Request for Trading Halt

Pursuant to Listing Rule 17.1, Sipa Resources Limited (ASX: SRI) ("Sipa" or "the Company") hereby requests a trading halt be placed on its quoted fully paid ordinary shares on the commencement of trading on Monday, 16 December 2024, pending an announcement by the Company regarding an acquisition and capital raising.

Sipa requests a trading halt until this announcement is released, or the commencement of trading on Wednesday, 18 December 2024 whichever is the earlier.

Sipa is not aware of any reasons why the trading halt should not be granted, nor is it aware of any other information available at this stage to inform the market about this Trading Halt.

This announcement has been authorised for release by the Board of Sipa Resources Limited.

About Sipa

Sipa Resources Limited (ASX: SRI) is an Australian-based exploration company focused on the discovery of precious, base and specialty metal deposits, primarily in Western Australia.

- The Paterson Project is targeting intrusion-related copper-gold mineralisation concealed by more recent cover sediments and is located to the northeast of Rio Tinto's Winu copper-gold discovery.
- The Skeleton Rocks Project covers outcropping and buried greenstone units, prospective for gold, lithium and nickel-copper-platinum group element (Ni-Cu-PGE) deposits, with limited previous drilling completed.
- The Barbwire Terrace base metal (lead-zinc) project, where exploration to date has achieved 'proof of concept' status, which involved a joint venture with energy company, Buru Energy Limited.
- At Wolfe Basin, extensive sedex-style base metal (copper-lead-zinc) anomalism and gossans provide targets for drill testing along a >80km long prospective horizon.
- The Warralong Project is prospective for intrusion-related gold and lithium-tin-tantalum mineralisation in the north Pilbara region, in an analogous, parallel structural setting to recent discoveries such as Hemi.
