIP circuit.
- Completion of the tailing storage facility lift and tailings pipework installation underway.
- Commissioning of the laboratory for processing underground samples.

Figure 1: Crushing underway - low-grade commissioning Ore being tipped into crushing circuit as wet commissioning commences

Black Cat's Managing Director, Gareth Solly, said: "On time and within budget, the refurbishment activities at Paulsens are almost complete. Our focus is now switching to dry and wet commissioning in the lead up to first gold later this month. Ongoing selective mining and preparations for the full mechanised fleet remain on track and planning for accelerated exploration in 2025 is well underway."

Crusher in action

### **TIMELINE TO GOLD**

The refurbishment is on target for commissioning on low-grade stockpiles and first gold pour in December 2024.

Table 1: Timeline to first Gold

### PROCESSING FACILITY REFURBISHMENT

All activities on site have been conducted safely and efficiently with no incidents recorded. Commissioning has started and the focus is on completion of the remaining works ahead of the first gold pour in December 2024.

The Knelson gravity concentrators have now been fully installed and being prepared for dry commissioning.

Figure 2: Showing the new, installed Knelson gravity concentrators.

The new electrically compliant 415-volt switchboard has been delivered and installed at power station # 1 motor control centre. The switchboard is the last of the long lead items ordered in April 2024.

Figure 3: Showing the newly installed 415-volt switchboard at power station # 1.

The 5 x 880 KVA generators have been installed into the circuit at power station # 1 and plumbed into the refurbished fuel tank system.

Figure 4: Showing the 5 x 880 KVA generators installed at power station # 1.

The new oxygen storage tank has been delivered to site and installed into position. Pipework setup is underway to connect the tank into the CIP circuit.

Figure 5: Showing the newly installed oxygen storage tank.

The tailing storage facility lift has been completed. Installation of the tailing pipeline has commenced and the facility is on track for commissioning in December 2024.

Figure 6: Showing the completed lift on the tailings storage facility facing East.

Major work planned for December 2024 includes:

- Continued dry commissioning and operation of the crushing circuit to build crushed stocks.
- Connection of power station #1 motor control centre to the process plant circuits.
- Preparation for and commencement of dry and wet commissioning of the grinding, gravity, CIP and recovery circuits.
- Continued mobilisation of internal process and maintenance teams.
- Pour first gold.

Figure 7: Members of the emergency response team undergroing training.

### **PLANNED ACTIVITIES**

Planned activities and announcements include:

11 Dec 2024 General Meeting for Tranche 2 of the recent Placement

Dec 2024: Paulsens commissioning on low-grade stocks followed by material from the high-grade

selective mining strategy & first gold pour

Jan - Dec 2025 Progress reports on accelerated and expanded Kal East processing facility

Jan - Mar 2025 Kal East near-mine baseload drilling

Jan - Mar 2025 Paulsens near-mine drilling

Mar - Oct 2025 Paulsens regional drilling

For further information, please contact:

Gareth Solly Managing Director +61 458 007 713 admin@bc8.com.au

This announcement has been approved for release by the Board of Black Cat Syndicate Limited.

#### **COMPETENT PERSON'S STATEMENT**

The information in this announcement that relates to geology, exploration results, drill planning, Exploration Targets, and Resources was compiled by Mr. Iain Levy, who is a Member of the AIG and an employee, shareholder and option/rights holder of the Company. Mr. Levy has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Levy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the exploration results, Mineral Resources, and Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource and Reserve estimates with that announcement continue to apply and have not materially changed.

The Company confirms that all material assumptions underpinning the production targets, or the forecast information derived from the production targets, included in the original ASX announcements dated, 8 May 2024, 9 May 2024 and 15 May 2024 continue to apply and have not materially changed.

### SNAPSHOT – PAULSENS GOLD OPERATION

~3,190km2 of Highly Prospective Ground, 100% Owned by Black Cat

### High-Grade 1,000oz per Vertical Metre Producer

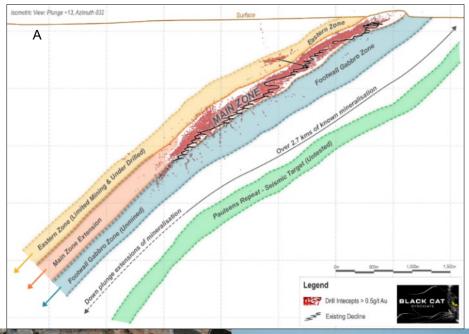

- Paulsens underground is comprised of >2.7km of known mineralisation: including the historically mined Main Zone; the under drilled Eastern Zone; an unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target. Paulsens has produced ~1Moz (at 1,000oz per vertical metre) principally from the Main Zone. The recently discovered 175m plunge/120m vertical extension to the Main Zone has the potential to extend mine life and has been justified for development in the May 2024 Restart Study.
- Paulsens underground is one of Australia's highest-grade gold deposits with a current Resource of 406koz @ 9.5g/t Au (76% Measured & Indicated).
- The 8 May 2024 Restart Study includes planned production of 177koz Au over the first 4.2 years with an All-in Sustaining Cost of \$1,882/oz and Operating Cashflow (after all capital and before tax) of \$201M @ \$3,500/oz.

