Bell Potter Securities Limited and Alpine Capital Pty Limited acted as Joint Lead Managers to the Placement.

SPONTAN® Development

As announced to the market in [June 2024](#) and [October 2024](#), SPONTAN® has achieved positive primary and secondary clinical study results from its pivotal pharmacokinetic trial. The trial showed rapid absorption and faster time to maximum concentration compared to oral PDE5 inhibitors at half the dose.

Following these positive outcomes, SPONTAN® has [commenced early market access](#) through Australia's Therapeutic Goods Administration (TGA) Special Access Scheme and Authorised Prescriber Scheme, enabling healthcare professionals to prescribe SPONTAN® to patients with unmet needs. The Company has also secured a strategic global [Co-Development Agreement with Aptar Pharma](#) to support the commercialisation of SPONTAN® in key markets, including the United States

LTR Pharma is actively pursuing expedited regulatory pathways, including the FDA's 505(b)(2) process in the United States and Category 1 - Type F application with the TGA in Australia. The Company has further strengthened its commercial positioning through a [joint venture with the Restorative Health Clinic](#) to develop an innovative online healthcare platform, capitalising on the growing telehealth market and expanding access to men's health services.

These developments underscore LTR Pharma's commitment to addressing the significant unmet needs in men's health services and ED treatment, offering patients a fast-acting, on-demand solution that could transform the standard of care in this therapeutic area.

In addition, the Company is seeking to leverage its IP and invest in product R&D to expand its nasal spray product portfolio for ED and non-ED applications.

This announcement has been approved by the Board of Directors.

About LTR Pharma

LTR Pharma is focused on improving men's health, physically and mentally, through the commercialisation of an innovative nasal spray treatment for Erectile Dysfunction. ED is a pressing health issue for millions of men that can negatively impact self-esteem and relationships across multiple age brackets. LTR Pharma's lead product, SPONTAN[®], is set apart from existing ED therapies by its mechanism of action – intranasal delivery technology of a PDE5 inhibitor. The nasal cavity is a highly vascular part of the body, supporting even and rapid absorption of the drug, empowering it to work within 10 minutes or less. LTR Pharma is proudly aiming to restore greater control over the timing, spontaneity, and enjoyment of sexual experiences.