#### Quality Infrastructure, Only Gold Processing Facility in 400km Radius, Fully Approved

- Strategically important location being the only gold processing facility in a 400km radius.
- Well maintained, 450ktpa processing facility, on care and maintenance since 2018 and requiring minimal restart capital.
- +128-person camp and village substantially rented out to third parties.
- Mine and advanced Resources on Mining Licences, minimal barriers to restart.
- Underground mine fully dewatered and ventilated.
- Excellent access with sealed road and gas pipeline within 7km.
- Approvals in place.

### Significant Opportunities at All Stages - Multi-metal Potential

- · Paulsens is an under-explored orogenic gold region with numerous gold and base metal anomalies.
- There is also significant open pit/underground potential at Belvedere, located only 5km from the processing facility. Belvedere is a Paulsens-style target with >2.5km of mineralised strike. To date, minimal drilling has identified a shallow Resource of 30koz @ 6.6g/t Au, part of which is in the May 2024 Restart Study.

<u>A:</u> Schematic isometric long-section looking towards the north showing >2.7km of known mineralisation comprised of: Main Zone (~1Moz mined @ 1,000oz per vertical metre), under-drilled Eastern Zone, unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target; **B.** Aerial view of Paulsens processing facility and site offices; and **C.** Paulsens village and camp

### ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat is fully funded and the key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation has commenced the mill refurbishment stage, with a plan to be in production by the end of 2024. Paulsens has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area.

Kal East Gold Project: comprises ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway1. Separately, Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The processing facility, with throughput up to 1.5Mtpa, will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.

### Coyote Gold Operation

- Landholding ~1,050sqkm
- Gold Resources: 3.7Mt @ 5.5g/t for 645koz
- Mill: 300ktpa only mill in Western Tanami region (expandable); operational +180 person camp Historical Production: >35kozpa (211koz @ 4.9 g/t)
- C&M. multiple open pits & underground potential

### Paulsens Gold Operation

- Landholding ~3,190sqkm
- Gold Resources: 4.3Mt @ 4.0g/t for 548koz
- Critical/Base Metals: 14kt Sb, 19kt Pb, 1.6kt Cu, 1.5Moz Ag
- Mill: 450ktpa regionally strategic location; +128 person camp Historical Production: ~75kozpa (1,003koz @ 6.9 g/t mined)
- Mill refurbishment, multiple open pits & underground potential

## Kal East Gold Project -

- Landholding ~650sqkm
- Gold Resources: 18.8Mt @ 2.1g/t for 1,294koz
- Proposed Mill: ~800ktpa designed, permitted, components acquired; spare 700ktpa mill to expand to 1.5Mtpa
- Historical Production: ~600koz
- Pre-development, open pit & underground potential
- Turn-key Funding, Development & Processing arrangement signed with mining at Myhree and Boundary to commence June/July 2024

Strategic Landholding 4,890 km<sup>2</sup>

**Gold Resources** 2.5Moz @ 2.9 g/t Au

Milling Capacity 1.55Mtpa (expandable to 2Mtpa)

#### Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'
- All tonnages reported are dry metric tonnes
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- Resources are reported inclusive of any Reserves.
- 6. Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Resources are:

#### Notes on Reserve:

- The preceding statements of Mineral Reserves conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 1. Edition'
- All tonnages reported are dry metric tonnes.
  - Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Cut-off Grade
  - Open Pit The Ore Reserves are based upon an internal cut-off grade greater than or equal to the break-even cut-off grade.
- Underground The Ore Reserves are based upon an internal cut-off grade greater than the break-even cut-off grade.
   The commodity price used for the Revenue calculations for Kal East was AUD \$2,300 per ounce.
- The commodity price used for the Revenue calculations for Paulsens was AUD \$2,500 per ounce. The Ore Reserves are based upon a State Royalty of 2.5% and a refining charge of 0.2%.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Reserves are:

#### Kal East Gold Project

Black Cat ASX announcement on 03 June 2022 "Robust Base Case Production Plan of 302koz for Kal East"

#### Paulsens Gold Operation

Black Cat ASX announcement on 10 July 2023 "Robust Restart Plan for Paulsens"
